

SOLVED PRACTICE WORKBOOK

Social Empowerment - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Social Empowerment - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which statement correctly identifies Empowerment against welfare receipt?	5
Q2. Which chronology card should be filed under Empowerment against welfare receipt?	5
Q3. Which option preserves the source-bounded meaning of Empowerment against welfare receipt?	5
Q4. Which statement avoids a close-option trap about Empowerment against welfare receipt?	6
Q5. Which statement correctly identifies The capability approach?	6
Q6. Which chronology card should be filed under The capability approach?	6
Q7. Which option preserves the source-bounded meaning of The capability approach?	7
Q8. Which statement avoids a close-option trap about The capability approach?	7
Q9. Which statement correctly identifies Agency view against welfare view?	8
Q10. Which chronology card should be filed under Agency view against welfare view?	8
Q11. Which option preserves the source-bounded meaning of Agency view against welfare view?	8
Q12. Which statement avoids a close-option trap about Agency view against welfare view?	9
Q13. Which statement correctly identifies Three-stage conversion chain?	9
Q14. Which chronology card should be filed under Three-stage conversion chain?	9
Q15. Which option preserves the source-bounded meaning of Three-stage conversion chain?	10
Q16. Which statement avoids a close-option trap about Three-stage conversion chain?	10
Q17. Which statement correctly identifies Naming the conversion factors?	11
Q18. Which chronology card should be filed under Naming the conversion factors?	11
Q19. Which option preserves the source-bounded meaning of Naming the conversion factors?	11
Q20. Which statement avoids a close-option trap about Naming the conversion factors?	12
Q21. Which statement correctly identifies Open and closed stratification?	12
Q22. Which chronology card should be filed under Open and closed stratification?	12
Q23. Which option preserves the source-bounded meaning of Open and closed stratification?	13
Q24. Which statement avoids a close-option trap about Open and closed stratification?	13
Q25. Which statement correctly identifies Formal and substantive mobility?	14
Q26. Which chronology card should be filed under Formal and substantive mobility?	14
Q27. Which option preserves the source-bounded meaning of Formal and substantive mobility?	14

Q28. Which statement avoids a close-option trap about Formal and substantive mobility?	15
Q29. Which statement correctly identifies Phule's cross-cutting critique?	15
Q30. Which chronology card should be filed under Phule's cross-cutting critique?	15
Q31. Which option preserves the source-bounded meaning of Phule's cross-cutting critique?	16
Q32. Which statement avoids a close-option trap about Phule's cross-cutting critique?	16
Q33. Which statement correctly identifies Education as Phule's chosen lever?	17
Q34. Which chronology card should be filed under Education as Phule's chosen lever?	17
Q35. Which option preserves the source-bounded meaning of Education as Phule's chosen lever?	17
Q36. Which statement avoids a close-option trap about Education as Phule's chosen lever?	18
Q37. Which statement correctly identifies Ambedkar's graded inequality?	18
Q38. Which chronology card should be filed under Ambedkar's graded inequality?	18
Q39. Which option preserves the source-bounded meaning of Ambedkar's graded inequality?	19
Q40. Which statement avoids a close-option trap about Ambedkar's graded inequality?	19
Q41. Which statement correctly identifies Why graded inequality is self-reinforcing?	19
Q42. Which chronology card should be filed under Why graded inequality is self-reinforcing?	20
Q43. Which option preserves the source-bounded meaning of Why graded inequality is self-reinforcing?	20
Q44. Which statement avoids a close-option trap about Why graded inequality is self-reinforcing?	21
Q45. Which statement correctly identifies Annihilation of caste?	21
Q46. Which chronology card should be filed under Annihilation of caste?	21
Q47. Which option preserves the source-bounded meaning of Annihilation of caste?	22
Q48. Which statement avoids a close-option trap about Annihilation of caste?	22
Q49. Which statement correctly identifies Phule and Ambedkar as complementary?	23
Q50. Which chronology card should be filed under Phule and Ambedkar as complementary?	23
Q51. Which option preserves the source-bounded meaning of Phule and Ambedkar as complementary?	23
Q52. Which statement avoids a close-option trap about Phule and Ambedkar as complementary?	24
Q53. Which statement correctly identifies Where the affirmative-action gap sits?	24
Q54. Which chronology card should be filed under Where the affirmative-action gap sits?	24
Q55. Which option preserves the source-bounded meaning of Where the affirmative-action gap sits?	25
Q56. Which statement avoids a close-option trap about Where the affirmative-action gap sits?	25
Q57. Which statement correctly identifies Capability-building complements?	25
Q58. Which chronology card should be filed under Capability-building complements?	26
Q59. Which option preserves the source-bounded meaning of Capability-building complements?	26

Q60. Which statement avoids a close-option trap about Capability-building complements?	27
Q61. Which statement correctly identifies Dated multidimensional anchor?	27
Q62. Which chronology card should be filed under Dated multidimensional anchor?	27
Q63. Which option preserves the source-bounded meaning of Dated multidimensional anchor?	28
Q64. Which statement avoids a close-option trap about Dated multidimensional anchor?	28
Q65. Which statement correctly identifies Entitlement without capability?	29
Q66. Which chronology card should be filed under Entitlement without capability?	29
Q67. Which option preserves the source-bounded meaning of Entitlement without capability?	29
Q68. Which statement avoids a close-option trap about Entitlement without capability?	30
Q69. Which statement correctly identifies Capability building that works?	30
Q70. Which chronology card should be filed under Capability building that works?	30
Q71. Which option preserves the source-bounded meaning of Capability building that works?	31
Q72. Which statement avoids a close-option trap about Capability building that works?	31
Q73. Which statement correctly identifies Formal mobility without recognition?	31
Q74. Which chronology card should be filed under Formal mobility without recognition?	32
Q75. Which option preserves the source-bounded meaning of Formal mobility without recognition?	32
Q76. Which statement avoids a close-option trap about Formal mobility without recognition?	33
Q77. Which statement correctly identifies Examination ownership audit?	33
Q78. Which chronology card should be filed under Examination ownership audit?	33
Q79. Which option preserves the source-bounded meaning of Examination ownership audit?	34
Q80. Which statement avoids a close-option trap about Examination ownership audit?	34

Social Empowerment - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Empowerment against welfare receipt?

A. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. B. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: A. Explanation: Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Empowerment against welfare receipt?

A. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. B. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: B. Explanation: Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Empowerment against welfare receipt?

A. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. B. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. C. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. D. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes

position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness.

Answer: C. Explanation: Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Empowerment against welfare receipt?

A. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. B. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. C. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. D. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over.

Answer: D. Explanation: Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies The capability approach?

A. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. B. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: A. Explanation: Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under The capability approach?

A. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. B. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. C. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter

uptake, and naming them converts a vague implementation complaint into a diagnosable stage. D. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness.

Answer: B. Explanation: Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of The capability approach?

A. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. B. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. C. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: C. Explanation: Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about The capability approach?

A. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. B. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. C. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. D. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives.

Answer: D. Explanation: Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Agency view against welfare view?

A. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. B. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. C. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: A. Explanation: A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Agency view against welfare view?

A. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. B. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. C. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: B. Explanation: A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Agency view against welfare view?

A. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. B. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time.

Answer: C. Explanation: A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not

establish agency. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Agency view against welfare view?

A. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. B. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. C. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. D. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency.

Answer: D. Explanation: A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Three-stage conversion chain?

A. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. B. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. C. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: A. Explanation: Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Three-stage conversion chain?

A. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. B. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. C. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. D. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness.

Answer: B. Explanation: Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Three-stage conversion chain?

A. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. B. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. C. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: C. Explanation: Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Three-stage conversion chain?

A. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. B. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. C. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: D. Explanation: Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Naming the conversion factors?

A. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. B. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. C. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: A. Explanation: The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Naming the conversion factors?

A. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. B. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. C. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. D. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here.

Answer: B. Explanation: The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Naming the conversion factors?

A. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. B. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. C. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. D. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above.

Answer: C. Explanation: The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Naming the conversion factors?

A. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. B. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. C. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. D. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage.

Answer: D. Explanation: The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Open and closed stratification?

A. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. B. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. C. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: A. Explanation: An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Open and closed stratification?

A. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. B. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. C. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of

those above. D. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time.

Answer: B. Explanation: An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Open and closed stratification?

A. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. B. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. C. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. D. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here.

Answer: C. Explanation: An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Open and closed stratification?

A. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. B. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. C. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. D. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness.

Answer: D. Explanation: An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Formal and substantive mobility?

A. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. B. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. C. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. D. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time.

Answer: A. Explanation: Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Formal and substantive mobility?

A. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. B. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. C. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. D. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above.

Answer: B. Explanation: Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Formal and substantive mobility?

A. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. B. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. C. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. D. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished.

Answer: C. Explanation: Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social

empowerment. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Formal and substantive mobility?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. C. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. D. Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Answer: D. Explanation: Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Phule's cross-cutting critique?

A. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. B. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. C. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. D. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished.

Answer: A. Explanation: Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Phule's cross-cutting critique?

A. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. B. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. C. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. D. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice.

Answer: B. Explanation: Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Phule's cross-cutting critique?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. C. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. D. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice.

Answer: C. Explanation: Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Phule's cross-cutting critique?

A. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. B. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. C. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. D. Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time.

Answer: D. Explanation: Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Education as Phule's chosen lever?

A. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. B. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. C. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. D. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished.

Answer: A. Explanation: Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Education as Phule's chosen lever?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. C. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. D. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice.

Answer: B. Explanation: Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Education as Phule's chosen lever?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. C. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. D. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement.

Answer: C. Explanation: Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Education as Phule's chosen lever?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. C. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. D. Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here.

Answer: D. Explanation: Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Ambedkar's graded inequality?

A. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. B. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. C. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. D. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice.

Answer: A. Explanation: B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Ambedkar's graded inequality?

A. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. B. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. C. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. D. Phule supplies a cross-cutting diagnosis that links caste, gender and

peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition.

Answer: B. Explanation: B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Ambedkar's graded inequality?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. C. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. D. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.

Answer: C. Explanation: B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Ambedkar's graded inequality?

A. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. B. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. C. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. D. B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above.

Answer: D. Explanation: B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Why graded inequality is self-reinforcing?

A. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. B. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. C. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. D. Phule supplies a cross-cutting diagnosis that

links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition.

Answer: A. Explanation: Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Why graded inequality is self-reinforcing?

A. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. B. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. C. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. D. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition.

Answer: B. Explanation: Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Why graded inequality is self-reinforcing?

A. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. C. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. D. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.

Answer: C. Explanation: Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Why graded inequality is self-reinforcing?

A. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. C. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. D. Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished.

Answer: D. Explanation: Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Annihilation of caste?

A. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. B. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. C. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. D. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.

Answer: A. Explanation: Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Annihilation of caste?

A. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. B. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. D. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.

Answer: B. Explanation: Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Annihilation of caste?

A. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. B. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. C. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.

Answer: C. Explanation: Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Annihilation of caste?

A. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. D. Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice.

Answer: D. Explanation: Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Phule and Ambedkar as complementary?

A. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. B. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. C. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.

Answer: A. Explanation: Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Phule and Ambedkar as complementary?

A. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. B. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. D. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer.

Answer: B. Explanation: Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Phule and Ambedkar as complementary?

A. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.

Answer: C. Explanation: Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. The remaining

options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Phule and Ambedkar as complementary?

A. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. D. Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition.

Answer: D. Explanation: Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Where the affirmative-action gap sits?

A. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. B. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. C. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.

Answer: A. Explanation: The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Where the affirmative-action gap sits?

A. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. B. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. C. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.

Answer: B. Explanation: The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a

different entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Where the affirmative-action gap sits?

A. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. D. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility.

Answer: C. Explanation: The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Where the affirmative-action gap sits?

A. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. B. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. C. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. D. The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement.

Answer: D. Explanation: The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Capability-building complements?

A. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. D. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer.

Answer: A. Explanation: Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Capability-building complements?

A. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. B. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. C. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. D. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical.

Answer: B. Explanation: Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Capability-building complements?

A. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. B. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. C. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. D. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical.

Answer: C. Explanation: Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Capability-building complements?

A. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. B. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. C. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. D. Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.

Answer: D. Explanation: Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Dated multidimensional anchor?

A. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. D. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer.

Answer: A. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Dated multidimensional anchor?

A. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. C. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. D. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission

illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical.

Answer: B. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Dated multidimensional anchor?

A. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. B. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. D. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility.

Answer: C. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Dated multidimensional anchor?

A. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. B. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. C. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.

Answer: D. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Entitlement without capability?

A. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. D. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers.

Answer: A. Explanation: A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Entitlement without capability?

A. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. B. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. C. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. D. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility.

Answer: B. Explanation: A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Entitlement without capability?

A. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. B. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. C. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. D. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives.

Answer: C. Explanation: A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Entitlement without capability?

A. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. B. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer.

Answer: D. Explanation: A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Capability building that works?

A. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. B. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. C. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. D. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility.

Answer: A. Explanation: A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Capability building that works?

A. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. B. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. C. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. D. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15

marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers.

Answer: B. Explanation: A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Capability building that works?

A. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. B. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. C. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. D. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency.

Answer: C. Explanation: A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Capability building that works?

A. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. B. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. C. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. D. A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical.

Answer: D. Explanation: A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Formal mobility without recognition?

A. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. B. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. C. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both

wordings were confirmed in the locally held official 2024 and 2025 question papers. D. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over.

Answer: A. Explanation: A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Formal mobility without recognition?

A. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over. B. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. C. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. D. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency.

Answer: B. Explanation: A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Formal mobility without recognition?

A. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. B. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. C. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: C. Explanation: A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Formal mobility without recognition?

A. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. B. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. C. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. D. A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility.

Answer: D. Explanation: A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Examination ownership audit?

A. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. B. Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over.

Answer: A. Explanation: Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Examination ownership audit?

A. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. B. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. C. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. D. Amartya

Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives.

Answer: B. Explanation: Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Examination ownership audit?

A. A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. B. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. C. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. D. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.

Answer: C. Explanation: Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Examination ownership audit?

A. The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. B. An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. C. Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. D. Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers.

Answer: D. Explanation: Two direct General Studies Paper-I demands are carried by this owner's own answer-architecture table, namely the 2024 demand on underprivileged sections not receiving the full benefits of affirmative action worth 15 marks and the 2025 demand on Phule's writings and reform efforts

worth 15 marks, while the audited routing ledgers name the Social Justice framework owner and the Modern Indian History reform-movements owner respectively, and both wordings were confirmed in the locally held official 2024 and 2025 question papers. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Two direct General Studies Paper-I Mains demands are carried by this owner's own answer-architecture table and each is recorded with its exact routing status, because in both cases the audited ledger names a different owner. The 2024 Q18 demand on underprivileged sections not yet receiving the full benefits of affirmative action is routed in the audited 2024-2025 Mains ledger to the Social Justice concept-and-welfare-state owner, while this owner's table claims it as a core route. The 2025 Q11 demand on Mahatma Jotirao Phule's writings and social reform efforts is routed in the same ledger to the Modern Indian History socio-religious reform-movements owner, while this owner's table claims it as a core route. Both conflicts are stated openly here and neither is resolved by assertion; the answers below are written strictly from the Social Empowerment sociological spine and claim no reservation doctrine, welfare-scheme architecture or reform-movement chronology owned elsewhere. The wording of both demands was confirmed in the locally held official 2024 and 2025 General Studies Paper-I question papers. No marking scheme, official key or model answer of the Union Public Service Commission is held locally, and none is reproduced or inferred.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the sociological demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

1. **Claim and named evidence:** Define the central concept and separate it from the nearest social or legal category. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Trace the historical and institutional setting instead of assuming a timeless practice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Explain the norm, incentive, network, power or agency mechanism producing the outcome. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Use one named Indian community, movement, region, institution or source-dated dataset. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** Qualify the pattern through intersectionality, regional variation, causation and implementation limits. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The answer must resolve the sociological demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- **FACT: 2024 GS-I PYQ (15 marks, verbatim):** "Despite Comprehensive policies for equity and social justice, underprivileged sections are not yet getting the full benefits of affirmative action envisaged by the Constitution. Comment." The expected answer: affirm the gap, explain it through implementation-capacity limits, unequal starting capability (illiteracy, remoteness, information asymmetry) and residual social stigma limiting effective uptake of affirmative-action provisions, and argue for a capability-building complement to legal entitlement, not merely wider or larger entitlements alone.

- **FACT: 2025 GS-I PYQ (15 marks, verbatim):** "Mahatma Jotirao Phule's writings and efforts of social reforms touched issues of almost all subaltern classes. Discuss." The expected answer: demonstrate that Phule's reform agenda spanned caste (critique of Brahminical dominance), gender (girls' education, widow remarriage support) and peasant-class concerns (critique of exploitative agrarian relations), making his sociological diagnosis unusually comprehensive across multiple axes of subaltern disadvantage rather than caste-focused alone.

- **ANALYSIS:** A Scheduled Caste student who qualifies for a reserved seat but cannot use it effectively due to prior schooling deficits illustrates the policy-practice gap the 2024 PYQ addresses.

9. PYQ application

- **FACT: 2024 GS-I (15 marks):** affirm the policy-practice gap, explain it through implementation capacity and unequal starting capability, and recommend capability-building as the complement to legal entitlement.

- **FACT: 2025 GS-I (15 marks):** demonstrate Phule's cross-cutting reform agenda (caste, gender, peasant class) with specific, named examples of his advocacy.

10. PYQ-based analytical application

- **FACT: 2024 GS-I (15 marks, verbatim):** "Despite Comprehensive policies for equity and social justice, underprivileged sections are not yet getting the full benefits of affirmative action envisaged by the Constitution. Comment." Analytical route: (a) affirm the gap; (b) apply the entitlement-versus-capability-conversion distinction to locate the gap precisely; (c) cite Ambedkar's graded-inequality logic to explain why informal social hierarchy persists despite formal legal equality; (d) recommend capability-building interventions (schooling quality, mentoring, stigma-reduction) as the necessary complement to entitlement expansion.

- **FACT: 2025 GS-I (15 marks, verbatim):** "Mahatma Jotirao Phule's writings and efforts of social reforms touched issues of almost all subaltern classes. Discuss." Analytical route: demonstrate Phule's cross-cutting agenda using the Section 3 diagnostic chain - caste (Brahminical dominance critique), gender (girls' education) and peasant class (agrarian exploitation critique) - and argue this comprehensiveness anticipated the modern capability-approach logic.

PYQ DEMAND CARD 1 - 2024 GS-I Q18

Demand: Despite Comprehensive policies for equity and social justice, underprivileged sections are not yet getting the full benefits of affirmative action envisaged by the Constitution. Comment. (Answer in 250 words) 15 marks.

Status: Wording confirmed in the locally held official 2024 General Studies Paper-I. The audited 2024-2025 Mains ledger routes this row to the Social Justice concept-and-welfare-state owner while this owner's own answer-architecture table claims it; the conflict is recorded openly and this answer uses only the Social Empowerment spine.

Model solution: Accept the premise and then locate it, because comment rewards a diagnosis rather than agreement. The claim is that a comprehensive equity architecture coexists with an incomplete benefit, and the analytical move is to separate three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome. Stage one is the entitlement, which in this case is genuinely comprehensive: a reserved seat, a targeted scheme, a statutory protection. Stage two is the conversion factor, namely whether the intended beneficiary has the prior schooling to meet the standard the entitlement admits her to, the information that the entitlement exists, the mobility and cost tolerance to reach it, the health to sustain it and freedom from the stigma that deters uptake. Stage three is the outcome. Locate the shortfall at stage two, and say why that matters: if the failure is a conversion failure then expanding entitlement coverage, which is the administratively easier response, will not close the gap, whereas if it were a design failure a different entitlement would be required. Explain the persistence with Ambedkar's graded-inequality logic: because each caste except the lowest has an interest in maintaining someone below it, the hierarchy supplies its own defenders and informal social closure survives the abolition of formal legal hierarchy, which is precisely why a legally sufficient entitlement can meet a socially insufficient reception. Prove it with boundary cases rather than adjectives: a reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling is entitlement without capability, and a bridge-course and mentoring programme that raises preparation before and during admission is the conversion-stage intervention that closes the gap. Add the measurement caution: the NITI Aayog discussion paper of 2024 estimated multidimensional poverty at 11.28 per cent in 2022-23 with about 24.8 crore exits between 2013-14 and 2022-23, and that is a dated estimate for a stated period rather than a current headcount or proof that any programme caused the change. Conclude that the constitutional promise is not defective but incompletely converted, and that schooling quality, information, mentoring and stigma reduction are the complement that entitlement requires. Route reservation doctrine to Polity and Social Justice rather than restating it.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2024 GS-I Q18", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Accept the premise and then locate it, because comment rewards a diagnosis rather than agreement. The claim is that a comprehensive equity architecture coexists with an incomplete benefit, and the analytical move is to separate three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome. Stage one is the entitlement, which in this case is genuinely comprehensive: a reserved seat, a targeted scheme, a statutory protection. Stage two is the conversion factor, namely whether the intended beneficiary has the prior schooling to meet the standard the entitlement admits her to, the information that the entitlement exists, the mobility and cost tolerance to reach it, the health to sustain it and freedom from the stigma that deters uptake. Stage three is the outcome. Locate the shortfall at stage two, and say why that matters: if the failure is a conversion failure then expanding entitlement coverage, which is the administratively easier response, will not close the gap, whereas if it were a design failure a different entitlement would be required. Explain the persistence with Ambedkar's graded-inequality logic: because each caste except the lowest has an interest in maintaining someone below it, the hierarchy supplies its own defenders and informal social closure survives the abolition of formal legal hierarchy, which is precisely why a legally sufficient entitlement can meet a socially insufficient reception. Prove it with boundary cases rather than adjectives: a reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling is entitlement without capability, and a bridge-course and mentoring programme that raises preparation before and during admission is the conversion-stage intervention that closes the gap. Add the measurement caution: the NITI Aayog discussion paper of 2024 estimated multidimensional poverty at 11.28 per cent in 2022-23 with about 24.8 crore exits between 2013-14 and 2022-23, and that is a dated estimate for a stated period

rather than a current headcount or proof that any programme caused the change. Conclude that the constitutional promise is not defective but incompletely converted, and that schooling quality, information, mentoring and stigma reduction are the complement that entitlement requires. Route reservation doctrine to Polity and Social Justice rather than restating it.

Analytical body:

1. **Claim and named evidence:** Define the central concept and separate it from the nearest social or legal category. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Trace the historical and institutional setting instead of assuming a timeless practice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Explain the norm, incentive, network, power or agency mechanism producing the outcome. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Use one named Indian community, movement, region, institution or source-dated dataset. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** Qualify the pattern through intersectionality, regional variation, causation and implementation limits. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Accept the premise and then locate it, because comment rewards a diagnosis rather than agreement. The claim is that a comprehensive equity architecture coexists with an incomplete benefit, and the analytical move is to separate three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome. Stage one is the entitlement, which in this case is genuinely comprehensive: a reserved seat, a targeted scheme, a statutory protection. Stage two is the conversion factor, namely whether the intended beneficiary has the prior schooling to meet the standard the entitlement admits her to, the information that the entitlement exists, the mobility and cost tolerance to reach it, the health to sustain it and freedom from the stigma that deters uptake. Stage three is the outcome. Locate the shortfall at stage two, and say why that matters: if the failure is a conversion failure then expanding entitlement coverage, which is the administratively easier response, will not close the gap, whereas if it were a design failure a different entitlement would be required. Explain the persistence with Ambedkar's graded-inequality logic: because each caste except the lowest has an interest in maintaining someone below it, the hierarchy supplies its own defenders and informal social closure survives the abolition of formal legal hierarchy, which is precisely why a legally sufficient entitlement can meet a socially insufficient reception. Prove it with boundary cases rather than adjectives: a reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling is entitlement without capability, and a bridge-course and mentoring programme that raises preparation before and during admission is the conversion-stage intervention that closes the gap. Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2024 GS-I Q18", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2025 GS-I Q11

Demand: Mahatma Jotirao Phule's writings and efforts of social reforms touched issues of almost all subaltern classes. Discuss. (Answer in 250 words) 15 marks.

Status: Wording confirmed in the locally held official 2025 General Studies Paper-I. The audited 2024-2025 Mains ledger routes this row to the Modern Indian History socio-religious reform-movements owner while this owner's own answer-architecture table claims it; the conflict is recorded openly and this answer supplies the sociological reading without restating the reform-movement chronology owned there.

Model solution: Fix what the question is actually testing before answering: the examinable word is almost all, so the answer must demonstrate breadth across distinct axes of subordination rather than depth on caste alone, and it must show that the breadth was structural rather than incidental. Establish the organising insight first. Phule identified Brahminical ritual dominance as maintaining not only caste hierarchy but also women's exclusion from learning and the subjugation of the peasant cultivator within the same ideological structure, which is why his reform programme attacks them together instead of sequentially. Now prove each axis. On caste, his critique targeted ritual dominance and the religious sanction that legitimised exclusion, and the Satyashodhak Samaj was the organisational vehicle through which that critique became practice. On gender, he worked with Savitribai Phule to make education for girls a central intervention, which is a capability-building measure in the strict sense because it changes what a person can subsequently do rather than what she is given. On peasant class, he criticised exploitative agrarian relations, which extends the subaltern category beyond ritual status into productive relations. Then supply the comparative claim that the directive quietly requires: most contemporaneous reform effort worked a single axis, such as widow remarriage alone or caste alone, so Phule's simultaneity is the distinguishing feature and not merely the volume of his output. Add the analytical payoff. Because he treated education as the lever, his diagnosis anticipates the modern distinction between an entitlement and the capability needed to use it, though he must not be described as a direct precursor of any later theory. Qualify honestly: the detailed chronology of his writings and organisations belongs to the reform-movement owner and is cross-linked rather than restated, and Phule's diagnosis is not interchangeable with Ambedkar's structural account of graded inequality, since Phule supplies breadth while Ambedkar supplies the reproduction mechanism. Conclude that the proposition holds on the evidence of three simultaneous axes and one organisational vehicle, with the qualification that comprehensiveness of diagnosis is not the same as completeness of outcome.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2025 GS-I Q11", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Fix what the question is actually testing before answering: the examinable word is almost all, so the answer must demonstrate breadth across distinct axes of subordination rather than depth on caste alone, and it must show that the breadth was structural rather than incidental. ORIGINAL MAINS 1 - 10 MARKS

Question: Explain Amartya Sen's capability approach and its relevance to measuring social empowerment. Answer in about 150 words.

Model thesis: The capability approach relocates measurement from what a person receives to what she can actually do and be, which makes conversion factors rather than transfers the correct site of empowerment analysis without denying that welfare inputs matter.

Claim -> named evidence -> analysis -> qualification:

- Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives.
- A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency.
- Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over.
- The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage.

Qualified conclusion: The capability approach relocates measurement from what a person receives to what she can actually do and be, which makes conversion factors rather than transfers the correct site of empowerment analysis without denying that welfare inputs matter.

Demand decoding: The directive **explain** requires a direct position on "Explain Amartya Sen's capability approach and its relevance to measuring social empowerment....", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The capability approach relocates measurement from what a person receives to what she can actually do and be, which makes conversion factors rather than transfers the correct site of empowerment analysis without denying that welfare inputs matter.

Analytical body:

1. **Claim and named evidence:** Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives.
Analysis: Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** A welfare or resource view asks what goods, income or benefits a person receives, while an agency view additionally asks whether that person can make and act on choices that shape her own well-being, and welfare provision remains valuable and rights-based even though receipt alone does not establish agency. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Social empowerment is not exhausted by the delivery of welfare benefits, because a person can receive a transfer, a seat or a scheme entitlement and still lack the real freedom to use it, so the examinable question is always what a person can actually do and be rather than what has been handed over.
Analysis: Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope,

correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

4. **Claim and named evidence:** The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The capability approach relocates measurement from what a person receives to what she can actually do and be, which makes conversion factors rather than transfers the correct site of empowerment analysis without denying that welfare inputs matter.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Explain Amartya Sen's capability approach and its relevance to measuring social empowerment...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Distinguish formal social mobility from substantive social mobility using Indian examples. Answer in about 150 words.

Model thesis: Formal mobility is documented movement in income, education or occupation and substantive mobility adds recognition and freedom from stigma, so an answer that stops at the first has measured a change without establishing an empowerment.

Claim -> named evidence -> analysis -> qualification:

- An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness.
- Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.
- A family that has moved into a higher-income occupation while still facing informal exclusion in marriage, housing or local social life illustrates graded-inequality logic persisting despite economic mobility, which is the boundary case that separates formal from substantive mobility.
- Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished.

Qualified conclusion: Formal mobility is documented movement in income, education or occupation and substantive mobility adds recognition and freedom from stigma, so an answer that stops at the first has measured a change without establishing an empowerment.

Demand decoding: The directive **answer** requires a direct position on "Distinguish formal social mobility from substantive social mobility using Indian examples....", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Formal mobility is documented movement in income, education or occupation and substantive mobility adds recognition and freedom from stigma, so an answer that stops at the first has measured a change without establishing an empowerment.

Analytical body:

1. **Claim and named evidence:** An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Formal mobility is documented movement in income, education or occupation and substantive mobility adds recognition and freedom from stigma, so an answer that stops at the first has measured a change without establishing an empowerment.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Distinguish formal social mobility from substantive social mobility using Indian examples....", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 3 - 15 MARKS

Question: Comment on the claim that despite comprehensive equity policies the underprivileged are not receiving the full benefits of affirmative action. Answer in about 250 words.

Model thesis: The gap is best located at the conversion stage, where prior schooling, information, mobility and stigma decide whether an entitlement can be used, so the remedy is capability building alongside entitlement rather than entitlement expansion alone.

Claim -> named evidence -> analysis -> qualification:

- Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.
- The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage.
- The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement.
- Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.
- Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished.

Qualified conclusion: The gap is best located at the conversion stage, where prior schooling, information, mobility and stigma decide whether an entitlement can be used, so the remedy is capability building alongside entitlement rather than entitlement expansion alone.

Demand decoding: The directive **comment** requires a direct position on "Comment on the claim that despite comprehensive equity policies the underprivileged are not...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The gap is best located at the conversion stage, where prior schooling, information, mobility and stigma decide whether an entitlement can be used, so the remedy is capability building alongside entitlement rather than entitlement expansion alone.

Analytical body:

1. **Claim and named evidence:** Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

3. **Claim and named evidence:** The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** Because every caste except the lowest has an interest in maintaining someone below it, the system supplies its own defenders at every level, which is why piecemeal reform by a single group improving its own position does not dismantle the structure and why informal hierarchy can persist after formal legal hierarchy is abolished. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The gap is best located at the conversion stage, where prior schooling, information, mobility and stigma decide whether an entitlement can be used, so the remedy is capability building alongside entitlement rather than entitlement expansion alone.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Comment on the claim that despite comprehensive equity policies the underprivileged are not...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 4 - 15 MARKS

Question: Discuss the proposition that Phule's writings and reform efforts touched almost all subaltern classes. Answer in about 250 words.

Model thesis: Phule's force lies in treating Brahminical ritual dominance, women's exclusion from education and peasant exploitation as one ideological structure, which makes his diagnosis cross-cutting where most contemporaneous reform was single-axis.

Claim -> named evidence -> analysis -> qualification:

- Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time.
- Working with Savitribai Phule, Phule made education for girls and for oppressed castes a central empowerment intervention while separately criticising exploitative agrarian relations, and the detailed chronology of the socio-religious reform movements belongs to Modern Indian History and is cross-linked rather than restated here.
- Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical

tools rather than collapsed into a single reformist tradition.

- An open stratification system allows movement between social positions on the basis of individual achievement while a closed system fixes position largely by birth-ascribed status, and traditional caste society leaned toward the closed type while contemporary India shows increasing but uneven openness.

Qualified conclusion: Phule's force lies in treating Brahminical ritual dominance, women's exclusion from education and peasant exploitation as one ideological structure, which makes his diagnosis cross-cutting where most contemporaneous reform was single-axis.

Demand decoding: The directive **discuss** requires a direct position on "Discuss the proposition that Phule's writings and reform efforts touched almost all subaltern...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess Phule, Ambedkar and the capability approach as three distinct tools for diagnosing social empowerment. Answer in about 300 words.

Model thesis: Phule identifies the breadth of subordination, Ambedkar explains why it reproduces itself and the capability approach specifies where an intervention must act, so the three are complementary instruments rather than competing verdicts.

Claim -> named evidence -> analysis -> qualification:

- Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers who worked a single axis of disadvantage at a time.
- B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above.
- Annihilation of caste is Ambedkar's structural conclusion that the institution itself must be dismantled rather than reformed from within, because a reform strategy that leaves the underlying religious sanction intact cannot end a graded hierarchy, and the constitutional safeguards this conclusion shaped belong doctrinally to Polity and Social Justice.
- Amartya Sen's capability approach holds that development and empowerment should be measured by the real freedoms a person has to achieve valued functionings such as being educated, being healthy and participating in public life, rather than by the resources or income that person receives.
- Phule supplies a cross-cutting diagnosis that links caste, gender and peasant-class subordination while Ambedkar supplies a structural diagnosis of why hierarchy reproduces itself, so the two must be used as distinct analytical tools rather than collapsed into a single reformist tradition.
- Formal mobility is documented movement in income, education or occupation, while substantive mobility additionally requires social recognition, secure voice and freedom from residual stigma, and the two diverge often enough that an aggregate income gain cannot be read as completed social empowerment.

Qualified conclusion: Phule identifies the breadth of subordination, Ambedkar explains why it reproduces itself and the capability approach specifies where an intervention must act, so the three are complementary instruments rather than competing verdicts.

Demand decoding: The directive **assess** requires a direct position on "Assess Phule, Ambedkar and the capability approach as three distinct tools for diagnosing...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Phule identifies the breadth of subordination, Ambedkar explains why it reproduces itself and the capability approach specifies where an intervention must act, so the three are complementary instruments rather than competing verdicts.

Analytical body:

1. **Claim and named evidence:** Mahatma Jyotirao Phule founded the Satyashodhak Samaj and directed his writings and reform work against Brahminical ritual dominance while treating women's exclusion from education and peasant exploitation as parts of the same ideological structure, which is what distinguishes him from reformers

who worked a single axis of disadvantage at a time. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication.

Qualification: State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

2. **Claim and named evidence:** B.R. Ambedkar argued that caste was not a benign division of labour or a simple top-to-bottom hierarchy but a graded inequality reproduced through religious sanction on endogamy, in which each caste simultaneously looks down on those below and aspires to the position of those above. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Phule identifies the breadth of subordination, Ambedkar explains why it reproduces itself and the capability approach specifies where an intervention must act, so the three are complementary instruments rather than competing verdicts.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess Phule, Ambedkar and the capability approach as three distinct tools for diagnosing...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate whether closing the affirmative-action gap requires wider entitlement or stronger capability conversion. Answer in about 300 words.

Model thesis: Entitlement expansion is administratively easier while the binding constraint sits at conversion, so the defensible verdict favours capability building without abandoning entitlement, and it must be argued with boundary cases rather than with an aggregate estimate.

Claim -> named evidence -> analysis -> qualification:

- Empowerment analysis separates three stages that the Advanced owner labels entitlement input vs capability-conversion factor vs outcome: the entitlement is the policy input such as a reserved seat or a targeted scheme, the conversion factor decides whether that input can be used, and the outcome is the mobility, income or voice that results.
- The conversion factors that decide whether an entitlement becomes an outcome are adequate prior schooling, information that the entitlement exists, mobility to reach it, health, social confidence and freedom from stigma that would otherwise deter uptake, and naming them converts a vague implementation complaint into a diagnosable stage.
- The gap between comprehensive equity policy and lived benefit is best located at the conversion stage rather than assumed to be a design failure, and this analytical claim matters because the remedy for a conversion failure is capability building while the remedy for a design failure would be a different entitlement.
- Early-childhood and schooling-quality investment, scholarship-plus-mentoring models, bridge and skill-bridging courses and stigma reduction are the interventions that address the conversion stage, and they complement rather than replace entitlement, which is why expanding coverage alone cannot close the gap.
- The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or proof that a particular programme caused the change.
- A reserved-category student admitted to a technical institution but unable to keep pace because of weak prior schooling illustrates an entitlement arriving without the capability needed to use it, which is the boundary case that defeats an entitlement-only answer.
- A bridge course or a scholarship-plus-mentoring programme that raises a student's academic preparation before and during admission illustrates a conversion-stage intervention closing the gap directly, which is the boundary case that makes the recommendation concrete rather than rhetorical.

Qualified conclusion: Entitlement expansion is administratively easier while the binding constraint sits at conversion, so the defensible verdict favours capability building without abandoning entitlement, and it must be argued with boundary cases rather than with an aggregate estimate.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate whether closing the affirmative-action gap requires wider entitlement or stronger...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:
