MEDITERRANEAN CLIMATE

FIVE-REGION WORLD MAP → SEASONAL PRESSURE SWITCH → CLIMATE IDENTITY FIREWALL → LOCAL-WIND MATRIX → SCLEROPHYLL DESIGN → REGIONAL SCRUB NAMES

Read the thick cyan rail from Stage 00 to the final core synthesis. Each card uses a concept-appropriate structure; the grey E card is optional enrichment only and never repairs missing core content.

● PRIMARY CORE FLOW ○ SUBORDINATE EXTRA ★ APPROVAL / REVIEW

CORE BEFORE EXTRA • prior artefacts unchanged • exact same master drives poster and tiles

Approval: FALSE • Pending user review • active generation g2 • explicit approval of this exact generation is required • all prior artifacts unchanged

00

STAGE 00 — FIVE-REGION WORLD MAP

FIVE-REGION WORLD MAP · MEDITERRANEAN BASIN · LARGEST EXPRESSION · CALIFORNIA + CENTRAL CHILE · WEST COASTS · SOUTH-WEST SOUTH AFRICA · SOUTH AUSTRALIA · FIFTH REGION

MEDITERRANEAN BASIN → largest expression

CALIFORNIA + CENTRAL CHILE → west coasts → CAPE → south-west South Africa → SW / SOUTH AUSTRALIA → fifth region

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
• MEDITERRANEAN BASIN → largest expression • CALIFORNIA + CENTRAL CHILE → west coasts	• CAPE → south-west South Africa • SW / SOUTH AUSTRALIA → fifth region	• MEDITERRANEAN BASIN → largest expression • CALIFORNIA + CENTRAL CHILE → west coasts	• CAPE → south-west South Africa • SW / SOUTH AUSTRALIA → fifth region

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: CAPE → south-west South Africa; SW / SOUTH AUSTRALIA → fifth region.

01

STAGE 01 — SEASONAL PRESSURE SWITCH

SEASONAL PRESSURE SWITCH · SUBTROPICAL HIGH SHIFTS POLEWARD · CLEAR SKY AND DROUGHT · WESTERLIES SHIFT EQUATORWARD · FRONTAL RAIN ARRIVES

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
• SUMMER → subtropical high shifts poleward • SUBSIDENCE → clear sky and drought	• WINTER → westerlies shift equatorward • DEPRESSIONS → frontal rain arrives	• SUMMER → subtropical high shifts poleward • SUBSIDENCE → clear sky and drought	• WINTER → westerlies shift equatorward • DEPRESSIONS → frontal rain arrives

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: WINTER → westerlies shift equatorward; DEPRESSIONS → frontal rain arrives.

02

STAGE 02 — CLIMATE IDENTITY FIREWALL

CLIMATE IDENTITY FIREWALL · SUMMER DRY · WINTER WET · SUMMER WET · WINTER DRIER · EASTERN MARGIN · RAIN THROUGH MUCH OF YEAR · RAINFALL SEASON OUTRANKS LATITUDE ALONE

DEFINITION / COMPONENTS	TRIGGER / MECHANISM	EFFECT / INTERVENTION
MEDITERRANEAN → summer dry / winter wet	EASTERN MARGIN → rain through much of year	MEDITERRANEAN → summer dry / winter wet
MONSOON → summer wet / winter drier	RULE → rainfall season outranks latitude alone	MONSOON → summer wet / winter drier

DEFINITION / COMPONENTS	TRIGGER / MECHANISM	EFFECT / INTERVENTION
• MEDITERRANEAN → summer dry / winter wet • MONSOON → summer wet / winter drier	• EASTERN MARGIN → rain through much of year • RULE → rainfall season outranks latitude alone	• MEDITERRANEAN → summer dry / winter wet • MONSOON → summer wet / winter drier

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: EASTERN MARGIN → rain through much of year.

03

STAGE 03 — LOCAL-WIND MATRIX

LOCAL-WIND MATRIX · HOT, DUSTY, SAHARA ORIGIN · COLD, RHONE-VALLEY OUTFLOW · COLD, ADRIATIC DOWNSLOPE WIND · LOCAL MEDITERRANEAN WINDS ARE NOT ALL HOT

CLASSIFICATION	DIAGNOSTIC BASIS	PROCESS LINK	EXAM TRAP
SIROCCO → hot, dusty, Sahara origin	BORA → cold, Adriatic downslope wind	SIROCCO → hot, dusty, Sahara origin	BORA → cold, Adriatic downslope wind
MISTRAL → cold, Rhone-valley outflow	TRAP → local Mediterranean winds are not all hot	MISTRAL → cold, Rhone-valley outflow	TRAP → local Mediterranean winds are not all hot

CLASSIFICATION	DIAGNOSTIC BASIS	PROCESS LINK	EXAM TRAP
• SIROCCO → hot, dusty, Sahara origin • MISTRAL → cold, Rhone-valley outflow	• BORA → cold, Adriatic downslope wind • TRAP → local Mediterranean winds are not all hot	• SIROCCO → hot, dusty, Sahara origin • MISTRAL → cold, Rhone-valley outflow	• BORA → cold, Adriatic downslope wind • TRAP → local Mediterranean winds are not all hot

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: TRAP → local Mediterranean winds are not all hot.

04

STAGE 04 — SCLEROPHYLL DESIGN

SCLEROPHYLL DESIGN · SMALL, HARD, WAXY OR LEATHERY · DEEP ACCESS TO STORED MOISTURE · DROUGHT AND FIRE PROTECTION · SCRUB OR OPEN WOODLAND

LEAF → small, hard, waxy or leathery

ROOT → deep access to stored moisture → BARK → drought and fire protection → STRUCTURE → scrub or open woodland

CLASSIFICATION	DIAGNOSTIC BASIS	PROCESS LINK	EXAM TRAP
• LEAF → small, hard, waxy or leathery • ROOT → deep access to stored moisture	• BARK → drought and fire protection • STRUCTURE → scrub or open woodland	• LEAF → small, hard, waxy or leathery • ROOT → deep access to stored moisture	• BARK → drought and fire protection • STRUCTURE → scrub or open woodland

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: BARK → drought and fire protection; STRUCTURE → scrub or open woodland.

05

STAGE 05 — REGIONAL SCRUB NAMES

REGIONAL SCRUB NAMES · MEDITERRANEAN BASIN · FORM CONVERGES · SPECIES REMAIN REGIONAL

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
MAQUIS → Mediterranean basin	MALLEE → Australia	MAQUIS → Mediterranean basin	MALLEE → Australia
CHAPARRAL → California	FORM CONVERGES → species remain regional	CHAPARRAL → California	FORM CONVERGES → species remain regional

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
• MAQUIS → Mediterranean basin • CHAPARRAL → California	• MALLEE → Australia • FORM CONVERGES → species remain regional	• MAQUIS → Mediterranean basin • CHAPARRAL → California	• MALLEE → Australia • FORM CONVERGES → species remain regional

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: MALLEE → Australia; FORM CONVERGES → species remain regional.

06

STAGE 06 — GROWTH-SEASON CALENDAR

GROWTH-SEASON CALENDAR · RAIN RETURNS AFTER DROUGHT · MOISTURE BUT COOLER GROWTH · BEST MOISTURE-TEMPERATURE OVERLAP · DROUGHT AND FIRE STRESS

AUTUMN → rain returns after drought

WINTER → moisture but cooler growth → SPRING → best moisture-temperature overlap → SUMMER → drought and fire stress

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
• AUTUMN → rain returns after drought • WINTER → moisture but cooler growth	• SPRING → best moisture-temperature overlap • SUMMER → drought and fire stress	• AUTUMN → rain returns after drought • WINTER → moisture but cooler growth	• SPRING → best moisture-temperature overlap • SUMMER → drought and fire stress

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: SPRING → best moisture-temperature overlap; SUMMER → drought and fire stress.

07

STAGE 07 — AGRICULTURAL SYSTEM

AGRICULTURAL SYSTEM · WINTER RAIN · CEREALS AND SOIL RECHARGE · DEEP-ROOTED TREES · SURVIVE DRY SUMMER · SUN + IRRIGATION · FRUIT AND VEGETABLES · HIGH-VALUE EXPORT HORTICULTURE

WINTER RAIN → cereals and soil recharge → DEEP-ROOTED TREES → survive dry summer → SUN + IRRIGATION → fruit and vegetables → MARKETS → high-value export horticulture

DEFINITION / COMPONENTS	TRIGGER / MECHANISM	EFFECT / INTERVENTION
• WINTER RAIN → cereals and soil recharge • DEEP-ROOTED TREES → survive dry summer	• SUN + IRRIGATION → fruit and vegetables • MARKETS → high-value export horticulture	• WINTER RAIN → cereals and soil recharge • DEEP-ROOTED TREES → survive dry summer

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: SUN + IRRIGATION → fruit and vegetables; MARKETS → high-value export horticulture.

08

STAGE 08 — WILDFIRE CHAIN

WILDFIRE CHAIN · WET SEASON · BIOMASS AND FINE FUEL · SUMMER DROUGHT · FUEL DESICCATION · HEAT + WIND + IGNITION · RAPID SPREAD · LAND MANAGEMENT

WET SEASON → biomass and fine fuel → SUMMER DROUGHT → fuel desiccation → HEAT + WIND + IGNITION → rapid spread → LAND MANAGEMENT → exposure and recovery

DEFINITION / COMPONENTS	TRIGGER / MECHANISM	EFFECT / INTERVENTION
• WET SEASON → biomass and fine fuel • SUMMER DROUGHT → fuel desiccation	• HEAT + WIND + IGNITION → rapid spread • LAND MANAGEMENT → exposure and recovery	• WET SEASON → biomass and fine fuel • SUMMER DROUGHT → fuel desiccation

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: HEAT + WIND + IGNITION → rapid spread.

09

STAGE 09 — INDIA ANALOGUE MAP

INDIA ANALOGUE MAP · TEMPERATE FRUIT VALLEYS · KULLU AND SHIMLA APPLE BELTS · SUITABLE HILL ORCHARDS · GRAPE BELT, NOT CS CLIMATE

KASHMIR → temperate fruit valleys

HIMACHAL → Kullu and Shimla apple belts → UTTARAKHAND → suitable hill orchards → MAHARASHTRA → grape belt, not Cs climate

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
• KASHMIR → temperate fruit valleys • HIMACHAL → Kullu and Shimla apple belts	• UTTARAKHAND → suitable hill orchards • MAHARASHTRA → grape belt, not Cs climate	• KASHMIR → temperate fruit valleys • HIMACHAL → Kullu and Shimla apple belts	• UTTARAKHAND → suitable hill orchards • MAHARASHTRA → grape belt, not Cs climate

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: UTTARAKHAND → suitable hill orchards; MAHARASHTRA → grape belt, not Cs climate.

10

STAGE 10 — APPLE VIABILITY LADDER

APPLE VIABILITY LADDER · WINTER CHILL · CULTIVAR-SPECIFIC DORMANCY · FROST, HAIL, ASPECT AND WATER · GRADING AND STORAGE · ROADS, COLD CHAIN AND TIMING

WINTER CHILL → cultivar-specific dormancy

SITE → frost, hail, aspect and water → HARVEST → grading and storage → MARKET → roads, cold chain and timing

DEFINITION / COMPONENTS	TRIGGER / MECHANISM	EFFECT / INTERVENTION
• WINTER CHILL → cultivar-specific dormancy • SITE → frost, hail, aspect and water	• HARVEST → grading and storage • MARKET → roads, cold chain and timing	• WINTER CHILL → cultivar-specific dormancy • SITE → frost, hail, aspect and water

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: HARVEST → grading and storage; MARKET → roads, cold chain and timing.

11

STAGE 11 — MEDITERRANEAN ANSWER SPINE

MEDITERRANEAN ANSWER SPINE · WESTERN MARGINS AT 30-45 DEGREES · SUMMER HIGH · WINTER WESTERLIES · SCLEROPHYLL, CROPS AND FIRE · INDIA IS AN ORCHARD ANALOGUE ONLY

LOCATE → western margins at 30-45 degrees → DERIVE → summer high / winter westerlies → LINK → sclerophyll, crops and fire → QUALIFY → India is an orchard analogue only

DEFINITION / COMPONENTS	TRIGGER / MECHANISM	EFFECT / INTERVENTION
• LOCATE → western margins at 30-45 degrees • DERIVE → summer high / winter westerlies	• LINK → sclerophyll, crops and fire • QUALIFY → India is an orchard analogue only	• LOCATE → western margins at 30-45 degrees • DERIVE → summer high / winter westerlies

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: QUALIFY → India is an orchard analogue only.

E

EXTRA — SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT · INDIA HAS NO TRUE MEDITERRANEAN (CS) CLIMATE . · HIMALAYAN TEMPERATE HORTICULTURE IS INDIA'S MEDITERRANEAN-STYLE ORCHARD ANALOGUE. · HIMALAYAS ARE KNOWN FOR APPLE, PEACH, CHERRY, PEAR, MULBERRY · APPLE IS A TEMPERATE FRUIT CROP . · APPLE SUITABILITY DEPENDS ON WINTER CHILLING, FROST/HAIL EXPOSURE, GROWING-SEASON · NUMERICAL THRESHOLDS VARY BY CULTIVAR AND ORCHARD ALTITUDE; USE · APPLE ORCHARDS SHOULD BE FREE FROM HAILSTORMS AND FROST.

OPTIONAL PROCESS DEPTH	DATA / INSTITUTION LIMIT	CONTEMPORARY PARALLEL
• India has no true Mediterranean (Cs) climate . • Himalayan temperate horticulture is India's Mediterranean-style orchard analogue. • Himalayas are known for apple, peach, cherry, pear, mulberry, walnut, almond and apricot orchards. • Apple is a temperate fruit crop .	• Apple suitability depends on winter chilling, frost/hail exposure, growing-season temperature and water. • Numerical thresholds vary by cultivar and orchard altitude; use them only with the source context. • Apple orchards should be free from hailstorms and frost. • Main apple areas: Kullu, Shimla, Kashmir Valley, hilly Uttarakhand .	• Apple is perishable and requires quick, efficient transport. • Nashik and adjoining Maharashtra districts form a major grape/wine belt; Sangli is also important for grapes. • NOT: India has a Mediterranean climate in Kashmir → India lacks true Cs; Kashmir is a temperate horticultural analogue. • NOT: Indian grapes are grown mainly in the Himalayas → Main viticulture belt is Nashik–Sangli, Maharashtra.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.

END OF MASTER CANVAS • poster embeds this exact master • tiled pages are overlapping crops of the same pixels
