

GEOGRAPHY 01 — THE EARTH AND THE UNIVERSE / INDIA LOCATION AND EXTENT

EARTH IN THE COSMIC → STARS, SOLAR-SYSTEM BODIES AND → EARTH GEOMETRY, MOTIONS AND → COORDINATES, WORLD TIME AND → MAGNETOSPHERE AND EARTH INTERIOR → INDIA'S COORDINATE FRAME, TROPIC

Read the thick cyan rail from Stage 00 to the final core synthesis. Each card uses a concept-appropriate structure; the grey E card is optional enrichment only and never repairs missing core content.

PRIMARY CORE FLOW SUBORDINATE EXTRA APPROVAL / REVIEW

Approval: FALSE • Pending user review • source generation g10 and all prior artifacts unchanged

CORE BEFORE EXTRA • prior artefacts unchanged • exact same master drives poster and tiles

00

STAGE 00 EARTH IN THE COSMIC HIERARCHY: ORIGIN, EVIDENCE AND PLANETARY SETTING

EARTH IN THE COSMIC HIERARCHY ORIGIN, EVIDENCE AND PLANETARY SETTING EARTH IN THE COSMIC SYSTEM HOW DID EARTH ACQUIRE ITS PLACE AND TRAITS? HOT, DENSE EARLY UNIVERSE ABOUT 13.8 BILLION YEARS AGO MILKY WAY SOLAR SYSTEM EARTH ROTATING NEBULA

EARTH IN THE COSMIC SYSTEM

CENTRAL QUESTION: How did Earth acquire its place and traits?

Hot, dense early universe about 13.8 billion years ago expansion + cooling + structure redshift

convergent evidence galaxies → Milky Way → Solar System → Earth rotating nebula → disc

DEFINITION / COMPONENTS

- EARTH IN THE COSMIC SYSTEM
- CENTRAL QUESTION: How did Earth acquire its place and traits?

TRIGGER / MECHANISM

- Hot, dense early universe about 13.8 billion years ago expansion + cooling + structure redshift CMB light elements
- convergent evidence galaxies → Milky Way → Solar System → Earth rotating nebula → disc → accretion →

EFFECT / INTERVENTION

- differentiated planets terrestrial inner planets gas and ice giants
- LOCATION IN A SYSTEM PRECEDES EXPLANATION OF PROCESS

MECHANISM / VERDICT — The Big Bang denotes the expansion and cooling of an extremely hot, dense early universe about 13.8 billion years ago, not an explosion from one point into pre-existing empty space.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The Big Bang denotes the expansion and cooling of an extremely hot, dense early universe about 13.8 billion years ago, not an explosion from one point into pre-existing empty space.

01

STAGE 01 STARS, SOLAR-SYSTEM BODIES AND THE MASS-CONTROLLED LIFE CYCLE

STARS, SOLAR-SYSTEM BODIES AND THE MASS-CONTROLLED LIFE CYCLE MAIN SEQUENCE LOWER MASS HIGHER MASS RED GIANT SUPERGIANT WHITE DWARF SOLAR-SYSTEM BODY FIREWALL ASTEROID ROCKY BODY ICE-RICH BODY SMALL BODY METEOR LUMINOUS PASSAGE IN AIR

MAIN SEQUENCE

LOWER MASS HIGHER MASS red giant supergiant white dwarf supernova neutron star black hole

SOLAR-SYSTEM BODY FIREWALL asteroid = rocky body

comet = ice-rich body

CLASSIFICATION

- MAIN SEQUENCE
- LOWER MASS HIGHER MASS red giant supergiant white dwarf supernova neutron star black hole

DIAGNOSTIC BASIS

- SOLAR-SYSTEM BODY FIREWALL asteroid = rocky body
- comet = ice-rich body

PROCESS LINK

- meteoroid = small body meteor = luminous passage in air
- meteorite = fragment reaching ground

EXAM TRAP

- Mass raises fusion rate: massive stars generally burn faster and live less.
- MAIN SEQUENCE

MECHANISM / VERDICT — SOLAR-SYSTEM BODY FIREWALL asteroid = rocky body | comet = ice-rich body | meteoroid = small body meteor = luminous passage in air | meteorite = fragment reaching ground.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: SOLAR-SYSTEM BODY FIREWALL asteroid = rocky body | comet = ice-rich body | meteoroid = small body meteor = luminous passage in air | meteorite = fragment reaching ground.

02

STAGE 02 EARTH GEOMETRY, MOTIONS AND THE SEASONAL ENERGY SEQUENCE

EARTH GEOMETRY, MOTIONS AND THE SEASONAL ENERGY SEQUENCE EARTH AS A MOVING GEOID OBLATE SPHEROID GEOMETRIC FORM GRAVITY EQUIPOTENTIAL ROTATION ABOUT AXIS DAY-NIGHT + TIME DIFFERENCE ABOUT 24 REVOLUTION + 23.5 DEG AXIAL TILT FROM PERPENDICULAR CHANGING

JUNE SOLSTICE EQUINOXES DEC SOLSTICE

EARTH AS A MOVING GEOID

Oblate spheroid: geometric form

Geoid: gravity equipotential

ROTATION about axis day-night + time difference about 24 hours; west to east

REVOLUTION + 23.5 deg axial tilt from perpendicular changing solar angle and changing day length

DEFINITION / COMPONENTS

- EARTH AS A MOVING GEOID
- Oblate spheroid: geometric form
- Geoid: gravity equipotential
- ROTATION about axis day-night + time difference about 24 hours; west to east

TRIGGER / MECHANISM

- REVOLUTION + 23.5 deg axial tilt from perpendicular changing solar angle and changing day length
- June solstice equinoxes Dec solstice
- Sun at 23.5 N Sun at Equator Sun at 23.5 S
- N day maximum near-equal day S day maximum

EFFECT / INTERVENTION

- ANNUAL SEASONAL CYCLE
- Distance is not the cause: perihelion and aphelion do not create seasons.

MECHANISM / VERDICT — Rotation produces day and night, whereas revolution acting with axial tilt changes solar angle and day length to produce the seasonal cycle.

MECHANISM / VERDICT — SOLAR-SYSTEM BODY FIREWALL asteroid = rocky body | comet = ice-rich body | meteoroid = small body meteor = luminous passage in air | meteorite = fragment reaching ground.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: SOLAR-SYSTEM BODY FIREWALL asteroid = rocky body | comet = ice-rich body | meteoroid = small body meteor = luminous passage in air | meteorite = fragment reaching ground.

02

STAGE 02 EARTH GEOMETRY, MOTIONS AND THE SEASONAL ENERGY SEQUENCE

EARTH GEOMETRY, MOTIONS AND THE SEASONAL ENERGY SEQUENCE

EARTH AS A MOVING GEOID

OBLATE SPHEROID

GEOMETRIC FORM

GRAVITY EQUIPOTENTIAL

ROTATION ABOUT AXIS DAY-NIGHT + TIME DIFFERENCE ABOUT 24

REVOLUTION + 23.5 DEG AXIAL TILT FROM PERPENDICULAR CHANGING

JUNE SOLSTICE EQUINOXES DEC SOLSTICE

EARTH AS A MOVING GEOID

Oblate spheroid: geometric form

Geoid: gravity equipotential

ROTATION about axis day-night + time difference about 24 hours; west to east

REVOLUTION + 23.5 deg axial tilt from perpendicular changing solar angle and changing day length

DEFINITION / COMPONENTS

- EARTH AS A MOVING GEOID
- Oblate spheroid: geometric form
- Geoid: gravity equipotential
- ROTATION about axis day-night + time difference about 24 hours; west to east

TRIGGER / MECHANISM

- REVOLUTION + 23.5 deg axial tilt from perpendicular changing solar angle and changing day length
- June solstice equinoxes Dec solstice
- Sun at 23.5 N Sun at Equator Sun at 23.5 S
- N day maximum near-equal day S day maximum

EFFECT / INTERVENTION

- ANNUAL SEASONAL CYCLE
- Distance is not the cause; perihelion and aphelion do not create seasons.

MECHANISM / VERDICT — Rotation produces day and night, whereas revolution acting with axial tilt changes solar angle and day length to produce the seasonal cycle.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Rotation produces day and night, whereas revolution acting with axial tilt changes solar angle and day length to produce the seasonal cycle.

03

STAGE 03 COORDINATES, WORLD TIME AND THE INTERNATIONAL DATE LINE

COORDINATES, WORLD TIME AND THE INTERNATIONAL DATE LINE

COORDINATE READING GRID

N OR S OF EQUATOR

E OR W OF PRIME MERIDIAN PARALLEL CIRCLES

MERIDIANS MEET AT POLES CONTROLS SOLAR ANGLE

SUPPLIES ANGULAR BASIS FOR TIME

EARTH TURNS 360 DEG IN 24 H

15 DEG

LATITUDE

N or S of Equator

15 deg = 1 hour

LONGITUDE

E or W of Prime Meridian parallel circles

1 deg = 4 minutes

meridians meet at poles controls solar angle

supplies angular basis for time

SYSTEM / DEFINITION

- COORDINATE READING GRID
- N or S of Equator
- E or W of Prime Meridian parallel circles

PROCESS / MECHANISM

- meridians meet at poles controls solar angle
- supplies angular basis for time
- Earth turns 360 deg in 24 h

SPATIAL / INDIA PATTERN

- 15 deg = 1 hour
- 1 deg = 4 minutes
- EAST IS AHEAD IN TIME local time → zone standard → UTC offset

HAZARD / LIMIT / RESPONSE

- International Date Line near 180 deg cross westward: add one day cross eastward: subtract one day
- A great circle has Earth's centre in its plane and gives the shortest route.

MECHANISM / VERDICT — Earth's rotation gives 15° of longitude per hour and 1° per four minutes; east is ahead, and crossing the International Date Line westward adds a calendar day while eastward subtracts one.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Earth's rotation gives 15° of longitude per hour and 1° per four minutes; east is ahead, and crossing the International Date Line westward adds a calendar day while eastward subtracts one.

04

STAGE 04 MAGNETOSPHERE AND EARTH INTERIOR: TWO EVIDENCE-BASED CROSS-SECTIONS

MAGNETOSPHERE AND EARTH INTERIOR

TWO EVIDENCE-BASED CROSS-SECTIONS

SOLAR-TERRESTRIAL SECTION EARTH-INTERIOR SECTION

CME CRUST SOLAR WIND MOHO BOUNDARY MAGNETOSPHERE SOLID MANTLE

S WAVES STOP; P WAVES REFRACT OXYGEN AND NITROGEN

LEHMANN BOUNDARY

AURORAL LIGHT SOLID INNER CORE

EVIDENCE CONVERGES

SOLAR-TERRESTRIAL SECTION EARTH-INTERIOR SECTION

Sun / CME crust solar wind Moho boundary magnetosphere solid mantle reconnection Gutenberg boundary polar

S waves stop; P waves refract oxygen and nitrogen

Lehmann boundary

SYSTEM / DEFINITION

- SOLAR-TERRESTRIAL SECTION EARTH-INTERIOR SECTION
- Sun / CME crust solar wind Moho boundary magnetosphere solid mantle reconnection Gutenberg boundary polar particle paths liquid outer core
- S waves stop; P waves refract oxygen and nitrogen

PROCESS / MECHANISM

- Lehmann boundary
- AURORAL LIGHT solid inner core
- Evidence converges

SPATIAL / INDIA PATTERN

- solar particles + magnetic guidance + gas excitation → aurora
- P-wave refraction + S-wave absence + shadow zones → layered core
- Do not call the whole core liquid; the outer core is liquid, inner core solid.

HAZARD / LIMIT / RESPONSE

- Lehmann boundary

MECHANISM / VERDICT — The disappearance of S-waves through the outer core and the refraction of P-waves create shadow zones that reveal a liquid outer core surrounding a solid inner core.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The disappearance of S-waves through the outer core and the refraction of P-waves create shadow zones that reveal a liquid outer core surrounding a solid inner core.

04

STAGE 04 MAGNETOSPHERE AND EARTH INTERIOR: TWO EVIDENCE-BASED CROSS-SECTIONS

MAGNETOSPHERE AND EARTH INTERIOR

TWO EVIDENCE-BASED CROSS-SECTIONS

SOLAR-TERRESTRIAL SECTION EARTH-INTERIOR SECTION

CME CRUST SOLAR WIND MOHO BOUNDARY MAGNETOSPHERE SOLID MANTLE

S WAVES STOP; P WAVES REFRACT OXYGEN AND NITROGEN

LEHMANN BOUNDARY

AURORAL LIGHT SOLID INNER CORE

EVIDENCE CONVERGES

SOLAR-TERRESTRIAL SECTION EARTH-INTERIOR SECTION

Sun / CME crust solar wind Moho boundary magnetosphere solid mantle reconnection Gutenberg boundary polar

S waves stop; P waves refract oxygen and nitrogen

Lehmann boundary

SYSTEM / DEFINITION

- SOLAR-TERRESTRIAL SECTION EARTH-INTERIOR SECTION
- Sun / CME crust solar wind Moho boundary magnetosphere solid mantle reconnection Gutenberg boundary polar particle paths liquid outer core
- S waves stop; P waves refract oxygen and nitrogen

PROCESS / MECHANISM

- Lehmann boundary
- AURORAL LIGHT solid inner core
- Evidence converges

SPATIAL / INDIA PATTERN

- solar particles + magnetic guidance + gas excitation → aurora
- P-wave refraction + S-wave absence + shadow zones → layered core
- Do not call the whole core liquid; the outer core is liquid, inner core solid.

HAZARD / LIMIT / RESPONSE

- Lehmann boundary

MECHANISM / VERDICT — The disappearance of S-waves through the outer core and the refraction of P-waves create shadow zones that reveal a liquid outer core surrounding a solid inner core.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The disappearance of S-waves through the outer core and the refraction of P-waves create shadow zones that reveal a liquid outer core surrounding a solid inner core.

05

STAGE 05 INDIA'S COORDINATE FRAME, TROPIC OF CANCER AND IST DERIVATION

INDIA'S COORDINATE FRAME, TROPIC OF CANCER AND IST DERIVATION

ABSOLUTE FRAME

MAINLAND LATITUDE

8 DEG 4 N TO 37 DEG 6 N

MAINLAND LONGITUDE

68 DEG 7 E TO 97 DEG 25 E

N-S 3,214 KM

E-W 2,933 KM

INDIA: ABSOLUTE FRAME

Mainland latitude : 8 deg 4 N to 37 deg 6 N

Mainland longitude: 68 deg 7 E to 97 deg 25 E

N-S 3,214 km

SYSTEM / DEFINITION

- INDIA: ABSOLUTE FRAME
- Mainland latitude : 8 deg 4 N to 37 deg 6 N
- Mainland longitude: 68 deg 7 E to 97 deg 25 E
- N-S 3,214 km

PROCESS / MECHANISM

- E-W 2,933 km
- area 3,287,263 sq km
- TROPIC OF CANCER: 23.5 deg N across eight states, west to east
- Gujarat → Rajasthan → Madhya Pradesh → Chhattisgarh

SPATIAL / INDIA PATTERN

- Jharkhand → West Bengal → Tripura → Mizoram
- STANDARD MERIDIAN: 82 deg 30 E, through Mirzapur
- 82.5 x 4 minutes = 330 minutes = UTC + 5:30 = IST
- LONGITUDINAL SPAN: 29 deg 18 min x 4 = about 117 minutes eastern local noon precedes western local noon

HAZARD / LIMIT / RESPONSE

- One civil time creates coordination; it does not erase solar-time difference.

MECHANISM / VERDICT — India's 29°18' longitudinal span produces about 117 minutes of local solar-time difference, even though one civil time is used across the country.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: India's 29°18' longitudinal span produces about 117 minutes of local solar-time difference, even though one civil time is used across the country.

06

STAGE 06 INDIA'S OCEANIC SITUATION, NEIGHBOURS, COASTS AND ISLAND EXTENSIONS

INDIA'S OCEANIC SITUATION, NEIGHBOURS, COASTS AND ISLAND EXTENSIONS

HIMALAYA LAND NEIGHBOURS + PASSES + CLIMATIC FILTERING

ARABIAN SEA ----- PENINSULAR INDIA ----- BAY OF BENGAL

LAKSHADWEEP INDIAN OCEAN SOUTH ANDAMAN-NICOBAR CORAL ATOLLS ROUTE CENTRALITY

TEN DEGREE CHANNEL

ANDAMAN SEA TO EAST

LAND NEIGHBOURS

PAKISTAN, AFGHANISTAN, CHINA, NEPAL, BHUTAN

SYSTEM / DEFINITION

HIMALAYA land neighbours + passes + climatic filtering

ARABIAN SEA ----- PENINSULAR INDIA ----- BAY OF BENGAL western routes northern Indian Ocean eastern routes

Lakshadweep Indian Ocean south Andaman-Nicobar coral atolls route centrality tectonic island arc

PROCESS / MECHANISM

Ten Degree Channel: Andaman / Nicobar

Andaman Sea to east

LAND NEIGHBOURS: Pakistan, Afghanistan, China, Nepal, Bhutan,

SPATIAL / INDIA PATTERN

Bangladesh and Myanmar

MARITIME NEIGHBOURS: Sri Lanka and Maldives

Land border: 15,106.7 km

HAZARD / LIMIT / RESPONSE

2025 revised coastline: 11,098.81 km

Revised measurement reflects GIS and high-water-line detail, not new territory.

SYSTEM / DEFINITION

- HIMALAYA land neighbours + passes + climatic filtering
- ARABIAN SEA ----- PENINSULAR INDIA ----- BAY OF BENGAL western routes northern Indian Ocean eastern routes
- Lakshadweep Indian Ocean south Andaman-Nicobar coral atolls route centrality tectonic island arc

PROCESS / MECHANISM

- Ten Degree Channel: Andaman / Nicobar
- Andaman Sea to east
- LAND NEIGHBOURS: Pakistan, Afghanistan, China, Nepal, Bhutan,

SPATIAL / INDIA PATTERN

- Bangladesh and Myanmar
- MARITIME NEIGHBOURS: Sri Lanka and Maldives
- Land border: 15,106.7 km

HAZARD / LIMIT / RESPONSE

- 2025 revised coastline: 11,098.81 km
- Revised measurement reflects GIS and high-water-line detail, not new territory.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: India's 29°18' longitudinal span produces about 117 minutes of local solar-time difference, even though one civil time is used across the country.

06

STAGE 06 INDIA'S OCEANIC SITUATION, NEIGHBOURS, COASTS AND ISLAND EXTENSIONS

INDIA'S OCEANIC SITUATION, NEIGHBOURS, COASTS AND ISLAND EXTENSIONS

HIMALAYA LAND NEIGHBOURS + PASSES + CLIMATIC FILTERING

ARABIAN SEA ----- PENINSULAR INDIA ----- BAY OF BENGAL

LAKSHADWEEP INDIAN OCEAN SOUTH ANDAMAN-NICOBAR CORAL ATOLLS ROUTE CENTRALITY

TEN DEGREE CHANNEL

ANDAMAN SEA TO EAST

LAND NEIGHBOURS

PAKISTAN, AFGHANISTAN, CHINA, NEPAL, BHUTAN

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
HIMALAYA land neighbours + passes + climatic filtering	Ten Degree Channel: Andaman / Nicobar	Bangladesh and Myanmar	2025 revised coastline: 11,098.81 km
ARABIAN SEA ----- PENINSULAR INDIA ----- BAY OF BENGAL western routes northern Indian Ocean eastern routes	Andaman Sea to east	MARITIME NEIGHBOURS: Sri Lanka and Maldives	Revised measurement reflects GIS and high-water-line detail, not new territory.
Lakshadweep Indian Ocean south Andaman-Nicobar coral atolls route centrality tectonic island arc	LAND NEIGHBOURS: Pakistan, Afghanistan, China, Nepal, Bhutan,	Land border: 15,106.7 km	
SYSTEM / DEFINITION - HIMALAYA land neighbours + passes + climatic filtering - ARABIAN SEA ----- PENINSULAR INDIA ----- BAY OF BENGAL western routes northern Indian Ocean eastern routes - Lakshadweep Indian Ocean south Andaman-Nicobar coral atolls route centrality tectonic island arc	PROCESS / MECHANISM - Ten Degree Channel: Andaman / Nicobar - Andaman Sea to east - LAND NEIGHBOURS: Pakistan, Afghanistan, China, Nepal, Bhutan,	SPATIAL / INDIA PATTERN - Bangladesh and Myanmar - MARITIME NEIGHBOURS: Sri Lanka and Maldives - Land border: 15,106.7 km	HAZARD / LIMIT / RESPONSE 2025 revised coastline: 11,098.81 km - Revised measurement reflects GIS and high-water-line detail, not new territory.

MECHANISM / VERDICT — The 2025 coastline figure of 11,098.81 km reflects finer GIS and high-water-line measurement of coastal detail and islands, not territorial expansion or automatic change in Coastal Regulation Zone boundaries.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The 2025 coastline figure of 11,098.81 km reflects finer GIS and high-water-line measurement of coastal detail and islands, not territorial expansion or automatic change in Coastal Regulation Zone boundaries.

07

STAGE 07 MAP-ANSWER AND MAINS SPINE FOR INDIA'S LOCATIONAL SIGNIFICANCE

MAP-ANSWER AND MAINS SPINE FOR INDIA'S LOCATIONAL SIGNIFICANCE

WHY IS INDIA'S LOCATION SIGNIFICANT WITHOUT BEING DETERMINISTIC?

1. DEFINE SCALE

ASIAN SUBDIVISION WITH CONTINENTAL SIZE AND DIVERSITY

2. DRAW MAP

ARABIAN SEA

3. ADD EVIDENCE COORDINATES

ISLAND EXTENSIONS

QUESTION: Why is India's location significant without being deterministic?	1. DEFINE SCALE: Asian subdivision with continental size and diversity	2. DRAW MAP: Himalaya	Arabian Sea	3. ADD EVIDENCE coordinates → Tropic → IST → coast → neighbours → island extensions
SYSTEM / DEFINITION - QUESTION: Why is India's location significant without being deterministic? 1. DEFINE SCALE: Asian subdivision with continental size and diversity 2. DRAW MAP: Himalaya	PROCESS / MECHANISM - Arabian Sea 3. ADD EVIDENCE coordinates → Tropic → IST → coast → neighbours → island extensions 4. EXPLAIN MECHANISMS latitude → solar regime	SPATIAL / INDIA PATTERN - mountains → selective filter ocean position → trade, monsoon, ecology and security connections 5. QUALIFY centrality does not equal control; borders and routes require safe mapping 6. VERDICT location supplies opportunities and constraints	HAZARD / LIMIT / RESPONSE - connectivity, institutions and stewardship convert them into outcomes - MAP RULE: schematic, not to scale, claim-relevant labels, no improvised borders.	

MECHANISM / VERDICT — MAP RULE: schematic, not to scale, claim-relevant labels, no improvised borders.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: schematic, not to scale, claim-relevant labels, no improvised borders.

E

EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT

41. COORDINATE ENVELOPE, POLYGON REALITY AND MEASUREMENT DISCIPLINE

42. ADMINISTRATIVE GEOGRAPHY OF ONE STANDARD TIME

43. LATITUDE IS NOT A CLIMATIC BORDER

44. COASTLINE PARADOX AND SCALE-DEPENDENT NUMBERS

45. NEIGHBOUR COUNTS DEPEND ON CATEGORY

46. SUBCONTINENT AS A RELATIONAL SCALE CONCEPT

47. MOUNTAINS AS SELECTIVE PERMEABILITY

OPTIONAL PROCESS DEPTH

- 41. Coordinate envelope, polygon reality and measurement discipline
- 42. Administrative geography of one standard time
- 43. Latitude is not a climatic border
- 44. Coastline paradox and scale-dependent numbers

DATA / INSTITUTION LIMIT

- 45. Neighbour counts depend on category
- 46. Subcontinent as a relational scale concept
- 47. Mountains as selective permeability
- 48. Oceans as routes and risk fields

CONTEMPORARY PARALLEL

- 49. Island extension without strategic simplification
- 50. Route maps require humility
- 51. Administrative accuracy after reorganisation
- 52. Cross-topic deployment without ownership leakage

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
