

SOLVED PRACTICE WORKBOOK

Social Justice, Inclusion and Welfare-State Framework - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Social Justice, Inclusion and Welfare-State Framework - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which statement correctly identifies What this owner holds and why the whole folder depends on it?	6
Q2. Which chronology card should be filed under What this owner holds and why the whole folder depends on it?	6
Q3. Which option preserves the source-bounded meaning of What this owner holds and why the whole folder depends on it?	7
Q4. Which statement avoids a close-option trap about What this owner holds and why the whole folder depends on it?	8
Q5. Which statement correctly identifies Formal equality, substantive equality and capability equality?	8
Q6. Which chronology card should be filed under Formal equality, substantive equality and capability equality?	9
Q7. Which option preserves the source-bounded meaning of Formal equality, substantive equality and capability equality?	9
Q8. Which statement avoids a close-option trap about Formal equality, substantive equality and capability equality?	10
Q9. Which statement correctly identifies Distributive justice and what it asks?	11
Q10. Which chronology card should be filed under Distributive justice and what it asks?	11
Q11. Which option preserves the source-bounded meaning of Distributive justice and what it asks?	12
Q12. Which statement avoids a close-option trap about Distributive justice and what it asks?	12
Q13. Which statement correctly identifies Corrective justice and what it asks?	13
Q14. Which chronology card should be filed under Corrective justice and what it asks?	13
Q15. Which option preserves the source-bounded meaning of Corrective justice and what it asks?	14
Q16. Which statement avoids a close-option trap about Corrective justice and what it asks?	14
Q17. Which statement correctly identifies Recognitive justice and what it asks?	15
Q18. Which chronology card should be filed under Recognitive justice and what it asks?	16
Q19. Which option preserves the source-bounded meaning of Recognitive justice and what it asks?	16
Q20. Which statement avoids a close-option trap about Recognitive justice and what it asks?	17
Q21. Which statement correctly identifies The welfare state as the institutional vehicle in the Indian Constitution?	17
Q22. Which chronology card should be filed under The welfare state as the institutional vehicle in the Indian Constitution?	18
Q23. Which option preserves the source-bounded meaning of The welfare state as the institutional vehicle in the Indian Constitution?	19
Q24. Which statement avoids a close-option trap about The welfare state as the institutional vehicle in the Indian Constitution?	19
Q25. Which statement correctly identifies Functionings and capabilities in Amartya Sen's framework?	20

Q26. Which chronology card should be filed under Functionings and capabilities in Amartya Sen's framework?	21
Q27. Which option preserves the source-bounded meaning of Functionings and capabilities in Amartya Sen's framework?	21
Q28. Which statement avoids a close-option trap about Functionings and capabilities in Amartya Sen's framework?	22
Q29. Which statement correctly identifies Nussbaum's central capabilities as a threshold specification?	23
Q30. Which chronology card should be filed under Nussbaum's central capabilities as a threshold specification?	23
Q31. Which option preserves the source-bounded meaning of Nussbaum's central capabilities as a threshold specification?	24
Q32. Which statement avoids a close-option trap about Nussbaum's central capabilities as a threshold specification?	25
Q33. Which statement correctly identifies Rawls's difference principle as a distributive standard?	25
Q34. Which chronology card should be filed under Rawls's difference principle as a distributive standard?	26
Q35. Which option preserves the source-bounded meaning of Rawls's difference principle as a distributive standard?	27
Q36. Which statement avoids a close-option trap about Rawls's difference principle as a distributive standard?	27
Q37. Which statement correctly identifies Fraser's triad and Ambedkar's warning about political equality?	28
Q38. Which chronology card should be filed under Fraser's triad and Ambedkar's warning about political equality?	29
Q39. Which option preserves the source-bounded meaning of Fraser's triad and Ambedkar's warning about political equality?	29
Q40. Which statement avoids a close-option trap about Fraser's triad and Ambedkar's warning about political equality?	30
Q41. Which statement correctly identifies ILO Recommendation 202 and the social protection floor?	30
Q42. Which chronology card should be filed under ILO Recommendation 202 and the social protection floor?	31
Q43. Which option preserves the source-bounded meaning of ILO Recommendation 202 and the social protection floor?	32
Q44. Which statement avoids a close-option trap about ILO Recommendation 202 and the social protection floor?	33
Q45. Which statement correctly identifies Universalism against targeting as a design choice?	34
Q46. Which chronology card should be filed under Universalism against targeting as a design choice?	34
Q47. Which option preserves the source-bounded meaning of Universalism against targeting as a design choice?	35
Q48. Which statement avoids a close-option trap about Universalism against targeting as a design choice?	36
Q49. Which statement correctly identifies Inclusion error against exclusion error?	36
Q50. Which chronology card should be filed under Inclusion error against exclusion error?	37
Q51. Which option preserves the source-bounded meaning of Inclusion error against exclusion error?	38
Q52. Which statement avoids a close-option trap about Inclusion error against exclusion error?	38
Q53. Which statement correctly identifies Horizontal and vertical equity in affirmative action?	39
Q54. Which chronology card should be filed under Horizontal and vertical equity in affirmative action?	40
Q55. Which option preserves the source-bounded meaning of Horizontal and vertical equity in affirmative action?	40
Q56. Which statement avoids a close-option trap about Horizontal and vertical equity in affirmative action?	41

Q57. Which statement correctly identifies Residual, institutional and hybrid welfare states?	42
Q58. Which chronology card should be filed under Residual, institutional and hybrid welfare states?	42
Q59. Which option preserves the source-bounded meaning of Residual, institutional and hybrid welfare states?	43
Q60. Which statement avoids a close-option trap about Residual, institutional and hybrid welfare states?	44
Q61. Which statement correctly identifies Rights-based against charity-based welfare and the paper-promise risk?	45
Q62. Which chronology card should be filed under Rights-based against charity-based welfare and the paper-promise risk?	45
Q63. Which option preserves the source-bounded meaning of Rights-based against charity-based welfare and the paper-promise risk?	46
Q64. Which statement avoids a close-option trap about Rights-based against charity-based welfare and the paper-promise risk?	47
Q65. Which statement correctly identifies The five-stage welfare mechanism from Constitution to measured outcome?	48
Q66. Which chronology card should be filed under The five-stage welfare mechanism from Constitution to measured outcome?	48
Q67. Which option preserves the source-bounded meaning of The five-stage welfare mechanism from Constitution to measured outcome?	49
Q68. Which statement avoids a close-option trap about The five-stage welfare mechanism from Constitution to measured outcome?	50
Q69. Which statement correctly identifies The five recurring welfare gaps?	51
Q70. Which chronology card should be filed under The five recurring welfare gaps?	52
Q71. Which option preserves the source-bounded meaning of The five recurring welfare gaps?	52
Q72. Which statement avoids a close-option trap about The five recurring welfare gaps?	53
Q73. Which statement correctly identifies Multi-dimensional Indian applications and the boundary case?	54
Q74. Which chronology card should be filed under Multi-dimensional Indian applications and the boundary case?	54
Q75. Which option preserves the source-bounded meaning of Multi-dimensional Indian applications and the boundary case?	55
Q76. Which statement avoids a close-option trap about Multi-dimensional Indian applications and the boundary case?	56
Q77. Which statement correctly identifies Commissions, the measurement boundary and honest question ownership?	57
Q78. Which chronology card should be filed under Commissions, the measurement boundary and honest question ownership?	57
Q79. Which option preserves the source-bounded meaning of Commissions, the measurement boundary and honest question ownership?	58
Q80. Which statement avoids a close-option trap about Commissions, the measurement boundary and honest question ownership?	59

Social Justice, Inclusion and Welfare-State Framework - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this owner holds and why the whole folder depends on it?

A. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. B. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. C. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. D. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met.

Answer: A. Explanation: This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under What this owner holds and why the whole folder depends on it?

A. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. B. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies

the lens through which both are argued. C. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. D. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched.

Answer: B. Explanation: This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this owner holds and why the whole folder depends on it?

A. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. B. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. C. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. D. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980.

Answer: C. Explanation: This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about What this owner holds and why the whole folder depends on it?

A. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. B. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. C. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. D. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued.

Answer: D. Explanation: This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Formal equality, substantive equality and capability equality?

A. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. B. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. C. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. D. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the

dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched.

Answer: A. Explanation: Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Formal equality, substantive equality and capability equality?

A. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. B. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. C. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. D. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met.

Answer: B. Explanation: Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Formal equality, substantive equality and capability equality?

A. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. B. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health,

disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. C. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. D. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980.

Answer: C. Explanation: Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Formal equality, substantive equality and capability equality?

A. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. B. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. C. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. D. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion.

Answer: D. Explanation: Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. The remaining

Q9. Which statement correctly identifies Distributive justice and what it asks?

A. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. B. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. C. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. D. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980.

Answer: A. Explanation: Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Distributive justice and what it asks?

A. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. B. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. C. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. D. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched.

Answer: B. Explanation: Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest

conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Distributive justice and what it asks?

A. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. B. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. C. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. D. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980.

Answer: C. Explanation: Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Distributive justice and what it asks?

A. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. B. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. C. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. D. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without

remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact.

Answer: D. Explanation: Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Corrective justice and what it asks?

A. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. B. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. C. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. D. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete.

Answer: A. Explanation: Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Corrective justice and what it asks?

A. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. B. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. C. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. D. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must

secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified.

Answer: B. Explanation: Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Corrective justice and what it asks?

A. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. D. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified.

Answer: C. Explanation: Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Corrective justice and what it asks?

A. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that

misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. D. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met.

Answer: D. Explanation: Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Recognitive justice and what it asks?

A. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. B. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of *Minerva Mills* in 1980. C. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. D. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete.

Answer: A. Explanation: Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Recognitive justice and what it asks?

A. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. B. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. C. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. D. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete.

Answer: B. Explanation: Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Recognitive justice and what it asks?

A. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. D. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution.

Answer: C. Explanation: Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer,

and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Recognitive justice and what it asks?

A. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. B. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched.

Answer: D. Explanation: Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies The welfare state as the institutional vehicle in the Indian Constitution?

A. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes

yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. D. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified.

Answer: A. Explanation: The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under The welfare state as the institutional vehicle in the Indian Constitution?

A. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. B. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. C. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. D. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric.

Answer: B. Explanation: The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of The welfare state as the institutional vehicle in the Indian Constitution?

A. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. D. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution.

Answer: C. Explanation: The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about The welfare state as the institutional vehicle in the Indian Constitution?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care

including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of *Minerva Mills* in 1980.

Answer: D. Explanation: The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of *Minerva Mills* in 1980. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Functionings and capabilities in Amartya Sen's framework?

A. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. D. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified.

Answer: A. Explanation: Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Functionings and capabilities in Amartya Sen's framework?

A. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. B. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric.

Answer: B. Explanation: Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Functionings and capabilities in Amartya Sen's framework?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. C. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal

capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. D. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation.

Answer: C. Explanation: Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Functionings and capabilities in Amartya Sen's framework?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete.

Answer: D. Explanation: Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is

that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Nussbaum's central capabilities as a threshold specification?

A. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution.

Answer: A. Explanation: Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Nussbaum's central capabilities as a threshold specification?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. C. The Social

Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution.

Answer: B. Explanation: Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Nussbaum's central capabilities as a threshold specification?

A. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. B. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. C. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. D. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action.

Answer: C. Explanation: Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Nussbaum's central capabilities as a threshold specification?

A. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. D. Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified.

Answer: D. Explanation: Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Rawls's difference principle as a distributive standard?

A. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. B. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national

law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. C. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. D. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action.

Answer: A. Explanation: John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Rawls's difference principle as a distributive standard?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. C. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. D. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation.

Answer: B. Explanation: John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability

approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Rawls's difference principle as a distributive standard?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. D. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Answer: C. Explanation: John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Rawls's difference principle as a distributive standard?

A. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. D. John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a

defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric.

Answer: D. Explanation: John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Fraser's triad and Ambedkar's warning about political equality?

A. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. B. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through.

Answer: A. Explanation: Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Fraser's triad and Ambedkar's warning about political equality?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. C. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. D. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Answer: B. Explanation: Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Fraser's triad and Ambedkar's warning about political equality?

A. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. D. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it

is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Answer: C. Explanation: Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Fraser's triad and Ambedkar's warning about political equality?

A. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. B. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. C. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. D. Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution.

Answer: D. Explanation: Nancy Fraser's redistribution, recognition and representation triad connects stigma and political voice to material exclusion and establishes that misrecognition is itself a distributive barrier rather than a separate cultural grievance, and it is paired in the owners with Ambedkar's warning against sustaining political equality alongside continuing social and economic inequality; the qualification recorded with the triad is equally examinable, namely that identity recognition cannot substitute for services, assets and employment, so recognition strengthens an answer only when it is argued together with distribution. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies ILO Recommendation 202 and the social protection floor?

A. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and

gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. B. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. C. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. D. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Answer: A. Explanation: The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under ILO Recommendation 202 and the social protection floor?

A. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. B. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. C. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical

equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. D. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move.

Answer: B. Explanation: The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of ILO Recommendation 202 and the social protection floor?

A. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. B. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. C. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. D. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.

Answer: C. Explanation: The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by

prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about ILO Recommendation 202 and the social protection floor?

A. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. B. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. C. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. D. The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation.

Answer: D. Explanation: The Social Protection Floors Recommendation, 2012, numbered 202, was adopted by the International Labour Conference and, on the International Labour Organization's own page read on 2 September 2026, provides guidance to member States in building comprehensive social security systems by prioritising national floors of social protection accessible to all in need, comprising at least four basic guarantees, namely access to essential health care including maternity care, basic income security for children providing access to nutrition, education, care and other necessary goods and services, basic income security for persons of active age unable to earn sufficient income in cases such as sickness, unemployment, maternity and disability, and basic income security for older persons; its stated principles include the overall and primary responsibility of the State, a rights-based approach based on entitlements prescribed by national law, progressive realisation, universality of protection based on social solidarity, non-discrimination and

gender equality, and tripartite participation, and it is a Recommendation rather than a ratified Convention, so it creates no self-executing domestic legal obligation. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Universalism against targeting as a design choice?

A. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. D. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Answer: A. Explanation: Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Universalism against targeting as a design choice?

A. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. B. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. C. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical

equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. D. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.

Answer: B. Explanation: Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Universalism against targeting as a design choice?

A. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. B. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. C. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. D. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice.

Answer: C. Explanation: Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Universalism against targeting as a design choice?

A. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. B. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action.

Answer: D. Explanation: Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Inclusion error against exclusion error?

A. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. B. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. C. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. D. Rights-based welfare frames the

citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.

Answer: A. Explanation: Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Inclusion error against exclusion error?

A. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. B. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. C. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. D. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move.

Answer: B. Explanation: Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Inclusion error against exclusion error?

A. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. B. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. C. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. D. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.

Answer: C. Explanation: Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Inclusion error against exclusion error?

A. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. B. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. C. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative

livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. D. Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through.

Answer: D. Explanation: Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Horizontal and vertical equity in affirmative action?

A. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. B. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. C. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. D. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move.

Answer: A. Explanation: Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Horizontal and vertical equity in affirmative action?

A. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. B. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.

Answer: B. Explanation: Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Horizontal and vertical equity in affirmative action?

A. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. B. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. C. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage,

and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. D. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction.

Answer: C. Explanation: Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Horizontal and vertical equity in affirmative action?

A. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. B. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Answer: D. Explanation: Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification

disputes and boundary cases such as creamy-layer exclusion arise. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Residual, institutional and hybrid welfare states?

A. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. B. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice.

Answer: A. Explanation: A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Residual, institutional and hybrid welfare states?

A. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. B. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. C. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled

Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. D. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction.

Answer: B. Explanation: A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Residual, institutional and hybrid welfare states?

A. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. B. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. C. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. D. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner.

Answer: C. Explanation: A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Residual, institutional and hybrid welfare states?

A. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. B. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. C. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. D. A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move.

Answer: D. Explanation: A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Rights-based against charity-based welfare and the paper-promise risk?

A. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. B. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner.

Answer: A. Explanation: Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Rights-based against charity-based welfare and the paper-promise risk?

A. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. B. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. C. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which

combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. D. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation.

Answer: B. Explanation: Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Rights-based against charity-based welfare and the paper-promise risk?

A. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. B. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. C. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. D. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their

mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation.

Answer: C. Explanation: Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Rights-based against charity-based welfare and the paper-promise risk?

A. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. B. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. C. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. D. Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.

Answer: D. Explanation: Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies The five-stage welfare mechanism from Constitution to measured outcome?

A. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. B. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation.

Answer: A. Explanation: The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under The five-stage welfare mechanism from Constitution to measured outcome?

A. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. B. The mechanism runs from a

constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. C. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. D. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner.

Answer: B. Explanation: The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of The five-stage welfare mechanism from Constitution to measured outcome?

A. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. B. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion.

C. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. D. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued.

Answer: C. Explanation: The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about The five-stage welfare mechanism from Constitution to measured outcome?

A. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. B. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. C. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. D. The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice.

Answer: D. Explanation: The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies The five recurring welfare gaps?

A. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. B. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. C. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. D. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner.

Answer: A. Explanation: The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under The five recurring welfare gaps?

A. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. B. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. C. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. D. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued.

Answer: B. Explanation: The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of The five recurring welfare gaps?

A. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. B. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. C. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what

is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. D. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion.

Answer: C. Explanation: The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about The five recurring welfare gaps?

A. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. B. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. C. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. D. The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction.

Answer: D. Explanation: The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Multi-dimensional Indian applications and the boundary case?

A. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. B. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. C. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. D. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion.

Answer: A. Explanation: Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Multi-dimensional Indian applications and the boundary case?

A. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. B. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory

entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. C. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. D. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued.

Answer: B. Explanation: Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Multi-dimensional Indian applications and the boundary case?

A. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. B. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. C. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. D. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be

rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion.

Answer: C. Explanation: Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Multi-dimensional Indian applications and the boundary case?

A. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. B. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. C. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. D. Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner.

Answer: D. Explanation: Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Commissions, the measurement boundary and honest question ownership?

A. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. B. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. C. This topic owns the evaluative vocabulary of the entire Social Justice folder, namely the three dimensions of justice, the welfare-state concept, the capability standard, the universalism-versus-targeting design choice and the rights-based framing, and its distinctive feature is that it is simultaneously conceptual and directly examined: four General Studies Mains demands in the audited routing ledgers are routed to it, from 2019, 2023, 2024 and 2025, so it must be learned as an answer instrument rather than as background theory; the constitutional doctrine of the Directive Principles belongs to the Polity owner and the mechanics of poverty and human-development measurement belong to the Economy owner, while this topic supplies the lens through which both are argued. D. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact.

Answer: A. Explanation: Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Commissions, the measurement boundary and honest question ownership?

A. Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion. B. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where

recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. C. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. D. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact.

Answer: B. Explanation: Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Commissions, the measurement boundary and honest question ownership?

A. Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact. B. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. C. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. D. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met.

Answer: C. Explanation: Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by

giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Commissions, the measurement boundary and honest question ownership?

A. The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of Minerva Mills in 1980. B. Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met. C. Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched. D. Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation.

Answer: D. Explanation: Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Four General Studies Mains demands are routed to this topic in the audited routing ledgers and each is reproduced below as a demand card with its printed year, paper, question number, directive, marks and word limit exactly as the ledger records them: 2019 General Studies Paper II Question 6, 2023 General Studies Paper I Question 16, 2024 General Studies Paper I Question 18 and 2025 General Studies Paper II Question 16. No objective demand is routed to this topic in the audited 2018-2023, 2024-2025 or 2026 Prelims ledgers, so no objective card is manufactured, no official answer key is consulted or inferred for this topic and no option is recorded. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demands; no question was invented from them, no stem was paraphrased into an apparent routing, and no marking scheme or page precision was imported. Every model solution below is original work written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern, and none of them reproduces or claims an official answer.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- **FACT: 2024 GS-I Q18** directly tests the implementation gap in affirmative action.

Structure it as constitutional promise -> protective/redistributive instrument -> identification, enforcement or delivery gap -> dated outcome and correction. The closest GS-II framing is 2024 Q7 (poverty-malnutrition-human-capital), which tests capability conversion. Use distributive + corrective + recognitive justice as the common structuring device.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-I, GS-II
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	18	Underprivileged sections not getting full benefits of affirmative action	Comment · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	GS-II	16	Inequality in resource ownership and the paradox of poverty	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Underprivileged sections not getting full benefits of affirmative action
- Inequality in resource ownership and the paradox of poverty

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2019, 2023

- **Paper(s):** GS-I, GS-II
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	GS-II	6	High growth alongside the lowest human development indicators	Examine · 10 marks · 150 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-I	16	Human development lagging behind economic development in India	Why did it fail · 15 marks · 250 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- High growth alongside the lowest human development indicators
- Human development lagging behind economic development in India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **FACT: 2024 GS-I Q18 (250 words)** asks why underprivileged sections have not received

the full benefits of constitutionally envisaged affirmative action. It is the clearest cross-paper route to this framework. The closest GS-II question is 2024 Q7 (poverty-malnutrition-human-capital), which implicitly tests capability conversion. A strong answer to either social-justice/inclusive-development framing should:

1. Define the three dimensions (distributive, corrective, cognitive).
2. Apply the capability lens (does the intervention expand what people can do?).
3. Acknowledge universalism/targeting trade-offs.
4. Cite a concrete Indian example with dated evidence.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2019, 2023

- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	GS-II	6	High growth alongside the lowest human development indicators	Examine · 10 marks · 150 words	Routed to owning topic; word limit taken from the instruction block	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-I	16	Human development lagging behind economic development in India	Why did it fail · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- High growth alongside the lowest human development indicators

- Human development lagging behind economic development in India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2019 General Studies Paper II Question 6

Demand: High growth alongside the lowest human development indicators. Examine, 10 marks, 150 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership and the word limit is taken from the instruction block. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: growth enlarges the resource envelope but does not itself produce human development, because development is a conversion problem rather than an accumulation problem. Named evidence and example: Amartya Sen's distinction between functionings and capabilities; the Preamble's socialist commitment concretised through Part IV Articles 38, 39, 41 to 43 and 46 to 47; the five-stage mechanism running from constitutional foundation through legislative concretisation, scheme design, institutional delivery and outcome measurement; and the four basic guarantees of the Social Protection Floors Recommendation, 2012, No. 202, read on the International Labour Organization page on 2 September 2026. Analysis: growth raises private income while the health, schooling, nutrition and sanitation environment that converts income into capability is supplied publicly, so where the identification, delivery and quality gaps bind, the conversion rate stays low and headline growth coexists with weak human-development outcomes; the point is sharpened by vertical equity, since equal public provision to unequally placed households leaves the disadvantaged converting the least. Qualification: the argument must not be pushed into a denial that growth matters, because growth funds the fiscal space for universal services, and the human-development claim must be carried with its source, index method and year rather than as a bare ranking, since index averages conceal gender, caste, regional and intra-household inequality. Why this earns marks: it answers the directive by examining a mechanism rather than listing schemes, uses a named evaluative standard, locates the failure at a specific gap and closes with a stated data limit.

PYQ DEMAND CARD 2 - 2023 General Studies Paper I Question 16

Demand: Human development lagging behind economic development in India, asked as a why-did-it-fail demand, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: the lag is institutional rather than accidental, because India built entitlement faster than it built the identification, delivery, quality and measurement capacity that entitlements require. Named evidence and example: the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013, and of elementary education under the Right of Children to Free and Compulsory Education Act, 2009; Article 46 combining recognitive and distributive direction; the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission, which investigate, advise and recommend without binding power; and the folder's five recurring gaps of identification, enforcement, delivery, quality and outcome-learning. Analysis: each gap explains a different part of the lag, since misidentification produces exclusion error at the roll, weak enforcement leaves protective law unapplied, last-mile failure keeps the entitlement from the person, poor service quality delivers a count without a capability, and absent outcome measurement prevents correction; the hybrid welfare design compounds this because universal statutory claims sit on a targeted administrative base whose documentation requirements exclude precisely the migrant, disabled and undocumented households that need them most. Qualification: the argument must concede real gains and must avoid asserting general implementation failure, naming instead which gap operated in the case cited, and every indicator used must carry its survey, round and year. Why this earns marks: it converts a why-did-it-fail directive into a named institutional diagnosis with a remedy attached to each gap, rather than a lament.

PYQ DEMAND CARD 3 - 2024 General Studies Paper I Question 18

Demand: Despite comprehensive policies for equity and social justice, underprivileged sections are not yet getting the full benefits of affirmative action envisaged by the Constitution. Comment, 15 marks, 250 words, exactly as recorded in the audited 2024-2025 Mains routing ledger and reproduced in the Basic owner.

Status: Routed to this owner in the audited 2024-2025 Mains routing ledger. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: affirmative action delivers less than it promises because it is asked to carry all three dimensions of justice while being funded and administered as a distributive instrument alone. Named evidence and example: Article 46's direction on the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections; the operationalisation of vertical equity through reservation; the recorded boundary case of creamy-layer exclusion, where targeting inside affirmative action generates identification and boundary disputes; the manual-scavenging case, in which prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition; and the commissions that can recommend but cannot enforce. Analysis: the constitutional promise is distributive at the point of entry, corrective where a specific historical and continuing wrong must be undone, and recognitive where stigma and voicelessness persist after entry, so a reserved seat filled without remedial support, hostel access and protection from discrimination converts an entitlement into a formal opportunity rather than a capability; identification disputes then displace the debate from outcome to boundary, which is exactly where the benefit leaks. Qualification: the comment must not deny measurable progress in representation and access, and it must avoid quoting any coverage, backlog or representation figure without its official source and year. Why this earns marks: it comments with a stated criterion, applies all three dimensions to one Indian case and ends with a graded verdict and a data caveat.

PYQ DEMAND CARD 4 - 2025 General Studies Paper II Question 16

Demand: Inequality in the ownership pattern of resources is one of the major causes of poverty. Discuss in the context of the paradox of poverty, 15 marks, 250 words, exactly as recorded in the audited 2024-2025 Mains routing ledger.

Status: Routed to this owner in the audited 2024-2025 Mains routing ledger. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: unequal ownership of productive resources is a major but not sufficient cause of poverty, because ownership inequality operates through the capability conversion that public provision either repairs or reproduces. Named evidence and example: Rawls's difference principle, which judges an inequality by whether it benefits the least advantaged; Nancy Fraser's triad, in which misrecognition operates as a distributive barrier; Ambedkar's warning against political equality amid social and economic inequality; the vertical-equity justification for differentiated provision; and the folder's rule that inclusion and exclusion errors move in opposite directions. Analysis: unequal ownership of land, assets, credit and now digital access lowers bargaining power and collateral, which lowers income and saving, which prevents asset formation and transmits the disadvantage to the next generation, and the paradox is that measured monetary poverty can fall while the ownership structure that produces poverty remains intact, so consumption relief and redistribution of productive assets are not interchangeable policies. Qualification: the discussion must test the ownership explanation against joblessness, unequal access to public services and implementation failure rather than treating it as the sole cause, and it must not assert any land, asset, credit or inequality statistic without its official source and year. Why this earns marks: it discusses a stated causal loop, distinguishes two policy families that are usually conflated, and closes with a graded verdict rather than a slogan.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish distributive, corrective and recognitive justice, and show how the three-dimension test evaluates one Indian welfare intervention. Answer in about 150 words.

Model thesis: The three dimensions are distinct questions rather than synonyms, so the answer must define each by the question it asks, apply all three to one named Indian intervention, and close by showing that failure in any single dimension perpetuates the injustice.

Claim -> named evidence -> analysis -> qualification:

- Distributive justice is concerned with the fair allocation of resources, opportunities and services and asks the question who receives what, and it is implemented in India through transfers, reservation, public services and social security; treating it as the whole of social justice is the commonest conceptual error, because an allocation that reaches a household without remedying a specific wrong done to that household, and without affirming the dignity that was denied to it, leaves the injustice partly intact.
- Corrective justice is concerned with remedying a specific wrong and asks the question how the harm is undone, and it is implemented through compensation, rehabilitation, penalty and restoration; it is the dimension that gives protective legislation its analytical shape, because a prohibition without a remedy, a penalty without enforcement capacity, or a rehabilitation entitlement without an alternative livelihood leaves the corrective claim unsatisfied even where the distributive claim has been met.
- Recognitive justice is concerned with affirming denied identities, dignity and voice and asks the question whose personhood is marginalised, and it is implemented through anti-discrimination law, representation and identity recognition; it is the dimension most often omitted from an average answer, and its omission is visible whenever a scheme restores income while leaving stigma, exclusion from public space and absence of political voice untouched.
- Article 46 directs the State to promote with special care the educational and economic interests of the Scheduled Castes, the Scheduled Tribes and the weaker sections, which combines recognitive and distributive logic in one clause, the shift of the public distribution system into a statutory entitlement under the National Food Security Act, 2013 illustrates the rights-based turn, and the prohibition of manual scavenging read together with rehabilitation and dignity restoration is the folder's standard three-dimension test case because prohibition supplies correction, rehabilitation and alternative livelihood supply distribution and dignity restoration supplies recognition, so failure in any one dimension perpetuates the injustice; the recorded boundary case is creamy-layer exclusion within reservation, where targeting inside affirmative action generates identification and boundary disputes whose doctrinal detail belongs to the Polity owner.

Qualified conclusion: The three dimensions are distinct questions rather than synonyms, so the answer must define each by the question it asks, apply all three to one named Indian intervention, and close by showing that failure in any single dimension perpetuates the injustice.

ORIGINAL MAINS 2 - 10 MARKS

Question: Examine why formal legal equality is a necessary but insufficient condition for social justice. Answer in about 150 words.

Model thesis: Formal equality secures the rule but not the starting position, so the answer must climb the ladder from formal to substantive to capability equality, anchor it in the Preamble and the Directive Principles, and qualify it with the vertical-equity justification for differentiated support.

Claim -> named evidence -> analysis -> qualification:

- Formal equality applies the same rule to everyone and can entrench structural disadvantage where starting conditions differ by caste, gender, tribe, disability, location or income, substantive equality supplies differentiated support such as reservation, targeted transfers and special provisions in order to remove those structural barriers, and capability equality, the Sen standard, asks the further question of whether the differentiated support actually expanded what people can do and be rather than merely whether an input was delivered; this three-step ladder is the single most transferable structuring device in the folder because it converts a list of schemes into an argument about conversion.

- The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the courts, a use recorded in the owners with the example of *Minerva Mills* in 1980.
- Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete.
- Horizontal equity means that equals are treated equally, while vertical equity means that unequals are treated unequally in proportion to their disadvantage, and affirmative action operationalises vertical equity rather than violating equality; stating this distinction is what allows an answer to defend reservation and targeted provision against the charge that it is discriminatory, and the qualification is that vertical equity requires a defensible measure of disadvantage, which is precisely where identification disputes and boundary cases such as creamy-layer exclusion arise.

Qualified conclusion: Formal equality secures the rule but not the starting position, so the answer must climb the ladder from formal to substantive to capability equality, anchor it in the Preamble and the Directive Principles, and qualify it with the vertical-equity justification for differentiated support.

ORIGINAL MAINS 3 - 15 MARKS

Question: Assess the claim that India's welfare architecture has moved from discretionary charity to enforceable entitlement. Answer in about 250 words.

Model thesis: The framing has moved further than the delivery, because statutory entitlements now exist alongside a large targeted-scheme layer while funding, identification and remedy remain the binding constraints, so the assessment must be graded and must name the gap at which the claim fails.

Claim -> named evidence -> analysis -> qualification:

- Rights-based welfare frames the citizen as an entitlement-holder with a statutory or constitutional claim and a remedy where the law provides one, whereas charity-based welfare treats support as state beneficence that may be withdrawn at discretion, and the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009 are the standard Indian illustrations of the shift from scheme to claim; the qualification carried by the owners is decisive and must always be written, namely that a statutory label alone does not guarantee delivery and that an under-funded entitlement converts a legal right into a paper promise.
- A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move.
- The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice.
- The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not

applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction.

Qualified conclusion: The framing has moved further than the delivery, because statutory entitlements now exist alongside a large targeted-scheme layer while funding, identification and remedy remain the binding constraints, so the assessment must be graded and must name the gap at which the claim fails.

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine the universalism-versus-targeting choice in India's welfare design, including the errors that each design generates. Answer in about 250 words.

Model thesis: Neither design is costless, because universalism buys lower exclusion error with higher cost and inclusion error while targeting buys apparent efficiency with documentation barriers and exclusion risk, so the examination must argue the hybrid rather than declare a winner.

Claim -> named evidence -> analysis -> qualification:

- Universalism provides the same entitlement to every member of a defined population and therefore reduces stigma and exclusion error while raising cost and inclusion error, whereas targeting concentrates resources on identified beneficiaries and therefore improves apparent efficiency while creating documentation barriers, identification disputes and exclusion risk; the two are not mutually exclusive and are best treated as a design trade-off rather than a moral contest, because Indian practice layers universal basic services such as elementary schooling and primary health on targeted transfers, scholarships, rehabilitation packages and affirmative action.
- Inclusion error occurs when a non-eligible person receives a benefit, which is the leakage that dominates political debate, and exclusion error occurs when an eligible person does not receive a benefit, which is the failure that dominates the lived experience of the poorest and is typically produced by documentation, seeding, migration and disability-related barriers; the analytical rule is that reducing one error usually raises the other, so a recommendation that promises to eliminate leakage without stating its exclusion consequence has not been thought through.
- The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction.
- A residual welfare state intervenes only when family and market have failed and therefore relies on means testing and carries stigma, an institutional welfare state provides universal services as a citizenship right and is therefore de-stigmatised but costlier, and India's trajectory is expressly recorded in the owners as a hybrid in which some universal or near-universal statutory entitlements, such as the Right of Children to Free and Compulsory Education Act, 2009 and the National Food Security Act, 2013, are layered on a large body of targeted schemes; naming the hybrid rather than asserting one model is the graded-verdict move.

Qualified conclusion: Neither design is costless, because universalism buys lower exclusion error with higher cost and inclusion error while targeting buys apparent efficiency with documentation barriers and exclusion risk, so the examination must argue the hybrid rather than declare a winner.

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess whether the capability approach supplies a more defensible standard of social justice than income-based measurement. Answer in about 300 words.

Model thesis: The capability standard is more defensible because it evaluates conversion rather than possession, but it is harder to observe than income and must be operationalised through proxies whose limits are stated, so the verdict must be graded rather than celebratory.

Claim -> named evidence -> analysis -> qualification:

- Amartya Sen's capability approach evaluates well-being not by income or utility alone but by functionings, which are achieved states such as being nourished, being healthy or being literate, and capabilities, which are the real freedoms a person has to achieve those functionings, so the policy question shifts from what people have to what people can actually do and be; the operational consequence is that identical incomes yield unequal capabilities where health, disability, social exclusion or location differ, which is why an income-only evaluation of a welfare programme is analytically incomplete.
- Martha Nussbaum's central capabilities list specifies a threshold set that a just society must secure for every citizen, namely life, bodily health, bodily integrity, senses, imagination and thought, emotions, practical reason, affiliation, relation to other species, play, and control over one's environment, and it is a more prescriptive version of Sen's deliberately open-ended framework; the examinable distinction is that Sen refuses a fixed list in order to leave the specification to public reasoning, whereas Nussbaum supplies the list precisely so that a constitutional minimum can be identified.
- John Rawls's difference principle holds that social and economic inequalities are just only if they are arranged so as to be to the greatest benefit of the least-advantaged members of society, and it is accompanied in the owners by his standard of fair equality of opportunity; it supplies a defensible test for judging an inequality rather than merely deploring it, and it is the natural companion to the capability approach in a twenty-mark answer because one supplies the distributive criterion while the other supplies the evaluative metric.
- Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation.

Qualified conclusion: The capability standard is more defensible because it evaluates conversion rather than possession, but it is harder to observe than income and must be operationalised through proxies whose limits are stated, so the verdict must be graded rather than celebratory.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess the institutional conditions under which constitutional social-justice directives translate into measured capability gains. Answer in about 300 words.

Model thesis: Directives become capability gains only where legislative concretisation, funded delivery, enforceable remedy and honest outcome measurement all hold together, so the assessment must run the full five-stage mechanism, locate the specific gap and end with a graded verdict carrying a reversal condition.

Claim -> named evidence -> analysis -> qualification:

- The welfare state is a state that assumes responsibility for its citizens' minimum standard of living through public provision of health, education, housing, social security and poverty relief, and in India its normative foundation is the Preamble's declaration of a socialist republic committed to justice that is social, economic and political, together with Part IV of the Constitution, particularly Articles 38, 39, 41 to 43 and 46 to 47; the Directive Principles are not directly justiciable and create no individual cause of action, but they are used as an interpretive aid by the

courts, a use recorded in the owners with the example of Minerva Mills in 1980.

- The mechanism runs from a constitutional foundation in the Preamble and the Directive Principles, through legislative concretisation in protective statutes on atrocities, disability and child protection and in entitlement statutes such as the National Food Security Act, 2013 and the Right of Children to Free and Compulsory Education Act, 2009, through scheme design and budgetary allocation using transfers, services and affirmative action, through institutional delivery by ministries, statutory and quasi-judicial commissions and frontline bodies such as the anganwadi centre, the primary health centre and the school, to outcome measurement by surveys such as the National Family Health Survey and the Periodic Labour Force Survey, administrative data and social audit; an answer that stops at stage three has described intent rather than justice.
- The Master Framework of this folder records five recurring gaps that reappear in every downstream topic, namely identification, where the eligible person is not correctly listed, enforcement, where a prohibition or protection is not applied, delivery, where the entitlement does not reach the person, quality, where what is delivered is too poor to change anything, and outcome-learning, where the system never establishes whether the intervention worked; naming the specific gap rather than asserting general implementation failure is the difference between an average and a high-scoring diagnosis, because each gap has a different institutional correction.
- Institutional commissions such as the National Commission for Women, the National Commission for Minorities, the National Commission for Protection of Child Rights and the National Human Rights Commission investigate, advise and recommend and therefore operationalise recognitive justice by giving marginalised groups a voice, but they cannot substitute for enforcement capacity, so recognitive justice remains incomplete where recommendations are not binding; on measurement, the Human Development Index and the Multidimensional Poverty Index operationalise the capability lens but their mechanics belong to the Economy owner and their averages conceal gender, caste, regional and intra-household inequality, and on ownership four Mains demands are routed to this topic in the audited ledgers, from 2019, 2023, 2024 and 2025, while no dynamic dashboard figure is asserted anywhere in this package because the topic is conceptual and its durable anchors are the constitutional text and the 2012 Recommendation.

Qualified conclusion: Directives become capability gains only where legislative concretisation, funded delivery, enforceable remedy and honest outcome measurement all hold together, so the assessment must run the full five-stage mechanism, locate the specific gap and end with a graded verdict carrying a reversal condition.
