

SOLVED PRACTICE WORKBOOK

Latin America (20th Century) - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Latin America (20th Century) - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which statement correctly identifies Informal empire?	5
Q2. Which chronology card should be filed under Informal empire?	5
Q3. Which option preserves the source-bounded meaning of Informal empire?	5
Q4. Which statement avoids a close-option trap about Informal empire?	5
Q5. Which statement correctly identifies Unequal landholding?	6
Q6. Which chronology card should be filed under Unequal landholding?	6
Q7. Which option preserves the source-bounded meaning of Unequal landholding?	6
Q8. Which statement avoids a close-option trap about Unequal landholding?	6
Q9. Which statement correctly identifies Commodity export dependence?	6
Q10. Which chronology card should be filed under Commodity export dependence?	7
Q11. Which option preserves the source-bounded meaning of Commodity export dependence?	7
Q12. Which statement avoids a close-option trap about Commodity export dependence?	7
Q13. Which statement correctly identifies Militarised politics?	7
Q14. Which chronology card should be filed under Militarised politics?	7
Q15. Which option preserves the source-bounded meaning of Militarised politics?	8
Q16. Which statement avoids a close-option trap about Militarised politics?	8
Q17. Which statement correctly identifies External and internal power interacted?	8
Q18. Which chronology card should be filed under External and internal power interacted?	8
Q19. Which option preserves the source-bounded meaning of External and internal power interacted?	8
Q20. Which statement avoids a close-option trap about External and internal power interacted?	9
Q21. Which statement correctly identifies Mexican Revolution and PRI?	9
Q22. Which chronology card should be filed under Mexican Revolution and PRI?	9
Q23. Which option preserves the source-bounded meaning of Mexican Revolution and PRI?	9
Q24. Which statement avoids a close-option trap about Mexican Revolution and PRI?	9
Q25. Which statement correctly identifies Guatemala, 1954?	10
Q26. Which chronology card should be filed under Guatemala, 1954?	10
Q27. Which option preserves the source-bounded meaning of Guatemala, 1954?	10

Q28. Which statement avoids a close-option trap about Guatemala, 1954?	10
Q29. Which statement correctly identifies Cuban Revolution, 1959-62?	11
Q30. Which chronology card should be filed under Cuban Revolution, 1959-62?	11
Q31. Which option preserves the source-bounded meaning of Cuban Revolution, 1959-62?	11
Q32. Which statement avoids a close-option trap about Cuban Revolution, 1959-62?	11
Q33. Which statement correctly identifies Nicaragua, 1979?	11
Q34. Which chronology card should be filed under Nicaragua, 1979?	12
Q35. Which option preserves the source-bounded meaning of Nicaragua, 1979?	12
Q36. Which statement avoids a close-option trap about Nicaragua, 1979?	12
Q37. Which statement correctly identifies Brazilian pattern?	12
Q38. Which chronology card should be filed under Brazilian pattern?	12
Q39. Which option preserves the source-bounded meaning of Brazilian pattern?	13
Q40. Which statement avoids a close-option trap about Brazilian pattern?	13
Q41. Which statement correctly identifies Venezuela and oil politics?	13
Q42. Which chronology card should be filed under Venezuela and oil politics?	13
Q43. Which option preserves the source-bounded meaning of Venezuela and oil politics?	13
Q44. Which statement avoids a close-option trap about Venezuela and oil politics?	14
Q45. Which statement correctly identifies US intervention instruments?	14
Q46. Which chronology card should be filed under US intervention instruments?	14
Q47. Which option preserves the source-bounded meaning of US intervention instruments?	14
Q48. Which statement avoids a close-option trap about US intervention instruments?	14
Q49. Which statement correctly identifies Import-substituting industrialisation?	15
Q50. Which chronology card should be filed under Import-substituting industrialisation?	15
Q51. Which option preserves the source-bounded meaning of Import-substituting industrialisation?	15
Q52. Which statement avoids a close-option trap about Import-substituting industrialisation?	15
Q53. Which statement correctly identifies Limits of ISI?	16
Q54. Which chronology card should be filed under Limits of ISI?	16
Q55. Which option preserves the source-bounded meaning of Limits of ISI?	16
Q56. Which statement avoids a close-option trap about Limits of ISI?	16
Q57. Which statement correctly identifies Debt crisis of the 1980s?	16
Q58. Which chronology card should be filed under Debt crisis of the 1980s?	17
Q59. Which option preserves the source-bounded meaning of Debt crisis of the 1980s?	17

Q60. Which statement avoids a close-option trap about Debt crisis of the 1980s?	17
Q61. Which statement correctly identifies Mexico's debt vulnerability?	17
Q62. Which chronology card should be filed under Mexico's debt vulnerability?	18
Q63. Which option preserves the source-bounded meaning of Mexico's debt vulnerability?	18
Q64. Which statement avoids a close-option trap about Mexico's debt vulnerability?	18
Q65. Which statement correctly identifies Argentina's inflation example?	18
Q66. Which chronology card should be filed under Argentina's inflation example?	19
Q67. Which option preserves the source-bounded meaning of Argentina's inflation example?	19
Q68. Which statement avoids a close-option trap about Argentina's inflation example?	19
Q69. Which statement correctly identifies Neoliberal turn?	19
Q70. Which chronology card should be filed under Neoliberal turn?	20
Q71. Which option preserves the source-bounded meaning of Neoliberal turn?	20
Q72. Which statement avoids a close-option trap about Neoliberal turn?	20
Q73. Which statement correctly identifies Regional diversity?	20
Q74. Which chronology card should be filed under Regional diversity?	20
Q75. Which option preserves the source-bounded meaning of Regional diversity?	21
Q76. Which statement avoids a close-option trap about Regional diversity?	21
Q77. Which statement correctly identifies Dependency verdict?	21
Q78. Which chronology card should be filed under Dependency verdict?	21
Q79. Which option preserves the source-bounded meaning of Dependency verdict?	21
Q80. Which statement avoids a close-option trap about Dependency verdict?	22

Latin America (20th Century) - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Informal empire?

A. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. B. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. C. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. D. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality.

Answer: A. Explanation: Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Informal empire?

A. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. B. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. C. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. D. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.

Answer: B. Explanation: Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Informal empire?

A. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. B. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. C. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. D. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo.

Answer: C. Explanation: Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Informal empire?

A. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. B. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. C. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. D. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule.

Answer: D. Explanation: Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Unequal landholding?

A. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. B. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. C. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. D. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo.

Answer: A. Explanation: Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Unequal landholding?

A. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. B. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. C. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. D. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.

Answer: B. Explanation: Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Unequal landholding?

A. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. B. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. C. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. D. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening.

Answer: C. Explanation: Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Unequal landholding?

A. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. B. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. C. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. D. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality.

Answer: D. Explanation: Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Commodity export dependence?

A. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. B. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. C. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. D. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.

Answer: A. Explanation: Reliance on narrow export bases made world price movements into fiscal, employment and political crises. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Commodity export dependence?

A. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. B. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. C. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. D. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.

Answer: B. Explanation: Reliance on narrow export bases made world price movements into fiscal, employment and political crises. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Commodity export dependence?

A. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. B. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. C. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. D. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict.

Answer: C. Explanation: Reliance on narrow export bases made world price movements into fiscal, employment and political crises. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Commodity export dependence?

A. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. B. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. C. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. D. Reliance on narrow export bases made world price movements into fiscal, employment and political crises.

Answer: D. Explanation: Reliance on narrow export bases made world price movements into fiscal, employment and political crises. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Militarised politics?

A. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. B. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. C. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. D. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict.

Answer: A. Explanation: Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Militarised politics?

A. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. B. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. C. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. D. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening.

Answer: B. Explanation: Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Militarised politics?

A. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. B. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. C. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. D. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict.

Answer: C. Explanation: Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Militarised politics?

A. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. B. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. C. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. D. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo.

Answer: D. Explanation: Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies External and internal power interacted?

A. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. B. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. C. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. D. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening.

Answer: A. Explanation: US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under External and internal power interacted?

A. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. B. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. C. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. D. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation.

Answer: B. Explanation: US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of External and internal power interacted?

A. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. B. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. C. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. D. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.

Answer: C. Explanation: US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. The remaining options

belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about External and internal power interacted?

A. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. B. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. C. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. D. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.

Answer: D. Explanation: US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Mexican Revolution and PRI?

A. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. B. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. C. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. D. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation.

Answer: A. Explanation: The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Mexican Revolution and PRI?

A. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. B. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. C. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. D. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.

Answer: B. Explanation: The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Mexican Revolution and PRI?

A. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. B. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. C. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. D. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics.

Answer: C. Explanation: The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Mexican Revolution and PRI?

A. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. B. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. C. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. D. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening.

Answer: D. Explanation: The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. The remaining options belong to different chronology,

actor or analytical categories.

Q25. Which statement correctly identifies Guatemala, 1954?

A. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. B. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. C. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. D. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.

Answer: A. Explanation: A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Guatemala, 1954?

A. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. B. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. C. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. D. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.

Answer: B. Explanation: A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Guatemala, 1954?

A. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. B. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. C. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. D. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices.

Answer: C. Explanation: A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Guatemala, 1954?

A. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. B. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. C. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. D. A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict.

Answer: D. Explanation: A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Cuban Revolution, 1959-62?

A. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. B. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. C. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. D. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.

Answer: A. Explanation: Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Cuban Revolution, 1959-62?

A. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. B. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. C. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. D. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices.

Answer: B. Explanation: Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Cuban Revolution, 1959-62?

A. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. B. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. C. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. D. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.

Answer: C. Explanation: Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Cuban Revolution, 1959-62?

A. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. B. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. C. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. D. Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation.

Answer: D. Explanation: Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Nicaragua, 1979?

A. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. B. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. C. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. D. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices.

Answer: A. Explanation: The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Nicaragua, 1979?

A. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. B. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. C. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. D. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics.

Answer: B. Explanation: The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Nicaragua, 1979?

A. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. B. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. C. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. D. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s.

Answer: C. Explanation: The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Nicaragua, 1979?

A. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. B. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. C. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. D. The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.

Answer: D. Explanation: The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Brazilian pattern?

A. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. B. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. C. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. D. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics.

Answer: A. Explanation: Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Brazilian pattern?

A. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. B. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. C. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. D. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.

Answer: B. Explanation: Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Brazilian pattern?

A. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. B. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. C. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. D. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.

Answer: C. Explanation: Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Brazilian pattern?

A. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. B. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. C. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. D. Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable.

Answer: D. Explanation: Brazil combined industrial growth with inequality and authoritarian phases, proving that development and social justice are separable. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Venezuela and oil politics?

A. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. B. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. C. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. D. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.

Answer: A. Explanation: Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Venezuela and oil politics?

A. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. B. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. C. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. D. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s.

Answer: B. Explanation: Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Venezuela and oil politics?

A. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. B. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. C. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. D. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt.

Answer: C. Explanation: Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Venezuela and oil politics?

A. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. B. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. C. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. D. Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics.

Answer: D. Explanation: Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies US intervention instruments?

A. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. B. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. C. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. D. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.

Answer: A. Explanation: Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under US intervention instruments?

A. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. B. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. C. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. D. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s.

Answer: B. Explanation: Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of US intervention instruments?

A. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. B. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. C. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. D. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt.

Answer: C. Explanation: Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about US intervention instruments?

A. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. B. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. C. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. D. Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices.

Answer: D. Explanation: Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. The remaining options

belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Import-substituting industrialisation?

A. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. B. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. C. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. D. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s.

Answer: A. Explanation: Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Import-substituting industrialisation?

A. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. B. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. C. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. D. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state.

Answer: B. Explanation: Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Import-substituting industrialisation?

A. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. B. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. C. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. D. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality.

Answer: C. Explanation: Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Import-substituting industrialisation?

A. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. B. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. C. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. D. Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.

Answer: D. Explanation: Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Limits of ISI?

A. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. B. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. C. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. D. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state.

Answer: A. Explanation: Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Limits of ISI?

A. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. B. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. C. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. D. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings.

Answer: B. Explanation: Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Limits of ISI?

A. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. B. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. C. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. D. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Answer: C. Explanation: Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Limits of ISI?

A. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. B. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. C. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. D. Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s.

Answer: D. Explanation: Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Debt crisis of the 1980s?

A. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. B. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. C. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. D. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings.

Answer: A. Explanation: Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Debt crisis of the 1980s?

A. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. B. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. C. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. D. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings.

Answer: B. Explanation: Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Debt crisis of the 1980s?

A. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. B. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. C. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. D. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality.

Answer: C. Explanation: Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Debt crisis of the 1980s?

A. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. B. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. C. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. D. Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state.

Answer: D. Explanation: Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Mexico's debt vulnerability?

A. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. B. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. C. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. D. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings.

Answer: A. Explanation: Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Mexico's debt vulnerability?

A. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. B. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. C. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. D. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Answer: B. Explanation: Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Mexico's debt vulnerability?

A. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. B. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. C. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. D. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Answer: C. Explanation: Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Mexico's debt vulnerability?

A. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. B. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. C. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. D. Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt.

Answer: D. Explanation: Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Argentina's inflation example?

A. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. B. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. C. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. D. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Answer: A. Explanation: Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Argentina's inflation example?

A. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. B. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. C. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. D. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Answer: B. Explanation: Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Argentina's inflation example?

A. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. B. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. C. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. D. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor.

Answer: C. Explanation: Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Argentina's inflation example?

A. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. B. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. C. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. D. Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings.

Answer: D. Explanation: Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Neoliberal turn?

A. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. B. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. C. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. D. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule.

Answer: A. Explanation: Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Neoliberal turn?

A. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. B. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. C. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. D. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor.

Answer: B. Explanation: Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Neoliberal turn?

A. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. B. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. C. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. D. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule.

Answer: C. Explanation: Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Neoliberal turn?

A. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. B. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. C. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. D. Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality.

Answer: D. Explanation: Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Regional diversity?

A. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. B. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. C. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. D. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor.

Answer: A. Explanation: Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Regional diversity?

A. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. B. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. C. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. D. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality.

Answer: B. Explanation: Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Regional diversity?

A. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. B. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. C. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. D. Reliance on narrow export bases made world price movements into fiscal, employment and political crises.

Answer: C. Explanation: Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Regional diversity?

A. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. B. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. C. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. D. Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Answer: D. Explanation: Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Dependency verdict?

A. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. B. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. C. Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. D. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality.

Answer: A. Explanation: Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Dependency verdict?

A. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. B. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. C. Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality. D. Reliance on narrow export bases made world price movements into fiscal, employment and political crises.

Answer: B. Explanation: Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Dependency verdict?

A. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. B. Reliance on narrow export bases made world price movements into fiscal, employment and political crises. C. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. D. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.

Answer: C. Explanation: Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Dependency verdict?

A. The Mexican Revolution began in 1910, but its institutional outcome became long PRI dominance and only gradual political opening. B. Armies repeatedly entered politics through coups or pressure, becoming a twentieth-century institutional successor to caudillismo. C. US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. D. Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor.

Answer: D. Explanation: Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No direct UPSC PYQ is verified as owned solely by this topic in the local routing blocks. All six Mains demands are original practice.

ORIGINAL MAINS 1 - 10 MARKS

Question: What made US influence in Latin America an informal empire? Answer in about 150 words.

Model thesis: Sovereign governments remained, but strategic, commercial, financial and intervention capacity constrained the range of policies they could sustain.

Claim -> named evidence -> analysis -> qualification:

- Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule.
- US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.
- Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices.

Qualified conclusion: Sovereign governments remained, but strategic, commercial, financial and intervention capacity constrained the range of policies they could sustain.

Demand decoding: The directive **answer** requires a direct position on “What made US influence in Latin America an informal empire? Answer in about 150 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise three named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “What made US influence in Latin America an informal empire? Answer in about 150 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Sovereign governments remained, but strategic, commercial, financial and intervention capacity constrained the range of policies they could sustain.

Analytical body:

1. **Claim and named evidence:** Twentieth-century US influence in Latin America usually operated through strategic, commercial, financial and political leverage rather than direct colonial rule. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
2. **Claim and named evidence:** US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
3. **Claim and named evidence:** Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: Sovereign governments remained, but strategic, commercial, financial and intervention capacity constrained the range of policies they could sustain.

ORIGINAL MAINS 2 - 10 MARKS

Question: Why did commodity wealth not guarantee political stability? Answer in about 150 words.

Model thesis: Narrow export dependence exposed budgets and social contracts to price shocks, while concentrated control of resource income intensified political conflict.

Claim -> named evidence -> analysis -> qualification:

- Reliance on narrow export bases made world price movements into fiscal, employment and political crises.
- Oil wealth produced vulnerability as well as revenue, while Hugo Chavez from 1998 became a major symbol of anti-US regional politics.

Qualified conclusion: Narrow export dependence exposed budgets and social contracts to price shocks, while concentrated control of resource income intensified political conflict.

Demand decoding: The directive **answer** requires a direct position on “Why did commodity wealth not guarantee political stability? Answer in about 150 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise three named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “Why did commodity wealth not guarantee political stability? Answer in about 150 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Narrow export dependence exposed budgets and social contracts to price shocks, while concentrated control of resource income intensified political conflict.

ORIGINAL MAINS 3 - 15 MARKS

Question: Why did the Cuban Revolution matter regionally? Answer in about 250 words.

Model thesis: It was the durable revolutionary break with US predominance, but survived through Soviet alignment and therefore exchanged rather than abolished external patronage.

Claim -> named evidence -> analysis -> qualification:

- Cuba's revolution survived US hostility by aligning with the Soviet Union, and the missile crisis internationalised the confrontation.

Qualified conclusion: It was the durable revolutionary break with US predominance, but survived through Soviet alignment and therefore exchanged rather than abolished external patronage.

Demand decoding: The directive **answer** requires a direct position on "Why did the Cuban Revolution matter regionally? Answer in about 250 words.", every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise five named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For "Why did the Cuban Revolution matter regionally? Answer in about 250 words.", replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

ORIGINAL MAINS 4 - 15 MARKS

Question: How did the 1980s debt crisis transform Latin American politics? Answer in about 250 words.

Model thesis: Compounding debt, rescheduling and conditionality transmitted financial crisis into austerity, weakened developmental legitimacy and narrowed democratic policy choice.

Claim -> named evidence -> analysis -> qualification:

- Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state.
- Mexico borrowed against expected oil revenue and in 1982 sought an IMF loan and rescheduling of half its ninety-six-billion-dollar overseas debt.
- Argentina's foreign-debt crisis coincided with inflation around nine hundred per cent, illustrating the destruction of wages and savings.
- Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality.

Qualified conclusion: Compounding debt, rescheduling and conditionality transmitted financial crisis into austerity, weakened developmental legitimacy and narrowed democratic policy choice.

Demand decoding: The directive **answer** requires a direct position on "How did the 1980s debt crisis transform Latin American politics? Answer in about 250 words.", every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Qualified conclusion: Compounding debt, rescheduling and conditionality transmitted financial crisis into austerity, weakened developmental legitimacy and narrowed democratic policy choice.

ORIGINAL MAINS 5 - 20 MARKS

Question: Explain the interaction of domestic inequality and US influence. Answer in about 300 words.

Model thesis: Landholding and elite power created allies for intervention, while external support preserved social structures that repeatedly generated reform and revolution.

Claim -> named evidence -> analysis -> qualification:

- Oligarchic land concentration narrowed domestic markets, blocked reform and tied political power to social inequality.
- US leverage preserved domestic elites, while domestic elites sought external backing; local agency therefore remained central within constrained sovereignty.
- A reform experiment in Guatemala was overturned with US-backed anti-communist intervention, showing how land reform became an international conflict.
- The Sandinistas took power in 1979 and faced counter-revolutionary pressure, joining local revolution to Cold War intervention.
- Covert action, proxy pressure, diplomatic hostility, financial leverage and commercial weight set limits on domestic reform without eliminating local choices.
- Latin American instability arose from interaction among domestic inequality, commodity dependence, militarised politics and outside leverage, not from any one factor.

Qualified conclusion: Landholding and elite power created allies for intervention, while external support preserved social structures that repeatedly generated reform and revolution.

Demand decoding: The directive **explain** requires a direct position on "Explain the interaction of domestic inequality and US influence. Answer in about 300 words.", every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise six to eight named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For "Explain the interaction of domestic inequality and US influence. Answer in about 300 words.", replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Landholding and elite power created allies for intervention, while external support preserved social structures that repeatedly generated reform and revolution.

ORIGINAL MAINS 6 - 20 MARKS

Question: Trace Latin America's economic arc from commodities to liberalisation. Answer in about 300 words.

Model thesis: Commodity vulnerability encouraged ISI; its import and fiscal constraints encouraged borrowing; debt crisis then drove market opening without settling inequality.

Claim -> named evidence -> analysis -> qualification:

- Reliance on narrow export bases made world price movements into fiscal, employment and political crises.
- Mid-century ISI sought to replace imported manufactures through protection, state investment and subsidised domestic industry.
- Small markets, capital-goods import costs and fiscal deficits pushed many economies toward external borrowing during the 1970s.
- Compounding interest, rescheduling and outside conditions reduced policy autonomy, intensified austerity and weakened the developmental state.
- Trade opening, privatisation and fiscal austerity followed the debt crisis, restoring openness without automatically resolving inequality.
- Brazil, Mexico, Venezuela, Guatemala, Nicaragua and Cuba followed distinct combinations of industrialisation, revolution, authoritarianism and external pressure.

Qualified conclusion: Commodity vulnerability encouraged ISI; its import and fiscal constraints encouraged borrowing; debt crisis then drove market opening without settling inequality.

Demand decoding: The directive **trace** requires a direct position on "Trace Latin America's economic arc from commodities to liberalisation. Answer in about 300...", every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.
