

COMPLETE LEARNING SESSION

Children and Child Protection - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Children and Child Protection - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies question papers held under books\mains and books\more_previous_papers were read only to confirm the printed wording of routed Mains demands. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Exactly one General Studies Mains demand and one objective demand are routed to this topic in the audited routing ledgers, and the ownership is stated openly rather than inflated. The Mains demand is 2025 General Studies Paper II Question 18, reproduced below as a demand card with its printed year, paper, question number, directive, marks and word limit exactly as the audited 2024-2025 Mains routing ledger records them and as the locally held official 2025 General Studies Paper II prints them. The objective demand is 2018 Prelims General Studies Paper I Question 30 on the subject matter of the two international labour conventions numbered 138 and 182, and the audited 2018-2023 Prelims routing ledger records the official keys for that period as not held locally, so no option, key or inferred answer is recorded for it and it is not converted into a solved question. No further Mains demand is claimed for this topic: the audited ledgers route the tribal-knowledge, tribal-diversity and tribal-development demands to the Indian Society owner, the mobile-phone and socialisation demand to the family and kinship owner, and no separate child-labour or juvenile-justice Mains demand appears in the ledgers for the covered years, so none is manufactured here. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demand; no question was invented from them and no marking scheme or page precision was imported. Every model solution below is original work written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work.
- **Live-link boundary:** One live official page was verified for this topic on 2026-09-02. The Ministry of Women and Child Development's official page, read on that date, records that the Ministry came into existence as a separate Ministry with effect from 30 January 2006, that it had been a Department under the Ministry of Human Resources Development since 1985, and that it was constituted with the prime intention of addressing gaps in State action for women and children and of promoting inter-ministerial and inter-sectoral convergence to create gender-equitable and child-centred legislation, policies and programmes. That statement is used only for what it says, namely the ministry's date of creation, its predecessor status and its convergence mandate, which is directly relevant because the umbrella child-welfare mission and the child-rights commission both sit under this ministry, and nothing further has been inferred from it. Two further official checks were attempted on the same date, namely the child-rights commission's about page and its home page, and both returned a not-found error or a redirect notice only, so nothing was read or used from them and no secondary summary, coaching site or news report has been treated as an official source. The package therefore relies on the dated official anchors already carried by the repository owners, each cited with its issuing instrument, edition or survey round: the Protection of Children from Sexual Offences Act, 2012 with its definition of a child as any person below eighteen, its gender-neutral scope, its graded offences, mandatory reporting, Special Courts, in-camera proceedings and its reach over offences committed through electronic means; the Juvenile Justice (Care and Protection of Children) Act, 2015 with its two categories, the composition of the Juvenile Justice Board and of the Child Welfare Committee, the definition of a heinous offence as one carrying a minimum punishment of seven years or more, the Section 15 preliminary assessment and the Section 18(3) transfer route to the Children's Court; the 2021 amendment with its District Magistrate oversight of adoption and child-care institutions and its reclassification of specified offences; the Child Labour

(Prohibition and Regulation) Amendment Act, 2016 with its complete prohibition below fourteen, its hazardous-occupation prohibition for adolescents aged fourteen to eighteen and its conditional family-enterprise and child-artist exceptions; the subject matter of International Labour Organization Conventions 138 and 182; the Prohibition of Child Marriage Act, 2006 with its recorded thresholds, its voidable general rule, its void specified situations and its Child Marriage Prohibition Officers; Mission Vatsalya with Child Care Institutions, the Child Helpline numbered 1098 and sponsorship and foster care; the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women and recommendatory powers; the electronic reporting box, the national cybercrime reporting portal and the intermediary guidelines rules with category-specific duties; the recorded status as at 21 July 2026 that the child-data duties under the Digital Personal Data Protection Act, 2023 and the 2025 Rules, including verifiable parental consent, are scheduled to commence on 13 May 2027; the sixth-round National Family Health Survey child-marriage prevalence of 20.1 per cent of women aged twenty to twenty-four, down from 23.3 per cent in the fifth round; and the 2011 Census count of about 10.1 million workers aged five to fourteen counting main and marginal workers together. No case registration, disposal, conviction, takedown, complaint, institution, placement or coverage count is asserted, no budget or expenditure figure is asserted, no National Crime Records Bureau, Periodic Labour Force Survey, NITI Aayog or Sustainable Development Goal value is asserted, no legal or constitutional provision is invented or upgraded in status, no scheduled duty is described as current enforcement, and no previous-year question, official answer key or option is asserted or inferred.

- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Social Justice Basic/Core is answer-complete before optional Advanced depth.
Legal-status boundary	Constitutional value/right, statute, rule, judgment, executive policy, scheme, eligibility rule, implementation and outcome remain distinct.
Rights-holder map	Rights-holder -> entitlement/need -> competent institution/duty-bearer -> accountability forum -> grievance/appeal/remedy.
Delivery chain	Identification -> eligibility -> documentation -> enrolment -> finance -> frontline access -> service/benefit -> portability -> outcome -> audit and correction.
Inclusion method	Intersectional caste, tribe, gender, age, disability, religion, occupation, migration and regional variation is retained without homogenising groups.
Evidence method	Claim -> named India-centric law/institution/scheme/case/dataset -> analysis -> source, reference period, release date, denominator, status and causal qualification.
Dignity and safeguards	Accessibility, privacy, participation, social audit, portability, offline access, due process and protection from stigma or coercion are tested.
Practice contract	Every model has demand decoding, detailed examiner-grade answer, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner:

upsc-ai-kit\knowledge\Social-Justice\basic\06_Children-and-Child-Protection.md

Substantive canonical provenance owner: upsc-ai-kit\knowledge\Social-Justice\06_Children-and-Child-Protection_Learner-V2-Complete-Topic-Package.md **Optional Advanced owner:**

upsc-ai-kit\knowledge\Social-Justice\advanced\06_Children-and-Child-Protection.md

Official syllabus mapping:

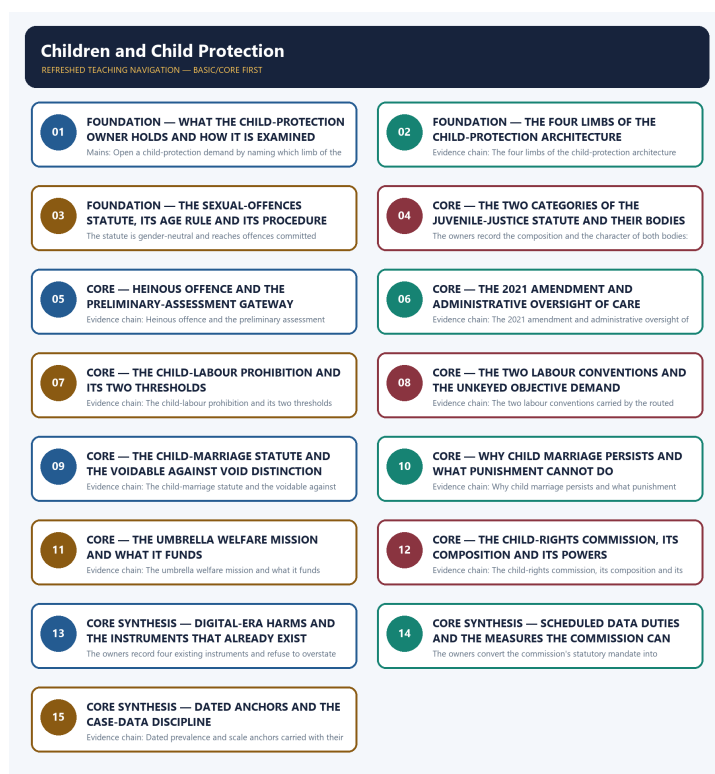

upsc-ai-kit\knowledge\Social-Justice\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Prohibition/outcome discipline:** a legal prohibition, reported case, registration, conviction, rehabilitation measure and lived eradication are different claims.
- **Eligibility discipline:** universal, categorical, means-tested, self-declared, notified-list and residence-linked routes require exact scope; coverage never proves adequacy or access.
- **Reservation discipline:** constitutional basis, beneficiary category, competent list, ceiling, creamy-layer rule, EWS route, horizontal/vertical operation and judicial status are qualified separately.
- **Fiscal discipline:** allocation, release, expenditure, unit cost, beneficiary transfer and outcome are not interchangeable.
- **Data discipline:** retain numerator, denominator, unit, geography, reference period, release date, provisional/final status and survey-versus-administrative character.
- **Causal discipline:** headline change, before-after sequence or cross-state correlation does not establish scheme impact without mechanism and counterfactual limits.
- **PYQ discipline:** exact wording is preserved only when verified; routed or reconstructed demands remain labelled and no model is presented as an official UPSC answer.
- **Current-status note, rechecked 2026-09-03:** volatile law, scheme, judgment, list, budget and dataset claims retain issuing authority, date and operative/interim/final status.

SESSION 1 - FOUNDATION - WHAT THE CHILD-PROTECTION OWNER HOLDS AND HOW IT IS EXAMINED

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Evidence chain: What this owner holds and the demands routed to it Qualified use: Open a child-protection demand by naming which limb of the architecture the question is testing.

Technical definition: Mains: Open a child-protection demand by naming which limb of the architecture the question is testing.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Prelims: Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the child-protection owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.

MUST-WRITE KEYWORDS

- FOUNDATION
- What the child-protection owner holds
- how it is examined
- Evidence chain
- Qualified use
- 2024-2025

How to use them: Frame the answer through FOUNDATION; define What the child-protection owner holds, connect how it is examined with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

WHAT THE CHILD-PROTECTION OWNER HOLDS AND HOW IT IS EXAMINED

01. What this owner holds and the demands routed to it

BOUNDARY -> The macroeconomics of child work and the socialisation demand belong to the Economy and Indian Society owners.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner.

NAMED EVIDENCE AND MECHANISM

- This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner.

EXAMINER CAUTION

- The macroeconomics of child work and the socialisation demand belong to the Economy and Indian Society owners.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the child-protection owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Open a child-protection demand by naming which limb of the architecture the question is testing.

MINI RECAP

- **Evidence chain:** What this owner holds and the demands routed to it
- **Qualified use:** Open a child-protection demand by naming which limb of the architecture the question is testing.

ANSWER-GRABBING FORMULATION: Prelims: Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the child-protection owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.

SESSION 2 - FOUNDATION - THE FOUR LIMBS OF THE CHILD-PROTECTION ARCHITECTURE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

Technical definition: Evidence chain: The four limbs of the child-protection architecture Qualified use: Convert a general complaint into a located diagnosis before proposing any remedy.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: The four limbs of the child-protection architecture Qualified use: Convert a general complaint into a located diagnosis before proposing any remedy.

MUST-WRITE KEYWORDS

- FOUNDATION
- The four limbs of the child-protection architecture
- Evidence chain
- Qualified use
- Saying child protection
- Saying

How to use them: Frame the answer through FOUNDATION; define The four limbs of the child-protection architecture, connect Evidence chain with Qualified use to explain the mechanism, and use Saying child protection for the decisive comparison or qualification.

VISUAL FIRST

THE FOUR LIMBS OF THE CHILD-PROTECTION ARCHITECTURE

01. The four limbs of the child-protection architecture

BOUNDARY -> Saying child protection is weak has not yet located the defect in any one limb.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

NAMED EVIDENCE AND MECHANISM

- The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

EXAMINER CAUTION

- Saying child protection is weak has not yet located the defect in any one limb.

THE SEXUAL-OFFENCES STATUTE, ITS AGE RULE AND ITS PROCEDURE

01. Who is a child and why the sexual-offences statute is gender-neutral

|
v

02. The graded offences and the child-friendly procedure of the 2012 Act

BOUNDARY -> The statute is gender-neutral and reaches offences committed through electronic means.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute.

NAMED EVIDENCE AND MECHANISM

- The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all.

|
v

02. The Board and the Committee are differently constituted bodies

BOUNDARY -> The Committee is not a court hearing an accusation and the Board is not a welfare authority.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.

NAMED EVIDENCE AND MECHANISM

- The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.
- The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.

SESSION 5 - CORE - HEINOUS OFFENCE AND THE PRELIMINARY-ASSESSMENT GATEWAY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.

Technical definition: Evidence chain: Heinous offence and the preliminary assessment gateway Qualified use: State a contested provision in its exact sequence before taking a position on it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.

- The Prohibition
- Child Marriage Act

How to use them: Frame the answer through The child-marriage statute; define the voidable against void distinction, connect Evidence chain with Qualified use to explain the mechanism, and use The Prohibition for the decisive comparison or qualification.

VISUAL FIRST

THE CHILD-MARRIAGE STATUTE AND THE VOIDABLE AGAINST VOID DISTINCTION

01. The child-marriage statute and the voidable against void distinction

BOUNDARY -> A voidable marriage stands until avoided, while only specified situations are void.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

NAMED EVIDENCE AND MECHANISM

- The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

EXAMINER CAUTION

- A voidable marriage stands until avoided, while only specified situations are void.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to The child-marriage statute and the voidable against void distinction, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Use the exact legal consequence rather than a loose description of invalidity.

MINI RECAP

- **Evidence chain:** The child-marriage statute and the voidable against void distinction
- **Qualified use:** Use the exact legal consequence rather than a loose description of invalidity.

ANSWER-GRABBING FORMULATION: Evidence chain: The child-marriage statute and the voidable against void distinction Qualified use: Use the exact legal consequence rather than a loose description of invalidity.

SESSION 10 - CORE - WHY CHILD MARRIAGE PERSISTS AND WHAT PUNISHMENT CANNOT DO

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility.

Technical definition: Evidence chain: Why child marriage persists and what punishment alone cannot do Qualified use: Attach an instrument to each recorded cause instead of relying on prohibition.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: Why child marriage persists and what punishment alone cannot do Qualified use: Attach an instrument to each recorded cause instead of relying on prohibition.

MUST-WRITE KEYWORDS

SESSION 11 - CORE - THE UMBRELLA WELFARE MISSION AND WHAT IT FUNDS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question.

Technical definition: Evidence chain: The umbrella welfare mission and what it funds Qualified use: Separate a delivery failure inside a scheme from a defect in the statute itself.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

SESSION 13 - CORE SYNTHESIS - DIGITAL-ERA HARMS AND THE INSTRUMENTS THAT ALREADY EXIST

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.

Technical definition: The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.

SESSION 14 - CORE SYNTHESIS - SCHEDULED DATA DUTIES AND THE MEASURES THE COMMISSION CAN INITIATE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

Technical definition: The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Prelims: Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Scheduled data duties and the measures the commission can initiate, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.

- Qualified use
- Digital Personal Data Protection Act
- Rules

How to use them: Frame the answer through CORE SYNTHESIS; define Scheduled data duties, connect Evidence chain with Qualified use to explain the mechanism, and use Digital Personal Data Protection Act for the decisive comparison or qualification.

VISUAL FIRST

SCHEDULED DATA DUTIES AND THE MEASURES THE COMMISSION CAN INITIATE

01. The data-protection child regime and its commencement status

|
v

02. What the commission itself can initiate and where its power stops

BOUNDARY -> The child-data duties are scheduled for 13 May 2027 and are not current enforcement.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.

NAMED EVIDENCE AND MECHANISM

- The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.
- The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting

compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.

EXAMINER CAUTION

- The child-data duties are scheduled for 13 May 2027 and are not current enforcement.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Scheduled data duties and the measures the commission can initiate, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Recommend concrete, powers-consistent measures and keep an impending regime in the future tense.

MINI RECAP

- **Evidence chain:** The data-protection child regime and its commencement status -> What the commission itself can initiate and where its power stops
- **Qualified use:** Recommend concrete, powers-consistent measures and keep an impending regime in the future tense.

CLOSING RECALL FLOW - CORE SYNTHESIS - SCHEDULED DATA DUTIES AND THE MEASURES THE COMMISSION CAN INITIATE

START / CONCEPT: CORE SYNTHESIS - Scheduled data duties and the measures the commission can initiate

|
v

EXACT TERMS: CORE SYNTHESIS · Scheduled data duties · Evidence chain · Qualified use · Digital Personal Data Protection Act · Rules

|
v

MECHANISM / ARGUMENT: The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

|
v

CONSEQUENCE / CONTRAST: The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.

|
v

UPSC TRAP / ANSWER-USE: The child-data duties are scheduled for 13 May 2027 and are not current enforcement.

|
v

ANSWER-GRABBING FORMULATION: Prelims: Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Scheduled data duties and the measures the commission can initiate, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.

SESSION 15 - CORE SYNTHESIS - DATED ANCHORS AND THE CASE-DATA DISCIPLINE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Two dated anchors are carried with their issuing survey and year.

Technical definition: Evidence chain: Dated prevalence and scale anchors carried with their sources - The case-data discipline and the honest ownership statement Qualified use: Close a child-protection answer with a dated indicator and an explicit ownership and data boundary.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: Dated prevalence and scale anchors carried with their sources - The case-data discipline and the honest ownership statement Qualified use: Close a child-protection answer with a dated indicator and an explicit ownership and data boundary.

MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Dated anchors
- the case-data discipline
- Evidence chain
- Qualified use
- Subject

How to use them: Frame the answer through CORE SYNTHESIS; define Dated anchors, connect the case-data discipline with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

DATED ANCHORS AND THE CASE-DATA DISCIPLINE

01. Dated prevalence and scale anchors carried with their sources

|

v

02. The case-data discipline and the honest ownership statement

BOUNDARY -> Prevalence, registration, disposal and conviction denominators are not interchangeable.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

NAMED EVIDENCE AND MECHANISM

- Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.
- Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

EXAMINER CAUTION

- Prevalence, registration, disposal and conviction denominators are not interchangeable.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Dated anchors and the case-data discipline, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Close a child-protection answer with a dated indicator and an explicit ownership and data boundary.

MINI RECAP

- **Evidence chain:** Dated prevalence and scale anchors carried with their sources -> The case-data discipline and the honest ownership statement
- **Qualified use:** Close a child-protection answer with a dated indicator and an explicit ownership and data boundary.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Social Justice | **Tier:** Must-Do (foundation) | **GS Paper:** GS-II. **Core area:** Child sexual abuse protection, juvenile justice, child labour prohibition, child marriage prevention, digital-era safety and NCPCR. **Grounded in:** POCSO Act, 2012; Juvenile Justice Act, 2015; Child Labour (Prohibition and Regulation) Amendment Act, 2016; Prohibition of Child Marriage Act, 2006; Mission Vatsalya (MWCD); Commissions for Protection of Child Rights Act, 2005; audited 2025 GS-II PYQ Q18 (NCPCR/digital era). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/06_Children-and-Child-Protection.md.

1. Visual foundation

Core proposition: FACT: Child protection requires protective law (POCSO, PCMA), a specialised justice system (JJ Act), welfare support (Mission Vatsalya) and independent oversight (NCPCR); the digital era introduces new protection challenges - online sexual exploitation, cyberbullying, data privacy - that existing frameworks must adapt to address.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Child (POCSO Act)	Any person below 18 years of age; the Act is gender-neutral.
FACT: POCSO Act, 2012	Protection of Children from Sexual Offences Act - a dedicated statute addressing sexual offences against children, including penetrative/aggravated forms, with mandatory reporting, Special Courts and in-camera proceedings.
FACT: JJ Act, 2015	Juvenile Justice (Care and Protection of Children) Act - distinguishes children in conflict with law (alleged offenders) from children in need of care and protection, with JJBs and CWCs as respective adjudicating/caring bodies. For a 16-18-year-old accused of a heinous offence, the JJB first makes the statutory preliminary assessment; adult treatment is not automatic.
FACT: Juvenile Justice Board (JJB)	A Board (Metropolitan/Judicial Magistrate + two social workers) that deals with children in conflict with law; has the power to conduct inquiry and dispose of cases.
FACT: Child Welfare Committee (CWC)	A Committee (Chairperson + four members) with the power of a Bench of Magistrates, dealing with children in need of care and protection, ordering rehabilitation, foster care or institutional care.
FACT: Child labour (2016 Amendment)	Complete prohibition of employment of children below 14 years in any occupation; adolescents (14-18) prohibited from hazardous occupations - Child Labour (Prohibition and Regulation) Amendment Act, 2016.
FACT: NCPCR	National Commission for Protection of Child Rights - a statutory body under the Commissions for Protection of Child Rights Act, 2005, mandated to examine/review safeguards, inquire into violations and recommend measures.
FACT: ILO Convention 138	Minimum Age Convention: requires a national minimum age for admission to employment/work and progressive abolition of child labour.
FACT: ILO Convention 182	Worst Forms of Child Labour Convention: requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals.
CURRENT: DPDP child-data status	The DPDP Act, 2023 contains child-data safeguards, and the 2025 Rules set phased commencement. As at 21 July 2026, the substantive child-data duties, including verifiable parental consent, are scheduled for 13 May 2027; do not describe them as current enforcement.

3. How child-protection instruments work (mechanism)

- POCSO Act, 2012:** Creates graded offences (penetrative sexual assault, aggravated penetrative assault, sexual harassment, use of child for pornography); mandates reporting by any person having knowledge of an offence; establishes Special Courts for speedy trial; requires in-camera proceedings and child-friendly procedures (assistance of interpreter, special educator, support person).
- JJ Act, 2015:** (a) Children in conflict with law (0-18) are dealt with by JJBs with a rehabilitative focus; (b) for a heinous offence alleged against a child aged 16-18, the JJB conducts the Section 15 preliminary assessment of capacity, understanding and circumstances before it may transfer the matter; the Children's Court then applies the Act's safeguards in deciding treatment. Adult trial is therefore not automatic; (c) children in need of care and protection are dealt with by CWCs, which may order foster care, sponsorship, adoption or institutional care.

3. **Child Labour (2016 Amendment):** Complete prohibition of employment of children (<14) in any occupation or process; adolescents (14-18) are prohibited from hazardous occupations and processes listed in the Schedule. The narrow family-enterprise and child-artist exceptions carry statutory conditions; they are not a general licence for child work.
4. **PCMA, 2006:** Child marriage (boy <21, girl <18) is generally voidable at the option of the party who was a child at marriage; the Act separately makes specified forced, trafficked or abducted-child situations void. Child Marriage Prohibition Officers (CMPOs) are notified to prevent solemnisation and seek injunctions.
5. **Mission Vatsalya (MWCD):** Umbrella child-protection scheme covering institutional care (Child Care Institutions under JJ Act), Child Helpline 1098, sponsorship and foster care, and JJ Act implementation support - restructured from erstwhile Integrated Child Protection Scheme (ICPS).
6. **NCPCR (2005 Act):** Examines and reviews safeguards for children under any law; inquires into complaints and violations; recommends measures for effective implementation of child-rights laws; monitors the implementation of POCSO, JJ Act, RTE Act, etc.

4. Institutions and tools

- FACT: **POCSO Act, 2012:** gender-neutral; child = <18; Special Courts; mandatory reporting; in-camera proceedings; child-friendly procedures.
- FACT: **JJ Act, 2015:** JJBs (conflict with law), CWCs (care and protection); the 16-18 transfer-to-adult-trial provision for heinous offences; rehabilitation-focused.
- FACT: **Child Labour (Prohibition and Regulation) Amendment Act, 2016:** complete ban <14; hazardous-occupation ban 14-18; family-work and apprenticeship exemptions with restrictions.
- FACT: **Prohibition of Child Marriage Act, 2006 (PCMA):** voidable marriage; CMPOs for prevention and injunction.
- FACT: **Mission Vatsalya (MWCD):** Child Care Institutions, Child Helpline 1098, sponsorship/foster care, JJ Act implementation support.
- FACT: **NCPCR (Commissions for Protection of Child Rights Act, 2005):** Chairperson + six Members (at least two women), drawn from the statutory child-rights fields; mandate to examine safeguards, inquire into violations and recommend measures. It is a statutory, not constitutional, body.

5. Indian applications and examples

- FACT: **2025 GS-II PYQ Q18 (15 marks):** "The National Commission for Protection of Child Rights has to address the challenges faced by children in the digital era. Examine the existing policies and suggest measures the Commission can initiate to tackle the issue." - this is the CENTRAL PYQ for this topic. The expected answer must: (a) outline NCPCR's statutory mandate (2005 Act); (b) identify digital-era challenges (online sexual exploitation, CSAM, cyberbullying, data privacy, screen-time/mental-health); (c) examine existing policies (POCSO applicability to online abuse, IT Rules/intermediary obligations, NCPCR's e-Box portal, National Cybercrime Reporting Portal's child-abuse category); (d) suggest NCPCR-led measures (monitoring/complaint mechanism for online exploitation, coordination with intermediaries/police cyber cells, digital-literacy programmes, age-verification advocacy).
- ANALYSIS: A case of online grooming and solicitation of a minor illustrates the intersection of POCSO and IT Act/Rules - the offence is prosecutable under POCSO, and intermediaries have reporting obligations under IT Rules.
- ANALYSIS: A 17-year-old accused of a heinous offence being assessed by the JJB for possible transfer to a Children's Court demonstrates the 16-18 transfer provision under the 2015 JJ Act.
- FACT: **Child-marriage prevalence:** NFHS-6 (2023-24) reported that 20.1% of women aged 20-24 had married before age 18, down from 23.3% in NFHS-5. The variation shows why law must be joined to girls' schooling, safety and household economic security.

- **FACT: Child labour scale:** Census 2011 counted about 10.1 million workers aged 5-14 (main plus marginal workers). This dated measure does not capture every hidden, unpaid or hazardous form.
- **ANALYSIS: POCSO data discipline:** check whether a statistic measures registration, disposal, convictions among disposed cases or convictions among all pending trials; those denominators are not interchangeable.

6. Must-Know Facts for Prelims

- **FACT: POCSO Act, 2012** defines "child" as any person below 18 years; the Act is gender-neutral.
- **FACT: JJ Act, 2015** distinguishes children in conflict with law (JJB) from children in need of care and protection (CWC).
- **FACT: The 2016 Child Labour Amendment** completely prohibits employment of children below 14; hazardous occupations are prohibited for adolescents 14-18.
- **FACT: NCPCR** is a statutory body under the Commissions for Protection of Child Rights Act, 2005, with Chairperson + 6 Members.
- **FACT: Child Helpline 1098** is administered under Mission Vatsalya (MWCD).

7. UPSC traps

- **WRONG:** POCSO Act applies only to female children. -> POCSO is gender-neutral; it protects all children below 18, regardless of gender.
- **WRONG:** All juveniles are tried by JJBs without exception. -> For a heinous offence alleged against a 16-18-year-old, the JJB may transfer the matter after preliminary assessment; adult treatment is not automatic.
- **WRONG:** Child labour is completely banned for all children below 18. -> The 2016 Amendment bans employment of children <14 in all occupations; for adolescents 14-18, only hazardous occupations are prohibited.
- **WRONG:** NCPCR is a constitutional body. -> NCPCR is a statutory body under the 2005 Act; constitutional bodies include NCSC (Art 338), NCST (Art 338A).

8. CURRENT: Current anchor

- **CURRENT:** The 2025 GS-II PYQ Q18 explicitly tests NCPCR's role in digital-era child protection. Existing routes include NCPCR's POCSO e-Box, the National Cybercrime Reporting Portal and the IT Rules' user-notice, takedown and due-diligence obligations. Cite the applicable rule/notice route rather than inventing a universal removal deadline; the durable issue is POCSO-IT-Rules coordination and NCPCR monitoring.
- **CURRENT: DPDP status (21 July 2026):** Child-data provisions in the DPDP Act/Rules are notified on a phased schedule and the substantive child-data duties are due from 13 May 2027. Use them as an impending governance framework, not as a currently enforceable substitute for POCSO/IT-Rules action.

9. PYQ application

- **FACT: 2025 Q18 (15 marks):** structure the answer as: (a) NCPCR's statutory mandate and composition; (b) digital-era challenges - online sexual exploitation, CSAM, cyberbullying, data privacy of minors, screen-time/mental-health; (c) existing policies - POCSO (applicable to online abuse), IT Rules (intermediary reporting obligations), NCPCR e-Box, Cybercrime Portal; (d) NCPCR-led measures - strengthen monitoring/complaint mechanism, coordinate with intermediaries and police cyber cells, digital-literacy and awareness programmes, advocate for age-verification policy.

10. Mains angles

- **ANALYSIS:** Use the POCSO-IT Rules intersection as the default framework for any digital-child-safety question.

- ANALYSIS: Distinguish JJ Act's two categories (conflict vs care) - questions often test whether the candidate understands this basic bifurcation.
- ANALYSIS: Child labour questions require distinguishing the <14 complete ban from the 14-18 hazardous-occupation restriction.

Answer thesis: Child protection in India rests on specialised protective law (POCSO, PCMA, child-labour ban), a rehabilitative justice system (JJ Act's JJB/CWC structure) and statutory oversight (NCPCR); the digital era introduces challenges - online exploitation, cyberbullying, data privacy - that require NCPCR to coordinate POCSO enforcement with IT-Rules-based intermediary obligations and proactive digital- literacy measures, as directly tested by the 2025 GS-II PYQ Q18.

11. Probable questions

- ANALYSIS: **Prelims:** Under which Act is the National Commission for Protection of Child Rights constituted?
- FACT: **Mains (15 marks, 2025 GS-II PYQ Q18):** The National Commission for Protection of Child Rights has to address the challenges faced by children in the digital era. Examine the existing policies and suggest measures the Commission can initiate to tackle the issue.
- ANALYSIS: **Mains (10 marks):** Distinguish between children in conflict with law and children in need of care and protection under the Juvenile Justice Act, 2015.
- ANALYSIS: **Mains (10 marks):** Examine the effectiveness of the Child Labour (Prohibition and Regulation) Amendment Act, 2016, in eliminating child labour in India.

11A. Answer architecture (10/15/20-mark support)

- **Legal chain:** Constitution -> JJ Act -> POCSO -> NCPCR -> Mission Vatsalya.
- **JJ Amendment 2021:** strengthened District Magistrate oversight of adoption and child-care institutions and reclassified specified offences; accountability must preserve specialised child-sensitive decision-making.
- **Digital safety:** grooming, sexual-abuse material, cyberbullying, addictive design, privacy loss and unequal literacy require platform duties, policing, school/parent literacy and accessible reporting.
- **Child marriage:** schooling loss, poverty, safety fears, patriarchy and weak birth registration explain persistence; punishment alone can drive unions underground.

10 marks: right plus three responses. **15 marks:** risks, institutions, gaps and safeguards with 4-6 examples. **20 marks:** lifecycle approach from registration and nutrition to education, digital participation, adolescence and rehabilitation.

Reasoned verdict: Child protection joins prohibition to prevention, family support, child-sensitive institutions and enforceable digital accountability.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025
- **Paper(s):** GS-II
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-II	18	NCPCR and challenges to children in the digital era	Examine and suggest · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- NCPCR and challenges to children in the digital era

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	30	ILO Conventions 138 and 182 subject matter	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- ILO Conventions 138 and 182 subject matter

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CLOSING RECALL FLOW - CORE SYNTHESIS - DATED ANCHORS AND THE CASE-DATA DISCIPLINE

START / CONCEPT: CORE SYNTHESIS - Dated anchors and the case-data discipline

|

v

EXACT TERMS: CORE SYNTHESIS · Dated anchors · the case-data discipline · Evidence chain · Qualified use · Subject

|

v

MECHANISM / ARGUMENT: First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another.

|

v

CONSEQUENCE / CONTRAST: This dated measure does not capture every hidden, unpaid or hazardous form. ANALYSIS: POCSO data discipline: check whether a statistic measures registration, disposal, convictions among disposed cases or convictions among all pending trials; those denominators are not interchangeable.

|

v

UPSC TRAP / ANSWER-USE: The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.

|

v

ANSWER-GRABBING FORMULATION: Evidence chain: Dated prevalence and scale anchors carried with their sources - The case-data discipline and the honest ownership statement Qualified use: Close a child-protection answer with a dated indicator and an explicit ownership and data boundary.

SOCIAL JUSTICE DEEP-REVIEW CORE CONTROL

- **Must remember:** Child rights integrate survival, development, protection and participation, with the best-interests principle, evolving capacities and age-specific safeguards across nutrition, education, labour, marriage, trafficking, care and juvenile justice.
- **Close distinction:** A child is not defined by one uniform age across every statute, child protection is not institutionalisation, rescue is not rehabilitation, legal prohibition is not eradication, and household poverty cannot justify coercive removal without due process.
- **Authority / evidence / implementation limit:** Distinguish JJ Act, POCSO, child-labour and marriage laws, RTE and schemes by purpose and age; map child, family, CWC/JJB, police, school, health system, DCPU, court, grievance and rehabilitation with privacy and participation safeguards.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this owner holds and the demands routed to it?

A. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. B. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. C. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children

below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. D. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

Answer: A. Explanation: This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under What this owner holds and the demands routed to it?

A. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. B. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. C. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: B. Explanation: This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition,

the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this owner holds and the demands routed to it?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. C. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: C. Explanation: This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about What this owner holds and the demands routed to it?

A. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. B. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. C. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. D. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner.

Answer: D. Explanation: This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies The four limbs of the child-protection architecture?

A. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. B. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the

child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. C. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: A. Explanation: The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under The four limbs of the child-protection architecture?

A. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. B. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. C. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. D. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute.

Answer: B. Explanation: The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice

system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of The four limbs of the child-protection architecture?

A. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. B. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. C. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: C. Explanation: The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about The four limbs of the child-protection architecture?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

Answer: D. Explanation: The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Who is a child and why the sexual-offences statute is gender-neutral?

A. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. B. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. C. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two

social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: A. Explanation: The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Who is a child and why the sexual-offences statute is gender-neutral?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. C. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: B. Explanation: The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is

being used before using any age at all. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Who is a child and why the sexual-offences statute is gender-neutral?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. C. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. D. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.

Answer: C. Explanation: The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Who is a child and why the sexual-offences statute is gender-neutral?

A. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. B. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a

hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all.

Answer: D. Explanation: The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies The graded offences and the child-friendly procedure of the 2012 Act?

A. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. B. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. C. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. D. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.

Answer: A. Explanation: The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance

of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under The graded offences and the child-friendly procedure of the 2012 Act?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.

Answer: B. Explanation: The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of The graded offences and the child-friendly procedure of the 2012 Act?

A. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. B. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to

understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. C. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. D. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum.

Answer: C. Explanation: The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about The graded offences and the child-friendly procedure of the 2012 Act?

A. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. B. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute.

Answer: D. Explanation: The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography;

that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies The two categories of the juvenile-justice statute?

A. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. B. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. C. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. D. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.

Answer: A. Explanation: The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under The two categories of the juvenile-justice statute?

A. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. B. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to

have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. C. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. D. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum.

Answer: B. Explanation: The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of The two categories of the juvenile-justice statute?

A. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. B. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. C. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. D. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.

Answer: C. Explanation: The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about The two categories of the juvenile-justice statute?

A. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. B. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. C. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. D. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

Answer: D. Explanation: The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies The Board and the Committee are differently constituted bodies?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. C. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. D. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.

Answer: A. Explanation: The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under The Board and the Committee are differently constituted bodies?

A. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. B. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to

that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.

Answer: B. Explanation: The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of The Board and the Committee are differently constituted bodies?

A. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. B. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. C. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. D. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.

Answer: C. Explanation: The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body

must be named whenever the answer describes a decision about a child. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about The Board and the Committee are differently constituted bodies?

A. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. B. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. C. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. D. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.

Answer: D. Explanation: The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Heinous offence and the preliminary assessment gateway?

A. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. B. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a

hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.

Answer: A. Explanation: The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Heinous offence and the preliminary assessment gateway?

A. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. B. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. C. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. D. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.

Answer: B. Explanation: The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Heinous offence and the preliminary assessment gateway?

A. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. B. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. C. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. D. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.

Answer: C. Explanation: The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Heinous offence and the preliminary assessment gateway?

A. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. B. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. C. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. D. The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.

Answer: D. Explanation: The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies The 2021 amendment and administrative oversight of care?

A. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. B. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. C. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a

child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. D. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.

Answer: A. Explanation: The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under The 2021 amendment and administrative oversight of care?

A. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. B. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. C. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. D. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

Answer: B. Explanation: The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and

monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of The 2021 amendment and administrative oversight of care?

A. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. B. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. C. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. D. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility.

Answer: C. Explanation: The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about The 2021 amendment and administrative oversight of care?

A. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. B. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline

numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. C. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. D. The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum.

Answer: D. Explanation: The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies The child-labour prohibition and its two thresholds?

A. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. B. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. C. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. D. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

Answer: A. Explanation: The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from

hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under The child-labour prohibition and its two thresholds?

A. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. B. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. C. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. D. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility.

Answer: B. Explanation: The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of The child-labour prohibition and its two thresholds?

A. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. B. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a

prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. C. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: C. Explanation: The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about The child-labour prohibition and its two thresholds?

A. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. B. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. C. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline

response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. D. The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.

Answer: D. Explanation: The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies The two labour conventions carried by the routed objective demand?

A. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. B. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. C. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. D. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

Answer: A. Explanation: The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. The remaining options

Q38. Which chronology card should be filed under The two labour conventions carried by the routed objective demand?

A. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. B. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. C. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: B. Explanation: The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of The two labour conventions carried by the routed objective demand?

A. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. B. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social

media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. C. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: C. Explanation: The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about The two labour conventions carried by the routed objective demand?

A. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. B. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal

removal obligation. C. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. D. The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.

Answer: D. Explanation: The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies The child-marriage statute and the voidable against void distinction?

A. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. B. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. C. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the

education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: A. Explanation: The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under The child-marriage statute and the voidable against void distinction?

A. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. B. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. C. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: B. Explanation: The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of The child-marriage statute and the voidable against void distinction?

A. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. B. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. C. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. D. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.

Answer: C. Explanation: The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about The child-marriage statute and the voidable against void distinction?

A. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child

sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. B. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. C. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. D. The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

Answer: D. Explanation: The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Why child marriage persists and what punishment alone cannot do?

A. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. B. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. C. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the

education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. D. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.

Answer: A. Explanation: The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Why child marriage persists and what punishment alone cannot do?

A. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. B. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. C. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. D. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state

the intermediary category and the applicable rule instead of asserting a universal removal obligation.

Answer: B. Explanation: The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Why child marriage persists and what punishment alone cannot do?

A. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. B. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. C. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. D. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation.

Answer: C. Explanation: The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Why child marriage persists and what punishment alone cannot do?

A. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. B. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility.

Answer: D. Explanation: The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies The umbrella welfare mission and what it funds?

A. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. B. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute

although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. C. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: A. Explanation: Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under The umbrella welfare mission and what it funds?

A. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. B. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. C. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences

statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. D. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.

Answer: B. Explanation: Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of The umbrella welfare mission and what it funds?

A. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. B. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. C. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. D. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

Answer: C. Explanation: Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about The umbrella welfare mission and what it funds?

A. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. B. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question.

Answer: D. Explanation: Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies The child-rights commission, its composition and its powers?

A. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. B. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. C. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. D. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

Answer: A. Explanation: The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under The child-rights commission, its composition and its powers?

A. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. B. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation.

Answer: B. Explanation: The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of The child-rights commission, its composition and its powers?

A. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. B. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. C. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. D. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.

Answer: C. Explanation: The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about The child-rights commission, its composition and its powers?

A. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. B. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. C. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. D. The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

Answer: D. Explanation: The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies The digital-era harms the owners actually name?

A. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. B. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. C. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. D. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

Answer: A. Explanation: The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under The digital-era harms the owners actually name?

A. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. B. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.

Answer: B. Explanation: The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of The digital-era harms the owners actually name?

A. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order

an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. B. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. C. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. D. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Answer: C. Explanation: The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about The digital-era harms the owners actually name?

A. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. B. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record

expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. C. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. D. The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.

Answer: D. Explanation: The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies The existing policy instruments for online child safety?

A. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. B. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for

the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

Answer: A. Explanation: The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under The existing policy instruments for online child safety?

A. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. B. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be

joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.

Answer: B. Explanation: The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of The existing policy instruments for online child safety?

A. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. B. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. C. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. D. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Answer: C. Explanation: The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about The existing policy instruments for online child safety?

A. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. B. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. C. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. D. The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation.

Answer: D. Explanation: The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police

cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies The data-protection child regime and its commencement status?

A. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. B. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. C. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. D. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.

Answer: A. Explanation: The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under The data-protection child regime and its commencement status?

A. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. B. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. C. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. D. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.

Answer: B. Explanation: The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of The data-protection child regime and its commencement status?

A. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian

Society owner, and the girl-child overlap is shared with the gender-justice owner. B. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. C. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. D. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Answer: C. Explanation: The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about The data-protection child regime and its commencement status?

A. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. B. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. C. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited

2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. D. The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

Answer: D. Explanation: The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies What the commission itself can initiate and where its power stops?

A. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. B. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. C. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. D. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or

inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Answer: A. Explanation: The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under What the commission itself can initiate and where its power stops?

A. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. B. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. C. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. D. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

Answer: B. Explanation: The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to

assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of What the commission itself can initiate and where its power stops?

A. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. B. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. C. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. D. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

Answer: C. Explanation: The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about What the commission itself can initiate and where its power stops?

A. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. B. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. C. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. D. The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.

Answer: D. Explanation: The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Dated prevalence and scale anchors carried with their sources?

A. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. B. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate

computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. C. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. D. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner.

Answer: A. Explanation: Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Dated prevalence and scale anchors carried with their sources?

A. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. B. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. C. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited

2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner. D. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all.

Answer: B. Explanation: Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Dated prevalence and scale anchors carried with their sources?

A. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. B. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. C. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. D. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all.

Answer: C. Explanation: Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does

not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Dated prevalence and scale anchors carried with their sources?

A. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. B. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. C. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. D. Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.

Answer: D. Explanation: Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies The case-data discipline and the honest ownership statement?

A. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. B. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences

statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. C. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. D. This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner.

Answer: A. Explanation: Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under The case-data discipline and the honest ownership statement?

A. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. B. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. C. The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards,

inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. D. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all.

Answer: B. Explanation: Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of The case-data discipline and the honest ownership statement?

A. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. B. The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all. C. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. D. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute.

Answer: C. Explanation: Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because

those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about The case-data discipline and the honest ownership statement?

A. The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. B. The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. C. The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. D. Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Answer: D. Explanation: Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Exactly one General Studies Mains demand and one objective demand are routed to this topic in the audited routing ledgers, and the ownership is stated openly rather than inflated. The Mains demand is 2025 General Studies Paper II Question 18, reproduced below as a demand card with its printed year, paper, question number, directive, marks and word limit exactly as the audited 2024-2025 Mains routing ledger records them and as the locally held official 2025 General Studies Paper II prints them. The objective demand is 2018 Prelims General Studies Paper I Question 30 on the subject matter of the two international labour conventions numbered 138 and 182, and the audited 2018-2023 Prelims routing ledger records the official keys for that period as not held locally, so no option, key or inferred answer is recorded for it and it is not converted into a solved question. No further Mains demand is claimed for this topic: the audited ledgers route the tribal-knowledge, tribal-diversity and tribal-development demands to the Indian Society owner, the mobile-phone and socialisation demand to the family and kinship owner, and no separate child-labour or juvenile-justice Mains demand appears in the ledgers for the covered years, so none is manufactured here. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demand; no question was invented from them and no marking scheme or page precision was imported. Every model solution below is original work written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the Social Justice demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

- 1. Claim and named evidence:** Define the vulnerable group, deprivation, right or policy concept and distinguish the nearest legal and measured category. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 2. Claim and named evidence:** Identify the constitutional, statutory, judicial or executive basis and the competent Union, state or local institution. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 3. Claim and named evidence:** Map rights-holder, household/community context, duty-bearer, frontline worker, provider and accountability forum. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 4. Claim and named evidence:** Trace identification, eligibility, documentation, finance, access, portability, grievance, appeal and correction. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 5. Claim and named evidence:** Use a named Indian law, judgment, scheme, institution or official dataset with source, date, denominator and status. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal

limit, accessibility, dignity, privacy, portability or residual exclusion.

6. **Claim and named evidence:** Test intersectionality, regional variation, stigma, accessibility, privacy, fiscal adequacy, exclusion and causal limits. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The answer must resolve the Social Justice demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- **FACT: 2025 Q18 (15 marks):** structure the answer as: (a) NCPCR's statutory mandate and composition; (b) digital-era challenges - online sexual exploitation, CSAM, cyberbullying, data privacy of minors, screen-time/mental-health; (c) existing policies - POCSO (applicable to online abuse), IT Rules (intermediary reporting obligations), NCPCR e-Box, Cybercrime Portal; (d) NCPCR-led measures - strengthen monitoring/complaint mechanism, coordinate with intermediaries and police cyber cells, digital-literacy and awareness programmes, advocate for age-verification policy.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025
- **Paper(s):** GS-II
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-II	18	NCPCR and challenges to children in the digital era	Examine and suggest · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- NCPCR and challenges to children in the digital era

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	30	ILO Conventions 138 and 182 subject matter	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- ILO Conventions 138 and 182 subject matter

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

3. Detailed causal chain: NCPCR and digital-era child protection (2025 PYQ Q18)

Challenge identification

1. **Online sexual exploitation:** perpetrators use social media, messaging apps and gaming platforms to contact, groom and exploit children; POCSO applies (sexual assault, use of child for pornography) but detection is difficult.
2. **CSAM proliferation:** encrypted platforms and cloud storage make CSAM distribution harder to trace; intermediary obligations under IT Rules are the first line of defence.
3. **Cyberbullying and harassment:** non-sexual online harm affecting children's mental health; no dedicated statute, but IPC/BNS provisions on intimidation and IT Act provisions on offensive content may apply.
4. **Data privacy of minors:** children's personal data collected by apps/platforms creates a distinct risk. The DPDP Act, 2023 and DPDP Rules, 2025 contain verifiable-parental-consent and child-protection duties, but their substantive child-data obligations are scheduled to commence on 13 May 2027. As at 21 July 2026, describe this as a notified future compliance framework, not current enforcement.

Existing policy response

1. **POCSO applicability:** the Act covers offences committed through electronic means; NCPCR's POCSO e-Box portal allows online reporting of child sexual abuse.
2. **IT Rules (Intermediary Guidelines):** impose user-rule, due-diligence, notice/order, takedown and grievance obligations; some significant intermediaries have additional technology-based measures. State the applicable intermediary category and rule rather than claiming one universal proactive-detection duty.
3. **National Cybercrime Reporting Portal:** dedicated category for reporting child sexual abuse material, routed to state police cyber cells.
4. **NCPCR monitoring:** the Commission tracks POCSO case pendency, issues advisories, and coordinates with MWCD and MeitY on child-online-safety initiatives.

NCPCR-led measures (recommendations for Mains answers)

1. **Strengthen monitoring mechanism:** NCPCR could establish a dedicated digital-child-safety cell to track online exploitation complaints and POCSO e-Box portal effectiveness.
2. **Coordinate with intermediaries:** NCPCR could convene periodic reviews with major platforms to assess CSAM-detection technology deployment and reporting compliance.
3. **Digital-literacy programmes:** NCPCR could recommend integration of cyber-safety modules into school curricula under RTE Act implementation monitoring.
4. **Age-verification advocacy:** NCPCR could recommend policy requiring robust age-verification for access to social-media platforms, gaming and content with age restrictions.
5. **Data-privacy oversight:** NCPCR can prepare coordination with the Data Protection Board/MeitY for the 13 May 2027 child-data regime while using current POCSO and IT mechanisms for immediate harm.

10. PYQ-based analytical application

- FACT: **2025 Q18 (15 marks):** the answer must: (a) establish NCPCR's statutory mandate and composition (2005 Act); (b) identify specific digital-era challenges (online sexual exploitation, CSAM, cyberbullying, data privacy); (c) examine existing policies (POCSO, IT Rules, e-Box, Cybercrime Portal); (d) suggest actionable NCPCR-led measures - dedicated digital-safety cell, platform coordination, school-curriculum cyber-safety, age-verification advocacy, data-protection coordination.

PYQ DEMAND CARD 1 - 2025 General Studies Paper II Question 18

Demand: The National Commission for Protection of Child Rights has to address the challenges faced by children in the digital era; examine the existing policies and suggest measures the Commission can initiate to tackle the issue, 15 marks, 250 words, exactly as recorded in the audited 2024-2025 Mains routing ledger and as printed in the locally held official 2025 General Studies Paper II.

Status: Routed to this owner in the audited 2024-2025 Mains routing ledger as the owning topic. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: the existing policy framework is substantially complete on the offence and only partial on the platform duty, so the measures the Commission can initiate must be monitoring, convening and recommending measures rather than enforcement it does not possess. Named evidence and example: the Commissions for Protection of Child Rights Act, 2005, under which the Commission has a Chairperson and six Members of whom at least two are women and the powers to examine and review safeguards under any law, inquire into complaints and violations, recommend measures, inspect institutions where children reside and issue advisories; the four named digital harms of online sexual exploitation, proliferation of child sexual exploitation and abuse material, cyberbullying and the data privacy of minors, with screen time and mental health recorded as emerging; the existing instruments, namely the Protection of Children from Sexual Offences Act, 2012 which reaches offences committed through electronic means, the Commission's own electronic reporting box, the national cybercrime reporting portal with its dedicated child-abuse category routed to State police cyber cells, and the intermediary guidelines rules with their user-rule, notice or order, takedown and cooperation duties and additional due diligence for significant intermediaries; and the recorded status that the child-data duties under the data-protection regime, including verifiable parental consent, are scheduled to commence on 13 May 2027 and as at 21 July 2026 are not current enforcement. Analysis: the examination shows an offence layer that already covers online abuse, a reporting layer that exists in two separate channels, a platform layer that is category-specific rather than uniform and a data layer that is notified but not yet operative, so the gaps are coordination, visibility of outcomes and readiness rather than absence of law; the measures the Commission can therefore initiate are a dedicated digital-child-safety monitoring cell tracking online exploitation complaints and the performance of its own reporting box, periodic compliance reviews convened with major platforms on detection and reporting, a recommendation to integrate cyber-safety modules into school curricula using its existing power to monitor implementation of the education entitlement, advocacy for robust age verification for social-media, gaming and age-restricted content, and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 regime. Qualification: the Commission cannot order a takedown or impose a platform sanction,

so each measure is framed within recommendatory and monitoring powers; no complaint, takedown, case or coverage figure is asserted; no universal proactive-detection duty or removal deadline is attributed to all intermediaries; and the data-protection duties are kept in the future tense with their scheduled date. Why this earns marks: it obeys both verbs in the stem by examining before suggesting, it names four instruments and four harms precisely, and every suggested measure is one the Commission is statutorily able to initiate.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 1 - 2025 General Studies Paper II Question 18”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: the existing policy framework is substantially complete on the offence and only partial on the platform duty, so the measures the Commission can initiate must be monitoring, convening and recommending measures rather than enforcement it does not possess. Named evidence and example: the Commissions for Protection of Child Rights Act, 2005, under which the Commission has a Chairperson and six Members of whom at least two are women and the powers to examine and review safeguards under any law, inquire into complaints and violations, recommend measures, inspect institutions where children reside and issue advisories; the four named digital harms of online sexual exploitation, proliferation of child sexual exploitation and abuse material, cyberbullying and the data privacy of minors, with screen time and mental health recorded as emerging; the existing instruments, namely the Protection of Children from Sexual Offences Act, 2012 which reaches offences committed through electronic means, the Commission's own electronic reporting box, the national cybercrime reporting portal with its dedicated child-abuse category routed to State police cyber cells, and the intermediary guidelines rules with their user-rule, notice or order, takedown and cooperation duties and additional due diligence for significant intermediaries; and the recorded status that the child-data duties under the data-protection regime, including verifiable parental consent, are scheduled to commence on 13 May 2027 and as at 21 July 2026 are not current enforcement. Why this earns marks: it obeys both verbs in the stem by examining before suggesting, it names four instruments and four harms precisely, and every suggested measure is one the Commission is statutorily able to initiate.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2025 General Studies Paper II Question 18", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish a child in conflict with law from a child in need of care and protection under the Juvenile Justice (Care and Protection of Children) Act, 2015, and explain why the distinction decides the institution, the purpose and the outcome. Answer in about 150 words.

Model thesis: The two categories are separate jurisdictions rather than two labels, so the answer must name the body, the composition and the disposal available under each and then show what goes wrong when a care case is routed into an accusation track.

Claim -> named evidence -> analysis -> qualification:

- The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate

holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.

- The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.
- Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question.
- The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.

Qualified conclusion: The two categories are separate jurisdictions rather than two labels, so the answer must name the body, the composition and the disposal available under each and then show what goes wrong when a care case is routed into an accusation track.

Demand decoding: The directive **answer** requires a direct position on “Distinguish a child in conflict with law from a child in need of care and protection under...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The two categories are separate jurisdictions rather than two labels, so the answer must name the body, the composition and the disposal available under each and then show what goes wrong when a care case is routed into an accusation track.

Analytical body:

1. **Claim and named evidence:** The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child. **Analysis:** Connect right or deprivation -> institutional duty and eligibility

rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

3. **Claim and named evidence:** Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The two categories are separate jurisdictions rather than two labels, so the answer must name the body, the composition and the disposal available under each and then show what goes wrong when a care case is routed into an accusation track.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Distinguish a child in conflict with law from a child in need of care and protection under...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Examine whether the child-labour law of 2016 prohibits child work or regulates it. Answer in about 150 words.

Model thesis: The statute does both at different ages, so the examination must set the complete ban below fourteen against the hazard-limited ban for adolescents, place the conditional exceptions accurately and test the design against a dated scale measure with its own limits.

Claim -> named evidence -> analysis -> qualification:

- The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.
- The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.
- Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.
- Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Qualified conclusion: The statute does both at different ages, so the examination must set the complete ban below fourteen against the hazard-limited ban for adolescents, place the conditional exceptions accurately and test the design against a dated scale measure with its own limits.

Demand decoding: The directive **examine** requires a direct position on "Examine whether the child-labour law of 2016 prohibits child work or regulates it. Answer in...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The statute does both at different ages, so the examination must set the complete ban below fourteen against the hazard-limited ban for adolescents, place the conditional exceptions accurately and test the design against a dated scale measure with its own limits.

Analytical body:

- 1. Claim and named evidence:** The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 2. Claim and named evidence:** The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 3. Claim and named evidence:** Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 4. Claim and named evidence:** Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The statute does both at different ages, so the examination must set the complete ban below fourteen against the hazard-limited ban for adolescents, place the conditional exceptions accurately and test the design against a dated scale measure with its own limits.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Examine whether the child-labour law of 2016 prohibits child work or regulates it. Answer in...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Critically examine the preliminary-assessment gateway for children aged sixteen to eighteen accused of heinous offences. Answer in about 250 words.

Model thesis: The gateway is a safeguard whose value depends on capacity, so the critical examination must state the statutory sequence exactly, weigh public-safety and rehabilitative claims against each other and close on the assessment infrastructure the sequence presumes.

Claim -> named evidence -> analysis -> qualification:

- The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.
- The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.
- The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.
- The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum.

Qualified conclusion: The gateway is a safeguard whose value depends on capacity, so the critical examination must state the statutory sequence exactly, weigh public-safety and rehabilitative claims against each other and close

on the assessment infrastructure the sequence presumes.

Demand decoding: The directive **critically examine** requires a direct position on “Critically examine the preliminary-assessment gateway for children aged sixteen to eighteen...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The gateway is a safeguard whose value depends on capacity, so the critical examination must state the statutory sequence exactly, weigh public-safety and rehabilitative claims against each other and close on the assessment infrastructure the sequence presumes.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess whether prohibition alone can end child marriage in India. Answer in about 250 words.

Model thesis: Prohibition changes visibility more reliably than it changes the household calculation, so the assessment must state the voidable and void distinction precisely, name the recorded causes of persistence and attach an instrument to each cause before concluding.

Claim -> named evidence -> analysis -> qualification:

- The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.
- The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility.
- Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.
- Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the

mission while a defect in the categories or procedures is a statutory question.

Qualified conclusion: Prohibition changes visibility more reliably than it changes the household calculation, so the assessment must state the voidable and void distinction precisely, name the recorded causes of persistence and attach an instrument to each cause before concluding.

Demand decoding: The directive **assess** requires a direct position on “Assess whether prohibition alone can end child marriage in India. Answer in about 250 words.”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

ORIGINAL MAINS 5 - 20 MARKS

Question: Analyse how India's existing legal instruments address online harm to children, and identify where the framework is complete and where it is only impending. Answer in about 300 words.

Model thesis: The framework is complete on the offence and partial on the platform duty, so the analysis must separate the electronic reach of the sexual-offences statute from the category-specific intermediary duty and must place the data-protection child regime in its scheduled rather than current status.

Claim -> named evidence -> analysis -> qualification:

- The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.
- The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation.
- The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive

child-data duties, including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

- The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute.

Qualified conclusion: The framework is complete on the offence and partial on the platform duty, so the analysis must separate the electronic reach of the sexual-offences statute from the category-specific intermediary duty and must place the data-protection child regime in its scheduled rather than current status.

Demand decoding: The directive **analyse** requires a direct position on “Analyse how India's existing legal instruments address online harm to children, and identify...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The framework is complete on the offence and partial on the platform duty, so the analysis must separate the electronic reach of the sexual-offences statute from the category-specific intermediary duty and must place the data-protection child regime in its scheduled rather than current status.

Analytical body:

1. **Claim and named evidence:** The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

4. **Claim and named evidence:** The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The framework is complete on the offence and partial on the platform duty, so the analysis must separate the electronic reach of the sexual-offences statute from the category-specific intermediary duty and must place the data-protection child regime in its scheduled rather than current status.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Analyse how India's existing legal instruments address online harm to children, and identify...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate the proposition that statutory oversight is the weakest link in India's child-protection system. Answer in about 300 words.

Model thesis: Oversight is recommendatory by design rather than weak by accident, so the evaluation must state the commission's composition and actual powers, show what it can initiate, locate the enforcement lever elsewhere and test the claim against the delivery and data limbs.

Claim -> named evidence -> analysis -> qualification:

- The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the

education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.

- The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.
- Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question.
- Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Qualified conclusion: Oversight is recommendatory by design rather than weak by accident, so the evaluation must state the commission's composition and actual powers, show what it can initiate, locate the enforcement lever elsewhere and test the claim against the delivery and data limbs.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate the proposition that statutory oversight is the weakest link in India's child-...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Oversight is recommendatory by design rather than weak by accident, so the evaluation must state the commission's composition and actual powers, show what it can initiate, locate the enforcement lever elsewhere and test the claim against the delivery and data limbs.

Analytical body:

1. **Claim and named evidence:** The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the

two levels is a condition of effective monitoring. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

2. **Claim and named evidence:** The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Oversight is recommendatory by design rather than weak by accident, so the evaluation must state the commission's composition and actual powers, show what it can initiate, locate the enforcement lever elsewhere and test the claim against the delivery and data limbs.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Evaluate the proposition that statutory oversight is the weakest link in India's child-...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Social Justice | **Tier:** Advanced | **GS Paper:** GS-II. **Core area:** POCSO-digital intersection, JJ Act transfer mechanism, NCPDR's monitoring powers, digital-era policy gaps and NCPDR-led reform measures. **Grounded in:** POCSO Act, 2012; JJ Act, 2015; Child Labour Amendment, 2016; PCMA, 2006; Commissions for Protection of Child Rights Act, 2005; IT Rules (Intermediary Guidelines); audited 2025 GS-II PYQ Q18. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/06_Children-and-Child-Protection.md.

1. Architecture

CHILD PROTECTION MATRIX

2. Concepts and distinctions

Concept	Precise meaning
FACT: Heinous offence (JJ Act, 2015)	An offence for which the minimum punishment under IPC/BNS is imprisonment of 7 years or more. For a child aged 16-18, the JJB first makes the Section 15 preliminary assessment; transfer and any adult treatment are not automatic.
FACT: Preliminary assessment (JJ Act)	The JJB's assessment of mental/physical capacity, ability to understand consequences and circumstances of the alleged heinous offence. It is the gateway to a possible Section 18(3) transfer, after which the Children's Court applies the Act's safeguards.
FACT: CSEAM / CSAM terminology	"Child sexual exploitation and abuse material" is the child-protective term increasingly used in legal discourse; the statute may still use older terminology. In an answer, use the current legal term when quoting a provision and CSEAM/CSAM when explaining the harm.
FACT: Intermediary obligations (IT Rules)	Intermediaries must publish user rules barring child-sexual content and comply with the rule-prescribed notice/order, takedown and cooperation duties. Significant intermediaries have additional due-diligence measures; do not claim that every intermediary has the same proactive-detection duty or deadline.
ANALYSIS: NCPCR vs SCPCR	NCPCR is the national-level Commission; State Commissions for Protection of Child Rights (SCPCRs) perform parallel functions at state level - coordination between the two is essential for effective monitoring.
ANALYSIS: Online grooming	The process by which an adult builds a relationship with a child online with the intent to exploit - a POCSO-applicable offence when it leads to sexual solicitation or abuse.

3. Detailed causal chain: NCPCR and digital-era child protection (2025 PYQ Q18)

Challenge identification

- Online sexual exploitation:** perpetrators use social media, messaging apps and gaming platforms to contact, groom and exploit children; POCSO applies (sexual assault, use of child for pornography) but detection is difficult.
- CSAM proliferation:** encrypted platforms and cloud storage make CSAM distribution harder to trace; intermediary obligations under IT Rules are the first line of defence.
- Cyberbullying and harassment:** non-sexual online harm affecting children's mental health; no dedicated statute, but IPC/BNS provisions on intimidation and IT Act provisions on offensive content may apply.
- Data privacy of minors:** children's personal data collected by apps/platforms creates a distinct risk. The DPDP Act, 2023 and DPDP Rules, 2025 contain verifiable-parental-consent and child-protection duties, but their substantive child-data obligations are scheduled to commence on 13 May 2027. As at 21 July 2026, describe this as a notified future compliance framework, not current enforcement.

Existing policy response

- POCSO applicability:** the Act covers offences committed through electronic means; NCPCR's POCSO e-Box portal allows online reporting of child sexual abuse.
- IT Rules (Intermediary Guidelines):** impose user-rule, due-diligence, notice/order, takedown and grievance obligations; some significant intermediaries have additional technology-based measures. State the applicable intermediary category and rule rather than claiming one universal proactive-detection duty.

3. **National Cybercrime Reporting Portal:** dedicated category for reporting child sexual abuse material, routed to state police cyber cells.

4. **NCPCR monitoring:** the Commission tracks POCSO case pendency, issues advisories, and coordinates with MWCD and MeitY on child-online-safety initiatives.

NCPCR-led measures (recommendations for Mains answers)

1. **Strengthen monitoring mechanism:** NCPCR could establish a dedicated digital-child-safety cell to track online exploitation complaints and POCSO e-Box portal effectiveness.

2. **Coordinate with intermediaries:** NCPCR could convene periodic reviews with major platforms to assess CSAM-detection technology deployment and reporting compliance.

3. **Digital-literacy programmes:** NCPCR could recommend integration of cyber-safety modules into school curricula under RTE Act implementation monitoring.

4. **Age-verification advocacy:** NCPCR could recommend policy requiring robust age-verification for access to social-media platforms, gaming and content with age restrictions.

5. **Data-privacy oversight:** NCPCR can prepare coordination with the Data Protection Board/MeitY for the 13 May 2027 child-data regime while using current POCSO and IT mechanisms for immediate harm.

4. Institutional and reform architecture

- FACT: **NCPCR (2005 Act) powers:** (a) examine and review safeguards provided under any law for the protection of child rights; (b) inquire into complaints and violations; (c) recommend measures for effective implementation of child-rights laws; (d) inspect institutions where children are detained or reside; (e) issue advisories.

- FACT: **NCPCR composition:** Chairperson + six Members, with at least two women, appointed from the statutory fields of child welfare and rights. Avoid inventing a fixed one-member-per-portfolio allocation.

- ANALYSIS: **NCPCR limitations:** advisory/recommendatory powers only; cannot enforce orders like a court; effectiveness depends on executive follow-up and inter-ministerial coordination (MWCD, MHA, MeitY).

- ANALYSIS: **JJ Act 16-18 transfer provision:** controversial for diluting the juvenile-justice principle of rehabilitation; the preliminary-assessment mechanism is a safeguard but depends on JJB capacity and psychological-evaluation infrastructure.

5. Indian applications and boundary cases

- ANALYSIS: A case where a child's explicit images are shared on a messaging platform: POCSO (use of child for pornography), IT Rules (intermediary reporting obligation) and Cybercrime Portal (reporting channel) all apply - a Mains answer should show this multi-instrument interplay.

- ANALYSIS: A 16-year-old accused of a heinous offence: the JJB must conduct the preliminary assessment; only after that statutory gateway may it transfer the matter to a Children's Court. This illustrates the 2015 Act's exceptional, not automatic, departure from the rehabilitative route.

- ANALYSIS: A social-media platform failing to comply with an applicable notice/order/takedown duty may trigger MeitY enforcement; NCPCR can flag the child-rights impact but cannot itself impose the platform sanction.

6. Limitations and trade-offs

- ANALYSIS: **Rehabilitation vs deterrence (JJ Act 16-18 provision):** a possible transfer after preliminary assessment addresses public-safety concerns but risks undermining the rehabilitative principle of juvenile justice - a live policy tension.

- ANALYSIS: **Intermediary liability vs encryption:** child-safety detection/response duties may conflict with end-to-end encryption and privacy safeguards - a technology-policy trade-off NCPCR must navigate.

- ANALYSIS: **NCPCR capacity:** a single national Commission overseeing POCSO, JJ Act, RTE,

child labour and now digital-era challenges faces bandwidth constraints; coordination with SCPCRs and sectoral ministries is essential.

7. Must-Know Facts for Advanced Prelims

- FACT: JJ Act, 2015 permits a JJB, after preliminary assessment of a 16-18-year-old accused of a heinous offence, to transfer the matter to a Children's Court; adult treatment is not automatic.
- FACT: IT Rules impose intermediary due diligence and takedown/response duties; additional technology measures depend on the intermediary category and applicable rule.
- FACT: NCPCR's POCSO e-Box portal enables online reporting of child sexual abuse.
- FACT: NCPCR has recommendatory/advisory powers; it cannot enforce orders like a court.

8. Advanced Prelims traps

- WRONG: All children below 18 are tried only by JJBs under JJ Act. -> For heinous offences, children aged 16-18 may be transferred to a Children's Court after preliminary assessment.
- WRONG: NCPCR can order intermediaries to remove CSAM. -> NCPCR has recommendatory powers; IT Rules and MeitY/MHA enforcement are the operative mechanisms.
- WRONG: POCSO applies only to offline offences. -> POCSO covers offences committed through electronic means, including use of child for pornography distributed online.

9. CURRENT: Current-anchor note

- CURRENT: **Digital-law status (21 July 2026):** POCSO e-Box, Cybercrime Portal and IT Rules are the current policy instruments. DPDP child-data obligations are notified for phased commencement on 13 May 2027, so they are an impending addition rather than current enforcement. NCPCR's advisory/monitoring role remains the coordination lever.

10. PYQ-based analytical application

- FACT: **2025 Q18 (15 marks):** the answer must: (a) establish NCPCR's statutory mandate and composition (2005 Act); (b) identify specific digital-era challenges (online sexual exploitation, CSAM, cyberbullying, data privacy); (c) examine existing policies (POCSO, IT Rules, e-Box, Cybercrime Portal); (d) suggest actionable NCPCR-led measures - dedicated digital-safety cell, platform coordination, school-curriculum cyber-safety, age-verification advocacy, data-protection coordination.

11. Mains-ready framework

Central thesis: NCPCR's statutory mandate to examine safeguards and recommend measures extends to the digital era, where online sexual exploitation, CSAM, cyber-bullying and data-privacy risks demand coordinated action across POCSO enforcement, IT Rules-based intermediary obligations and proactive digital-literacy initiatives. The 2025 GS-II PYQ Q18 tests whether candidates can move beyond generic "awareness" recommendations to concrete, policy-linked measures.

1. **Establish NCPCR's mandate:** Commissions for Protection of Child Rights Act, 2005; Chairperson + 6 Members; powers to examine, inquire, recommend, inspect.
2. **Identify digital-era challenges:** online sexual exploitation, CSAM, cyberbullying, data privacy of minors, screen-time/mental-health.
3. **Map existing policies:** POCSO (applicable to online offences), IT Rules (intermediary obligations), POCSO e-Box, Cybercrime Portal.
4. **Propose NCPCR-led measures:** dedicated digital-safety monitoring cell, periodic platform-compliance reviews, school-curriculum integration, age-verification advocacy, coordination with Data Protection Board.
5. **Flag limitations:** NCPCR's advisory-only powers require executive follow-up; encryption-detection trade-off; capacity constraints.

12. Probable questions

- ANALYSIS: **Prelims:** Which body is empowered to examine and review safeguards for children under the Commissions for Protection of Child Rights Act, 2005?
- FACT: **Mains (15 marks, 2025 GS-II PYQ Q18):** The National Commission for Protection of Child Rights has to address the challenges faced by children in the digital era. Examine the existing policies and suggest measures the Commission can initiate to tackle the issue.
- ANALYSIS: **Mains (10 marks):** Critically examine the provision allowing transfer of children aged 16-18 to adult trial for heinous offences under the Juvenile Justice Act, 2015.
- ANALYSIS: **Mains (10 marks):** How effective are the IT (Intermediary Guidelines) Rules in addressing the proliferation of child sexual abuse material online?

CONSOLIDATED REGISTER NOTES

Children and Child Protection: RAPID RIGHT, SCHEME AND MEASURED-OUTCOME MAP

1. **What this owner holds and the demands routed to it:** This topic owns the child half of the protection argument, namely the dedicated sexual-offences statute, the juvenile-justice system with its two separate tracks, the child-labour prohibition, the child-marriage statute, the umbrella child-welfare mission and the statutory child-rights commission, together with the digital-era extension of all of them; its distinctive feature is a single, very precise verified Mains route rather than a dense one, because the audited 2024-2025 ledger routes exactly one General Studies Mains demand here, the 2025 General Studies Paper II Question 18 on the child-rights commission and children in the digital era, while the audited 2018-2023 Prelims ledger routes one objective demand on two labour conventions whose official key it records as not held locally; the macroeconomics of child labour belongs to the Economy owner, the socialisation and family dimension to the Indian Society owner, and the girl-child overlap is shared with the gender-justice owner.
2. **The four limbs of the child-protection architecture:** The owners describe the architecture as four limbs that must not be merged: protection from harm through the sexual-offences statute and the child-marriage statute; a specialised justice system under the juvenile-justice statute with its separate boards and committees; welfare and care through the umbrella mission that funds institutions, helpline, sponsorship and foster care; and independent statutory oversight through the child-rights commission that examines safeguards, inquires into violations and recommends measures; the analytical payoff is that a failure can be located in exactly one limb, so an answer that says child protection is weak has not yet said whether the defect is in the offence definition, in the adjudicating body, in the funded service or in the monitoring.
3. **Who is a child and why the sexual-offences statute is gender-neutral:** The Protection of Children from Sexual Offences Act, 2012 defines a child as any person below eighteen years of age and is gender-neutral, so it protects all children below that age regardless of gender, and the owners flag as a recurring trap the belief that it protects only female children; the age boundary is a single bright line for this statute, which distinguishes it from the child-labour statute where fourteen and eighteen operate as two different thresholds and from the child-marriage statute where the ages recorded for a boy and a girl differ, so the examinable discipline is to state which statute's age rule is being used before using any age at all.
4. **The graded offences and the child-friendly procedure of the 2012 Act:** The owners record that the 2012 Act creates graded offences including penetrative sexual assault, aggravated penetrative sexual assault, sexual

harassment and use of a child for pornography; that it mandates reporting by any person having knowledge of an offence; that it establishes Special Courts for speedy trial; and that it requires in-camera proceedings and child-friendly procedures with the assistance of an interpreter, a special educator or a support person; they also record that the Act covers offences committed through electronic means, which is the doorway through which the whole digital-era argument enters this topic rather than requiring a new statute.

5. **The two categories of the juvenile-justice statute:** The Juvenile Justice (Care and Protection of Children) Act, 2015 divides children into two categories that carry different institutions, different purposes and different outcomes: a child in conflict with law is one alleged or found to have committed an offence and is dealt with by a Juvenile Justice Board on a rehabilitative footing, while a child in need of care and protection is dealt with by a Child Welfare Committee which may order foster care, sponsorship, adoption or institutional care; the owners note that examiners frequently test whether a candidate holds this bifurcation, because collapsing the two turns a care jurisdiction into a criminal one in the answer itself.
6. **The Board and the Committee are differently constituted bodies:** The owners record the composition and the character of both bodies: the Juvenile Justice Board consists of a Metropolitan or Judicial Magistrate together with two social workers and has the power to conduct an inquiry and to dispose of cases concerning children in conflict with law, while the Child Welfare Committee consists of a Chairperson and four members and exercises the powers of a Bench of Magistrates in respect of children in need of care and protection; the practical consequence is that the Committee is not a court hearing an accusation and the Board is not a welfare authority, so the correct body must be named whenever the answer describes a decision about a child.
7. **Heinous offence and the preliminary assessment gateway:** The owners define a heinous offence under the 2015 Act as one for which the minimum punishment under the general penal law is imprisonment of seven years or more, and they state the transfer mechanism with precision: for a child aged sixteen to eighteen alleged to have committed such an offence, the Board first conducts the preliminary assessment under Section 15 of the child's mental and physical capacity, ability to understand the consequences of the offence and the circumstances in which the offence was allegedly committed, and only after that statutory gateway may it order the transfer contemplated by Section 18(3), after which the Children's Court applies the Act's safeguards; adult treatment is therefore exceptional and never automatic, and the recurring trap is to describe it as automatic.
8. **The 2021 amendment and administrative oversight of care:** The owners record that the 2021 amendment to the juvenile-justice statute strengthened District Magistrate oversight of adoption and of child-care institutions and reclassified specified offences, and they attach an analytical caution to that change, namely that administrative accountability must not displace specialised child-sensitive decision-making; the examinable point is that the amendment moved certain decisions from a judicial or quasi-judicial route to an executive one in the name of speed and monitoring, so an answer about it must weigh faster clearance and closer inspection of institutions against the loss of a specialised forum.
9. **The child-labour prohibition and its two thresholds:** The Child Labour (Prohibition and Regulation) Amendment Act, 2016 sets two different rules that must not be merged: employment of a child below fourteen years is completely prohibited in any occupation or process, while an adolescent aged fourteen to eighteen is prohibited only from hazardous occupations and processes listed in the Schedule; the owners further record that the family-enterprise and child-artist exceptions carry statutory conditions and are not a general licence for child work, so the accurate formulation is a complete ban below fourteen, a hazard-limited ban between fourteen and eighteen, and narrow conditional exceptions, and the trap is to state a single ban for everyone below eighteen.
10. **The two labour conventions carried by the routed objective demand:** The owners record the subject matter of the two conventions that the audited Prelims ledger routes to this topic: Convention 138, the Minimum Age Convention, requires a national minimum age for admission to employment or work and the progressive abolition of child labour, while Convention 182, the Worst Forms of Child Labour Convention, requires urgent elimination of slavery-like practices, trafficking, forced recruitment, commercial sexual exploitation, illicit activities and work likely to harm children's health, safety or morals; the discipline is that one convention sets an age floor and the other targets categories of work irrespective of a single age rule, and no option, key or answer is recorded for that objective demand because the ledger records the official key as not held locally.
11. **The child-marriage statute and the voidable against void distinction:** The Prohibition of Child Marriage Act, 2006 records the age thresholds as below twenty-one for a boy and below eighteen for a girl, and it makes a child marriage generally voidable at the option of the party who was a child at the time of the marriage, while separately

making specified situations void, namely those involving force, trafficking or an abducted child; the Act also provides for the notification of Child Marriage Prohibition Officers to prevent solemnisation and to seek injunctions; the examinable precision is that voidable is not the same as void, because a voidable marriage stands until the party who was a child elects to avoid it, whereas a void marriage has no legal existence from the outset.

12. **Why child marriage persists and what punishment alone cannot do:** The owners record the causes of persistence as schooling loss, poverty, safety fears, patriarchy and weak birth registration, and they attach an explicit policy caution that punishment alone can drive such unions underground; the analytical shape of the argument is therefore that a prohibition changes the visible price of the practice without changing the household calculation that produces it, so an answer must join the statute to girls' schooling, to safety on the route to school, to household economic security and to reliable registration of births and marriages, each of which is the instrument that changes the calculation rather than the visibility.
13. **The umbrella welfare mission and what it funds:** Mission Vatsalya is recorded by the owners as the umbrella child-protection scheme of the Ministry of Women and Child Development, restructured from the earlier integrated child-protection scheme, and it carries institutional care through Child Care Institutions established under the juvenile-justice statute, the Child Helpline numbered 1098, sponsorship and foster care, and implementation support for the juvenile-justice statute itself; the boundary that matters in an answer is that the mission funds the delivery of a statutory system rather than creating any entitlement of its own, so a defect in placement, care standards or helpline response is a delivery failure within the mission while a defect in the categories or procedures is a statutory question.
14. **The child-rights commission, its composition and its powers:** The National Commission for Protection of Child Rights is constituted under the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women, drawn from the statutory fields of child welfare and rights, and the owners caution against inventing a fixed one-member-per-portfolio allocation; its recorded powers are to examine and review the safeguards provided for the protection of child rights under any law, to inquire into complaints and violations, to recommend measures for effective implementation of child-rights laws, to inspect institutions where children are detained or reside and to issue advisories, and it monitors implementation of the sexual-offences statute, the juvenile-justice statute and the education entitlement; it is statutory and not constitutional, its powers are recommendatory rather than enforceable like a court's, and State Commissions perform parallel functions at State level so that coordination between the two levels is a condition of effective monitoring.
15. **The digital-era harms the owners actually name:** The owners name four digital-era harms with a fifth emerging concern rather than leaving the phrase abstract: online sexual exploitation, in which perpetrators use social media, messaging and gaming platforms to contact, groom and exploit children; the proliferation of child sexual exploitation and abuse material, made harder to trace by encrypted platforms and cloud storage; cyberbullying and harassment, which is a non-sexual online harm affecting mental health for which there is no dedicated statute although general provisions on intimidation and offensive content may apply; and the data privacy of minors whose personal data is collected by applications and platforms, with screen time and mental health recorded as an emerging concern; the owners also record that the child-protective term child sexual exploitation and abuse material should be used when explaining the harm while the statute's own term is used when quoting a provision.
16. **The existing policy instruments for online child safety:** The owners record four existing instruments and refuse to overstate any of them: the sexual-offences statute of 2012 itself, because it covers offences committed through electronic means including use of a child for pornography distributed online; the commission's own electronic complaint route, the e-Box, which allows online reporting of child sexual abuse; the national cybercrime reporting portal, which carries a dedicated category for reporting child sexual abuse material that is routed to State police cyber cells; and the intermediary guidelines rules, under which intermediaries must publish user rules barring child-sexual content and must comply with the rule-prescribed notice or order, takedown and cooperation duties, with additional due-diligence measures for significant intermediaries; the express caution is that not every intermediary carries the same proactive-detection duty or deadline, so an answer must state the intermediary category and the applicable rule instead of asserting a universal removal obligation.
17. **The data-protection child regime and its commencement status:** The owners record that the Digital Personal Data Protection Act, 2023 contains child-data safeguards and that the 2025 Rules set a phased commencement, and they state the status with a date: as at 21 July 2026 the substantive child-data duties,

including verifiable parental consent, are scheduled to commence on 13 May 2027, so the regime is a notified future compliance framework and not current enforcement; the examinable consequence is that an answer written in this period must use the sexual-offences statute and the intermediary rules for immediate harm and must treat the data-protection duties as impending, because describing a scheduled duty as an existing one is precisely the status error this folder is built to prevent.

18. **What the commission itself can initiate and where its power stops:** The owners convert the commission's statutory mandate into measures it can actually initiate: a dedicated digital-child-safety monitoring cell to track online exploitation complaints and the effectiveness of its own electronic complaint route; periodic review meetings with major platforms to assess detection technology and reporting compliance; a recommendation that cyber-safety modules be integrated into school curricula, using its existing power to monitor implementation of the education entitlement; advocacy for robust age verification for access to social-media platforms, gaming and age-restricted content; and preparatory coordination with the data-protection authority and the electronics ministry for the 2027 child-data regime; the limit is equally explicit, because the commission cannot order an intermediary to remove material or impose a platform sanction, those levers belonging to the rules and to the enforcing ministries, so its instrument is monitoring, convening and recommendation.
19. **Dated prevalence and scale anchors carried with their sources:** Two dated anchors are carried with their issuing survey and year. The sixth round of the National Family Health Survey for 2023-24 reported that 20.1 per cent of women aged twenty to twenty-four had married before the age of eighteen, down from 23.3 per cent in the fifth round, and the owners attach the caution that variation across this measure shows why law must be joined to girls' schooling, safety and household economic security. The 2011 Census counted about 10.1 million workers aged five to fourteen, counting main and marginal workers together, and the owners record expressly that this dated measure does not capture every hidden, unpaid or hazardous form of child work; neither value may be updated, rounded or re-attributed to another instrument.
20. **The case-data discipline and the honest ownership statement:** Two boundaries close this topic. First, the owners impose a denominator discipline on case statistics under the sexual-offences statute, requiring an answer to check whether a figure measures registration, disposal, convictions among disposed cases or convictions among all pending trials, because those denominators are not interchangeable and a conviction rate computed on one of them says nothing about another. Second, ownership is stated openly: the audited 2024-2025 Mains ledger routes exactly one Mains demand to this topic, namely 2025 General Studies Paper II Question 18, which is reproduced below as a demand card; the audited 2018-2023 Prelims ledger routes one objective demand on the two labour conventions and records the official key as not held locally, so no option or inferred answer is recorded and it is not converted into a solved question; and demands on tribal knowledge, family socialisation or the macroeconomics of child work are routed elsewhere and are not claimed here.

Children and Child Protection: CLOSE-OPTION AND ENTITLEMENT TRAPS

- Do not describe the Protection of Children from Sexual Offences Act, 2012 as protecting only female children, because it is gender-neutral and applies to any person below eighteen years.
- Do not carry one age rule across statutes, because the sexual-offences statute uses a single boundary of eighteen while the child-labour statute uses fourteen and eighteen as two different thresholds.
- Do not merge a child in conflict with law with a child in need of care and protection, because the first is dealt with by a Juvenile Justice Board and the second by a Child Welfare Committee.
- Do not describe transfer of a sixteen to eighteen year old as automatic, because the Board must first make the preliminary assessment under Section 15 before any transfer contemplated by Section 18(3).
- Do not state a general seven-year rule as the definition of a child offender, because the seven-year minimum punishment defines a heinous offence and not the child.
- Do not present the 2021 amendment as purely administrative housekeeping, because it moved adoption and institution oversight to the District Magistrate and reclassified specified offences.
- Do not state that child labour is banned for everyone below eighteen, because the complete ban applies below fourteen while adolescents aged fourteen to eighteen are barred only from hazardous occupations and processes.
- Do not treat the family-enterprise and child-artist exceptions as a general licence, because they carry statutory conditions.

- Do not swap the two labour conventions, because Convention 138 sets a minimum age for admission to employment while Convention 182 targets the worst forms of child labour.
- Do not record or infer an option for the routed objective demand on the two labour conventions, because the ledger records the official 2018-2023 Prelims keys as not held locally.
- Do not describe a child marriage as void as a general rule, because it is generally voidable at the option of the party who was a child while only specified forced, trafficked or abducted-child situations are void.
- Do not call the National Commission for Protection of Child Rights a constitutional body, because it is statutory under the Commissions for Protection of Child Rights Act, 2005.
- Do not claim that the commission can order an intermediary to remove material, because its powers are recommendatory and enforcement lies with the rules and the enforcing ministries.
- Do not assert a universal proactive-detection duty or a single removal deadline for all intermediaries, because the duty depends on the intermediary category and the applicable rule.
- Do not describe the child-data duties under the data-protection regime as currently enforceable, because as at 21 July 2026 they are scheduled to commence on 13 May 2027.
- Do not state that the sexual-offences statute does not reach online abuse, because it covers offences committed through electronic means.
- Do not update or round the dated anchors, because the child-marriage prevalence of 20.1 per cent, down from 23.3 per cent, belongs to the sixth survey round and the figure of about 10.1 million workers aged five to fourteen belongs to the 2011 Census.
- Do not compare a conviction rate with a registration count, because registration, disposal, convictions among disposed cases and convictions among all pending trials use different denominators.

Children and Child Protection: ANSWER-WRITING SPINE

NAME THE DEPRIVATION OR CLAIM -> IDENTIFY THE RIGHT-HOLDER AND THE DUTY-BEARER
-> SEPARATE THE CONSTITUTIONAL OR STATUTORY ENTITLEMENT FROM THE SCHEME THAT CARRIES IT
-> TRACE ADMINISTRATIVE DELIVERY: IDENTIFICATION, ENROLMENT, ACCESS, QUALITY
-> TEST THE MEASURED OUTCOME AGAINST THE INPUT, NAMING SURVEY, ROUND AND YEAR
-> SEPARATE INCLUSION ERROR FROM EXCLUSION ERROR AND COVERAGE FROM CAPABILITY
-> CLOSE WITH A GRADED VERDICT AND AN EXPLICIT INDICATOR OR STATUS CAVEAT

Children and Child Protection: DATED-INDICATOR AND STATUS BOUNDARY

One live official page was verified for this topic on 2026-09-02. The Ministry of Women and Child Development's official page, read on that date, records that the Ministry came into existence as a separate Ministry with effect from 30 January 2006, that it had been a Department under the Ministry of Human Resources Development since 1985, and that it was constituted with the prime intention of addressing gaps in State action for women and children and of promoting inter-ministerial and inter-sectoral convergence to create gender-equitable and child-centred legislation, policies and programmes. That statement is used only for what it says, namely the ministry's date of creation, its predecessor status and its convergence mandate, which is directly relevant because the umbrella child-welfare mission and the child-rights commission both sit under this ministry, and nothing further has been inferred from it. Two further official checks were attempted on the same date, namely the child-rights commission's about page and its home page, and both returned a not-found error or a redirect notice only, so nothing was read or used from them and no secondary summary, coaching site or news report has been treated as an official source. The package therefore relies on the dated official anchors already carried by the repository owners, each cited with its issuing instrument, edition or survey round: the Protection of Children from Sexual Offences Act, 2012 with its definition of a child as any person below eighteen, its gender-neutral scope, its graded offences, mandatory reporting, Special Courts, in-camera proceedings and its reach over offences committed through electronic means; the Juvenile Justice (Care and Protection of Children) Act, 2015 with its two categories, the composition of the Juvenile Justice Board and of the Child Welfare Committee, the definition of a heinous offence as one carrying a minimum punishment of seven years or more, the Section 15 preliminary assessment and the Section 18(3) transfer route to the Children's Court; the 2021 amendment with its District Magistrate oversight of adoption and child-care institutions and its reclassification of specified offences; the Child Labour (Prohibition and Regulation) Amendment Act, 2016 with its complete prohibition below fourteen, its hazardous-occupation prohibition for adolescents aged fourteen to eighteen and its conditional family-enterprise and child-artist exceptions; the subject matter of International Labour Organization Conventions 138

and 182; the Prohibition of Child Marriage Act, 2006 with its recorded thresholds, its voidable general rule, its void specified situations and its Child Marriage Prohibition Officers; Mission Vatsalya with Child Care Institutions, the Child Helpline numbered 1098 and sponsorship and foster care; the Commissions for Protection of Child Rights Act, 2005 with a Chairperson and six Members of whom at least two are women and recommendatory powers; the electronic reporting box, the national cybercrime reporting portal and the intermediary guidelines rules with category-specific duties; the recorded status as at 21 July 2026 that the child-data duties under the Digital Personal Data Protection Act, 2023 and the 2025 Rules, including verifiable parental consent, are scheduled to commence on 13 May 2027; the sixth-round National Family Health Survey child-marriage prevalence of 20.1 per cent of women aged twenty to twenty-four, down from 23.3 per cent in the fifth round; and the 2011 Census count of about 10.1 million workers aged five to fourteen counting main and marginal workers together. No case registration, disposal, conviction, takedown, complaint, institution, placement or coverage count is asserted, no budget or expenditure figure is asserted, no National Crime Records Bureau, Periodic Labour Force Survey, NITI Aayog or Sustainable Development Goal value is asserted, no legal or constitutional provision is invented or upgraded in status, no scheduled duty is described as current enforcement, and no previous-year question, official answer key or option is asserted or inferred.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Four limbs

PROTECTION FROM HARM -> sexual-offences statute 2012; child-marriage statute 2006
 JUSTICE SYSTEM -> juvenile-justice statute 2015; Board for conflict, Committee for care
 WELFARE AND CARE -> Mission Vatsalya; institutions, helpline 1098, sponsorship, foster care
 OVERSIGHT -> child-rights commission under the 2005 Act; examine, inquire, recommend, inspect
 USE -> locate the failure in one limb before proposing any remedy
 MUST REMEMBER: Child rights integrate survival, development, protection and...

ASCII MASTER FLOW - PANEL 2/12: Age rules by statute

SEXUAL OFFENCES 2012 -> child is any person below 18; the Act is gender-neutral
 CHILD LABOUR 2016 -> complete ban below 14; hazardous-only ban for ages 14 to 18
 CHILD MARRIAGE 2006 -> boy below 21 and girl below 18 recorded as the thresholds
 JUVENILE JUSTICE 2015 -> 16 to 18 band matters only for a heinous offence
 TRAP -> never carry one statute's age rule into another statute

ASCII MASTER FLOW - PANEL 3/12: Two tracks compared

CONFLICT WITH LAW -> Juvenile Justice Board; Magistrate plus two social workers
 PURPOSE -> inquiry and disposal on a rehabilitative footing
 CARE AND PROTECTION -> Child Welfare Committee; Chairperson plus four members
 POWER -> exercises the powers of a Bench of Magistrates; foster care, sponsorship, adoption
 ERROR -> routing a care case into an accusation track changes the whole outcome

ASCII MASTER FLOW - PANEL 4/12: Transfer sequence

STEP 1 -> offence alleged against a child aged 16 to 18
-> STEP 2: is the minimum punishment seven years or more, making it a heinous offence
-> STEP 3: Board conducts the Section 15 preliminary assessment of capacity and circumstances
-> STEP 4: only then may transfer under Section 18(3) follow to the Children's Court
LIMIT -> adult treatment is exceptional and never automatic

ASCII MASTER FLOW - PANEL 5/12: Offence and procedure card

GRADED OFFENCES -> penetrative assault, aggravated penetrative assault, sexual harassment
ALSO -> use of a child for pornography, including through electronic means
REPORTING -> mandatory for any person having knowledge of an offence
FORUM -> Special Courts; proceedings in camera
SUPPORT -> interpreter, special educator or support person for the child

ASCII MASTER FLOW - PANEL 6/12: Conventions pair

CONVENTION 138 -> Minimum Age Convention; a national minimum age for admission to work
AIM -> progressive abolition of child labour through an age floor
CONVENTION 182 -> Worst Forms of Child Labour Convention
AIM -> urgent elimination of slavery-like practice, trafficking, forced recruitment
ALSO -> commercial sexual exploitation, illicit activity, work harming health or morals

ASCII MASTER FLOW - PANEL 7/12: Marriage validity ladder

GENERAL RULE -> a child marriage is voidable at the option of the party who was a child
EFFECT -> the marriage stands in law until that party elects to avoid it
SPECIFIED SITUATIONS -> force, trafficking or an abducted child make the marriage void
PREVENTION -> Child Marriage Prohibition Officers may prevent solemnisation, seek injunction
TRAP -> writing void where the statute says voidable changes the legal consequence

ASCII MASTER FLOW - PANEL 8/12: Persistence and instruments

CAUSES -> schooling loss, poverty, safety fears, patriarchy, weak birth registration
-> PROHIBITION alone changes visibility rather than the household calculation
-> INSTRUMENTS: girls' schooling, safe travel, household economic security, registration
-> RESULT: the calculation changes and the practice falls rather than hides
CAUTION -> punishment alone can drive such unions underground

ASCII MASTER FLOW - PANEL 9/12: Welfare mission card

MISSION VATSALYA -> umbrella child-protection scheme, restructured from the earlier scheme
INSTITUTIONS -> Child Care Institutions established under the juvenile-justice statute
HELPLINE -> Child Helpline numbered 1098
FAMILY-BASED CARE -> sponsorship and foster care
BOUNDARY -> it funds statutory delivery; it creates no entitlement of its own

ASCII MASTER FLOW - PANEL 10/12: Commission design

STATUTE -> Commissions for Protection of Child Rights Act, 2005; statutory, not constitutional
COMPOSITION -> Chairperson and six Members, of whom at least two are women
POWERS -> examine safeguards, inquire into violations, recommend, inspect, issue advisories
PARALLEL -> State Commissions perform the same functions at State level
LIMIT -> recommendatory; it cannot make an order that binds like a court
CLOSE DISTINCTION: A child is not defined by one uniform age across every statute, child...

ASCII MASTER FLOW - PANEL 11/12: Online harm and instrument map

ONLINE SEXUAL EXPLOITATION -> sexual-offences statute reaches electronic means
ABUSE MATERIAL -> cybercrime reporting portal category routed to State police cyber cells
PLATFORM DUTY -> intermediary rules; notice or order, takedown and cooperation duties
SIGNIFICANT INTERMEDIARIES -> additional due diligence; not one universal detection duty
COMPLAINT ROUTE -> the commission's electronic reporting box for child sexual abuse
EVIDENCE LIMIT: AUTHORITY / IMPLEMENTATION: Distinguish JJ Act, POCSO, child-labour and...

ASCII MASTER FLOW - PANEL 12/12: Status and boundary

NOW -> sexual-offences statute, intermediary rules and reporting portals are operative
STATUS DATE -> as at 21 July 2026 the child-data duties are not in force
SCHEDULED -> substantive child-data duties including verifiable parental consent from 13 May 2027
DATED ANCHORS -> child marriage 20.1 per cent from 23.3; about 10.1 million workers aged 5 to 14
DENOMINATORS -> registration, disposal and conviction bases are not interchangeable
