

COMPLETE LEARNING SESSION

Poverty and Developmental Issues - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Poverty and Developmental Issues - Learner-v2 Complete Learning Session	6
SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT	6

Poverty and Developmental Issues - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies Paper-I question papers held under books\mains and books\more_previous_papers were used only to confirm the wording of routed Mains PYQs. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Four direct General Studies Paper-I Mains demands are carried by this owner and each is recorded with its exact routing status. The 2018 Q9 demand on the persistence of poverty despite eradication programmes and the 2020 Q9 demand on the pandemic, class inequalities and poverty are routed in the audited 2018-2023 Mains ledger to the Advanced owner, while the Core owner's own answer-architecture table records that Core routing supersedes, so both are answered here from the Basic spine. The locally held official question papers for 2018 and 2020 are scanned images from which reliable text cannot be extracted, so the audited ledger's neutral demand rendering is used for those two years and no verbatim wording is claimed. The 2024 Q10 demand on collaboration between government, non-governmental organisations and the private sector is routed in the audited 2024-2025 ledger to the Governance civil-society owner while this owner's own table claims it as a core route, and that cross-owner conflict is recorded openly here. The 2025 Q19 demand on sustainable growth against the needs of the poor is routed in the same ledger to this Basic owner. The wording of the 2024 and 2025 demands was confirmed in the locally held official question papers for those years. No marking scheme, official key or model answer of the Union Public Service Commission is held locally, and none is reproduced or inferred.
- **Live-link boundary:** No additional live official item was verified for this topic on 2026-09-02. Only the dated official anchors already carried by the repository owners are used, each with its issuing body and date. The package invents no caste, tribe, demographic or agrarian statistic, no legal or constitutional claim and no policy status.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Indian Society Basic/Core is answer-complete before optional Advanced depth.
Concept method	Define and distinguish the institution, identity, process, legal category and measured indicator before analysis.
Sociological method	Structure/institution -> mechanism and agency -> differentiated group/region outcome -> feedback, resistance and qualification.
Evidence method	Claim -> named Indian community/region/institution/dataset -> analysis -> source-date-status or causal qualification.
Non-homogenisation	Caste, tribe, women, religion, region and rural/urban groups retain internal class, gender, locality and historical variation.
Boundary method	Constitutional right, statutory mandate, executive scheme, implementation and lived social outcome remain distinct.
Practice contract	Every solved item has demand decoding, a detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner:

upsc-ai-kit\knowledge\Indian-Society\basic\09_Poverty-and-Developmental-Issues.md

Canonical topic owner:

upsc-ai-kit\knowledge\Indian-Society\basic\09_Poverty-and-Developmental-Issues.md

Optional Advanced owner:

Official syllabus mapping:

upsc-ai-kit\knowledge\Indian-Society\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Definition discipline:** close concepts and legal-administrative categories share a comparison axis and are never treated as synonyms.
- **Mechanism discipline:** correlation, temporal sequence and aggregate association do not establish causation; identify institutions, incentives, norms, power and agency.
- **Historical discipline:** colonial, constitutional, developmental, liberalisation and contemporary phases are separated without a linear tradition-to-modernity story.
- **Intersectional discipline:** overlapping caste, tribe, class, gender, religion, disability, region and life-course positions are analysed without creating a single homogeneous category.
- **India discipline:** use named communities, movements, institutions, cities, states and regional contrasts without stereotyping or treating one case as nationally representative.
- **Data discipline:** Census 2011, NFHS, PLFS, SRS, Agriculture Census, MPI and scheme claims retain source, reference period, release date, coverage and provisional/final status.
- **PYQ discipline:** repository routing ledgers and locally held papers control wording and metadata; reconstructed wording and unavailable official keys remain labelled.
- **Current-status note, rechecked 2026-09-05:** No additional live official item was verified for this topic on 2026-09-02. Only the dated official anchors already carried by the repository owners are used, each with its issuing body and date. The package invents no caste, tribe, demographic or agrarian statistic, no legal or constitutional claim and no policy status.

Live/official context sources recorded by the predecessor generation:

- No volatile live claim is necessary for the static sociological core.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - What poverty actually deprives a person of

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What poverty actually deprives a person of is the part of Poverty and Developmental Issues that explains how Capability deprivation fit into one examinable social relationship.

Technical definition: In sociological analysis, What poverty actually deprives a person of denotes the source-bounded relationship among Capability deprivation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What poverty actually deprives a person of should be analysed as a relation among Capability deprivation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- What
- poverty
- actually
- deprives
- person
- Capability

How to use them: Define What, poverty, actually; cite deprives as named evidence; then apply this qualification: Capability analysis supplements income measurement rather than abolishing it. Conclude by showing how the distinction supports this answer route: Open any poverty answer with deprivation rather than with a threshold..

VISUAL FIRST

WHAT POVERTY ACTUALLY DEPRIVES A PERSON OF

01. Capability deprivation

BOUNDARY -> Capability analysis supplements income measurement rather than abolishing it.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.

NAMED EVIDENCE AND MECHANISM

- Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.

EXAMINER CAUTION

- Capability analysis supplements income measurement rather than abolishing it.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to What poverty actually deprives a person of.
- **Mains:** Open any poverty answer with deprivation rather than with a threshold.

MINI RECAP

- **Evidence chain:** Capability deprivation
- **Qualified use:** Open any poverty answer with deprivation rather than with a threshold.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS What poverty actually deprives person Capability	2. MECHANISM / ARGUMENT relate Capability deprivation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that open any poverty answer with deprivation rather than with a threshold.	4. UPSC TRAP / ANSWER-USE LIMIT: Capability analysis supplements income measurement rather than abolishing it.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: What poverty actually deprives a person of converts named social evidence into a qualified argument			

SESSION 2 - FOUNDATION - Exclusion as the relational dimension

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Exclusion as the relational dimension is the part of Poverty and Developmental Issues that explains how Social exclusion fit into one examinable social relationship.

Technical definition: In sociological analysis, Exclusion as the relational dimension denotes the source-bounded relationship among Social exclusion, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Exclusion as the relational dimension should be analysed as a relation among Social exclusion, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Exclusion
- relational
- dimension

- **Social**
- **deprivation**
- **compounded**

How to use them: Define Exclusion, relational, dimension; cite Social as named evidence; then apply this qualification: Exclusion is relational and cannot be read off an aggregate income statistic. Conclude by showing how the distinction supports this answer route: Add the dimension that explains why deprivation is unevenly distributed..

VISUAL FIRST

EXCLUSION AS THE RELATIONAL DIMENSION

01. Social exclusion

BOUNDARY -> Exclusion is relational and cannot be read off an aggregate income statistic.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.

NAMED EVIDENCE AND MECHANISM

- Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.

EXAMINER CAUTION

- Exclusion is relational and cannot be read off an aggregate income statistic.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Exclusion as the relational dimension.
- **Mains:** Add the dimension that explains why deprivation is unevenly distributed.

MINI RECAP

- **Evidence chain:** Social exclusion
- **Qualified use:** Add the dimension that explains why deprivation is unevenly distributed.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Exclusion relational dimension Social deprivation compounded	2. MECHANISM / ARGUMENT relate Social exclusion through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that add the dimension that explains why deprivation is unevenly distributed.	4. UPSC TRAP / ANSWER-USE LIMIT: Exclusion is relational and cannot be read off an aggregate income statistic.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Exclusion as the relational dimension converts named social evidence into a qualified argument			

SESSION 3 - FOUNDATION - The culture-of-poverty thesis

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The culture-of-poverty thesis is the part of Poverty and Developmental Issues that explains how The culture of poverty fit into one examinable social relationship.

Technical definition: In sociological analysis, The culture-of-poverty thesis denotes the source-bounded relationship among The culture of poverty, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The culture-of-poverty thesis should be analysed as a relation among The culture of poverty, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- culture-of-poverty
- thesis
- culture
- poverty
- Oscar
- Lewis's

How to use them: Define culture-of-poverty, thesis, culture; cite poverty as named evidence; then apply this qualification: The thesis is contested and arose from particular ethnographic settings. Conclude by showing how the distinction supports this answer route: State a contested thesis accurately before criticising it..

VISUAL FIRST

THE CULTURE-OF-POVERTY THESIS

01. The culture of poverty

BOUNDARY -> The thesis is contested and arose from particular ethnographic settings.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

NAMED EVIDENCE AND MECHANISM

- The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

EXAMINER CAUTION

- The thesis is contested and arose from particular ethnographic settings.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The culture-of-poverty thesis.
- **Mains:** State a contested thesis accurately before criticising it.

MINI RECAP

- **Evidence chain:** The culture of poverty
- **Qualified use:** State a contested thesis accurately before criticising it.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS culture-of-poverty thesis culture poverty Oscar Lewis's	2. MECHANISM / ARGUMENT relate The culture of poverty through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that state a contested thesis accurately before criticising it.	4. UPSC TRAP / ANSWER-USE LIMIT: The thesis is contested and arose from particular ethnographic settings.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The culture-of-poverty thesis converts named social evidence into a qualified argument			

SESSION 4 - CORE - The structural critique and causal direction

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The structural critique and causal direction is the part of Poverty and Developmental Issues that explains how The structural critique and Short-horizon decision-making fit into one examinable social relationship.

Technical definition: In sociological analysis, The structural critique and causal direction denotes the source-bounded relationship among The structural critique and Short-horizon decision-making, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The structural critique and causal direction should be analysed as a relation among The structural critique and Short-horizon decision-making, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- structural
- critique
- causal
- direction
- Short-horizon
- decision-making

How to use them: Define structural, critique, causal; cite direction as named evidence; then apply this qualification: Coping behaviour must be described without being converted into blame. Conclude by showing how the distinction supports this answer route: Win a critically-examine directive on the causal-direction question..

VISUAL FIRST

THE STRUCTURAL CRITIQUE AND CAUSAL DIRECTION

01. The structural critique

|
v

02. Short-horizon decision-making

BOUNDARY -> Coping behaviour must be described without being converted into blame.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected.

Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.

NAMED EVIDENCE AND MECHANISM

- The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected.
- Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.

EXAMINER CAUTION

- Coping behaviour must be described without being converted into blame.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The structural critique and causal direction.
- **Mains:** Win a critically-examine directive on the causal-direction question.

MINI RECAP

- **Evidence chain:** The structural critique -> Short-horizon decision-making
- **Qualified use:** Win a critically-examine directive on the causal-direction question.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS structural critique causal direction Short-horizon decision-making	2. MECHANISM / ARGUMENT relate The structural critique and Short-horizon decision-making through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that win a critically-examine directive on the causal-direction question.	4. UPSC TRAP / ANSWER-USE LIMIT: Coping behaviour must be described without being converted into blame.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The structural critique and causal direction converts named social evidence into a qualified argument			

SESSION 5 - CORE - Where poverty measurement is owned

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Where poverty measurement is owned is the part of Poverty and Developmental Issues that explains how The measurement boundary fit into one examinable social relationship.

Technical definition: In sociological analysis, Where poverty measurement is owned denotes the source-bounded relationship among The measurement boundary, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Where poverty measurement is owned should be analysed as a relation among The measurement boundary, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- poverty
- measurement
- owned
- this
- that
- Tendulkar

How to use them: Define poverty, measurement, owned; cite this as named evidence; then apply this qualification: Methodology belongs to Economy and entitlement detail to Social Justice. Conclude by showing how the distinction supports this answer route: Protect a sociological answer from becoming another owner's methodology note..

VISUAL FIRST

WHERE POVERTY MEASUREMENT IS OWNED

01. The measurement boundary

BOUNDARY -> Methodology belongs to Economy and entitlement detail to Social Justice.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

NAMED EVIDENCE AND MECHANISM

- The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

EXAMINER CAUTION

- Methodology belongs to Economy and entitlement detail to Social Justice.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Where poverty measurement is owned.
- **Mains:** Protect a sociological answer from becoming another owner's methodology note.

MINI RECAP

- **Evidence chain:** The measurement boundary
- **Qualified use:** Protect a sociological answer from becoming another owner's methodology note.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS poverty measurement owned this that Tendulkar	2. MECHANISM / ARGUMENT relate The measurement boundary through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that protect a sociological answer from becoming another owner's methodology note.	4. UPSC TRAP / ANSWER-USE LIMIT: Methodology belongs to Economy and entitlement detail to Social Justice.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Where poverty measurement is owned converts named social evidence into a qualified argument			

SESSION 6 - CORE - Reading the multidimensional estimate

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Reading the multidimensional estimate is the part of Poverty and Developmental Issues that explains how Dated multidimensional anchor fit into one examinable social relationship.

Technical definition: In sociological analysis, Reading the multidimensional estimate denotes the source-bounded relationship among Dated multidimensional anchor, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Reading the multidimensional estimate should be analysed as a relation among Dated multidimensional anchor, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Reading

- multidimensional
- estimate
- Dated
- anchor
- NITI

How to use them: Define Reading, multidimensional, estimate; cite Dated as named evidence; then apply this qualification: The estimate covers a stated period and proves no programme attribution. Conclude by showing how the distinction supports this answer route: Cite one dated official estimate without overclaiming it..

VISUAL FIRST

READING THE MULTIDIMENSIONAL ESTIMATE

01. Dated multidimensional anchor

BOUNDARY -> The estimate covers a stated period and proves no programme attribution.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

NAMED EVIDENCE AND MECHANISM

- The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

EXAMINER CAUTION

- The estimate covers a stated period and proves no programme attribution.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Reading the multidimensional estimate.
- **Mains:** Cite one dated official estimate without overclaiming it.

MINI RECAP

- **Evidence chain:** Dated multidimensional anchor
- **Qualified use:** Cite one dated official estimate without overclaiming it.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Reading multidimensional estimate Dated anchor NITI	2. MECHANISM / ARGUMENT relate Dated multidimensional anchor through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that cite one dated official estimate without overclaiming it.	4. UPSC TRAP / ANSWER-USE LIMIT: The estimate covers a stated period and proves no programme attribution.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Reading the multidimensional estimate converts named social evidence into a qualified argument			

SESSION 7 - CORE - Why poverty persists despite programmes

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Why poverty persists despite programmes is the part of Poverty and Developmental Issues that explains how Persistence despite programmes fit into one examinable social relationship.

Technical definition: In sociological analysis, Why poverty persists despite programmes denotes the source-bounded relationship among Persistence despite programmes, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Why poverty persists despite programmes should be analysed as a relation among Persistence despite programmes, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- poverty
- persists
- despite
- programmes
- Persistence
- coverage

How to use them: Define poverty, persists, despite; cite programmes as named evidence; then apply this qualification: Coverage is not access and access is not use, so the three must be separated. Conclude by showing how the distinction supports this answer route: Answer an explain-by-giving-reasons directive with delivery mechanisms..

VISUAL FIRST

WHY POVERTY PERSISTS DESPITE PROGRAMMES

01. Persistence despite programmes

BOUNDARY -> Coverage is not access and access is not use, so the three must be separated.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

NAMED EVIDENCE AND MECHANISM

- Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

EXAMINER CAUTION

- Coverage is not access and access is not use, so the three must be separated.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Why poverty persists despite programmes.
- **Mains:** Answer an explain-by-giving-reasons directive with delivery mechanisms.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Why poverty persists despite programmes converts named social evidence into a qualified argument

SESSION 8 - CORE - How a shock becomes class-differentiated

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: How a shock becomes class-differentiated is the part of Poverty and Developmental Issues that explains how Class-differentiated shock transmission fit into one examinable social relationship.

Technical definition: In sociological analysis, How a shock becomes class-differentiated denotes the source-bounded relationship among Class-differentiated shock transmission, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

How a shock becomes class-differentiated should be analysed as a relation among Class-differentiated shock transmission, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- shock
- becomes
- class-differentiated
- transmission
- process
- common

How to use them: Define shock, becomes, class-differentiated; cite transmission as named evidence; then apply this qualification: The channels are analytical and no magnitude or rate is asserted. Conclude by showing how the distinction supports this answer route: Convert an event-based demand into a transmission-channel argument..

VISUAL FIRST

HOW A SHOCK BECOMES CLASS-DIFFERENTIATED

01. Class-differentiated shock transmission

BOUNDARY -> The channels are analytical and no magnitude or rate is asserted.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience.

NAMED EVIDENCE AND MECHANISM

- Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience.

EXAMINER CAUTION

- The channels are analytical and no magnitude or rate is asserted.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to How a shock becomes class-differentiated.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: How a shock becomes class-differentiated converts named social evidence into a qualified argument			

SESSION 9 - CORE - The development-livelihood conflict

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The development-livelihood conflict is the part of Poverty and Developmental Issues that explains how The development-livelihood conflict fit into one examinable social relationship.

Technical definition: In sociological analysis, The development-livelihood conflict denotes the source-bounded relationship among The development-livelihood conflict, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The development-livelihood conflict should be analysed as a relation among The development-livelihood conflict, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **development-livelihood**
- **conflict**
- **tension**
- **that**
- **arises**
- **when**

How to use them: Define development-livelihood, conflict, tension; cite that as named evidence; then apply this qualification: The conflict is a genuine trade-off rather than a communication failure. Conclude by showing how the distinction supports this answer route: Affirm the conflict honestly before discussing how to reduce it..

VISUAL FIRST

THE DEVELOPMENT-LIVELIHOOD CONFLICT

01. The development-livelihood conflict

BOUNDARY -> The conflict is a genuine trade-off rather than a communication failure.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

NAMED EVIDENCE AND MECHANISM

- The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

EXAMINER CAUTION

- The conflict is a genuine trade-off rather than a communication failure.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The development-livelihood conflict.
- **Mains:** Affirm the conflict honestly before discussing how to reduce it.

UPSC TRAP / ANSWER-USE LIMIT: The conflict is a genuine trade-off rather than a communication failure.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The development-livelihood conflict converts named social evidence into a qualified argument			

SESSION 10 - CORE - Two development conflicts kept apart

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Two development conflicts kept apart is the part of Poverty and Developmental Issues that explains how Two development conflicts kept apart fit into one examinable social relationship.

Technical definition: In sociological analysis, Two development conflicts kept apart denotes the source-bounded relationship among Two development conflicts kept apart, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Two development conflicts kept apart should be analysed as a relation among Two development conflicts kept apart, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- development
- conflicts
- kept

- apart
- Conservation
- restriction

How to use them: Define development, conflicts, kept; cite apart as named evidence; then apply this qualification: Project displacement is owned by the tribal-society topic and is not claimed here. Conclude by showing how the distinction supports this answer route: Keep two remedies apart by keeping two mechanisms apart..

VISUAL FIRST

TWO DEVELOPMENT CONFLICTS KEPT APART

01. Two development conflicts kept apart

BOUNDARY -> Project displacement is owned by the tribal-society topic and is not claimed here.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

NAMED EVIDENCE AND MECHANISM

- Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

EXAMINER CAUTION

- Project displacement is owned by the tribal-society topic and is not claimed here.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Two development conflicts kept apart converts named social evidence into a qualified argument			

SESSION 11 - CORE - Exclusionary and participatory conservation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Exclusionary and participatory conservation is the part of Poverty and Developmental Issues that explains how Two conservation designs and Reduction rather than elimination fit into one examinable social relationship.

Technical definition: In sociological analysis, Exclusionary and participatory conservation denotes the source-bounded relationship among Two conservation designs and Reduction rather than elimination, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately

be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Exclusionary and participatory conservation should be analysed as a relation among Two conservation designs and Reduction rather than elimination, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Exclusionary
- participatory
- conservation
- designs
- Reduction
- than

How to use them: Define Exclusionary, participatory, conservation; cite designs as named evidence; then apply this qualification: Participatory design reduces the conflict without eliminating it. Conclude by showing how the distinction supports this answer route: Turn a comment directive into a design verdict rather than a lament..

VISUAL FIRST

EXCLUSIONARY AND PARTICIPATORY CONSERVATION

01. Two conservation designs

|

v

02. Reduction rather than elimination

BOUNDARY -> Participatory design reduces the conflict without eliminating it.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.

NAMED EVIDENCE AND MECHANISM

- Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.
- Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.

EXAMINER CAUTION

- Participatory design reduces the conflict without eliminating it.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Exclusionary and participatory conservation.
- **Mains:** Turn a comment directive into a design verdict rather than a lament.

MINI RECAP

- **Evidence chain:** Two conservation designs -> Reduction rather than elimination
- **Qualified use:** Turn a comment directive into a design verdict rather than a lament.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Exclusionary and participatory conservation converts named social evidence into a qualified argument			

SESSION 12 - CORE - Three actors, three comparative advantages

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Three actors, three comparative advantages is the part of Poverty and Developmental Issues that explains how Three-actor comparative advantage fit into one examinable social relationship.

Technical definition: In sociological analysis, Three actors, three comparative advantages denotes the source-bounded relationship among Three-actor comparative advantage, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Three actors, three comparative advantages should be analysed as a relation among Three-actor comparative advantage, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Three
- actors
- comparative
- advantages
- Three-actor
- advantage

How to use them: Define Three, actors, comparative; cite advantages as named evidence; then apply this qualification: No single actor ordinarily holds regulatory scale, grassroots trust and private efficiency together. Conclude by showing how the distinction supports this answer route: Structure a collaboration demand around comparative advantage..

VISUAL FIRST

THREE ACTORS, THREE COMPARATIVE ADVANTAGES

01. Three-actor comparative advantage

BOUNDARY -> No single actor ordinarily holds regulatory scale, grassroots trust and private efficiency together.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

NAMED EVIDENCE AND MECHANISM

- The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

EXAMINER CAUTION

- No single actor ordinarily holds regulatory scale, grassroots trust and private efficiency together.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Three actors, three comparative advantages.
- **Mains:** Structure a collaboration demand around comparative advantage.

UPSC TRAP / ANSWER-USE LIMIT: No single actor ordinarily holds regulatory scale, grassroots trust and private efficiency together.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Three actors, three comparative advantages converts named social evidence into a qualified argument			

SESSION 13 - CORE SYNTHESIS - Complementary rather than overlapping roles

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Complementary rather than overlapping roles is the part of Poverty and Developmental Issues that explains how Complementary collaboration fit into one examinable social relationship.

Technical definition: In sociological analysis, Complementary rather than overlapping roles denotes the source-bounded relationship among Complementary collaboration, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Complementary rather than overlapping roles should be analysed as a relation among Complementary collaboration, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Complementary
- than
- overlapping
- roles
- collaboration
- role

How to use them: Define Complementary, than, overlapping; cite roles as named evidence; then apply this qualification: Undivided roles diffuse accountability even when every actor is competent. Conclude by showing how the distinction supports this answer route: Supply the failure mode that makes the recommendation credible..

VISUAL FIRST

COMPLEMENTARY RATHER THAN OVERLAPPING ROLES

01. Complementary collaboration

BOUNDARY -> Undivided roles diffuse accountability even when every actor is competent.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.

NAMED EVIDENCE AND MECHANISM

- Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.

EXAMINER CAUTION

- Undivided roles diffuse accountability even when every actor is competent.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Complementary rather than overlapping roles.
- **Mains:** Supply the failure mode that makes the recommendation credible.

UPSC TRAP / ANSWER-USE LIMIT: Undivided roles diffuse accountability even when every actor is competent.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Complementary rather than overlapping roles converts named social evidence into a qualified argument			

SESSION 14 - CORE SYNTHESIS - Three boundary cases

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Three boundary cases is the part of Poverty and Developmental Issues that explains how Culture-only misdiagnosis, Structural intervention and Conservation implementation contrast fit into one examinable social relationship.

Technical definition: In sociological analysis, Three boundary cases denotes the source-bounded relationship among Culture-only misdiagnosis, Structural intervention and Conservation implementation contrast, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Three boundary cases should be analysed as a relation among Culture-only misdiagnosis, Structural intervention and Conservation implementation contrast, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Three
- cases
- Culture-only
- misdiagnosis
- Structural
- intervention

How to use them: Define Three, cases, Culture-only; cite misdiagnosis as named evidence; then apply this qualification: All three are illustrative cases carrying no invented coverage or outcome figure. Conclude by showing how the distinction supports this answer route: Prove the argument with contrasting cases rather than assertion..

VISUAL FIRST

THREE BOUNDARY CASES

01. Culture-only misdiagnosis

|

v

02. Structural intervention

|

v

03. Conservation implementation contrast

BOUNDARY -> All three are illustrative cases carrying no invented coverage or outcome figure.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

NAMED EVIDENCE AND MECHANISM

- A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.
- A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.

- A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

EXAMINER CAUTION

- All three are illustrative cases carrying no invented coverage or outcome figure.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Three boundary cases converts named social evidence into a qualified argument			

SESSION 15 - CORE SYNTHESIS - Trade-offs, ownership and the answer spine

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Trade-offs, ownership and the answer spine is the part of Poverty and Developmental Issues that explains how Three standing trade-offs and Verified direct Mains demands fit into one examinable social relationship.

Technical definition: In sociological analysis, Trade-offs, ownership and the answer spine denotes the source-bounded relationship among Three standing trade-offs and Verified direct Mains demands, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Trade-offs, ownership and the answer spine should be analysed as a relation among Three standing trade-offs and Verified direct Mains demands, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Trade-offs
- ownership
- spine
- Three
- standing
- direct

How to use them: Define Trade-offs, ownership, spine; cite Three as named evidence; then apply this qualification: One claimed demand is routed to the Governance civil-society owner in the ledger, and the conflict is recorded rather than hidden. Conclude by showing how the distinction supports this answer route: Assemble the poverty answer spine

with explicit trade-offs and honest ownership..

VISUAL FIRST

TRADE-OFFS, OWNERSHIP AND THE ANSWER SPINE

01. Three standing trade-offs

|
v

02. Verified direct Mains demands

BOUNDARY -> One claimed demand is routed to the Governance civil-society owner in the ledger, and the conflict is recorded rather than hidden.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

NAMED EVIDENCE AND MECHANISM

- Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Indian Society | **Tier:** Must-Do (foundation) | **GS Paper:** GS-I. **Core area:** Poverty as social exclusion and capability deprivation, the culture-of- poverty critique, and the development-versus-livelihood conflict. **Grounded in:** Amartya Sen's capability approach to poverty; Oscar Lewis's "culture of poverty" thesis and its sociological critique; NITI Aayog's 2024 multidimensional-poverty discussion paper; audited 2024 and 2025 GS-I Mains PYQs. **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/09_Poverty-and-Developmental-Issues.md.

1. Visual foundation

Core proposition: ANALYSIS: Poverty in Indian society is best understood as social exclusion and capability deprivation compounded by caste, gender and regional disadvantage, not simply an income shortfall or a "culture" the poor transmit to themselves; this framing is essential to correctly answering both the development-versus-poor's-needs conflict (2025 PYQ) and the institutional-collaboration question (2024 PYQ).

2. Essential definitions

Concept	Exam-ready meaning
FACT: Poverty as capability deprivation (Amartya Sen)	Poverty is the deprivation of basic capabilities - to be nourished, educated, healthy, and to participate in social life - not merely low income; income poverty and capability poverty can diverge.
ANALYSIS: Social exclusion	Poverty compounded by exclusion from social networks, institutions and opportunity structures on the basis of caste, gender, religion or region, distinct from an aggregate income statistic.
FACT: Culture of poverty (Oscar Lewis)	A controversial thesis proposing that persistent poverty can generate values, attitudes and behaviours that are reproduced across generations. It arose from particular ethnographic settings and is not a complete explanation of poverty.
FACT: Sociological critique of culture-of-poverty	Critics argue the thesis can "blame the poor" and understate structural causes - unequal land, labour-market discrimination and inadequate public services - while defenders may treat it as a description of adaptation. Evaluate the direction of causation rather than dismissing evidence of coping behaviour.
ANALYSIS: Development-livelihood conflict	The tension that arises when environmental conservation or sustainable-development goals restrict access to land, forest or water resources on which poor communities directly depend for subsistence.

3. How poverty and development conflicts function socially

- 1. Capability lens over income lens:** FACT: measuring poverty only by income can miss deprivation in education, health and social participation; Sen's approach insists these be assessed directly, not inferred from income alone.
- 2. Compounding exclusion:** ANALYSIS: poverty is rarely caste-, gender- or region-neutral - Scheduled Caste and Scheduled Tribe households, women-headed households and remote-region households are disproportionately represented among the capability-poor, showing exclusion compounds income deprivation.
- 3. Culture-of-poverty claim and its limits:** FACT: Lewis's thesis described behavioural patterns in particular chronically poor urban communities. Critics argue these can be adaptive responses to structural deprivation rather than an independent cultural cause; policy should not blame poor people instead of addressing structural barriers.
- 4. Development-poverty conflict mechanism:** ANALYSIS: conservation and sustainable-development measures (protected forests, restricted resource extraction) can simultaneously serve long-term environmental goals and immediately curtail the subsistence access of poor, often tribal or forest-dependent, communities - a genuine trade-off, not a miscommunication problem.
- 5. Institutional collaboration as a response:** ANALYSIS: addressing socio-economic development issues effectively often requires combining government's scale and regulatory authority, NGOs' grassroots trust and local knowledge, and private-sector resources and efficiency - no single actor alone typically has all three.

4. Institutions and concepts

- ANALYSIS: **Poverty-line and MPI measurement methodology (cross-linked, not restated):** the Tendulkar/Rangarajan poverty-line formulae and MPI construction methodology are Economy's territory (Economy/basic/23_Poverty-Inequality-Social-Sector-and-Inclusive-Growth.md).
- ANALYSIS: **NGO-government-private collaboration models:** the institutional and social-capital mechanism through which NGOs mediate between state programmes and poor communities is detailed in Governance/basic/04_NGOs-SHGs-and-Civil-Society-Stakeholders.md.
- ANALYSIS: **Welfare entitlements for the poor (cross-linked):** specific scheme and legal

entitlement detail for poverty alleviation belongs to
Social-Justice/basic/02_Poverty-Hunger-Food-and-Nutrition-Security.md.

5. Indian applications and PYQ mapping

- FACT: **2024 GS-I PYQ (10 marks, verbatim):** "In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive?" The expected answer: argue for a complementary collaboration model - government providing scale, regulation and last-mile accountability; NGOs providing grassroots trust, local knowledge and last-mile delivery; private sector providing efficiency, technology and resources - with clear role-division and joint monitoring to avoid duplication or accountability gaps.

- FACT: **2025 GS-I PYQ (15 marks, verbatim):** "Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment." The expected answer: affirm the conflict is real (forest/land restrictions curtailing subsistence access), give concrete examples (protected-area displacement, restricted grazing/fuelwood collection), and argue the resolution lies in participatory conservation models that give poor communities a stake and alternative livelihood support, rather than treating conservation and poverty alleviation as automatically compatible or automatically opposed.

- ANALYSIS: A forest-dependent household losing fuelwood-collection access due to a new protected area, without an alternative livelihood programme, illustrates the 2025 PYQ's conflict directly.

6. Must-Know Facts for Prelims

- FACT: Amartya Sen's capability approach to poverty distinguishes capability deprivation from income poverty.

- FACT: Oscar Lewis proposed the "culture of poverty" thesis based on his ethnographic fieldwork among poor urban communities; the thesis is widely critiqued in sociology for underplaying structural causes.

- CURRENT: NITI Aayog's 2024 discussion paper *Multidimensional Poverty in India since 2005-06* estimated multidimensional poverty at 11.28% in 2022-23 and about 24.8 crore exits between 2013-14 and 2022-23. These are dated estimates, not a current headcount.

- ANALYSIS: Poverty measurement methodology (Tendulkar/Rangarajan/MPI formulae) is Economy's territory, not restated here.

- ANALYSIS: Development-poverty conflict most sharply affects forest-dependent, tribal and other resource-dependent poor communities.

7. UPSC traps

- WRONG: Poverty is only a matter of low income. -> Sen's capability approach and the social-exclusion framing both insist deprivation in education, health and social participation must be assessed directly, not inferred from income alone.

- WRONG: The culture-of-poverty thesis is universally accepted sociology. -> It is a contested thesis, widely critiqued for risking "blaming the poor" and underplaying structural causes of poverty transmission.

- WRONG: Environmental protection and poor people's needs are always automatically compatible.

-> The 2025 PYQ explicitly frames a real potential conflict; automatic-compatibility claims miss the trade-off the question tests.

- WRONG: Government, NGOs and the private sector play identical roles in development collaboration. -> Each brings a distinct comparative advantage (scale/regulation, grassroots trust, efficiency/resources respectively); effective collaboration divides roles rather than duplicating them.

8. CURRENT: Current anchor

- CURRENT: NITI Aayog's 2024 discussion paper estimated multidimensional poverty at 11.28% in 2022-23 and about 24.8 crore exits between 2013-14 and 2022-23. Label it as a dated estimate and do not present it as a current 2026 poverty headcount.

9. PYQ application

- FACT: **2024 GS-I (10 marks)**: structure around the three-actor comparative-advantage model (government scale/regulation, NGO grassroots trust, private efficiency/resources) with a clear role-division recommendation.

- FACT: **2025 GS-I (15 marks)**: affirm the conflict, give concrete forest/land-access examples, and recommend participatory conservation with alternative-livelihood support as the resolution direction.

10. Mains angles

- ANALYSIS: Always distinguish capability/exclusion poverty from income poverty at the start of any poverty-related answer.

- ANALYSIS: Treat the culture-of-poverty thesis as contested: distinguish observed coping behaviour from claims that culture independently causes poverty.

- ANALYSIS: Use the three-actor collaboration model for any government-NGO-private question.

Answer thesis: Poverty in India is a matter of compounded capability deprivation and social exclusion, not income shortfall or a self-perpetuating "culture," and addressing it requires both a genuine three-actor collaboration between government, NGOs and the private sector, and a resolution of the real conflict between environmental-protection goals and the immediate subsistence needs of poor, often resource-dependent, communities.

11. Probable questions

- ANALYSIS: **Prelims**: Who proposed the "culture of poverty" thesis?

- FACT: **Mains (10 marks, 2024 GS-I PYQ, verbatim)**: In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive?

- FACT: **Mains (15 marks, 2025 GS-I PYQ, verbatim)**: Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment.

- ANALYSIS: **Mains (10 marks)**: Critically examine the "culture of poverty" thesis and its sociological critique.

12. Study links

- FACT: Advanced companion: [advanced/09_Poverty-and-Developmental-Issues.md](#).

- FACT: Economy/basic/23_Poverty-Inequality-Social-Sector-and-Inclusive-Growth.md - poverty-

line/MPI measurement methodology and macro data.

- FACT: Social-Justice/basic/02_Poverty-Hunger-Food-and-Nutrition-Security.md - welfare entitlements and scheme detail.

- FACT: Governance/basic/04_NGOs-SHGs-and-Civil-Society-Stakeholders.md - NGO-collaboration mechanism detail.

- FACT: 03_Tribe-and-Tribal-Society.md - displacement/rehabilitation as a related development-conflict axis.

13. Answer architecture (10/15/20-mark support)

Core-only. Poverty answers must establish a mechanism of deprivation and avoid turning a programme announcement, a percentage or an attitude into a causal explanation.

13.1 Directive-to-structure map

Demand family	What is tested	Structure that scores
Explain reasons poverty persists	Structural/access mechanism	capabilities -> exclusion -> delivery/asset/market barriers -> qualification
Comment COVID, class and poverty	Shock transmission, not a generic pandemic narrative	work/income -> housing/health/digital exposure -> unequal recovery -> caution
Discuss three-actor collaboration	Complementary roles and accountability	state -> NGO -> private -> joint monitoring -> limitation
Comment sustainable growth and poor needs	Real trade-off plus design distinction	resource restriction -> livelihood loss -> participatory alternative -> graded verdict
Critically examine culture of poverty	Competing causal accounts	Lewis -> structural critique -> policy implication

13.2 Thesis bank

- **T1: FACT:** Poverty persists when income, assets, services, voice and social recognition fail together; a programme can reach a beneficiary without closing all of those gaps.
- **T2: ANALYSIS:** A shock is class-differentiated when precarious work, dense housing, weak savings and unequal service access transmit it unevenly.
- **T3: ANALYSIS:** Conservation-poverty conflict is real but is shaped by whether design excludes communities or shares voice, livelihood and benefit.

13.3 Mark-scaled spines

10 marks - poverty despite eradication programmes (2018 GS-I). Use T1: distinguish coverage from access/use, explain capability and asset deficits, exclusion and implementation/last-mile barriers, then state why a poverty measure alone cannot identify all failures. Conclude with convergence and accountability, not a generic scheme list.

15 marks - COVID, class inequalities and poverty (2020 GS-I). Map the shock through informal work/income loss, housing and health exposure, migration/social protection access and digital/service divides. Explain why these are channels rather than one uniform experience. Close with resilience and portable access; do not invent a poverty or migration number.

20 marks - development, sustainability and livelihood. Contrast exclusionary and participatory conservation; use a forest/grazing/commons mechanism and the distinct project-displacement route in Topic 03. Add State-NGO-private roles only where the question asks institutional collaboration, then give a conservation-effectiveness versus equity verdict.

13.4 Evidence bank - claim -> named evidence/example -> significance -> limitation

- **E1 - Capability.** *Claim:* income cannot exhaust poverty. *Evidence:* **Amartya Sen's capability approach**. *Significance:* supplies education, health and participation dimensions. *Limitation:* it does not eliminate the importance of income/consumption measurement owned by Economy.
- **E2 - Causal critique.** *Claim:* coping behaviour need not be poverty's cause. *Evidence:* **Oscar Lewis's culture-of-poverty thesis** and its structural critique. *Significance:* makes the causal-direction debate explicit. *Limitation:* do not deny lived coping patterns; do not blame people for structural scarcity.
- **E3 - Dated multidimensional anchor.** *Claim:* deprivation is multidimensional. *Evidence:* **NITI Aayog 2024 discussion paper** estimate for 2022-23. *Significance:* supports a time-bounded MPI example. *Limitation:* not a live 2026 headcount and not evidence that a particular programme caused the change.
- **E4 - Collaboration roles.** *Claim:* each actor has a distinct comparative advantage. *Evidence:* Government (scale/regulation/accountability), NGOs (trust/local knowledge), private sector (technology/resources), cross-linked to Governance. *Significance:* answers the 2024 demand. *Limitation:* unclear

roles diffuse accountability.

- **E5 - Resource-access trade-off.** *Claim:* restriction can harm subsistence where it removes an alternative-free livelihood. *Evidence:* protected forest/grazing/forest produce access mechanism. *Significance:* supports the 2025 demand without declaring conservation inherently anti-poor. *Limitation:* project displacement is a distinct Topic-03 mechanism.

13.5 Balance bank and verdict scaffolds

- ANALYSIS: Distinguish poverty reduction from equality, MPI from income poverty, and programme announcement from outcome.
- ANALYSIS: Do not use COVID as a decorative event; show a class channel and state evidentiary limits.
- ANALYSIS: Do not make sustainability and poverty automatically compatible or irreconcilable.
- **Verdict:** "Poverty is overcome when capability, security and voice are restored together; growth or transfer alone can reduce one deprivation while leaving another."

13.6 Direct Mains demands this Core file must answer alone

Year · Paper · Q	Demand	Core route
2018 · GS-I · Q9	Poverty despite eradication programmes	Section 13.1-13.4, T1/E1-E3
2020 · GS-I · Q9	COVID, class inequalities and poverty	Section 13.1, T2, Section 13.3
2024 · GS-I · Q10	Government-NGO-private collaboration	Section 13.1, E4
2025 · GS-I · Q19	Sustainable growth and poor needs	Section 13.1, T3/E5

Routing correction: Core routing supersedes older advanced/09 pointers; Economy, Governance and Social Justice retain their measurement, institution and entitlement boundaries.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025
- **Paper(s):** GS-I

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-I	19	Sustainable growth versus needs of the poor	Comment · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Sustainable growth versus needs of the poor

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** poverty may be monetary, multidimensional, absolute, relative, chronic, transient or vulnerable-to- poverty. Incidence, depth, severity, inequality, social exclusion and development are different concepts and must not be collapsed into one rate.

- **Development distinction:** economic growth concerns aggregate expansion;

human development concerns health, education and living standards; capability development concerns real freedoms; inclusive and sustainable development add distribution, participation, resilience and ecological constraints. Poverty reduction is one development outcome, not a synonym for development.

- **Indispensable sociology and intersectionality:** assets, land and housing tenure, labour-

market security, discrimination, health shocks, care burdens, indebtedness, service quality and state capacity explain entry, persistence and exit. Rural/urban location, caste, tribe, gender, religion, disability and region alter both exposure and conversion of assistance into durable capability.

- **Measurement control:** a consumption poverty line and the National

Multidimensional Poverty Index answer different questions. Headcount does not show depth or severity; MPI incidence does not equal consumption poverty; a survey estimate does not prove programme causation or current household status.

- **Data/source control:** NITI Aayog's January 2024 discussion paper estimated

11.28 per cent multidimensional poverty in 2022-23 and about 24.82 crore exits between 2013-14 and 2022-23 using an extrapolative method beyond NFHS-5 actuals. MoSPI's HCES 2023-24 covers August 2023-July 2024 and reports consumption, not an official poverty headcount unless a specified methodology is applied.

- **Ownership boundary:** Economy owns Tendulkar/Rangarajan and poverty-line

methodology; Social Justice owns detailed entitlement and scheme architecture; Governance owns partnership design. This owner explains deprivation, exclusion, capability conversion, class-differentiated shocks and development trade-offs without importing those inventories.

- **Four-ledger hostile audit:** literal syllabus, prerequisites, textbook

taxonomy and PYQs were tested for poverty-development distinctions, causal direction, persistence mechanisms, measurement limits, collaboration and environment-livelihood trade-offs.

- **Verified PYQ ownership, 2018-2026:** direct routes cover 2018 persistent

poverty, 2020 pandemic/class inequality, the cross-owned 2024 collaboration demand and the 2025 sustainable-growth/poor-needs conflict. No unavailable 2026 demand or current poverty rate is invented.

INDIAN SOCIETY DEEP-REVIEW CORE CONTROL

- **Must remember:** Poverty is multidimensional deprivation in income or consumption, nutrition, health, education, housing, services, security and agency; development changes capabilities and structural opportunities, while vulnerability describes exposure to falling into or remaining in deprivation.
- **Close distinction:** Absolute is not relative poverty, poverty is not inequality, incidence is not depth or severity, multidimensional indices are not interchangeable with consumption lines, and programme coverage is not proof of adequacy, access or durable exit.
- **Evidence / interpretation limit:** Use Tendulkar/Rangarajan history, NITI Aayog's National MPI and official survey dates/status carefully; map rural, urban, regional, caste, tribe and gender variation, and distinguish correlation from mechanisms such as assets, labour markets, discrimination, health shocks and state capacity.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Capability deprivation?

A. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is

misdirected. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: A. Explanation: Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Capability deprivation?

A. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. B. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. D. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.

Answer: B. Explanation: Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Capability deprivation?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected.

Answer: C. Explanation: Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Capability deprivation?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. C. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. D. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.

Answer: D. Explanation: Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Social exclusion?

A. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. B. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: A. Explanation: Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Social exclusion?

A. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. D. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

Answer: B. Explanation: Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational

condition that an aggregate income statistic cannot express. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Social exclusion?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. C. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

Answer: C. Explanation: Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Social exclusion?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. C. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. D. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.

Answer: D. Explanation: Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies The culture of poverty?

A. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. B. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. C. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. D. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.

Answer: A. Explanation: The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under The culture of poverty?

A. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. B. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. C. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. D. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

Answer: B. Explanation: The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of The culture of poverty?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. C. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. D. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

Answer: C. Explanation: The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about The culture of poverty?

A. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. B. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme

caused the change. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: D. Explanation: The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies The structural critique?

A. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. B. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. C. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

Answer: A. Explanation: The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under The structural critique?

A. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. B. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. C. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. D. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

Answer: B. Explanation: The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of The structural critique?

A. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. B. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

Answer: C. Explanation: The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about The structural critique?

A. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. B. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. C. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. D. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected.

Answer: D. Explanation: The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Short-horizon decision-making?

A. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. C. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. D. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

Answer: A. Explanation: Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Short-horizon decision-making?

A. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. B. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. D. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience.

Answer: B. Explanation: Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Short-horizon decision-making?

A. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. B. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. C. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. D. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

Answer: C. Explanation: Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Short-horizon decision-making?

A. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. B. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. C. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. D. Short-horizon decision-making is the prioritising of immediate survival over long-term

investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.

Answer: D. Explanation: Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies The measurement boundary?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. C. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

Answer: A. Explanation: The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under The measurement boundary?

A. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. B. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. C. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. D. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

Answer: B. Explanation: The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of The measurement boundary?

A. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. B. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. C. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. D. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: C. Explanation: The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about The measurement boundary?

A. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. B. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. C. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. D. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

Answer: D. Explanation: The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Dated multidimensional anchor?

A. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. B. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. C. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. D. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor

communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

Answer: A. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Dated multidimensional anchor?

A. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. B. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. C. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. D. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

Answer: B. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Dated multidimensional anchor?

A. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. B. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. C. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. D. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: C. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Dated multidimensional anchor?

A. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. B. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. C. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. D. The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

Answer: D. Explanation: The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Persistence despite programmes?

A. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. B. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. C. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. D. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

Answer: A. Explanation: Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Persistence despite programmes?

A. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. B. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. C. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. D. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: B. Explanation: Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Persistence despite programmes?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. C. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. D. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.

Answer: C. Explanation: Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Persistence despite programmes?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. C. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. D. Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

Answer: D. Explanation: Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Class-differentiated shock transmission?

A. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. B. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. C. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. D. Conservation restriction and project displacement are different mechanisms, a distinction

the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: A. Explanation: Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Class-differentiated shock transmission?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. C. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. D. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: B. Explanation: Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Class-differentiated shock transmission?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. C. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. D. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

Answer: C. Explanation: Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Class-differentiated shock transmission?

A. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. B. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. C. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. D. Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience.

Answer: D. Explanation: Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies The development-livelihood conflict?

A. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. B. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. C. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. D. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: A. Explanation: The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under The development-livelihood conflict?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. C. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. D. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.

Answer: B. Explanation: The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on

which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of The development-livelihood conflict?

A. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. B. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. C. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. D. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.

Answer: C. Explanation: The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about The development-livelihood conflict?

A. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. B. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. C. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. D. The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

Answer: D. Explanation: The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Two development conflicts kept apart?

A. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. B. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. C. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. D. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use

commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.

Answer: A. Explanation: Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Two development conflicts kept apart?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. C. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. D. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

Answer: B. Explanation: Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Two development conflicts kept apart?

A. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. B. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. C. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. D. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

Answer: C. Explanation: Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Two development conflicts kept apart?

A. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. B. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. C. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. D. Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.

Answer: D. Explanation: Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Two conservation designs?

A. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. B. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. C. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. D. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.

Answer: A. Explanation: Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Two conservation designs?

A. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. B. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. C. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. D. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

Answer: B. Explanation: Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights

and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Two conservation designs?

A. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. B. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. C. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. D. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.

Answer: C. Explanation: Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Two conservation designs?

A. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. B. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. C. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. D. Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.

Answer: D. Explanation: Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Reduction rather than elimination?

A. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. B. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. C. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. D. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.

Answer: A. Explanation: Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Reduction rather than elimination?

A. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. B. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. C. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. D. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.

Answer: B. Explanation: Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Reduction rather than elimination?

A. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. B. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. C. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. D. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.

Answer: C. Explanation: Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Reduction rather than elimination?

A. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. B. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. C. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. D. Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.

Answer: D. Explanation: Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. The remaining

options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Three-actor comparative advantage?

A. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. B. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. C. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. D. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.

Answer: A. Explanation: The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Three-actor comparative advantage?

A. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. B. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. C. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. D. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.

Answer: B. Explanation: The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Three-actor comparative advantage?

A. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. B. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. C. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. D. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

Answer: C. Explanation: The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Three-actor comparative advantage?

A. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. B. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. C. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. D. The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.

Answer: D. Explanation: The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Complementary collaboration?

A. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. B. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. C. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. D. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.

Answer: A. Explanation: Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Complementary collaboration?

A. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. B. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. C. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. D. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.

Answer: B. Explanation: Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Complementary collaboration?

A. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. B. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. C. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. D. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Answer: C. Explanation: Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Complementary collaboration?

A. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. B. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. C. Three

trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. D. Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.

Answer: D. Explanation: Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Culture-only misdiagnosis?

A. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. B. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. C. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. D. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.

Answer: A. Explanation: A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Culture-only misdiagnosis?

A. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. B. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. C. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. D. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

Answer: B. Explanation: A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Culture-only misdiagnosis?

A. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. B. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. C. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. D. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Answer: C. Explanation: A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Culture-only misdiagnosis?

A. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.

Answer: D. Explanation: A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Structural intervention?

A. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. B. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. C. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth

against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. D. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.

Answer: A. Explanation: A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Structural intervention?

A. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. B. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.

Answer: B. Explanation: A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Structural intervention?

A. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. B. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. C. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. D. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.

Answer: C. Explanation: A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Structural intervention?

A. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. B. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. C. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. D. A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.

Answer: D. Explanation: A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Conservation implementation contrast?

A. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. B. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Answer: A. Explanation: A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Conservation implementation contrast?

A. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. B. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Answer: B. Explanation: A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Conservation implementation contrast?

A. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. D. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.

Answer: C. Explanation: A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Conservation implementation contrast?

A. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. B. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. C. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. D. A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

Answer: D. Explanation: A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Three standing trade-offs?

A. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023

ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Answer: A. Explanation: Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Three standing trade-offs?

A. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. B. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.

Answer: B. Explanation: Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Three standing trade-offs?

A. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: C. Explanation: Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Three standing trade-offs?

A. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. B. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. D. Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.

Answer: D. Explanation: Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified direct Mains demands?

A. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. B. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. C. Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: A. Explanation: Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified direct Mains demands?

A. Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. B. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the

ledger to this Basic owner. C. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: B. Explanation: Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?

A. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. B. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. C. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. D. The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.

Answer: C. Explanation: Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified direct Mains demands?

A. The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. B. The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. C. Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. D. Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing

superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Answer: D. Explanation: Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Four direct General Studies Paper-I Mains demands are carried by this owner and each is recorded with its exact routing status. The 2018 Q9 demand on the persistence of poverty despite eradication programmes and the 2020 Q9 demand on the pandemic, class inequalities and poverty are routed in the audited 2018-2023 Mains ledger to the Advanced owner, while the Core owner's own answer-architecture table records that Core routing supersedes, so both are answered here from the Basic spine. The locally held official question papers for 2018 and 2020 are scanned images from which reliable text cannot be extracted, so the audited ledger's neutral demand rendering is used for those two years and no verbatim wording is claimed. The 2024 Q10 demand on collaboration between government, non-governmental organisations and the private sector is routed in the audited 2024-2025 ledger to the Governance civil-society owner while this owner's own table claims it as a core route, and that cross-owner conflict is recorded openly here. The 2025 Q19 demand on sustainable growth against the needs of the poor is routed in the same ledger to this Basic owner. The wording of the 2024 and 2025 demands was confirmed in the locally held official question papers for those years. No marking scheme, official key or model answer of the Union Public Service Commission is held locally, and none is reproduced or inferred.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the sociological demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

1. **Claim and named evidence:** Define the central concept and separate it from the nearest social or legal category. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Trace the historical and institutional setting instead of assuming a timeless practice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Explain the norm, incentive, network, power or agency mechanism producing the outcome. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Use one named Indian community, movement, region, institution or source-dated dataset. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical

scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

5. **Claim and named evidence:** Qualify the pattern through intersectionality, regional variation, causation and implementation limits. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The answer must resolve the sociological demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- **FACT: 2024 GS-I PYQ (10 marks, verbatim):** "In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive?" The expected answer: argue for a complementary collaboration model - government providing scale, regulation and last-mile accountability; NGOs providing grassroots trust, local knowledge and last-mile delivery; private sector providing efficiency, technology and resources - with clear role-division and joint monitoring to avoid duplication or accountability gaps.

- **FACT: 2025 GS-I PYQ (15 marks, verbatim):** "Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment." The expected answer: affirm the conflict is real (forest/land restrictions curtailing subsistence access), give concrete examples (protected-area displacement, restricted grazing/fuelwood collection), and argue the resolution lies in participatory conservation models that give poor communities a stake and alternative livelihood support, rather than treating conservation and poverty alleviation as automatically compatible or automatically opposed.

- **ANALYSIS:** A forest-dependent household losing fuelwood-collection access due to a new protected area, without an alternative livelihood programme, illustrates the 2025 PYQ's conflict directly.

9. PYQ application

- **FACT: 2024 GS-I (10 marks):** structure around the three-actor comparative-advantage model (government scale/regulation, NGO grassroots trust, private efficiency/resources) with a clear role-division recommendation.

- **FACT: 2025 GS-I (15 marks):** affirm the conflict, give concrete forest/land-access examples, and recommend participatory conservation with alternative-livelihood support as the resolution direction.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025

- **Paper(s):** GS-I

- Routed question demands: 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-I	19	Sustainable growth versus needs of the poor	Comment · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Sustainable growth versus needs of the poor

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

10. PYQ-based analytical application

- **FACT: 2024 GS-I (10 marks, verbatim):** "In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive?"
Analytical route: apply the complementary-versus-overlapping collaboration distinction, assign specific comparative advantages to each actor, and recommend joint monitoring to prevent accountability diffusion.
- **FACT: 2025 GS-I (15 marks, verbatim):** "Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment."
Analytical route: affirm the conflict using the development-livelihood conflict chain, distinguish exclusionary from participatory conservation implementation, and argue severity is implementation-dependent, concluding with participatory co-management as the preferred resolution direction.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2018, 2020
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-I	9	Persistence of poverty despite eradication programmes	Explain by giving reasons · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-I	9	COVID-19 pandemic, class inequalities and poverty in India	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Persistence of poverty despite eradication programmes
- COVID-19 pandemic, class inequalities and poverty in India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2018 GS-I Q9

Demand: Audited ledger demand rendering: the persistence of poverty despite eradication programmes. Explain by giving reasons, 10 marks, 150 words.

Status: Routed in the audited 2018-2023 Mains ledger to the Advanced owner, with the Core owner recording that Core routing supersedes. The locally held official 2018 paper is a scanned image without reliable text extraction, so the ledger rendering is used and no verbatim wording is claimed.

Model solution: The directive asks for reasons, so the answer must be a chain of mechanisms and not a catalogue of programmes. Begin by fixing what persists: poverty is capability deprivation and social exclusion, so a household can cross an income threshold while remaining unable to be schooled, treated or heard, which is why a programme can succeed on its own indicator and fail on the condition it was created to end. Give the first reason as a conversion problem: coverage, access and use are three different things, and an entitlement that formally covers a household can still fail on distance, cost, documentation, information or last-mile delivery capacity. Give the second reason as an asset and market problem: without land, credit, secure tenure or a stable wage relation, a transfer smooths consumption without changing the household's opportunity set, so deprivation returns with the next shock. Give the third reason as exclusion: caste, gender, religion and region shape which households are reached first and which are reached last, and the same delivery system therefore produces unequal results without any explicit discrimination. Give the fourth reason as short horizons: chronic insecurity forces survival-first decisions that suppress investment in schooling and savings, and this is a consequence of constrained choice rather than a cultural failing, which is the point at which weak answers slide into blaming the poor. Add the measurement caution: the NITI Aayog discussion paper of 2024 estimated multidimensional poverty at 11.28 per cent in 2022-23 with about 24.8 crore exits between 2013-14 and 2022-23, and those are estimates for a stated period that neither prove nor disprove a particular programme's effect. Conclude that persistence is a conversion and exclusion problem, so convergence, accountability and asset access matter more than adding another announcement, and route poverty-line methodology to Economy and entitlement design to Social Justice.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2018 GS-I Q9", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The directive asks for reasons, so the answer must be a chain of mechanisms and not a catalogue of programmes. Begin by fixing what persists: poverty is capability deprivation and social exclusion, so a household can cross an income threshold while remaining unable to be schooled, treated or heard, which is why a programme can succeed on its own indicator and fail on the condition it was created to end. Give the first reason as a conversion problem: coverage, access and use are three different things, and an entitlement that formally covers a household can still fail on distance, cost, documentation, information or last-mile delivery capacity. Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2018 GS-I Q9", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2020 GS-I Q9

Demand: Audited ledger demand rendering: the COVID-19 pandemic, class inequalities and poverty in India. Comment, 10 marks, 150 words.

Status: Routed in the audited 2018-2023 Mains ledger to the Advanced owner, with the Core owner recording that Core routing supersedes. The locally held official 2020 paper is a scanned image without reliable text extraction, so the ledger rendering is used and no verbatim wording is claimed. No pandemic-period poverty, migration or employment figure is asserted anywhere in this package.

Model solution: Comment invites a considered judgement, so state the analytical position first: a shock is not itself an equaliser or a leveller, it is transmitted through pre-existing class positions, and the answer's task is to name the transmission channels rather than to assert a magnitude. Channel one is work. Precarious informal employment without contracts, notice or paid leave converts a suspension of activity directly into a loss of income, while secure salaried work converts it into an inconvenience. Channel two is housing and health. Dense, poorly serviced housing raises exposure and makes isolation impracticable, so the same public-health measure imposes very different costs by class. Channel three is savings and social protection. Thin buffers force distress borrowing or asset sale, and where entitlement is tied to place of registration rather than to the person, mobility itself becomes a reason for exclusion from relief. Channel four is services and connectivity. Where schooling, work and relief move to digital delivery, unequal device and internet access converts a temporary disruption into a durable learning and earnings loss. Add the relational layer: caste, gender and location intersect these channels, so aggregate statements conceal which group actually bore the cost. State the evidentiary limit explicitly, because it is part of a good comment: this

package holds no pandemic-period poverty or migration figure and asserts none, and the NITI Aayog 2024 estimate covers 2022-23 rather than the shock period. Conclude that class inequality determined the depth of the shock more than the shock determined class inequality, and that the policy implication is portable entitlement, universal basic services and resilience for informal workers rather than a one-time relief narrative.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2020 GS-I Q9", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Comment invites a considered judgement, so state the analytical position first: a shock is not itself an equaliser or a leveller, it is transmitted through pre-existing class positions, and the answer's task is to name the transmission channels rather than to assert a magnitude. Conclude that class inequality determined the depth of the shock more than the shock determined class inequality, and that the policy implication is portable entitlement, universal basic services and resilience for informal workers rather than a one-time relief narrative.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named

evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 2 - 2020 GS-I Q9", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 3 - 2024 GS-I Q10

Demand: In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive? (Answer in 150 words) 10 marks.

Status: Wording confirmed in the locally held official 2024 General Studies Paper-I. The audited 2024-2025 Mains ledger routes this row to the Governance civil-society owner while this owner's own answer-architecture table claims it; the conflict is recorded openly and this answer supplies the sociological role-division argument without claiming the Governance owner's institutional-mechanism material.

Model solution: Answer the word most productive directly by naming a form of collaboration rather than praising cooperation in general: the productive form is complementary, in which each actor performs the function it is best placed to perform under a single joint monitoring arrangement. Set out the comparative advantages. Government supplies regulatory authority, funding at scale, statutory backing and final accountability, none of which the other two can substitute. Non-governmental organisations supply grassroots trust, knowledge of community-specific constraints and last-mile delivery into households that a formal system reaches late or not at all. Private actors supply technology, logistics, efficiency and resources, particularly where delivery must scale or a supply chain must be built. Then state the failure mode, which is what converts this from a list into an argument: where roles are not divided, the same function is attempted twice, coverage still fails at the margin, and responsibility for a poor outcome is diffused across three actors so that none of them owns it. That is why joint monitoring, a single accountable outcome owner and transparent role definition matter more than the number of partners. Qualify the recommendation honestly: collaboration cannot substitute for the conversion factors that decide whether an entitlement is usable, namely schooling, information, distance and stigma, and no partnership arrangement should be credited with an outcome that this package cannot evidence. Conclude that the most productive collaboration is comparative-advantage division plus joint accountability, and route detailed civil-society and partnership-institution theory to the Governance owner rather than restating it.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 3 - 2024 GS-I Q10", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Answer the word most productive directly by naming a form of collaboration rather than praising cooperation in general: the productive form is complementary, in which each actor performs the function it is best placed to perform under a single joint monitoring arrangement. Set out the comparative advantages. Government supplies regulatory authority, funding at scale, statutory backing and final accountability, none of which the other two can substitute. Non-governmental organisations supply grassroots trust, knowledge of community-specific constraints and last-mile delivery into households that a formal system reaches late or not at all. How to improve this answer: For "PYQ DEMAND CARD 3 - 2024 GS-I Q10", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 4 - 2025 GS-I Q19

Demand: Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment. (Answer in 250 words) 15 marks.

Status: Wording confirmed in the locally held official 2025 General Studies Paper-I and routed in the audited 2024-2025 Mains ledger to this Basic owner.

Model solution: Affirm the conflict without surrendering to it, because comment rewards a graded judgement rather than either denial or despair. State the mechanism first: where a forest, wetland or grazing common is designated for strict protection, the households that depended on grazing, fuelwood or non-timber forest produce lose an alternative-free subsistence base, so the conservation objective is achieved and the livelihood cost is imposed at the same time on the poorest users. Distinguish this from the adjacent mechanism at once, because merging them is the commonest error: conservation restriction curtails access without moving anyone, whereas project-driven displacement physically relocates a community and is owned by the tribal-society topic. Now make the analytical move that the directive rewards: the severity of the conflict is a function of implementation design rather than an unavoidable law of development. Exclusionary conservation closes access entirely and transfers the whole adjustment cost to local users. Participatory conservation grants co-management rights, recognises use rights and supplies alternative livelihood such as value chains in non-timber produce or ecotourism in exchange for

sustainable-use commitments, which substantially reduces the conflict. Keep the qualification honest: participatory design rarely eliminates the conflict, because some restriction on prior open access is normally still required, and it may be slower and permit more resource use than strict exclusion, which is a genuine effectiveness-against-equity trade-off rather than an administrative inconvenience. Add the deprivation frame: poverty here is capability deprivation and social exclusion, so an answer that measures only income loss understates what is removed. Conclude that sustainable growth conflicts with the needs of the poor whenever the poor bear the adjustment cost without voice or compensation, and that the resolution is participatory design, secure use rights and alternative livelihood rather than an assumption that conservation and poverty reduction are automatically compatible. Assert no displacement count, no protected-area figure and no poverty rate.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 4 - 2025 GS-I Q19", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Affirm the conflict without surrendering to it, because comment rewards a graded judgement rather than either denial or despair. State the mechanism first: where a forest, wetland or grazing common is designated for strict protection, the households that depended on grazing, fuelwood or non-timber forest produce lose an alternative-free subsistence base, so the conservation objective is achieved and the livelihood cost is imposed at the same time on the poorest users. Distinguish this from the adjacent mechanism at once, because merging them is the commonest error: conservation restriction curtails access without moving anyone, whereas project-driven displacement physically relocates a community and is owned by the tribal-society topic. Now make the analytical move that the directive rewards: the severity of the conflict is a function of implementation design rather than an unavoidable law of development. Exclusionary conservation closes access entirely and transfers the whole adjustment cost to local users. Participatory conservation grants co-management rights, recognises use rights and supplies alternative livelihood such as value chains in non-timber produce or ecotourism in exchange for sustainable-use commitments, which substantially reduces the conflict. Keep the qualification honest: participatory design rarely eliminates the conflict, because some restriction on prior open access is normally still required, and it may be slower and permit more resource use than strict exclusion, which is a genuine effectiveness-against-equity trade-off rather than an administrative inconvenience. Add the deprivation frame: poverty here is capability deprivation and social exclusion, so an answer that measures only income loss understates what is removed. Conclude that sustainable growth conflicts with the needs of the poor whenever the poor bear the adjustment cost without voice or compensation, and that the resolution is participatory design, secure use rights and alternative livelihood rather than an assumption that conservation and poverty reduction are automatically compatible. Assert no displacement count, no protected-area figure and no poverty rate.

Analytical body:

1. **Claim and named evidence:** Demand: Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment. (Answer in 250 words) 15 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Status: Wording confirmed in the locally held official 2025 General Studies Paper-I and routed in the audited 2024-2025 Mains ledger to this Basic owner. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Affirm the conflict without surrendering to it, because comment rewards a graded judgement rather than either denial or despair. State the mechanism first: where a forest, wetland or grazing common is designated for strict protection, the households that depended on grazing, fuelwood or non-timber forest produce lose an alternative-free subsistence base, so the conservation objective is achieved and the livelihood cost is imposed at

the same time on the poorest users. Distinguish this from the adjacent mechanism at once, because merging them is the commonest error: conservation restriction curtails access without moving anyone, whereas project-driven displacement physically relocates a community and is owned by the tribal-society topic. Now make the analytical move that the directive rewards: the severity of the conflict is a function of implementation design rather than an unavoidable law of development. Exclusionary conservation closes access entirely and transfers the whole adjustment cost to local users. Participatory conservation grants co-management rights, recognises use rights and supplies alternative livelihood such as value chains in non-timber produce or ecotourism in exchange for sustainable-use commitments, which substantially reduces the conflict. Keep the qualification honest: participatory design rarely eliminates the conflict, because some restriction on prior open access is normally still required, and it may be slower and permit more resource use than strict exclusion, which is a genuine effectiveness-against-equity trade-off rather than an administrative inconvenience. Add the deprivation frame: poverty here is capability deprivation and social exclusion, so an answer that measures only income loss understates what is removed. Conclude that sustainable growth conflicts with the needs of the poor whenever the poor bear the adjustment cost without voice or compensation, and that the resolution is participatory design, secure use rights and alternative livelihood rather than an assumption that conservation and poverty reduction are automatically compatible. Assert no displacement count, no protected-area figure and no poverty rate.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 4 - 2025 GS-I Q19", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain by giving reasons why poverty persists in India despite eradication programmes. Answer in about 150 words.

Model thesis: Poverty persists where coverage exists but access, capability and social recognition do not, so the reasons must be given as conversion and delivery mechanisms rather than as a list of schemes or a single income statistic.

Claim -> named evidence -> analysis -> qualification:

- Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.
- Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.
- Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.
- The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.

Qualified conclusion: Poverty persists where coverage exists but access, capability and social recognition do not, so the reasons must be given as conversion and delivery mechanisms rather than as a list of schemes or a single income statistic.

Demand decoding: The directive **explain** requires a direct position on "Explain by giving reasons why poverty persists in India despite eradication programmes....", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Poverty persists where coverage exists but access, capability and social recognition do not, so the reasons must be given as conversion and delivery mechanisms rather than as a list of schemes or a single income statistic.

Analytical body:

1. **Claim and named evidence:** Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Poverty persists where coverage exists but access, capability and social recognition do not, so the reasons must be given as conversion and delivery mechanisms rather than as a list of schemes or a single income statistic.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Explain by giving reasons why poverty persists in India despite eradication programmes....", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Discuss the collaboration between government, non-governmental organisations and the private sector that would be most productive for socio-economic development. Answer in about 150 words.

Model thesis: Productive collaboration divides roles by comparative advantage under joint monitoring, because each actor holds a different strength and undivided roles convert cooperation into duplication and diffused accountability.

Claim -> named evidence -> analysis -> qualification:

- The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.
- Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.
- Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.

Qualified conclusion: Productive collaboration divides roles by comparative advantage under joint monitoring, because each actor holds a different strength and undivided roles convert cooperation into duplication and diffused accountability.

Demand decoding: The directive **discuss** requires a direct position on "Discuss the collaboration between government, non-governmental organisations and the private...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Productive collaboration divides roles by comparative advantage under joint monitoring, because each actor holds a different strength and undivided roles convert cooperation into duplication and diffused accountability.

Analytical body:

1. **Claim and named evidence:** The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome ->

feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Productive collaboration divides roles by comparative advantage under joint monitoring, because each actor holds a different strength and undivided roles convert cooperation into duplication and diffused accountability.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Discuss the collaboration between government, non-governmental organisations and the private...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 3 - 15 MARKS

Question: Comment on the claim that a pandemic shock deepened class inequalities and poverty in India. Answer in about 250 words.

Model thesis: A shock becomes class-differentiated through named channels of work, housing, health exposure, savings and service access, so the defensible comment traces those channels and states its evidentiary limits instead of asserting a magnitude.

Claim -> named evidence -> analysis -> qualification:

- Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience.
- Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.
- Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.
- The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.

Qualified conclusion: A shock becomes class-differentiated through named channels of work, housing, health exposure, savings and service access, so the defensible comment traces those channels and states its evidentiary limits instead of asserting a magnitude.

Demand decoding: The directive **comment** requires a direct position on "Comment on the claim that a pandemic shock deepened class inequalities and poverty in India....", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: A shock becomes class-differentiated through named channels of work, housing, health exposure, savings and service access, so the defensible comment traces those channels and states its evidentiary

limits instead of asserting a magnitude.

Analytical body:

1. **Claim and named evidence:** Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

ORIGINAL MAINS 4 - 15 MARKS

Question: Comment on the claim that achieving sustainable growth with environmental protection can conflict with the needs of the poor. Answer in about 250 words.

Model thesis: The conflict is real because restriction removes an alternative-free subsistence base, but its severity is set by whether design excludes communities or shares voice, livelihood and benefit with them.

Claim -> named evidence -> analysis -> qualification:

- The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.
- Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.
- Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.
- Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.
- A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

Qualified conclusion: The conflict is real because restriction removes an alternative-free subsistence base, but its severity is set by whether design excludes communities or shares voice, livelihood and benefit with them.

Demand decoding: The directive **comment** requires a direct position on "Comment on the claim that achieving sustainable growth with environmental protection can...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The conflict is real because restriction removes an alternative-free subsistence base, but its severity is set by whether design excludes communities or shares voice, livelihood and benefit with them.

Analytical body:

1. **Claim and named evidence:** The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner

labels participatory conservation vs exclusionary conservation. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication.

Qualification: State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

4. **Claim and named evidence:** Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

5. **Claim and named evidence:** A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.

Analysis: Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The conflict is real because restriction removes an alternative-free subsistence base, but its severity is set by whether design excludes communities or shares voice, livelihood and benefit with them.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Comment on the claim that achieving sustainable growth with environmental protection can...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 5 - 20 MARKS

Question: Critically examine the culture-of-poverty thesis and its sociological critique. Answer in about 300 words.

Model thesis: The dispute is about the direction of causation rather than about whether coping behaviour exists, and because the answer decides whether policy corrects material conditions or attitudes, the critical verdict must favour structural intervention while refusing to deny lived adaptation.

Claim -> named evidence -> analysis -> qualification:

- The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.
- The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected.
- Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.
- A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.

- A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.

Qualified conclusion: The dispute is about the direction of causation rather than about whether coping behaviour exists, and because the answer decides whether policy corrects material conditions or attitudes, the critical verdict must favour structural intervention while refusing to deny lived adaptation.

Demand decoding: The directive **critically examine** requires a direct position on "Critically examine the culture-of-poverty thesis and its sociological critique. Answer in...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The dispute is about the direction of causation rather than about whether coping behaviour exists, and because the answer decides whether policy corrects material conditions or attitudes, the critical verdict must favour structural intervention while refusing to deny lived adaptation.

Analytical body:

1. **Claim and named evidence:** The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The dispute is about the direction of causation rather than about whether coping behaviour exists, and because the answer decides whether policy corrects material conditions or attitudes, the critical verdict

must favour structural intervention while refusing to deny lived adaptation.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Critically examine the culture-of-poverty thesis and its sociological critique. Answer in...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate how conservation design decides whether environmental protection deepens or relieves poverty. Answer in about 300 words.

Model thesis: Design rather than intention determines the welfare sign of conservation, so the evaluation compares exclusionary and participatory implementation on livelihood, voice and ecological outcome and closes with an explicit effectiveness-against-equity trade-off.

Claim -> named evidence -> analysis -> qualification:

- Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.
- Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.
- A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.
- Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.
- The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.

Qualified conclusion: Design rather than intention determines the welfare sign of conservation, so the evaluation compares exclusionary and participatory implementation on livelihood, voice and ecological outcome and closes with an explicit effectiveness-against-equity trade-off.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate how conservation design decides whether environmental protection deepens or relieves...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Design rather than intention determines the welfare sign of conservation, so the evaluation compares exclusionary and participatory implementation on livelihood, voice and ecological outcome and closes with an explicit effectiveness-against-equity trade-off.

Analytical body:

1. **Claim and named evidence:** Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Design rather than intention determines the welfare sign of conservation, so the evaluation compares exclusionary and participatory implementation on livelihood, voice and ecological outcome and closes with an explicit effectiveness-against-equity trade-off.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

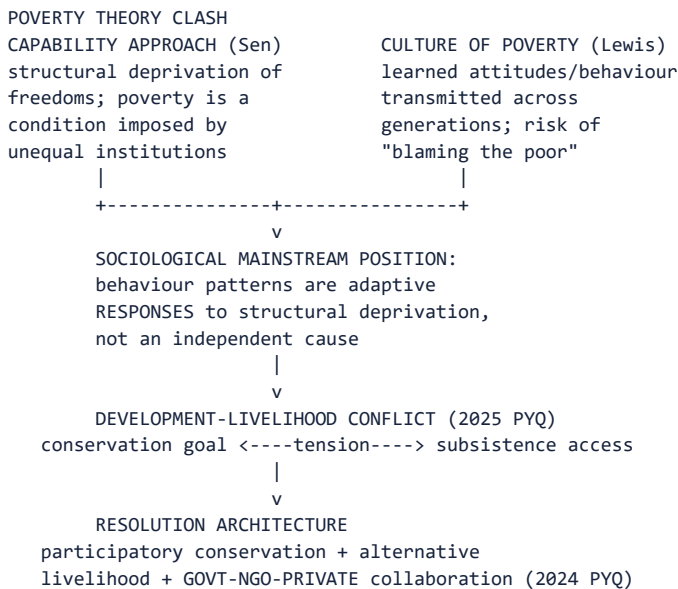

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Evaluate how conservation design decides whether environmental protection deepens or relieves...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Indian Society | **Tier:** Advanced | **GS Paper:** GS-I. **Core area:** The capability-versus-culture-of-poverty theoretical clash, the causal architecture of the development-livelihood conflict, and the three-actor collaboration trade-offs. **Grounded in:** Amartya Sen's capability approach; Oscar Lewis's culture-of-poverty thesis and its critics; NITI Aayog's 2024 multidimensional-poverty discussion paper; audited 2024 and 2025 GS-I Mains PYQs. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/09_Poverty-and-Developmental-Issues.md.

1. Architecture

Analytical claim: ANALYSIS: The capability-versus-culture-of-poverty debate is not merely academic - it determines whether policy targets structural barriers (land, credit, education access) or individual behaviour (financial literacy campaigns aimed at changing attitudes); strong structural critiques warn against making culture a primary cause. This supports treating the 2025 PYQ's development-livelihood conflict as a resource-access and power problem requiring institutional resolution, not as "poor communities resisting progress."

2. Concepts and distinctions

Concept	Precise meaning
FACT: Capability deprivation vs income poverty	Income poverty is measured against a monetary threshold; capability deprivation is measured by whether a person can actually achieve valued functionings (health, education, social participation) - the two frequently diverge, since a household above the poverty line can still be capability-poor if local schools or health facilities are absent.
FACT: Culture of poverty vs structural/institutional causation	Lewis's thesis treats certain behaviours (present-orientation, low future planning, resignation) as a semi-autonomous culture transmitted intergenerationally; the structural/institutional critique treats the same behaviours as rational adaptations to chronic insecurity, unequal land/credit access and weak public services - the direction of causation is the entire dispute.
ANALYSIS: Development-conservation conflict vs development-displacement conflict	The 2025 PYQ's conflict (conservation restricting subsistence access) is distinct from, though related to, the displacement conflict covered in Topic 03 (project-driven physical relocation) - conservation-driven restriction can curtail livelihood without physical displacement, e.g., restricted grazing or fuelwood collection in a protected area.
ANALYSIS: Participatory conservation vs exclusionary conservation	Exclusionary (fortress) conservation models restrict local access entirely to protect an ecosystem; participatory models (joint forest management-style approaches) give local, often poor, communities a formal stake and alternative livelihood support in exchange for sustainable-use commitments - the latter is the sociologically preferred resolution to the 2025 PYQ's conflict.
ANALYSIS: Complementary vs overlapping collaboration	Complementary collaboration (2024 PYQ) assigns distinct roles to government (scale, regulation, accountability), NGOs (grassroots trust, last-mile delivery) and the private sector (efficiency, technology, resources); overlapping collaboration, where roles are not clearly divided, tends to produce duplication, accountability gaps and coordination failure.

3. Detailed causal chain

Capability-deprivation chain

1. Structural barriers (unequal land distribution, weak rural schooling, labour-market discrimination by caste/gender) restrict a household's real opportunity set.
2. ANALYSIS: Chronic income insecurity forces short-horizon decision-making (prioritising immediate survival over long-term investment in education or savings).
3. ANALYSIS: Lewis interpreted some short-horizon behaviours as a transmitted culture; critics argue they can instead be rational adaptations to insecurity and structural barriers.
4. FACT: A robust policy response targets structural barriers directly (land access, school quality, anti-discrimination enforcement) while avoiding the assumption that poor people need cultural correction in isolation from material conditions.

Development-livelihood conflict chain (2025 PYQ)

1. A forest, wetland or grazing commons that a poor community depends on for subsistence is designated for strict conservation to meet sustainability or biodiversity goals.
2. ANALYSIS: Exclusionary implementation (fencing off access, banning collection/grazing without alternative provision) removes the community's livelihood base while achieving the conservation objective.
3. ANALYSIS: Where implementation is instead participatory - the community is given co-management

rights, alternative livelihood (ecotourism, non-timber forest produce value chains) or compensatory access - the conflict is substantially reduced, though rarely eliminated entirely, since some restriction on prior open access is usually still required.

4. ANALYSIS: The 2025 PYQ's "comment" invites exactly this nuanced position: the conflict is real and structural, but its severity is a function of implementation design (exclusionary versus participatory), not an unavoidable law of development.

Three-actor collaboration chain (2024 PYQ)

1. Government provides regulatory authority, funding at scale and final accountability for outcomes.

2. NGOs provide grassroots trust, local knowledge of community-specific constraints and last-mile delivery capacity that government alone often lacks.

3. Private-sector actors provide technology, efficiency and resources, particularly for scalable service delivery or supply-chain components.

4. ANALYSIS: Productive collaboration requires clear role division and joint monitoring; where roles overlap without coordination, duplication and accountability gaps result instead of synergy.

4. Institutional and reform architecture

- ANALYSIS: **NGO-government-private role-division frameworks:** structured public-private-NGO partnership models (with defined monitoring and accountability mechanisms) are the institutional answer to the 2024 PYQ; detailed NGO-mechanism theory is in Governance/advanced/04.

- FACT: ****Poverty-measurement and welfare-entitlement architecture (cross-linked, not restated):**** MPI/poverty-line methodology is Economy's territory; specific welfare entitlements are Social-Justice's territory.

5. Indian applications and boundary cases

- ANALYSIS: **Boundary case 1 - culture-only misdiagnosis:** a financial-literacy programme that assumes poor households simply need to be taught to "plan better," without addressing income insecurity, illustrates the risk of treating a contested cultural account as a complete causal explanation.

- ANALYSIS: **Boundary case 2 - structural intervention:** a land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-approach-consistent alternative.

- ANALYSIS: **Boundary case 3 - conservation implementation contrast:** a protected-area notification banning all local resource use without alternative livelihood provision illustrates the sharpest form of the 2025 PYQ's conflict, while a community granted co-management rights and an ecotourism-based alternative income stream illustrates the conflict substantially, though not perfectly, resolved.

6. Limitations and trade-offs

- ANALYSIS: **Conservation-effectiveness-versus-equity trade-off:** participatory models can be slower to implement and may allow more resource use than a strict exclusionary model, raising a genuine (not merely administrative) trade-off between ecological outcomes and distributive equity.

- ANALYSIS: **Collaboration-accountability trade-off:** distributing roles across government, NGOs and the private sector improves comparative-advantage matching but complicates accountability if outcomes fail, since responsibility can be diffused across three actors.

- ANALYSIS: **Structural-reform-pace trade-off:** capability-approach-consistent interventions (land reform, schooling-quality improvement) address poverty's root causes but take far longer to show results than the direct-transfer or awareness-campaign approaches that a culture-of-poverty framing might favour.

7. Must-Know Facts for Advanced Prelims

- FACT: Amartya Sen's capability approach is the standard corrective frame against

income-only or culture-only theories of poverty.

- FACT: Oscar Lewis's "culture of poverty" thesis originated from ethnographic fieldwork among poor urban communities in Mexico and Puerto Rico, later applied more broadly and heavily critiqued.
- CURRENT: NITI Aayog's 2024 discussion paper *Multidimensional Poverty in India since 2005-06* estimated multidimensional poverty at 11.28% in 2022-23 and about 24.8 crore exits between 2013-14 and 2022-23 - dated estimates, not a current figure.
- ANALYSIS: Participatory/joint conservation-management models are the sociologically preferred resolution to development-livelihood conflict, though not a complete solution.

8. Advanced Prelims traps

- WRONG: The culture-of-poverty thesis is the mainstream sociological explanation for chronic poverty. -> It is a contested, widely critiqued thesis; the mainstream position treats poverty-linked behaviour as an adaptive response to structural deprivation, not an independent cultural cause.
 - WRONG: Conservation and poor people's needs are inherently, permanently opposed. -> The 2025 PYQ's conflict is real but its severity depends on implementation design - exclusionary versus participatory - not an unavoidable law.
 - WRONG: Government, NGO and private-sector roles in development collaboration are interchangeable. -> Each has a distinct comparative advantage; effective collaboration requires role division, not substitution.
 - WRONG: NITI Aayog's multidimensional-poverty estimate represents a current 2026 poverty count.
- > The 2024 discussion paper's 11.28% estimate is for 2022-23; state the data period and method rather than treating it as a live headcount.

9. CURRENT: Current-anchor note

- CURRENT: NITI Aayog's 2024 discussion paper estimated multidimensional poverty at 11.28% in 2022-23 and about 24.8 crore exits between 2013-14 and 2022-23. Cite the date, period and estimated nature of the figure; avoid presenting it as a current count.

10. PYQ-based analytical application

- FACT: **2024 GS-I (10 marks, verbatim):** "In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive?"
Analytical route: apply the complementary-versus-overlapping collaboration distinction, assign specific comparative advantages to each actor, and recommend joint monitoring to prevent accountability diffusion.
- FACT: **2025 GS-I (15 marks, verbatim):** "Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment."
Analytical route: affirm the conflict using the development-livelihood conflict chain, distinguish exclusionary from participatory conservation implementation, and argue severity is implementation-dependent, concluding with participatory co-management as the preferred resolution direction.

11. Mains-ready framework

Central thesis: Poverty in India is best explained by capability deprivation and structural exclusion, not an independently transmitted "culture," and this same structural lens best resolves the conflict between environmental-protection goals and poor communities' subsistence needs - through participatory, not exclusionary, conservation design - while institutional collaboration between government, NGOs and the private sector is most productive when roles are clearly divided rather than overlapping.

1. Distinguish capability deprivation from income poverty at the outset.
2. Evaluate the culture-of-poverty thesis and its structural critique; do not treat either observed coping behaviour or culture as a complete independent cause.
3. Apply the development-livelihood conflict chain with a concrete resource-access example.

4. Distinguish exclusionary from participatory conservation implementation.
5. Apply the three-actor comparative-advantage model to the collaboration question.
6. Flag the conservation-effectiveness-versus-equity and accountability-diffusion trade-offs.
7. Cross-link poverty-measurement methodology and welfare-entitlement detail without restating them.
8. Conclude with structural, participatory and role-divided recommendations across both PYQs.

12. Probable questions

- ANALYSIS: **Prelims:** Which anthropologist proposed the "culture of poverty" thesis, and in which countries was his original fieldwork conducted?
- FACT: **Mains (10 marks, 2024 GS-I PYQ, verbatim):** In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive?
- FACT: **Mains (15 marks, 2025 GS-I PYQ, verbatim):** Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India. Comment.
- ANALYSIS: **Mains (15 marks):** Distinguish between exclusionary and participatory conservation models and their differing effects on poor, resource-dependent communities.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: [_PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md](#).

- **Years represented:** 2018, 2020
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-I	9	Persistence of poverty despite eradication programmes	Explain by giving reasons · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-I	9	COVID-19 pandemic, class inequalities and poverty in India	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Persistence of poverty despite eradication programmes
- COVID-19 pandemic, class inequalities and poverty in India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

Poverty and Developmental Issues: RAPID CONCEPT AND EVIDENCE MAP

1. **Capability deprivation:** Capability deprivation is the condition in which a person cannot achieve basic valued functionings such as being nourished, being educated, being healthy and participating in social life, which is why Amartya Sen's approach measures poverty directly against those freedoms rather than inferring them from an income threshold.
2. **Social exclusion:** Social exclusion is deprivation compounded by exclusion from social networks, institutions and opportunity structures on grounds of caste, gender, religion or region, and it is a relational condition that an aggregate income statistic cannot express.
3. **The culture of poverty:** The culture of poverty is Oscar Lewis's contested thesis that persistent poverty can generate values, attitudes and behaviour that are reproduced across generations, and it arose from particular ethnographic settings rather than as a complete explanation of poverty anywhere.
4. **The structural critique:** The structural or institutional critique holds that the behaviours Lewis described are better read as rational adaptations to chronic insecurity, unequal land and credit access and weak public services, so the direction of causation is the entire dispute and a policy that corrects culture while leaving material conditions untouched is misdirected.
5. **Short-horizon decision-making:** Short-horizon decision-making is the prioritising of immediate survival over long-term investment in schooling or savings, and it is evidence of a constrained opportunity set rather than proof of an independent cultural cause, which is why coping behaviour must be described without being converted into blame.
6. **The measurement boundary:** The measurement boundary of this owner is that the Tendulkar and Rangarajan poverty-line formulae and the construction of the multidimensional poverty index belong to Economy, while welfare entitlement and scheme detail belong to Social Justice, so a sociological answer explains deprivation mechanisms rather than restating another owner's methodology.
7. **Dated multidimensional anchor:** The NITI Aayog discussion paper of 2024 titled Multidimensional Poverty in India since 2005-06 estimated multidimensional poverty at 11.28 per cent in 2022-23 and about 24.8 crore persons exiting multidimensional poverty between 2013-14 and 2022-23, and these are the paper's estimates for a stated period rather than a current headcount or evidence that a named programme caused the change.
8. **Persistence despite programmes:** Persistence despite programmes is the gap between coverage, access and actual use, in which an entitlement exists on paper while asset deficits, exclusion, distance, information failure and last-mile delivery weaknesses stop it from reaching or being usable by the household it names.

9. **Class-differentiated shock transmission:** Class-differentiated shock transmission is the process by which a common shock produces unequal outcomes through precarious informal work and income loss, dense housing and health exposure, thin savings and social-protection portability, and unequal digital and service access, so the shock is a channel structure rather than one uniform experience.
10. **The development-livelihood conflict:** The development-livelihood conflict is the tension that arises when environmental conservation or sustainable-development measures restrict access to land, forest or water resources on which poor communities directly depend for subsistence, and it is a genuine trade-off rather than a failure of communication.
11. **Two development conflicts kept apart:** Conservation restriction and project displacement are different mechanisms, a distinction the Advanced owner labels development-conservation conflict vs development-displacement conflict: the first curtails grazing, fuelwood or produce collection without moving anyone, while the second physically relocates a community and is owned by the tribal-society topic.
12. **Two conservation designs:** Exclusionary conservation restricts local access entirely in order to protect an ecosystem while participatory conservation gives local communities a formal stake, co-management rights and alternative livelihood support in exchange for sustainable-use commitments, a design choice the Advanced owner labels participatory conservation vs exclusionary conservation.
13. **Reduction rather than elimination:** Participatory design substantially reduces the conservation-livelihood conflict without eliminating it, because some restriction on prior open access is usually still required, so the honest verdict describes severity as a function of design rather than declaring the conflict solved.
14. **Three-actor comparative advantage:** The three-actor comparative-advantage model holds that government supplies regulatory authority, funding at scale and final accountability, non-governmental organisations supply grassroots trust, local knowledge and last-mile delivery, and private actors supply technology, efficiency and resources, so no single actor ordinarily holds all three strengths.
15. **Complementary collaboration:** Complementary collaboration is a role division in which each actor performs the function it is best placed to perform under joint monitoring, and the Advanced owner contrasts it under the label complementary vs overlapping collaboration with an arrangement in which undivided roles produce duplication, coordination failure and diffused accountability.
16. **Culture-only misdiagnosis:** A financial-literacy programme that assumes poor households merely need to be taught to plan better, while leaving income insecurity and asset exclusion untouched, illustrates the risk of treating a contested cultural account as a complete causal explanation.
17. **Structural intervention:** A land-titling and credit-access programme that directly expands a poor household's real opportunity set illustrates the capability-consistent alternative, because it changes what the household can subsequently do rather than what it is told to do.
18. **Conservation implementation contrast:** A protected-area notification that bans all local resource use without alternative livelihood provision illustrates the sharpest form of the conflict, while a community granted co-management rights and an alternative income stream illustrates the same conflict substantially, though not perfectly, resolved.
19. **Three standing trade-offs:** Three trade-offs run through the topic: participatory conservation can be slower and may permit more resource use than strict exclusion, distributing roles across three actors improves capability matching while diffusing accountability if outcomes fail, and structural reforms such as land access and schooling quality address root causes but show results far more slowly than transfers or awareness campaigns.
20. **Verified direct Mains demands:** Four direct General Studies Paper-I demands are carried by this owner: the 2018 demand on the persistence of poverty despite eradication programmes worth 10 marks and the 2020 demand on the pandemic, class inequalities and poverty worth 10 marks, both routed in the audited 2018-2023 ledger to the Advanced owner with Core routing superseding, the 2024 demand on government, non-governmental and private collaboration worth 10 marks whose ledger row names the Governance civil-society owner while this owner's table claims it, and the 2025 demand on sustainable growth against the needs of the poor worth 15 marks routed in the ledger to this Basic owner.

Poverty and Developmental Issues: CLOSE-OPTION AND CAUSAL TRAPS

- Do not reduce poverty to a shortfall against an income threshold.
- Do not present the culture-of-poverty thesis as settled sociology.
- Do not convert observed coping behaviour into an independent cause of poverty.
- Do not restate the Tendulkar, Rangarajan or multidimensional index methodology owned by Economy.
- Do not restate welfare-scheme entitlement detail owned by Social Justice.
- Do not present the NITI Aayog estimate as a current-year poverty headcount.
- Do not attribute the estimated multidimensional-poverty change to a named programme.
- Do not treat programme coverage as evidence that a household actually used the entitlement.
- Do not use a pandemic as a decorative event without naming a class transmission channel.
- Do not merge conservation restriction with project-driven displacement.
- Do not claim that environmental protection and the needs of the poor are automatically compatible.
- Do not claim that conservation is inherently anti-poor irrespective of design.
- Do not describe government, non-governmental and private actors as performing identical roles.
- Do not invent a poverty rate, a displacement count, a migration figure or a programme coverage share.

Poverty and Developmental Issues: ANSWER-WRITING SPINE

DEFINE THE SOCIAL UNIT -> STATE THE BOUNDARY RULE AND WHO IS INCLUDED
-> GROUP NAMED EVIDENCE BY MECHANISM OF REPRODUCTION OR CHANGE
-> TEST COUNTER-CASES, REGIONAL VARIATION AND CATEGORY LIMITS
-> SEPARATE CORRELATION FROM CAUSATION AND LAW FROM SOCIAL ACCEPTANCE
-> CLOSE WITH A GRADED, POLICY-AWARE VERDICT AND A DATA CAVEAT

Poverty and Developmental Issues: CURRENT-LINK AND DATA BOUNDARY

No additional live official item was verified for this topic on 2026-09-02. Only the dated official anchors already carried by the repository owners are used, each with its issuing body and date. The package invents no caste, tribe, demographic or agrarian statistic, no legal or constitutional claim and no policy status.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: What poverty is

CAPABILITY -> nourished, educated, healthy, able to participate
RELATIONAL -> exclusion from networks, institutions and opportunity
COMPOUNDING -> caste, gender, religion and region stack the disadvantage
LIMIT -> an income threshold cannot express either dimension
MUST REMEMBER: Poverty is multidimensional deprivation in income or consumption, nutrition, health, education, housing, services, security and agency; development changes capabilities and structural opportunities, while vulnerability describes exposure to falling into or remaining in deprivation.

ASCII MASTER FLOW - PANEL 2/12: The causal dispute

LEWIS -> attitudes and behaviour reproduced across generations
CRITIQUE -> rational adaptation to insecurity and unequal access
STAKE -> correct material conditions, or correct attitudes
RULE -> describe coping behaviour without converting it into blame

ASCII MASTER FLOW - PANEL 3/12: Ownership boundary

ECONOMY -> Tendulkar and Rangarajan formulae, index construction
SOCIAL JUSTICE -> welfare entitlements and scheme architecture
GOVERNANCE -> non-governmental organisation collaboration mechanism
THIS OWNER -> deprivation mechanisms and their social consequences

ASCII MASTER FLOW - PANEL 4/12: Estimate card

SOURCE -> NITI Aayog discussion paper of 2024
TITLE -> Multidimensional Poverty in India since 2005-06
ESTIMATE -> 11.28 per cent multidimensional poverty in 2022-23
EXITS -> about 24.8 crore persons between 2013-14 and 2022-23

ASCII MASTER FLOW - PANEL 5/12: Coverage to use

COVERAGE -> the entitlement exists on paper for this household
ACCESS -> distance, cost, documents and information permit reach
USE -> the household can actually convert it into a functioning
SHORTFALL -> name which of the three failed before recommending

ASCII MASTER FLOW - PANEL 6/12: Shock channels

WORK -> precarious informal employment and income loss
HOUSING AND HEALTH -> density raises exposure and recovery cost
SAVINGS -> thin buffers and non-portable social protection
SERVICES -> unequal digital access blocks relief and schooling
CLOSE DISTINCTION: Absolute is not relative poverty, poverty is not inequality, incidence is not depth or severity, multidimensional indices are not interchangeable with consumption lines, and programme coverage is not proof of adequacy, access or durable exit.

ASCII MASTER FLOW - PANEL 7/12: Two development conflicts

CONSERVATION RESTRICTION -> access curtailed, nobody physically moved
PROJECT DISPLACEMENT -> community relocated, owned by tribal society
REMEDY 1 -> co-management and alternative livelihood
REMEDY 2 -> resettlement design and livelihood restoration

ASCII MASTER FLOW - PANEL 8/12: Two conservation designs

EXCLUSIONARY -> access closed entirely to protect the ecosystem
PARTICIPATORY -> co-management, stake and alternative livelihood
EFFECT -> severity of the conflict follows design, not intention
LIMIT -> some restriction on prior open access usually remains

ASCII MASTER FLOW - PANEL 9/12: Three actors

GOVERNMENT -> regulation, funding at scale, final accountability
NON-GOVERNMENTAL -> grassroots trust, local knowledge, last mile
PRIVATE -> technology, efficiency and resources
CONDITION -> divided roles with joint monitoring

ASCII MASTER FLOW - PANEL 10/12: Collaboration failure mode

ROLES UNDIVIDED -> two actors attempt the same function
DUPLICATION -> effort repeated and coverage still incomplete
ACCOUNTABILITY -> responsibility diffused across three actors
RESULT -> cooperation without a traceable outcome owner

ASCII MASTER FLOW - PANEL 11/12: Three boundary cases

CULTURE-ONLY -> literacy campaign without income security
STRUCTURAL -> land titling and credit access expand the opportunity set
EXCLUSIONARY -> total ban with no alternative livelihood provided
PARTICIPATORY -> co-management rights with an alternative income stream

ASCII MASTER FLOW - PANEL 12/12: Poverty answer spine

OPEN -> define deprivation and name the mechanism being tested
BODY -> coverage, access and use, then the class or design channel
TEST -> contrasting boundary cases and the standing trade-off
CLOSE -> graded verdict with the dated-estimate caveat
EVIDENCE LIMIT: Use Tendulkar/Rangarajan history, NITI Aayog's National MPI and official survey dates/status carefully; map rural, urban, regional, caste, tribe and gender variation, and distinguish correlation from mechanisms such as assets, labour markets, discrimination, health shocks and state capacity.
