00

STAGE 00

FOUR VERSIONS, FOUR BURDENS

LOGICAL — MACKIE 1955 · EVIDENTIAL — ROWE 1979 · EXISTENTIAL — ADAMS 1999 · DISTRIBUTIONAL — KARMA · OMNIPOTENT + OMNISCIENT + GOOD + CREATOR · MISMATCH OF REPLY TO VERSION = ERROR

VERSION	CANONICAL PROPONENT	BURDEN ON THE THEIST	REPLY-TYPE THAT DISCHARGES IT
Logical	J. L. Mackie, Mind 1955	Show a possible morally sufficient reason	Defence — bare logical possibility suffices
Evidential	William Rowe 1979	Restore probability of divine permission	Theodicy, skeptical theism, or a revised God-concept
Existential	Marilyn McCord Adams 1999	Defeat the evil within the sufferer life	Goodness to persons, not global balancing
Distributional	Karma traditions, pan-Indian	Explain why this person suffers	Karma across lives; the West has no standard answer

WHAT EACH VERSION ALLEGES

- Logical: the theistic propositions form an inconsistent set
- Evidential: the amount and kinds of suffering make God improbable
- Existential: this life may not be a great good to the person living it
- Distributional: why this person rather than that one

WHAT EACH BURDEN DEMANDS

- Logical: exhibit a possible morally sufficient reason
- Evidential: restore probability, not mere consistency
- Existential: defeat the evil within the individual life
- Distributional: explain allocation, not permission

CONTROL POINTS

- Omniscience is not one of Mackie three propositions but blocks the reply that evil escaped divine notice
- Answering Rowe with Plantinga is a version error and loses marks

MECHANISM / VERDICT — Classify the version and its burden before selecting any defence, theodicy, revision or dissolution.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Name the version of the problem in the first two lines, because every theodicy is version-specific.

01

STAGE 01

DEFENCE, THEODICY, REVISION, DISSOLUTION

DEFENCE — GOD COULD HAVE A REASON · THEODICY — THIS IS THE REASON · REVISION — CHANGE THE GOD-CONCEPT · DISSOLUTION — REMOVE THE DEFENDANT · COST IS A MEASURE, NOT A REFUTATION · EXPLANATION IS NEVER PERMISSION TO WITHHOLD AID

DEFENCE — POSSIBILITY ONLY

- Plantinga free-will defence and Wykstra skeptical theism
- Success condition is bare logical possibility
- Refuted only by showing the proposed story is impossible

THEODICY — ACTUALITY CLAIMED

- Augustine privation, Hick soul-making, Leibniz best world, process theodicy
- Success condition is plausibility and truth
- Refuted if the proposed reason is false or insufficient

REVISION AND DISSOLUTION

- Process and finite God keep goodness and surrender omnipotence
- Advaita relocates evil to the empirical level
- Buddhism, Jainism and Mīmaṃsā remove the creator entirely

MECHANISM / VERDICT — Match the reply-type to the burden, then price the reply by what it surrenders.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A defence says God could have a reason; a theodicy says what the reason actually is.

02

STAGE 02

KINDS OF EVIL AND THE SCOPE OF EACH REPLY

MORAL EVIL — MISUSED FREEDOM · NATURAL EVIL — LAW-GOVERNED NATURE · HORRENDOUS EVIL — ADAMS TECHNICAL SENSE · ANIMAL AND PRE-HUMAN SUFFERING · AMOUNT, KIND, DISTRIBUTION · LACTANTIUS, DE IRA DEI 13

MORAL EVIL — freely caused cruelty, betrayal, oppression; free-will defence, Augustine and soul-making all apply

NATURAL EVIL — earthquake, disease, congenital harm; free-will defence does not apply, soul-making does → HORRENDOUS EVIL — Adams technical sense; needs defeat within the individual life, not a global sum

→ ANIMAL AND PRE-HUMAN EVIL — no choice, no growth, no desert; only nomic regularity partly survives

SOURCE AND EXAMPLES

- Moral evil: cruelty, injustice, betrayal, oppression, war
- Natural evil: earthquake, disease, famine, congenital suffering
- Horrendous evil: participation gives prima facie reason to doubt the life is a great good to the participant
- Animal evil: predation and disease before any human moral agency

WHICH REPLY APPLIES

- Free-will defence applies to moral evil only
- Soul-making extends to natural evil as the environment of growth
- Augustine reaches natural evil only through a fallen order, which is historically strained
- No free-will and no soul-making rationale applies to the animal sufferer

PROVENANCE CONTROL

- The four-horn dilemma is transmitted by Lactantius, De Ira Dei 13, and traditionally ascribed to Epicurus
- No surviving Epicurean text contains it; and it presupposes the bridging premises it never states

MECHANISM / VERDICT — Classification fixes scope: a reply that covers moral evil has not thereby covered earthquakes or predation.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Sort the evil in the stem first, because each theodicy was built for a particular kind of evil.

03

STAGE 03

MACKIE LOGICAL PROBLEM AND THE TWO BRIDGES

EVIL AND OMNIPOTENCE, MIND 1955 · BRIDGE A — GOODNESS ELIMINATES EVIL · BRIDGE B — POWER HAS NO RELEVANT LIMIT · ADEQUATE VERSUS FALLACIOUS SOLUTIONS · THREE EXITS, EACH DENYING A BRIDGE · THE DEBATE MIGRATES TO ROWE

STATE the four-proposition profile, including omniscience → SHOW that the bare set is not a formal contradiction → ADD Bridge A or goodness and Bridge B or power → DENY one bridge — defence, theodicy, revision or denial of evil → MIGRATE to the evidential problem, where consistency no longer suffices

THE SET AS IT MUST BE WRITTEN

- God is omnipotent; God is omniscient; God is perfectly good; evil exists
- These propositions plus logic alone do not entail any proposition and its negation
- The contradiction is manufactured by two quasi-logical bridging principles

THE THREE THEIST EXITS

- Deny Bridge A by inserting unless there is a morally sufficient reason, opening the space of defences and theodicies
- Deny Bridge B with Plantinga, or with the process rejection of classical omnipotence
- Deny the force of evil exists through privation or the Advaitic empirical level, at the cost of the seriousness of suffering

2020 EXAM ROUTE

- The 2020 stem asks what the logical problem is; the marks are in the bridging premises
- Say that the logical problem is widely regarded as answered and that the live debate is now evidential

MECHANISM / VERDICT — Write the propositions as a numbered set, add both bridges, then show that each exit denies one bridge at a stated cost.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The set becomes inconsistent only with the bridging premises, so the whole logical debate is a fight over them.

04

STAGE 04

THE PARADOX OF OMNIPOTENCE — 2021 Q5(e)

FIRST-ORDER POWER OVER THINGS · SECOND-ORDER POWER OVER POWERS · LOGICAL POSSIBILITY RESTRICTION · SELF-BINDING SOVEREIGNTY · PROCESS ABANDONMENT · PLANTINGA CHOOSES, GRIFFIN CANNOT

HORN 1 — GOD CANNOT MAKE UNCONTROLLABLE BEINGS

- Second-order power is limited, because there is something God cannot make
- Creatively independence becomes impossible and free agency collapses

HORN 2 — GOD CAN AND DOES MAKE THEM

- First-order power over those beings is limited, because there is something God cannot control
- This is exactly what the free-will defence requires in order to work

RESTRICTIONS AND THEIR COSTS

- Logical possibility only — near-universally conceded, but it does not settle whether only-good free agents are actualizable
- Self-binding sovereignty — restraint becomes voluntary, re-opening the intervention question
- Abandonment in process theism — no guarantee of any final victory over evil

MECHANISM / VERDICT — The paradox does not refute theism; it forces theism to specify which sense of omnipotence it defends and to pay for it.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Unrestricted omnipotence in both the first-order and second-order senses is incoherent, so theism must choose.

05

STAGE 05

PLANTINGA FREE-WILL DEFENCE AND DIVINE RESPONSIBILITY

GOD, FREEDOM, AND EVIL 1974 · SIGNIFICANT FREEDOM · TRANSWORLD DEPRAVITY — POSSIBILITY ONLY · DEFENCE, NOT THEODICY · NATURAL EVIL IS THE RESIDUE · 2022 ABSOLUTE-CREATOR STEM

VALUE — significant freedom is a great good → ALTERNATIVES — freedom entails the genuine availability of doing otherwise → LIMIT — determined free rightness is a self-cancelling description → CONSEQUENCE — moral evil is compatible with omnipotence and goodness → RESIDUE — natural evil is untouched unless a further hypothesis is added

THE PREMISE CHAIN

- A world with significantly free creatures is more valuable than a world with none
- Significant freedom entails genuinely available alternatives
- God cannot causally determine a creature to freely choose only rightly; because that description cancels itself
- Therefore moral evil is compatible with omnipotence and perfect goodness

THE MACKIE OBJECTION AND THE REPLY

- Why not create free agents who always freely choose the good?
- It is possible that every creaturely essence God could instantiate suffers transworld depravity
- Plantinga asserts possibility, never actuality, and does not need more

2022 RESPONSIBILITY ROUTE

- God creates the capacity, the agent supplies the act, so authorship remains creaturely
- Foreknowledge does not cause free action
- Rejoinder retained: knowingly instantiating the whole system, foreseeing its outcomes, remains morally relevant

MECHANISM / VERDICT — The defence defeats the logical charge with bare possibility and leaves the quantity of suffering and all natural evil untouched.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A world of programmed beneficence lacks the moral authorship of a world containing genuinely responsible agents.

06

STAGE 06

AUGUSTINE — PRIVATION, SIN AND PUNISHMENT — 2023 Q8(a)

PRIVATION OF GOOD (PRIVATIO BONI) · DEFECTIVE WILL · PARASITIC ON A GOOD NATURE · THE FALL AND A DISORDERED ORDER · INHERITED GUILT VERSUS CONDITION · INNOCENT AND ANIMAL SUFFERING

THE METAPHYSICS, STATED FIRST

- Being, insofar as it is being, is good, and God creates beings rather than evil substances
- Corruption is parasitic and depends on a good nature to corrupt
- Moral fault is disordered willing, the will turning from a greater good to a lesser
- Rot is not a rival substance to wood but the loss of the wood proper integrity

THE PRINTED THESIS

- Moral evil is sin, the misuse of created freedom
- Natural evil is punishment through a fallen and disordered order
- Treat the printed sentence as the object of analysis, not as a certified verbatim translation

FOUR OBJECTIONS

- Innocent suffering fits a retributive reading poorly
- Animal and pre-human suffering involves no choice, no sin and no growth
- Privation is strained for intense positive pain, which does not feel like an absence
- Personal inherited guilt is far harder to defend than an inherited damaged condition, which still owes an explanation

MECHANISM / VERDICT — The account preserves divine goodness for moral evil while remaining incomplete for natural, innocent and animal suffering.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Calling blindness a privation does not call it unreal: it is a real lack in a subject that ought to possess sight.

07

STAGE 07

HICK IRENAEAN SOUL-MAKING AND THE ATTRIBUTION CHAIN

EVIL AND THE GOD OF LOVE 1966 · IMAGE INTO LIKENESS — IRENAEUS · EPISTEMIC DISTANCE · LAW-GOVERNED WORLD · VALE OF SOUL-MAKING — XSATS 1819 · PROPORTIONALITY AND ANIMALS

2nd century — Irenaeus supplies the image and likeness theology of growth → Spring 1819 — John Keats coins The vale of Soul-making in his journal-letter → 1966 — Hick publishes Evil and the God of Love with epistemic distance → Coverage — moral and natural evil, unlike the free-will defence → Cost — proportionality, animal suffering and universal eschatological fulfilment

THE ARGUMENT

- Ready-made virtue is not achieved virtue
- Courage requires danger and compassion requires another need
- A world in which such virtues are possible must be law-governed and must therefore permit harm
- Humans are created immature at an epistemic distance so that faith is freely reached

THE TYPOLOGY

- Augustinian type: humanity created perfect, then a backward-looking Fall, with a retributive framing
- Irenaean type: humanity created immature, then forward-looking growth toward likeness
- Soul-making covers natural evil as the environment of growth, which the free-will defence cannot

COSTS AND CONTROLS

- Proportionality: much suffering builds nothing, and the animal sufferer does not morally grow
- The reply is a universal eschatological fulfilment resting on contested afterlife commitments
- Keats coined the phrase; Irenaeus supplies the theology and Hick supplies the modern theodicy

MECHANISM / VERDICT — Development, not punishment, is the rationale, and its price is proportionality and a contested eschatology.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Courage requires danger and compassion requires need, so a world without suffering would lack the goods that make persons.

08

STAGE 08

ROWE EVIDENTIAL PROBLEM AND WYKSTRA CORNEA

GRATUITOUS EVIL · THE SUFFERING FAWN — EVIDENTIAL · THE NOSEUM INFERENCE · CORNEA 1984 · REPRESENTATIVENESS THESES · MORAL SCEPTICISM IS THE PRICE

CASE — intense suffering with no discernible justifying good → STEP — from no reason seen to no reason exists → CONCLUSION — gratuitous evil makes a wholly good omnipotent God improbable → REPLY — CORNEA denies the epistemic access the step requires → PRICE — moral scepticism, ad hoc restriction and unfalsifiability

ROWE ARGUMENT, 1979

- There exist instances of intense suffering preventable without losing a greater good or permitting an equally bad evil
- A wholly good being would prevent any intense suffering it could, absent such a reason
- The fawn removes free will, moral growth, desert and observer benefit from the case at once

SKEPTICAL THEISM, THE DEFENSIVE REPLY

- Wykstra CORNEA: an appearance of absence licenses a claim of absence only if the thing would likely be discernible
- Bergmann: our sample of goods, evils and their entailment relations is not representative of the total space
- Alston grandmaster analogy and Wykstra infant analogy: proponents also include Howard-Snyder

THREE STANDING COSTS

- Moral scepticism threatens the judgement that we ought to prevent an evil, and the duty to rescue
- Parity: the same scepticism undercuts divine promises unless restricted in an ad hoc way
- Bracketing: extended far enough, no evidence could ever count against theism

MECHANISM / VERDICT — Skeptical theism blocks the inference rather than naming a reason, and pays for it with a general loss of moral confidence.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Rowe fawn is an evidential case, not a deductive contradiction, so consistency no longer discharges the burden.

09

STAGE 09

HORRENDOUS EVILS AND ANIMAL SUFFERING

BALANCING OFF VERSUS DEFEAT · GOODNESS TO PERSONS · CHISHOLM TERM — DEFEAT · COMPENSATION IS NOT DEFEAT · ONLY NOMIC REGULARITY SURVIVES · TIRYAK-YONI AND AHIMSA

REPLY TO ANIMAL SUFFERING	PRECISE CLAIM	STANDING COST
Neo-Cartesian, canvassed by Michael Murray 2008	Animals lack the higher-order awareness that makes pain matter morally	The premise is philosophically and empirically contested
Nomic regularity	A stable law-governed world is required to support any life at all	Explains the kind of world, not the amount of pain in it
Soul-making extended	Real danger is the only condition in which stewardship toward animals is possible	Uses animals instrumentally for human virtue
Eschatological fulfilment	Animal fulfilment or redemption in a final state, a minority line	Unverifiable and largely undeveloped
Fallen order	A cosmic fall distorts nature prior to human history	Historically and scientifically strained

ADAMS, HORRENDOUS EVILS 1999

- A horrendous evil gives the participant, as perpetrator or victim, prima facie reason to doubt their life is a great good to them on the whole
- Standard theodicies balance globally while an individual life may remain a net disaster
- Only religion-specific resources such as divine identification and beatific intimacy can defeat within a life

ANIMAL AND PRE-HUMAN SUFFERING

- The pain predates moral agency, so no free-will defence applies
- The animal does not morally grow, so soul-making reaches it only instrumentally
- Rowe fawn is the canonical evidential illustration

INDIAN PARITY AND ITS COST

- Karma extends moral causation to animal births and answers distribution rather than personal worth
- Jainism grounds non-injury in graded living selves; Buddhism extends compassion to sentient beings
- The mechanism is unverifiable and must never be used to infer that present suffering is deserved

MECHANISM / VERDICT — These two cases are the standing residue of any twenty-mark answer, and naming them is itself a mark-earning move.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Global balancing is not personal defeat: a world can be good on the whole while a particular life is not.

10

STAGE 10

PROCESS THEODICY AND THE NON-CLASSICAL REPLY-SPACE — 2025 Q6(b)

DIPOLAR GOD · INITIAL AIM · PERSUASION BY METAPHYSICAL NECESSITY · FELLOW-SUFFERER WHO UNDERSTANDS · CLASSICAL OMNIPOTENCE IS INCOHERENT · SOVEREIGNTY IS THE PRICE

THE SIX TENETS, NUMBERED

- Creativity, not God, is the ultimate, and actual entities are self-creative occasions
- God is dipolar: the primordial nature supplies each occasion its initial aim, the consequent nature receives what the world becomes
- Power is intrinsically distributed, because to be actual is to have some self-determination
- Divine power is therefore persuasive by metaphysical necessity, not by self-limitation
- Evil is the deviation of finite occasions from the divine lure, so God is not culpable
- God is the fellow-sufferer who understands; solidarity rather than detachment

NAME THE LAYER YOU ARE USING

- Whitehead, Process and Reality 1929: dipolarity, initial aim, consequent nature, the fellow-sufferer
- Hartshorne, The Divine Relativity 1948 and Omnipotence and Other Theological Mistakes 1984: classical omnipotence is incoherent
- Griffin, God, Power, and Evil 1976 and Evil Revisited 1991: persuasion is a metaphysical necessity, not a chosen restraint
- Cobb, A Christian Natural Theology: the theological systematisation

THE SURROUNDING REPLY-SPACE, EACH PRICED

- Greater-good and stable order explain the kind of world, not the amount or distribution of suffering
- Leibnizian best world of 1710 may have no unique optimum and can neglect goodness to particular persons
- Eschatological fulfilment offers compensation, which is not automatically justification
- Divine mystery is unfalsifiable without an access principle; protest settles no logical or evidential point

MECHANISM / VERDICT — Griffin God cannot coerce while Plantinga God chooses not to intervene, and that modal difference separates theodicy from defence.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Process theodicy purchases the innocence of God at the price of the sovereignty of God, and the trade must be stated.

11

STAGE 11

INDIAN RESPONSES AND THE INDIA-WEST PARITY BENCH

KARMA-SAMSARA IS SELF-OPERATING · KARMADHYAKSA — GOD AS JUDGE · BEGINNINGLESS SERIES · YYAVAHARIKA AND PARAMARTHIKA · NO DEFENDANT AT ALL · VICTIM-BLAMING CONTROL

ORIGINATION — ignorance, inflow of karmic matter and craving replace the question of divine permission

ALLOCATION — deeds ripen across lives, no distribution is explained without charging a creator → ADMINISTRATION — Nyaya and Ramanuja retain God as a just dispenser of karmic fruit → DISSOLUTION — Buddhism, Jainism and Mīmaṃsā need no divine distributor at all

THE SCHOOLS DIFFER

- Non-theistic Buddhist, Jain and Mīmaṃsā accounts require no divine distributor, so there is no defendant
- Nyaya and theistic Vedanta assign God a just administrative role as karma-superintendent, a judge rather than an arbitrary cause
- Advaita treats evil as real at the empirical level and sublated at the ultimate level, at the risk of minimising suffering

WHAT THE PARITY BENCH SHOWS

- Why this person's karma across lives answers what Western theodicy answers weakly
- Why so much beginningless samsara denies the frame rather than justifying a quantity
- What defeats evil for the sufferer: defeat within the life versus exit from the life-series through liberation

NON-NEGOTIABLE MORAL CONTROLS

- Beginningroseness blocks one repress question and verifies nothing about any claimed past-life cause
- The inference from this person suffers to this person deserves it is unavailable to ordinary observers
- Karma does not cancel present duties of compassion, protection and relief

MECHANISM / VERDICT — The distributional gain is real and school-specific, and it is purchased with an unverifiable trans-life mechanism.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: India answers a different question: not why evil is permitted, but why this person suffers, and it can drop the defendant.

12

STAGE 12

RELIGION-FOUNDING EVIL, CONCEPT-DEPENDENCE AND THE GRADED VERDICT

PROFANE IS THE ORDINARY, NOT THE WICKED · PREDICAMENT TO BOUNDARY TO SOTERIOLOGY · DURKHEIM, OTTO, ELIADE · CONCEPT-DEPENDENCE IS NOT A SOLUTION · EVERY REPLY IS PRICED · NEVER END DEVOTIONALLY

FUNCTIONAL READING — evil and the profane supply the predicament and the boundary → CATEGORY DISCIPLINE — evil, profane, impure and demonic are four distinct categories → VARY THE GOD-CONCEPT — classical, finite, impersonal, non-creator → PRICE EACH DISSOLUTION — sovereignty, personality, providence → GRADE — coverage, preserved attribute, cost and residue, then a qualified conclusion

2019 OWNER-MODULE — EVIL AND THE PROFANE

- Durkheim 1912: all known religious beliefs presuppose a classification of things into sacred and profane, and the definition is deliberately God-free
- Otto 1917 supplies the object-side numinous; Eliade 1957 supplies hierophany, sacred space around a world-axis and recoverable sacred time
- Founding sequence: predicament, then boundary, then soteriology
- Buddhism First Noble Truth is the clearest world case; India founding defect is more often ignorance or bondage than moral evil

2024 CONCEPT-DEPENDENCE

- Classical theism carries the full force of all three burdens
- A finite or process God dissolves the logical charge and surrenders sovereignty
- An impersonal Absolute relocates evil to the empirical level and risks minimising suffering
- Removing the creator leaves no defendant and gives up providence and a cosmic guarantor of justice

THE ANSWER ROUTE AND VERDICT LADDER

- Name the version, write the set with its bridges, reconstruct the reply as premises, object and reply, compare, then grade
- Bands: ten marks about 150 words, fifteen marks about 240 to 260, twenty marks about 340 to 360
- Top band adds defeat versus balancing off, or CORNEA, or the animal gap, and states what the theist has given up
- A theodicy is not refuted by its cost but is measured by it, so the final task is to state the price

MECHANISM / VERDICT — Evil and the profane found religion structurally rather than doctrinally, and they found religion rather than theism.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The problem of evil is a stress-test of a particular God-concept, not of religion as such.

E

EXTRA

OPTIONAL ADVANCED ENRICHMENT

MODAL AND FEASIBLE WORLDS · GRAPER CUMULATIVE EVIDENCE · PROPORTIONALITY TESTING · ESSAY LABORATORY PROMPTS · PASTORAL RESTRAINT

SECOND-ORDER DEBATES

- Whether a positive theodicy can be combined consistently with global scepticism about divine reasons
- Whether defeat within the life of a sufferer is still a general theodicy at all
- Grounding objections to counterfactuals of freedom in feasible-world accounts

DEPLOYMENT RULE

- Use at most one refinement in a fifteen-marker and at most two in a twenty-marker
- Never use an advanced move to repair a missing core doctrine, thinker or distinction

OPTIONAL STATUS — This enrichment is unnecessary for a competent core answer and must never replace the core spine.
