

ASCII MASTER FLOW – PANEL 1/12: Western Deccan: terrain becomes a fort network

SAHYADRI RIDGE -> height, narrow passes and monsoon friction

MAVAL VALLEYS -> recruits, grain, local intelligence and short movement

KONKAN COAST -> creeks, customs, ports and access to maritime rivals

FORT NODE -> garrison + store + signal + refuge + route surveillance

NETWORK EFFECT -> inland plateau, passes and coast support one another

LIMIT -> geography enables choices; organisation converts it into power.

MUST REMEMBER: Shivaji's coronation (1674), fort network, revenue claims and military mobility
formed a negotiated regional polity.

ASCII MASTER FLOW – PANEL 2/12: Chronology from the 1640s to 1707

1640s -> Torna, Murumbdev-Rajgad and Kondana build a Poona-Maval base
1656 -> Javli | 1659 -> Pratapgad | 1663 -> Poona raid | 1664 -> Surat
1665 -> Purandar | 1666 -> Agra rupture | 1670 -> territorial recovery
1674 -> Raigad coronation | 1680 -> Shivaji dies
1689 -> Sambhaji executed | Rajaram shifts resistance toward Jinji
1700 -> Tarabai's regency | 1707 -> Aurangzeb dies with war unresolved.

ASCII MASTER FLOW – PANEL 3/12: Purandar, Agra and recovery

MUGHAL PRESSURE -> Jai Singh combines siege, diplomacy and Bijapur strategy

PURANDAR 1665 -> 23 forts ceded, 12 retained; Sambhaji receives mansab 5000

INCORPORATION TEST -> service and a retained base coexist uneasily

AGRA 1666 -> rank dispute, confinement and escape destroy political trust

RECOVERY FROM 1670 -> forts and initiative return; surrender was not final

SOURCE RULE -> escape is secure; basket details remain a source version.

ASCII MASTER FLOW – PANEL 4/12: Coronation and the language of sovereignty

POWER ALREADY BUILT -> forts, revenue, command and negotiated authority

RAIGAD 1674 -> public claim to chhatrapati sovereignty

GAGA BHATTA -> Kshatriya genealogy addresses contested status

RITUAL EFFECT -> ruler stands above chiefs in a legible royal idiom

POLITICAL EFFECT -> household, territory and administration gain one centre

LIMIT -> coronation crowned state-building; it did not create capacity alone.

ASCII MASTER FLOW – PANEL 5/12: Ashtapradhan: eight offices, not a cabinet

PESHWA -> general coordination | AMATYA / MAZUMDAR -> finance

SACHIV -> correspondence | MANTRI / WAQIA-NAVIS -> records and intelligence

SENAPATI / SAR-I-NAUBAT -> military | SUMANT / DABIR -> external affairs

NYAYADHISH -> justice | PANDITRAO -> religious grants and duties

CONTROL PRINCIPLE -> each office answers to the ruler

TRAP -> no collective responsibility, parliamentary cabinet or later Peshwa rule.

ASCI MASTER FLOW – PANEL 6/12: Chauth and sardeshmukhi are distinct claims

CHAUTH -> one-quarter fiscal claim, often tied to protection and restraint

SARDESHMUKHI -> additional ten-percent claim in a superior-right idiom

COLLECTION -> agents bargain, coerce and overlap with existing revenue systems

POLITICAL EFFECT -> payment may acknowledge power without settled sovereignty

LOCAL EFFECT -> payer can seek relief while parallel authority becomes normal

TRAP -> neither pure plunder nor automatic lawful title explains every case.

ASCII MASTER FLOW – PANEL 7/12: Cavalry and ganimi kava

BARGIR -> horse and equipment associated with state provision

SILHEDAR -> maintains his own horse and equipment

GANIMI KAVA -> surprise + intelligence + supply attack + selective engagement

FORT ANCHOR -> stores, refuge, signals and route control sustain mobility

LOCAL KNOWLEDGE -> converts short movement into operational advantage

LIMIT -> not invincibility, a social census or modern ideological insurgency.

ASCII MASTER FLOW – PANEL 8/12: Coast and navy: capability with scale limits

KONKAN -> creeks, ports, customs and sea forts connect war to commerce

RIVALS -> Sidis of Janjira, Portuguese and English shape naval choices

PEOPLE -> Koli, Bhandari, Muslim and other sailors prevent a closed identity

VESSELS -> gurab and galivat labels require source and context

CAPABILITY -> regional escort, defence, raiding and coastal communication

LIMIT -> not an oceanic blue-water navy or a licence to invent fleet numbers.

ASCII MASTER FLOW – PANEL 9/12: Resistance after Shivaji

SAMBHAJI 1680-89 -> leadership under pressure; execution removes a head
RAJARAM -> movement to Jinji creates strategic depth beyond Maharashtra
SANTAJI / DHANAJI -> strike communications and dispersed imperial forces
RAMCHANDRA PANT / SHANKARAJI -> administration and patronage sustain networks
TARABAI FROM 1700 -> regency supplies legitimacy and political coordination
RESULT -> decapitation changes the war into a more decentralised resistance.

ASCII MASTER FLOW – PANEL 10/12: Annexation removes buffers

BIJAPUR 1686 + GOLCONDA 1687 -> territory, forts and nominal revenue gained

BUFFER LOSS -> Mughals now confront mobile Maratha networks more directly

NEW CLAIMANTS -> absorbed elites add service and jagir expectations

NEW COSTS -> garrisons, siege trains, supply, policing and collection friction

REALISATION PROBLEM -> conquered jama does not guarantee usable hasil

VERDICT -> annexation enlarged the map while narrowing strategic flexibility.

CLOSE DISTINCTION: Ashtapradhan was not a modern cabinet; chauth and sardeshmukhi varied by claim, agreement, collection and territory.

ASCII MASTER FLOW – PANEL 11/12: Jagirdari terms and the feedback loop

MANSAB -> rank and service claim | JAGIR -> transferable revenue assignment

JAMA -> assessed claim | HASIL -> realised collection

PAIBAQI -> reserve assignable pool | BE-JAGIRI -> shortage of usable assignments

WAR / INFLATED JAMA -> weak hasil -> troop and remount shortfall

HARDER EXTRACTION -> local resistance / private pacts -> further disturbance

RESULT -> fiscal, agrarian, administrative and military strain reinforce one another.

EVIDENCE LIMIT: Deccan war and jagirdari crisis interacted with succession, ecology and regional resistance but do not alone explain decline.

ASCII MASTER FLOW – PANEL 12/12: Topic 23 final answer spine

OPEN -> ecology became power through institutions, networks and sovereignty

TRACE -> early forts -> Purandar / Agra -> recovery -> coronation

EXPLAIN -> offices + revenue + chauth claims + mobile war + bounded navy

EXTEND -> Sambhaji -> Rajaram / Jinji -> Tarabai's decentralised resistance

CONNECT -> annexation and long war intensify the jagirdari feedback loop

QUALIFY -> reject hero myth, nationalism, cabinet analogy and instant collapse.
