Q10. Which chronology card should be filed under The forest-rights statute and its three categories of right?	13
Q11. Which option preserves the source-bounded meaning of The forest-rights statute and its three categories of right?	14
Q12. Which statement avoids a close-option trap about The forest-rights statute and its three categories of right?	15
Q13. Which statement correctly identifies Individual forest rights and their exact limits?	16
Q14. Which chronology card should be filed under Individual forest rights and their exact limits?	17
Q15. Which option preserves the source-bounded meaning of Individual forest rights and their exact limits?	18
Q16. Which statement avoids a close-option trap about Individual forest rights and their exact limits?	19
Q17. Which statement correctly identifies Community rights as the livelihood limb of the statute?	19
Q18. Which chronology card should be filed under Community rights as the livelihood limb of the statute?	20
Q19. Which option preserves the source-bounded meaning of Community rights as the livelihood limb of the statute?	21
Q20. Which statement avoids a close-option trap about Community rights as the livelihood limb of the statute?	22
Q21. Which statement correctly identifies Community forest resource rights as the governance limb?	22
Q22. Which chronology card should be filed under Community forest resource rights as the governance limb?	23
Q23. Which option preserves the source-bounded meaning of Community forest resource rights as the governance limb?	24
Q24. Which statement avoids a close-option trap about Community forest resource rights as the governance limb?	25
Q25. Which statement correctly identifies The ministry's own account of the statute, verified on the record date?	25
Q26. Which chronology card should be filed under The ministry's own account of the statute, verified on the record date?	27
Q27. Which option preserves the source-bounded meaning of The ministry's own account of the statute, verified on the record date?	28

Q28. Which statement avoids a close-option trap about The ministry's own account of the statute, verified on the record date?	29
Q29. Which statement correctly identifies The claim process from Gram Sabha to district committee?	30
Q30. Which chronology card should be filed under The claim process from Gram Sabha to district committee?	31
Q31. Which option preserves the source-bounded meaning of The claim process from Gram Sabha to district committee?	32
Q32. Which statement avoids a close-option trap about The claim process from Gram Sabha to district committee?	32
Q33. Which statement correctly identifies Rejection of a claim is not authority to evict?	33
Q34. Which chronology card should be filed under Rejection of a claim is not authority to evict?	34
Q35. Which option preserves the source-bounded meaning of Rejection of a claim is not authority to evict?	34
Q36. Which statement avoids a close-option trap about Rejection of a claim is not authority to evict?	35
Q37. Which statement correctly identifies Rights in a critical wildlife habitat and the cumulative safeguards?	36
Q38. Which chronology card should be filed under Rights in a critical wildlife habitat and the cumulative safeguards?	36
Q39. Which option preserves the source-bounded meaning of Rights in a critical wildlife habitat and the cumulative safeguards?	37
Q40. Which statement avoids a close-option trap about Rights in a critical wildlife habitat and the cumulative safeguards?	38
Q41. Which statement correctly identifies The self-governance law read for its welfare content?	39
Q42. Which chronology card should be filed under The self-governance law read for its welfare content?	39
Q43. Which option preserves the source-bounded meaning of The self-governance law read for its welfare content?	40
Q44. Which statement avoids a close-option trap about The self-governance law read for its welfare content?	41
Q45. Which statement correctly identifies Particularly vulnerable tribal groups and their identification criteria?	41
Q46. Which chronology card should be filed under Particularly vulnerable tribal groups and their identification criteria?	42
Q47. Which option preserves the source-bounded meaning of Particularly vulnerable tribal groups and their identification criteria?	43
Q48. Which statement avoids a close-option trap about Particularly vulnerable tribal groups and their identification criteria?	44
Q49. Which statement correctly identifies The convergence mission for the most vulnerable groups?	44
Q50. Which chronology card should be filed under The convergence mission for the most vulnerable groups?	45
Q51. Which option preserves the source-bounded meaning of The convergence mission for the most vulnerable groups?	46
Q52. Which statement avoids a close-option trap about The convergence mission for the most vulnerable groups?	47
Q53. Which statement correctly identifies Minor forest produce, the village enterprise unit and price support?	47
Q54. Which chronology card should be filed under Minor forest produce, the village enterprise unit and price support?	48
Q55. Which option preserves the source-bounded meaning of Minor forest produce, the village enterprise unit and price support?	49
Q56. Which statement avoids a close-option trap about Minor forest produce, the village enterprise unit and price support?	50

Q57. Which statement correctly identifies Residential education and the block-level norm?	50
Q58. Which chronology card should be filed under Residential education and the block-level norm?	51
Q59. Which option preserves the source-bounded meaning of Residential education and the block-level norm?	52
Q60. Which statement avoids a close-option trap about Residential education and the block-level norm?	53
Q61. Which statement correctly identifies The constitutional commission and the ownership of institutional detail?	53
Q62. Which chronology card should be filed under The constitutional commission and the ownership of institutional detail?	54
Q63. Which option preserves the source-bounded meaning of The constitutional commission and the ownership of institutional detail?	55
Q64. Which statement avoids a close-option trap about The constitutional commission and the ownership of institutional detail?	56
Q65. Which statement correctly identifies Land alienation and the State laws that address it?	57
Q66. Which chronology card should be filed under Land alienation and the State laws that address it?	57
Q67. Which option preserves the source-bounded meaning of Land alienation and the State laws that address it?	58
Q68. Which statement avoids a close-option trap about Land alienation and the State laws that address it?	59
Q69. Which statement correctly identifies The case bank and the committee diagnosis?	60
Q70. Which chronology card should be filed under The case bank and the committee diagnosis?	61
Q71. Which option preserves the source-bounded meaning of The case bank and the committee diagnosis?	61
Q72. Which statement avoids a close-option trap about The case bank and the committee diagnosis?	62
Q73. Which statement correctly identifies Rehabilitation policy and what compensation cannot buy?	63
Q74. Which chronology card should be filed under Rehabilitation policy and what compensation cannot buy?	64
Q75. Which option preserves the source-bounded meaning of Rehabilitation policy and what compensation cannot buy?	64
Q76. Which statement avoids a close-option trap about Rehabilitation policy and what compensation cannot buy?	65
Q77. Which statement correctly identifies Heterogeneity discipline and the honest ownership statement?	66
Q78. Which chronology card should be filed under Heterogeneity discipline and the honest ownership statement?	67
Q79. Which option preserves the source-bounded meaning of Heterogeneity discipline and the honest ownership statement?	67
Q80. Which statement avoids a close-option trap about Heterogeneity discipline and the honest ownership statement?	68

Scheduled Tribes, PVTGs and Tribal Welfare - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this owner holds and the demands routed to it?

A. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: A. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under What this owner holds and the demands routed to it?

A. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. B. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: B. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this owner holds and the demands routed to it?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. This topic owns the tribal-welfare half of

the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: C. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about What this owner holds and the demands routed to it?

A. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. B. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. C. Community rights under the statute are the

livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. D. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

Answer: D. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies The two-axis frame and the third-axis debate?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: A. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under The two-axis frame and the third-axis debate?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: B. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of The two-axis frame and the third-axis debate?

A. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. D. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Answer: C. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about The two-axis frame and the third-axis debate?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: D. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies The forest-rights statute and its three categories of right?

A. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: A. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under The forest-rights statute and its three categories of right?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional

customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: B. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of The forest-rights statute and its three categories of right?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test

precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: C. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about The forest-rights statute and its three categories of right?

A. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure,

livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: D. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Individual forest rights and their exact limits?

A. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. B. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. C. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: A. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Individual forest rights and their exact limits?

A. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: B. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Individual forest rights and their exact limits?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: C. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Individual forest rights and their exact limits?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. C. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: D. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Community rights as the livelihood limb of the statute?

A. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights

for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Answer: A. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Community rights as the livelihood limb of the statute?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction

without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: B. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Community rights as the livelihood limb of the statute?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. C. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: C. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under

permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Community rights as the livelihood limb of the statute?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: D. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Community forest resource rights as the governance limb?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of

self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: A. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Community forest resource rights as the governance limb?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.

Answer: C. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Community forest resource rights as the governance limb?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Answer: D. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies The ministry's own account of the statute, verified on the record date?

A. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop

destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: A. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under The ministry's own account of the statute, verified on the record date?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: B. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights

holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of The ministry's own account of the statute, verified on the record date?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: C. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not

until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about The ministry's own account of the statute, verified on the record date?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement,

that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: D. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies The claim process from Gram Sabha to district committee?

A. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. B. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and

resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: A. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under The claim process from Gram Sabha to district committee?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: B. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of The claim process from Gram Sabha to district committee?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. D. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Answer: C. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about The claim process from Gram Sabha to district committee?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of

Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: D. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Rejection of a claim is not authority to evict?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: A. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create

eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Rejection of a claim is not authority to evict?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. C. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: B. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Rejection of a claim is not authority to evict?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are

complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.

Answer: C. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Rejection of a claim is not authority to evict?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.

Answer: D. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a

standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Rights in a critical wildlife habitat and the cumulative safeguards?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. D. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Answer: A. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Rights in a critical wildlife habitat and the cumulative safeguards?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is

satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.

Answer: B. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Rights in a critical wildlife habitat and the cumulative safeguards?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. The owners record the livelihood limb as a national

agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: C. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Rights in a critical wildlife habitat and the cumulative safeguards?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. C. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: D. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options

belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies The self-governance law read for its welfare content?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: A. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under The self-governance law read for its welfare content?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the

Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: B. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of The self-governance law read for its welfare content?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: C. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for

their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about The self-governance law read for its welfare content?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: D. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Particularly vulnerable tribal groups and their identification criteria?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across

housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: A. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Particularly vulnerable tribal groups and their identification criteria?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is

precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: B. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Particularly vulnerable tribal groups and their identification criteria?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. C. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: C. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Particularly vulnerable tribal groups and their identification criteria?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.

Answer: D. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies The convergence mission for the most vulnerable groups?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI

to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. D. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: A. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under The convergence mission for the most vulnerable groups?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. C. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. D. Eklatya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: B. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly

vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of The convergence mission for the most vulnerable groups?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

Answer: C. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about The convergence mission for the most vulnerable groups?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. D. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Answer: D. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Minor forest produce, the village enterprise unit and price support?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations

that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: A. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Minor forest produce, the village enterprise unit and price support?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. Answer: B. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Minor forest produce, the village enterprise unit and price support?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument.

Answer: C. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Minor forest produce, the village enterprise unit and price support?

A. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: D. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Residential education and the block-level norm?

A. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general

endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: A. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Residential education and the block-level norm?

A. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: B. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as

one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Residential education and the block-level norm?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: C. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Residential education and the block-level norm?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: D. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies The constitutional commission and the ownership of institutional detail?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is

recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: A. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under The constitutional commission and the ownership of institutional detail?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the

forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: B. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of The constitutional commission and the ownership of institutional detail?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: C. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the

Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about The constitutional commission and the ownership of institutional detail?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

Answer: D. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Land alienation and the State laws that address it?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. Answer: B. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Land alienation and the State laws that address it?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local

enforcement rather than propose a prohibition that already exists. D. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

Answer: C. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Land alienation and the State laws that address it?

A. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: D. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal

prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies The case bank and the committee diagnosis?

A. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. B. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: A. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under The case bank and the committee diagnosis?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: B. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of The case bank and the committee diagnosis?

A. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. B.

The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: C. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about The case bank and the committee diagnosis?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights,

and that a committee report is a diagnosis and not a binding instrument.

Answer: D. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Rehabilitation policy and what compensation cannot buy?

A. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. B. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: A. Answer: B. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Rehabilitation policy and what compensation cannot buy?

A. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the

convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: C. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Rehabilitation policy and what compensation cannot buy?

A. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: D. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Heterogeneity discipline and the honest ownership statement?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: A. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. The remaining

Q78. Which chronology card should be filed under Heterogeneity discipline and the honest ownership statement?

A. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. B. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. C. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: B. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Heterogeneity discipline and the honest ownership statement?

A. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it

is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: C. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Heterogeneity discipline and the honest ownership statement?

A. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable

tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

Answer: D. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No General Studies Mains demand is routed to this owner in the audited routing ledgers, and exactly two objective demands are, so the ownership statement is a mixed one and is reported precisely. The two routed objective demands are 2019 Prelims General Studies Paper I Question 51 on the criteria for particularly vulnerable tribal groups in India and 2021 Prelims General Studies Paper I Question 84 on the nodal ministry for the Forest Rights Act, 2006, both recorded in the audited 2018-2023 Prelims routing ledger, which states expressly that the official 2018-2023 Prelims keys are not held locally, so no option, key or inferred answer is recorded for either demand and neither is converted into a solved question; both are instead covered as taught content, the four identification criteria being stated in full and the administering ministry being identified from its own official page. No Mains demand card is manufactured for this topic. The Basic and Advanced owners both discuss the 2025 General Studies Paper I question asking whether tribal development in India centres around the two axes of displacement and rehabilitation, but the audited 2024-2025 Mains routing ledger routes that question to the Indian Society owner, so no demand card is created for it here and no ownership is claimed over it; the same ledger routes the 2021 and 2022 General Studies Paper I demands on tribal knowledge systems and tribal diversity to that owner, the 2023 colonial-rule-and-tribals demand to the Modern History owner, and the Fifth Schedule, Scheduled Area and forest-rights objective demands of 2018, 2019, 2022, 2023, 2024 and 2025 to the Polity and Environment owners, so none of those is claimed either. The practice in this package therefore consists of six original Mains questions with model solutions, each written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern, together with eighty original objective questions on a strict A -> B -> C -> D rotation. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work. The locally held OCR-searchable official General Studies papers were read only to confirm that no Mains question on this owner's subject matter is routed here; no question was invented from them, no marking scheme or page precision was imported and no official answer key is claimed anywhere in this package.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- FACT: **2025 GS-I (250 words)**: structure the answer as: (a) displacement axis - mining, dams, protected areas, land alienation; (b) rehabilitation axis - FRA (land/forest rights), PM-JANMAN (PVTG services), Van Dhan (livelihood), EMRS (education); (c) opinion - the two-axis framing is largely accurate but may understate a third dimension: livelihood/market integration or cultural autonomy; (d) recommend - move from displacement-rehabilitation dichotomy to a holistic development model integrating economic opportunity and identity protection.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2019, 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	Prelims GS-I	51	Particularly Vulnerable Tribal Groups PVTGs criteria India	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	Prelims GS-I	84	Nodal ministry for Forest Rights Act 2006	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Particularly Vulnerable Tribal Groups PVTGs criteria India
- Nodal ministry for Forest Rights Act 2006

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **FACT: 2025 GS-I (250 words):** the model answer: (a) map displacement drivers (mining, dams, protected areas, land alienation); (b) map rehabilitation instruments (FRA, PM-JANMAN, Van Dhan, EMRS); (c) propose a third axis - livelihood/market integration or cultural autonomy; (d) argue that policy coherence improves with a three-axis model; (e) conclude with a "yes, but" position: the two-axis framing is substantially correct but incomplete.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish the three categories of right recognised by the Forest Rights Act, 2006, and explain what each secures. Answer in about 150 words.

Model thesis: The three categories secure tenure, livelihood and governance respectively, so the distinction must name the holder, the object and the limit of each, and must close on why the third is the least operationalised.

Claim -> named evidence -> analysis -> qualification:

- The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.
- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.
- Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second

individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

- Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Qualified conclusion: The three categories secure tenure, livelihood and governance respectively, so the distinction must name the holder, the object and the limit of each, and must close on why the third is the least operationalised.

ORIGINAL MAINS 2 - 10 MARKS

Question: Examine why particularly vulnerable tribal groups are treated as a distinct policy category. Answer in about 150 words.

Model thesis: The category exists because four vulnerability criteria identify communities that a tribe-wide scheme would miss, so the examination must state the criteria exactly, name the convergence design built for them and close on the delivery caution.

Claim -> named evidence -> analysis -> qualification:

- A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.
- Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.
- Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.
- Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is

manufactured.

Qualified conclusion: The category exists because four vulnerability criteria identify communities that a tribe-wide scheme would miss, so the examination must state the criteria exactly, name the convergence design built for them and close on the delivery caution.

ORIGINAL MAINS 3 - 15 MARKS

Question: Critically examine the implementation of forest-rights recognition in India. Answer in about 250 words.

Model thesis: The statute is generous and the procedure is where it is decided, so the critical examination must run the three-tier claim chain, separate rejection from eviction authority and locate the failure at a named tier rather than in the text.

Claim -> named evidence -> analysis -> qualification:

- The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.
- The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.
- Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.
- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Qualified conclusion: The statute is generous and the procedure is where it is decided, so the critical examination must run the three-tier claim chain, separate rejection from eviction authority and locate the failure at a named tier rather than in the text.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess whether recognising rights over minor forest produce is sufficient to secure tribal livelihoods. Answer in about 250 words.

Model thesis: Ownership and income are separated by processing and market access, so the assessment must connect the community-rights head to the village-enterprise and price-support channel and close on uneven coverage.

Claim -> named evidence -> analysis -> qualification:

- Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second

individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

- The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.
- In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.
- Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Qualified conclusion: Ownership and income are separated by processing and market access, so the assessment must connect the community-rights head to the village-enterprise and price-support channel and close on uneven coverage.

ORIGINAL MAINS 5 - 20 MARKS

Question: Analyse the displacement and rehabilitation axes of tribal development and evaluate whether a third axis is required. Answer in about 300 words.

Model thesis: The two axes describe the tension accurately but stop at material restoration, so the analysis must map both axes with named instruments, test them against the conditional protected-area provision and the compensation limit, and argue a third axis of livelihood integration or cultural autonomy.

Claim -> named evidence -> analysis -> qualification:

- The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.
- The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion,

so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

- The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.
- Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

Qualified conclusion: The two axes describe the tension accurately but stop at material restoration, so the analysis must map both axes with named instruments, test them against the conditional protected-area provision and the compensation limit, and argue a third axis of livelihood integration or cultural autonomy.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate the proposition that tribal land alienation is a failure of administration rather than of law. Answer in about 300 words.

Model thesis: Prohibition already exists and restoration does not, so the evaluation must name the State laws, locate the failure in records, restoration proceedings and local enforcement, and use the case bank and the committee diagnosis to test the claim.

Claim -> named evidence -> analysis -> qualification:

- Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.
- The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument.
- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

- The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

Qualified conclusion: Prohibition already exists and restoration does not, so the evaluation must name the State laws, locate the failure in records, restoration proceedings and local enforcement, and use the case bank and the committee diagnosis to test the claim.
