Effects of Globalisation on Indian Society - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies Paper-I question papers held under books\mains and books\more_previous_papers were used only to confirm the wording of routed Mains PYQs. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Six direct General Studies Paper-I Mains demands are routed to this topic and each is recorded with its exact routing status. The 2018 Q19 demand on globalisation, cultural homogenisation and Indian cultural specificities, the 2019 Q20 demand on losing local identity for a global identity, the 2020 Q18 demand on diversity and pluralism under threat from globalisation and the 2022 Q20 demand on globalisation and new technology in a world of scarce resources are routed in the audited 2018-2023 Mains ledger to the Advanced owner, while the Core owner's own answer-architecture table records that Core routing supersedes those pointers, so all four are answered here from the Basic spine. The locally held official question papers for 2018, 2019, 2020 and 2022 are scanned images from which reliable English text cannot be extracted, so the audited ledger's neutral demand rendering is used for those four years and no verbatim wording is claimed. The 2024 Q19 demand on globalisation and the urban migration of skilled, young and unmarried women and the 2025 Q10 demand on whether globalisation results only in an aggressive consumer culture are routed in the audited 2024-2025 ledger to this Basic owner, and the wording of both was confirmed in the locally held official 2024 and 2025 General Studies Paper-I question papers. A seventh demand, the 2025 Q18 fast-food question, is claimed by this owner's own answer-architecture table while the audited 2024-2025 ledger routes it to the Social Change and Modernisation owner; that cross-owner conflict is stated openly here and the demand is answered under the owner the ledger names rather than duplicated. No marking scheme, official key or model answer of the Union Public Service Commission is held locally, and none is reproduced or inferred.
- **Live-link boundary:** No new live current-affairs item was verified for this topic on 2026-09-02. The package uses only the dated official anchors already carried by the repository owners, each with its issuing body, release date and reference period, namely the Periodic Labour Force Survey Annual Report 2023-24 released on 23 September 2024, the Periodic Labour Force Survey Annual Report 2025 released in March 2026, and the National Family Health Survey ever-internet-use measure with its provisional round six status. No brand, market share, consumption figure, migration statistic or connectivity estimate is invented, and no trade, investment or labour-code claim owned by Economy or Social Justice is asserted here.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Indian Society Basic/Core is answer-complete before optional Advanced depth.
Concept method	Define and distinguish the institution, identity, process, legal category and measured indicator before analysis.
Sociological method	Structure/institution -> mechanism and agency -> differentiated group/region outcome -> feedback, resistance and qualification.
Evidence method	Claim -> named Indian community/region/institution/dataset -> analysis -> source-date-status or causal qualification.
Non-homogenisation	Caste, tribe, women, religion, region and rural/urban groups retain internal class, gender, locality and historical variation.
Boundary method	Constitutional right, statutory mandate, executive scheme, implementation and lived social outcome remain distinct.
Practice contract	Every solved item has demand decoding, a detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Indian-Society\basic\11_Effects-of-Globalisation-on-Indian-Society.md **Canonical topic owner:** upsc-ai-kit\knowledge\Indian-Society\basic\11_Effects-of-Globalisation-on-Indian-Society.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Indian-Society\advanced\11_Effects-of-Globalisation-on-Indian-Society.md

Official syllabus mapping:

upsc-ai-kit\knowledge\Indian-Society\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Definition discipline:** close concepts and legal-administrative categories share a comparison axis and are never treated as synonyms.
- **Mechanism discipline:** correlation, temporal sequence and aggregate association do not establish causation; identify institutions, incentives, norms, power and agency.
- **Historical discipline:** colonial, constitutional, developmental, liberalisation and contemporary phases are separated without a linear tradition-to-modernity story.
- **Intersectional discipline:** overlapping caste, tribe, class, gender, religion, disability, region and life-course positions are analysed without creating a single homogeneous category.
- **India discipline:** use named communities, movements, institutions, cities, states and regional contrasts without stereotyping or treating one case as nationally representative.
- **Data discipline:** Census 2011, NFHS, PLFS, SRS, Agriculture Census, MPI and scheme claims retain source, reference period, release date, coverage and provisional/final status.
- **PYQ discipline:** repository routing ledgers and locally held papers control wording and metadata; reconstructed wording and unavailable official keys remain labelled.
- **Current-status note, rechecked 2026-09-05:** No new live current-affairs item was verified for this topic on 2026-09-02. The package uses only the dated official anchors already carried by the repository owners, each with its issuing body, release date and reference period, namely the Periodic Labour Force Survey Annual Report 2023-24 released on 23 September 2024, the Periodic Labour Force Survey Annual Report 2025 released in March 2026, and the National Family Health Survey ever-internet-use measure with its provisional round six status. No brand, market share, consumption figure, migration statistic or connectivity estimate is invented, and no trade, investment or labour-code claim owned by Economy or Social Justice is asserted here.

Live/official context sources recorded by the predecessor generation:

- No volatile live claim is necessary for the static sociological core.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - How globalisation enters Indian society

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: How globalisation enters Indian society is the part of Effects of Globalisation on Indian Society that explains how Globalisation as a set of channels fit into one examinable social relationship.

Technical definition: In sociological analysis, How globalisation enters Indian society denotes the source-bounded relationship among Globalisation as a set of channels, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

How globalisation enters Indian society should be analysed as a relation among Globalisation as a set of channels, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- globalisation
- enters
- channels
- treated
- this
- traceable

How to use them: Define globalisation, enters, channels; cite treated as named evidence; then apply this qualification: Trade and investment mechanics belong to Economy and gig-work labour law to Social Justice, so neither is re-derived here. Conclude by showing how the distinction supports this answer route: Open a globalisation answer with named social channels instead of a general statement about global culture..

VISUAL FIRST

HOW GLOBALISATION ENTERS INDIAN SOCIETY

01. Globalisation as a set of channels

BOUNDARY -> Trade and investment mechanics belong to Economy and gig-work labour law to Social Justice, so neither is re-derived here.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

NAMED EVIDENCE AND MECHANISM

- Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

EXAMINER CAUTION

- Trade and investment mechanics belong to Economy and gig-work labour law to Social Justice, so neither is re-derived here.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to How globalisation enters Indian society.
- **Mains:** Open a globalisation answer with named social channels instead of a general statement about global culture.

MINI RECAP

- **Evidence chain:** Globalisation as a set of channels
- **Qualified use:** Open a globalisation answer with named social channels instead of a general statement about global culture.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS globalisation enters channels treated this traceable	2. MECHANISM / ARGUMENT relate Globalisation as a set of channels through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that open a globalisation answer with named social channels instead of a general statement about global culture.	4. UPSC TRAP / ANSWER-USE LIMIT: Trade and investment mechanics belong to Economy and gig-work labour law to Social Justice, so neither is re-derived here.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: How globalisation enters Indian society converts named social evidence into a qualified argument			

SESSION 2 - FOUNDATION - Consumer culture and its two layers

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Consumer culture and its two layers is the part of Effects of Globalisation on Indian Society that explains how Consumer culture and Structural and cultural consumerism fit into one examinable social relationship.

Technical definition: In sociological analysis, Consumer culture and its two layers denotes the source-bounded relationship among Consumer culture and Structural and cultural consumerism, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Consumer culture and its two layers should be analysed as a relation among Consumer culture and Structural and cultural consumerism, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Consumer
- culture
- layers
- Structural
- cultural
- consumerism

How to use them: Define Consumer, culture, layers; cite Structural as named evidence; then apply this qualification: Structural change in market access can precede the cultural meaning attached to consumption, so the two layers may not be merged. Conclude by showing how the distinction supports this answer route: Concede the consumption effect precisely enough to refuse an exclusivity claim later in the answer..

VISUAL FIRST

CONSUMER CULTURE AND ITS TWO LAYERS

01. Consumer culture

|
v

02. Structural and cultural consumerism

BOUNDARY -> Structural change in market access can precede the cultural meaning attached to consumption, so the two layers may not be merged.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.

NAMED EVIDENCE AND MECHANISM

- Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.
- Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.

EXAMINER CAUTION

- Structural change in market access can precede the cultural meaning attached to consumption, so the two layers may not be merged.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Consumer culture and its two layers.
- **Mains:** Concede the consumption effect precisely enough to refuse an exclusivity claim later in the answer.

MINI RECAP

- **Evidence chain:** Consumer culture -> Structural and cultural consumerism
- **Qualified use:** Concede the consumption effect precisely enough to refuse an exclusivity claim later in the answer.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Consumer culture layers Structural cultural consumerism	2. MECHANISM / ARGUMENT relate Consumer culture and Structural and cultural consumerism through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that concede the consumption effect precisely enough to refuse an exclusivity claim later in the answer.	4. UPSC TRAP / ANSWER-USE LIMIT: Structural change in market access can precede the cultural meaning attached to consumption, so the two layers may not be merged.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Consumer culture and its two layers converts named social evidence into a qualified argument			

SESSION 3 - FOUNDATION - Homogenisation as a prediction

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Homogenisation as a prediction is the part of Effects of Globalisation on Indian Society that explains how Homogenisation fit into one examinable social relationship.

Technical definition: In sociological analysis, Homogenisation as a prediction denotes the source-bounded relationship among Homogenisation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Homogenisation as a prediction should be analysed as a relation among Homogenisation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Homogenisation
- prediction
- theory
- that
- globalisation
- makes

How to use them: Define Homogenisation, prediction, theory; cite that as named evidence; then apply this qualification: Homogenisation is a convergence prediction and not a proven description of every Indian domain. Conclude by showing how the distinction supports this answer route: State the convergence claim in its own terms before testing it against Indian evidence..

VISUAL FIRST

HOMOGENISATION AS A PREDICTION

01. Homogenisation

BOUNDARY -> Homogenisation is a convergence prediction and not a proven description of every Indian domain.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.

NAMED EVIDENCE AND MECHANISM

- Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.

EXAMINER CAUTION

- Homogenisation is a convergence prediction and not a proven description of every Indian domain.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Homogenisation as a prediction.
- **Mains:** State the convergence claim in its own terms before testing it against Indian evidence.

MINI RECAP

- **Evidence chain:** Homogenisation
- **Qualified use:** State the convergence claim in its own terms before testing it against Indian evidence.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Homogenisation prediction theory that globalisation makes	2. MECHANISM / ARGUMENT relate Homogenisation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that state the convergence claim in its own terms before testing it against Indian evidence.	4. UPSC TRAP / ANSWER-USE LIMIT: Homogenisation is a convergence prediction and not a proven description of every Indian domain.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Homogenisation as a prediction converts named social evidence into a qualified argument			

SESSION 4 - CORE - Glocalisation as the observed counter-move

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Glocalisation as the observed counter-move is the part of Effects of Globalisation on Indian Society that explains how Glocalisation fit into one examinable social relationship.

Technical definition: In sociological analysis, Glocalisation as the observed counter-move denotes the source-bounded relationship among Glocalisation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Glocalisation as the observed counter-move should be analysed as a relation among Glocalisation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Glocalisation**
- **observed**

- counter-move
- adaptation
- global
- products

How to use them: Define Glocalisation, observed, counter-move; cite adaptation as named evidence; then apply this qualification: An illustration of local adaptation is not a measurement of how much adaptation occurs. Conclude by showing how the distinction supports this answer route: Supply the adaptation evidence that a cultural-specificity demand is actually asking for..

VISUAL FIRST

GLOCALISATION AS THE OBSERVED COUNTER-MOVE

01. Glocalisation

BOUNDARY -> An illustration of local adaptation is not a measurement of how much adaptation occurs.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

NAMED EVIDENCE AND MECHANISM

- Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

EXAMINER CAUTION

- An illustration of local adaptation is not a measurement of how much adaptation occurs.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Glocalisation as the observed counter-move.
- **Mains:** Supply the adaptation evidence that a cultural-specificity demand is actually asking for.

MINI RECAP

- **Evidence chain:** Glocalisation
- **Qualified use:** Supply the adaptation evidence that a cultural-specificity demand is actually asking for.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Glocalisation observed counter-move adaptation global products	2. MECHANISM / ARGUMENT relate Glocalisation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the adaptation evidence that a cultural-specificity demand is actually asking for.	4. UPSC TRAP / ANSWER-USE LIMIT: An illustration of local adaptation is not a measurement of how much adaptation occurs.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Glocalisation as the observed counter-move converts named social evidence into a qualified argument			

SESSION 5 - CORE - Holding both processes together

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Holding both processes together is the part of Effects of Globalisation on Indian Society that explains how Simultaneity rule and The exclusivity trap fit into one examinable social relationship.

Technical definition: In sociological analysis, Holding both processes together denotes the source-bounded relationship among Simultaneity rule and The exclusivity trap, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Holding both processes together should be analysed as a relation among Simultaneity rule and The exclusivity trap, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Holding
- both
- processes
- together
- Simultaneity
- rule

How to use them: Define Holding, both, processes; cite together as named evidence; then apply this qualification: Neither process may be selected as the single truth about Indian society. Conclude by showing how the distinction supports this answer route: Answer an exclusivity demand by naming domains rather than by choosing one global verdict..

VISUAL FIRST

HOLDING BOTH PROCESSES TOGETHER

01. Simultaneity rule

|

v

02. The exclusivity trap

BOUNDARY -> Neither process may be selected as the single truth about Indian society.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.

NAMED EVIDENCE AND MECHANISM

- Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.
- The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.

EXAMINER CAUTION

- Neither process may be selected as the single truth about Indian society.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Holding both processes together.
- **Mains:** Answer an exclusivity demand by naming domains rather than by choosing one global verdict.

MINI RECAP

- **Evidence chain:** Simultaneity rule -> The exclusivity trap
- **Qualified use:** Answer an exclusivity demand by naming domains rather than by choosing one global verdict.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS

Holding | both | processes | together |
Simultaneity | rule

2. MECHANISM / ARGUMENT

relate Simultaneity rule and The
exclusivity trap through unit, boundary
rule and direction of change

3. CONSEQUENCE / CONTRAST

This relation supports the answer route
that answer an exclusivity demand by
naming domains rather than by
choosing one global verdict.

4. UPSC TRAP / ANSWER-USE

LIMIT: Neither process may be
selected as the single truth about
Indian society.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Holding both processes together converts named social evidence into a qualified argument

SESSION 6 - CORE - The service-sector labour pull

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The service-sector labour pull is the part of Effects of Globalisation on Indian Society that explains how Service-sector labour pull fit into one examinable social relationship.

Technical definition: In sociological analysis, The service-sector labour pull denotes the source-bounded relationship among Service-sector labour pull, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The service-sector labour pull should be analysed as a relation among Service-sector labour pull, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- service-sector
- labour
- pull
- employment
- growth
- cities

How to use them: Define service-sector, labour, pull; cite employment as named evidence; then apply this qualification: A pull factor is one possible driver among education, safety, housing and family norms, not a proven cause. Conclude by showing how the distinction supports this answer route: Establish the employment context of a migration demand without overclaiming causation..

VISUAL FIRST

THE SERVICE-SECTOR LABOUR PULL

01. Service-sector labour pull

BOUNDARY -> A pull factor is one possible driver among education, safety, housing and family norms, not a proven cause.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.

NAMED EVIDENCE AND MECHANISM

- Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.

EXAMINER CAUTION

- A pull factor is one possible driver among education, safety, housing and family norms, not a proven cause.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The service-sector labour pull.
- **Mains:** Establish the employment context of a migration demand without overclaiming causation.

MINI RECAP

- **Evidence chain:** Service-sector labour pull
- **Qualified use:** Establish the employment context of a migration demand without overclaiming causation.

CLOSING RECALL FLOW

UPSC TRAP / ANSWER-USE LIMIT: A pull factor is one possible driver among education, safety, housing and family norms, not a proven cause.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The service-sector labour pull converts named social evidence into a qualified argument			

SESSION 7 - CORE - Reading the two labour-force reports

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Reading the two labour-force reports is the part of Effects of Globalisation on Indian Society that explains how PLFS 2023-24 anchor and PLFS 2025 reference-period change fit into one examinable social relationship.

Technical definition: In sociological analysis, Reading the two labour-force reports denotes the source-bounded relationship among PLFS 2023-24 anchor and PLFS 2025 reference-period change, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Reading the two labour-force reports should be analysed as a relation among PLFS 2023-24 anchor and PLFS 2025 reference-period change, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Reading

- labour-force
- reports
- PLFS
- anchor
- reference-period

How to use them: Define Reading, labour-force, reports; cite PLFS as named evidence; then apply this qualification: The two reports use different reference periods, so period and measure must be stated before any comparison. Conclude by showing how the distinction supports this answer route: Cite a dated official labour anchor with its reference period attached..

VISUAL FIRST

READING THE TWO LABOUR-FORCE REPORTS

|

v

02. PLFS 2025 reference-period change

BOUNDARY -> The two reports use different reference periods, so period and measure must be stated before any comparison.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.

NAMED EVIDENCE AND MECHANISM

- The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.
- The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.

EXAMINER CAUTION

- The two reports use different reference periods, so period and measure must be stated before any comparison.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Reading the two labour-force reports.
- **Mains:** Cite a dated official labour anchor with its reference period attached.

MINI RECAP

- **Evidence chain:** PLFS 2023-24 anchor -> PLFS 2025 reference-period change
- **Qualified use:** Cite a dated official labour anchor with its reference period attached.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Reading labour-force reports PLFS anchor reference-period	2. MECHANISM / ARGUMENT relate PLFS 2023-24 anchor and PLFS 2025 reference-period change through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that cite a dated official labour anchor with its reference period attached.	4. UPSC TRAP / ANSWER-USE LIMIT The two reports use different reference periods, so period and measure must be stated before any comparison.

SESSION 8 - CORE - What a participation rate cannot prove

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What a participation rate cannot prove is the part of Effects of Globalisation on Indian Society that explains how A participation rate is not a migration stream fit into one examinable social relationship.

Technical definition: In sociological analysis, What a participation rate cannot prove denotes the source-bounded relationship among A participation rate is not a migration stream, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What a participation rate cannot prove should be analysed as a relation among A participation rate is not a migration stream, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- What
- participation
- rate
- prove
- migration
- stream

How to use them: Define What, participation, rate; cite prove as named evidence; then apply this qualification: An aggregate rate never establishes the size, age, marital status, destination or cause of a migration stream. Conclude by showing how the distinction supports this answer route: Convert a statistic into a bounded piece of evidence instead of an unsupported causal claim..

VISUAL FIRST

WHAT A PARTICIPATION RATE CANNOT PROVE

01. A participation rate is not a migration stream

BOUNDARY -> An aggregate rate never establishes the size, age, marital status, destination or cause of a migration stream.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

NAMED EVIDENCE AND MECHANISM

- A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

EXAMINER CAUTION

- An aggregate rate never establishes the size, age, marital status, destination or cause of a migration stream.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to What a participation rate cannot prove.
- **Mains:** Convert a statistic into a bounded piece of evidence instead of an unsupported causal claim.

MINI RECAP

- **Evidence chain:** A participation rate is not a migration stream
- **Qualified use:** Convert a statistic into a bounded piece of evidence instead of an unsupported causal claim.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: What a participation rate cannot prove converts named social evidence into a qualified argument			

SESSION 9 - CORE - Personal freedom under urban work

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Personal freedom under urban work is the part of Effects of Globalisation on Indian Society that explains how Personal-freedom expansion fit into one examinable social relationship.

Technical definition: In sociological analysis, Personal freedom under urban work denotes the source-bounded relationship among Personal-freedom expansion, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Personal freedom under urban work should be analysed as a relation among Personal-freedom expansion, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Personal**
- **freedom**
- **urban**
- **work**
- **Personal-freedom**
- **expansion**

How to use them: Define Personal, freedom, urban; cite work as named evidence; then apply this qualification: Each freedom must be named specifically rather than summarised as independence. Conclude by showing how the distinction supports this answer route: Trace the exact freedoms a migration demand asks about..

VISUAL FIRST

PERSONAL FREEDOM UNDER URBAN WORK

01. Personal-freedom expansion

BOUNDARY -> Each freedom must be named specifically rather than summarised as independence.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.

NAMED EVIDENCE AND MECHANISM

- Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.

EXAMINER CAUTION

- Each freedom must be named specifically rather than summarised as independence.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Personal freedom under urban work.
- **Mains:** Trace the exact freedoms a migration demand asks about.

- **Qualified use:** Trace the exact freedoms a migration demand asks about.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Personal freedom urban work Personal-freedom expansion	2. MECHANISM / ARGUMENT relate Personal-freedom expansion through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that trace the exact freedoms a migration demand asks about.	4. UPSC TRAP / ANSWER-USE LIMIT: Each freedom must be named specifically rather than summarised as independence.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Personal freedom under urban work converts named social evidence into a qualified argument			

SESSION 10 - CORE - Family renegotiation and its security cost

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Family renegotiation and its security cost is the part of Effects of Globalisation on Indian Society that explains how Family renegotiation rather than severance and Freedom and security trade-off fit into one examinable social relationship.

Technical definition: In sociological analysis, Family renegotiation and its security cost denotes the source-bounded relationship among Family renegotiation rather than severance and Freedom and security trade-off, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Family renegotiation and its security cost should be analysed as a relation among Family renegotiation rather than severance and Freedom and security trade-off, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Family
- renegotiation

- security
- cost
- than
- severance

How to use them: Define Family, renegotiation, security; cite cost as named evidence; then apply this qualification: Freedom expansion and a continuing family tie coexist, and the security loss must be stated alongside the gain. Conclude by showing how the distinction supports this answer route: Replace a freedom-versus-family binary with a renegotiation account and a qualification..

VISUAL FIRST

FAMILY RENEGOTIATION AND ITS SECURITY COST

01. Family renegotiation rather than severance

|
v

02. Freedom and security trade-off

BOUNDARY -> Freedom expansion and a continuing family tie coexist, and the security loss must be stated alongside the gain.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.

NAMED EVIDENCE AND MECHANISM

- Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.
- The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.

SESSION 11 - CORE - The fast-food paradox stated precisely

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The fast-food paradox stated precisely is the part of Effects of Globalisation on Indian Society that explains how Fast-food paradox fit into one examinable social relationship.

Technical definition: In sociological analysis, The fast-food paradox stated precisely denotes the source-bounded relationship among Fast-food paradox, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The fast-food paradox stated precisely should be analysed as a relation among Fast-food paradox, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- fast-food
- paradox
- stated
- precisely
- coexistence
- rising

How to use them: Define fast-food, paradox, stated; cite precisely as named evidence; then apply this qualification: Health concern is real and its reality is what makes the paradox worth explaining. Conclude by showing how the distinction supports this answer route: Define the paradox before explaining it so the illustrate directive has something to illustrate..

VISUAL FIRST

THE FAST-FOOD PARADOX STATED PRECISELY

01. Fast-food paradox

BOUNDARY -> Health concern is real and its reality is what makes the paradox worth explaining.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.

NAMED EVIDENCE AND MECHANISM

- The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.

EXAMINER CAUTION

- Health concern is real and its reality is what makes the paradox worth explaining.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The fast-food paradox stated precisely.
- **Mains:** Define the paradox before explaining it so the illustrate directive has something to illustrate.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The fast-food paradox stated precisely converts named social evidence into a qualified argument			

SESSION 12 - CORE - Bounded rationality and domestic food systems

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Bounded rationality and domestic food systems is the part of Effects of Globalisation on Indian Society that explains how Bounded rationality as one lens and Domestic food systems belong in the answer fit into one examinable social relationship.

Technical definition: In sociological analysis, Bounded rationality and domestic food systems denotes the source-bounded relationship among Bounded rationality as one lens and Domestic food systems belong in the answer, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Bounded rationality and domestic food systems should be analysed as a relation among Bounded rationality as one lens and Domestic food systems belong in the answer, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Bounded**
- **rationality**
- **domestic**
- **food**
- **systems**
- **lens**

How to use them: Define Bounded, rationality, domestic; cite food as named evidence; then apply this qualification: A behavioural lens is not proof that one motive dominates, and domestic chains and delivery platforms carry much of the growth. Conclude by showing how the distinction supports this answer route: Explain the paradox with several mechanisms and Indian supply evidence rather than one theory..

VISUAL FIRST

BOUNDED RATIONALITY AND DOMESTIC FOOD SYSTEMS

01. Bounded rationality as one lens

|
v

02. Domestic food systems belong in the answer

BOUNDARY -> A behavioural lens is not proof that one motive dominates, and domestic chains and delivery platforms carry much of the growth.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

NAMED EVIDENCE AND MECHANISM

- Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.
- An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

EXAMINER CAUTION

- A behavioural lens is not proof that one motive dominates, and domestic chains and delivery platforms carry much of the growth.

4. UPSC TRAP / ANSWER-USE

LIMIT: The round six results are labelled provisional and no round may be quoted as a current connectivity estimate.

SESSION 14 - CORE SYNTHESIS - The digital divide

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The digital divide is the part of Effects of Globalisation on Indian Society that explains how Digital divide fit into one examinable social relationship.

Technical definition: In sociological analysis, The digital divide denotes the source-bounded relationship among Digital divide, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The digital divide should be analysed as a relation among Digital divide, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- digital
- divide
- unequal
- access
- technology
- connectivity

How to use them: Define digital, divide, unequal; cite access as named evidence; then apply this qualification: Connectivity gains reach the already better positioned first, so the channel is stratified rather than universal. Conclude by showing how the distinction supports this answer route: Add the inequality qualification that a technology-and-society demand rewards..

VISUAL FIRST

THE DIGITAL DIVIDE

01. Digital divide

BOUNDARY -> Connectivity gains reach the already better positioned first, so the channel is stratified rather than universal.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one.

NAMED EVIDENCE AND MECHANISM

- The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one.

EXAMINER CAUTION

- Connectivity gains reach the already better positioned first, so the channel is stratified rather than universal.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The digital divide.
- **Mains:** Add the inequality qualification that a technology-and-society demand rewards.

UPSC TRAP / ANSWER-USE LIMIT: Connectivity gains reach the already better positioned first, so the channel is stratified rather than universal.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The digital divide converts named social evidence into a qualified argument			

SESSION 15 - CORE SYNTHESIS - Question ownership and the answer spine

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Question ownership and the answer spine is the part of Effects of Globalisation on Indian Society that explains how Verified direct Mains demands and one ownership conflict fit into one examinable social relationship.

Technical definition: In sociological analysis, Question ownership and the answer spine denotes the source-bounded relationship among Verified direct Mains demands and one ownership conflict, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Question ownership and the answer spine should be analysed as a relation among Verified direct Mains demands and one ownership conflict, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **ownership**
- **spine**
- **direct**
- **Mains**
- **demands**
- **conflict**

How to use them: Define ownership, spine, direct; cite Mains as named evidence; then apply this qualification: One demand claimed by this owner is routed by the audited ledger to another owner, and the conflict is stated rather than hidden. Conclude by showing how the distinction supports this answer route: Assemble the globalisation answer spine with honest question ownership..

VISUAL FIRST

QUESTION OWNERSHIP AND THE ANSWER SPINE

01. Verified direct Mains demands and one ownership conflict

BOUNDARY -> One demand claimed by this owner is routed by the audited ledger to another owner, and the conflict is stated rather than hidden.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

NAMED EVIDENCE AND MECHANISM

- Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

EXAMINER CAUTION

- One demand claimed by this owner is routed by the audited ledger to another owner, and the conflict is stated rather than hidden.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Question ownership and the answer spine.
- **Mains:** Assemble the globalisation answer spine with honest question ownership.

MINI RECAP

- **Evidence chain:** Verified direct Mains demands and one ownership conflict
- **Qualified use:** Assemble the globalisation answer spine with honest question ownership.

CLOSING RECALL FLOW

UPSC TRAP / ANSWER-USE LIMIT: One demand claimed by this owner is routed by the audited ledger to another owner, and the conflict is stated rather than hidden.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Question ownership and the answer spine converts named social evidence into a qualified argument			

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Indian Society | **Tier:** Must-Do (foundation) | **GS Paper:** GS-I. **Core area:** Consumer culture debate, globalisation's effect on women's urban migration and family/personal freedom, fast-food-industry paradox, and homogenisation versus glocalisation. **Grounded in:** MoSPI PLFS 2023-24 and 2025 female labour-force participation data; NFHS-5 (2019-21; historical comparator; NFHS-6 was released 29 May 2026); audited 2024 and 2025 GS-I Mains PYQs (three direct questions - the richest topic in this module). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/11_Effects-of-Globalisation-on-Indian-Society.md.

Data-status correction (13 August 2026): NFHS-6 (2023-24) was released on 29 May 2026. NFHS-5 (2019-21) values below are historical comparators, not the latest national NFHS result. Do not quote an NFHS-6 metric unless taken directly from its released national fact sheet; neither NFHS round is a Census stock or by itself proof of causation.

1. Visual foundation

GLOBALISATION'S CHANNELS INTO INDIAN SOCIETY

Core proposition: ANALYSIS: Globalisation's effect on Indian society is neither purely homogenising consumerism nor a simple, one-directional cultural takeover; it operates through specific, traceable channels - consumer markets, urban labour migration, food industry growth and digital access - each producing a mix of genuine change and local adaptation (glocalisation), which is why all three PYQs on this topic reward a qualified, "more than just X" answer rather than a flat yes/no.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Consumer culture	A social pattern in which consumption of goods and brands becomes a primary vehicle for identity, status and social participation, often intensified by globalisation-driven market access and advertising.
ANALYSIS: Homogenisation	The theory that globalisation makes cultures and consumption patterns increasingly similar worldwide (e.g., spread of global brands, media formats).
ANALYSIS: Glocalisation	The counter-observation that global products and practices are adapted to local tastes, norms and contexts rather than adopted unchanged (e.g., regionally customised menus, vernacular content on global platforms).
ANALYSIS: Female urban migration under globalisation	The 2024 PYQ gives a specific migration proposition to analyse. Service-sector demand, education, safety, housing and family norms may affect such migration, but a broad female LFPR figure does not establish the size, age, marital status or cause of this particular migration stream.
ANALYSIS: Digital divide	Unequal access to digital technology and connectivity across income, gender, region and generation, limiting globalisation's benefits to those already better positioned.

3. How globalisation reshapes Indian society

- 1. Consumer-culture expansion: FACT:** trade liberalisation, foreign investment and media exposure have expanded access to global brands and consumption styles, visibly reshaping urban lifestyle and aspiration, particularly among the middle class.
- 2. Beyond "only" consumerism: ANALYSIS:** globalisation simultaneously reshapes work patterns (service-sector jobs), family structure (urban migration effects) and public discourse (digital connectivity), so reducing its effect to "aggressive consumer culture" alone understates its full social reach - the core challenge of the 2025 Q10 PYQ.
- 3. Women's urban migration and family effect: ANALYSIS:** use the 2024 PYQ's proposition to

analyse how urban work and independent income *can* expand mobility, spending and partner-choice voice while renegotiating family authority. Do not use a general LFPR statistic as proof of this specific skilled, young, unmarried migration stream.

4. **Fast-food paradox:** ANALYSIS: convenience, urban time constraints, delivery platforms, pricing, marketing, aspirational consumption and local menu adaptation can help explain why fast-food industries grow despite health concerns. The answer should include domestic chains and food-delivery ecosystems, not attribute the trend only to globalisation.

5. **Homogenisation-glocalisation balance:** ANALYSIS: some domains show strong homogenisation (global brand recognition, English-medium aspiration); others show strong glocalisation (regional-language content on global platforms, India-specific menu items at global fast-food chains) - the correct analytical stance treats both as simultaneously operating, not as competing single explanations.

4. Institutions and concepts

- ANALYSIS: **Gig-economy and labour-code effects (cross-linked, not restated):** globalisation's effect on informal/gig work and its labour-law dimension belongs to Social-Justice/basic/15_Labour-Social-Security-Unorganised-and-Gig-Workers.md.

- ANALYSIS: **Trade/FDI macro-globalisation (cross-linked):** the macroeconomic dimension of trade and investment liberalisation is Economy's territory, not elaborated here.

- FACT: **PLFS female labour-force participation data:** aggregate employment-participation indicators. They do not identify the age, marital status, destination or cause of a migration stream.

- ANALYSIS: **Digital divide:** unequal internet/technology access across gender, region and generation, shaping who benefits from globalisation's connectivity gains.

5. Indian applications and PYQ mapping

- FACT: **2025 GS-I PYQ (10 marks, verbatim):** "Do you think that globalization results in only an aggressive consumer culture? Justify your answer." The expected answer: reject the "only" framing - acknowledge genuine consumer-culture intensification, but argue globalisation equally reshapes employment patterns, family structures, digital access and cultural adaptation (glocalisation), justifying a "more than just consumer culture" position with concrete Indian examples.

- FACT: **2024 GS-I PYQ (15 marks, verbatim):** "Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?" The expected answer: trace independent income and urban residence expanding personal freedom (mobility, spending, partner-choice voice) while family relationships are renegotiated through continued remittance and periodic contact rather than severed outright - full treatment also in 04_Family-Marriage-and-Kinship.md.

- FACT: **2025 GS-I PYQ (15 marks, verbatim):** "How do you account for the growing fast food industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience." The expected answer: explain the paradox through convenience, dual-income urban household time constraints, aspirational branding and glocalised Indian-taste menu adaptation, showing behaviour is not purely health-rational.

6. Must-Know Facts for Prelims

- FACT: MoSPI's PLFS Annual Report 2023-24 (released 23 September 2024) reported female labour force participation rate at 41.7%, up from 37.0% in 2022-23. The later PLFS Annual Report 2025 uses a changed calendar-year reference period and reports 40.0% for the same broad usual-status, age-15+ female LFPR measure.

- FACT: NFHS-6 (2023-24) national fact sheets report that 64.3% of women aged 15-49 had ever used the internet. It is a dated access indicator, not a current connectivity estimate.

- ANALYSIS: Glocalisation (local adaptation of global products) is the standard sociological counter-concept to homogenisation.

- ANALYSIS: Three direct GS-I PYQs (2024 and 2025) test this topic, making it the richest globalisation-linked theme in the recent Mains pattern.

- ANALYSIS: The fast-food paradox can be analysed through convenience, price, delivery, aspiration and local adaptation; do not reduce it to denial of health risk or one global brand story.

7. UPSC traps

- WRONG: Globalisation's only social effect on India is consumer culture. -> The 2025 Q10 PYQ specifically rewards rejecting the "only" framing; globalisation also reshapes employment, family structure and digital access.

- WRONG: Globalisation-driven women's urban migration severs family ties entirely. -> The 2024 Q19 PYQ's expected answer emphasises renegotiation (continued remittance, periodic contact) alongside genuine personal-freedom expansion, not outright severance.

- WRONG: Rising health awareness necessarily reduces fast-food consumption. -> The 2025 Q18 PYQ specifically tests the paradox that awareness and industry growth coexist, driven by convenience and aspiration, not health-rational choice alone.

- WRONG: Globalisation only homogenises Indian culture. -> Glocalisation (local adaptation) is equally observable and should be presented alongside homogenisation, not omitted.

8. CURRENT: Current anchor

- CURRENT: MoSPI's PLFS Annual Report 2023-24 female LFPR of 41.7% is a dated comparator.

PLFS Annual Report 2025, released March 2026, reports usual-status female LFPR for age 15+ at **40.0%**. Its January-December 2025 reference period differs from the earlier July-June cycle. It measures labour-force participation, not the PYQ's specific migration stream, so do not infer either trend without those limits.

9. PYQ application

- FACT: **2025 Q10 (10 marks)**: reject the "only consumer culture" framing with a multi-domain argument (employment, family, digital access, glocalisation).

- FACT: **2024 Q19 (15 marks)**: analyse possible personal-freedom expansion and family renegotiation using the exact "skilled, young, unmarried women" framing; distinguish the PYQ proposition from a verified national migration series.

- FACT: **2025 Q18 (15 marks)**: explain the fast-food paradox through convenience, time constraints, pricing/delivery, aspiration and local adaptation, including domestic as well as global food systems.

10. Mains angles

- ANALYSIS: Never answer any of the three PYQs with a flat yes/no; each rewards a qualified, multi-factor position.

- ANALYSIS: Use the homogenisation-glocalisation pairing as the master frame for any globalisation-and-culture question.

- ANALYSIS: Cross-link labour-code/gig-worker and trade/FDI mechanics rather than restating them.

Answer thesis: Globalisation's effect on Indian society operates through multiple, simultaneously active channels - consumer culture, women's urban labour migration, food- industry growth and digital access - each producing genuine change alongside local adaptation (glocalisation); reducing this to "only aggressive consumerism" or to simple cultural takeover misses the qualified, multi-domain reality all three recent PYQs on this theme are designed to test.

11. Probable questions

- ANALYSIS: **Prelims**: What term describes the local adaptation of global products and practices, as opposed to their unchanged worldwide spread?

- **FACT: Mains (10 marks, 2025 GS-I PYQ, verbatim):** Do you think that globalization results in only an aggressive consumer culture? Justify your answer.
- **FACT: Mains (15 marks, 2024 GS-I PYQ, verbatim):** Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?
- **FACT: Mains (15 marks, 2025 GS-I PYQ, verbatim):** How do you account for the growing fast food industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience.

12. Study links

- **FACT: Advanced companion:** [advanced/11_Effects-of-Globalisation-on-Indian-Society.md](#).
- **FACT:** [04_Family-Marriage-and-Kinship.md](#) - full family/kinship-side treatment of the 2024 Q19 PYQ.
- **FACT:** [Social-Justice/basic/15_Labour-Social-Security-Unorganised-and-Gig-Workers.md](#) - gig-economy and labour-law dimension.
- **FACT:** [12_Social-Change-and-Modernisation.md](#) - homogenisation/glocalisation within the broader theory of social change.

13. Answer architecture (10/15/20-mark support)

Core-only. Globalisation questions commonly hide an "only," "loss," or "despite" demand. Answer channels and mechanisms, not a single verdict about global culture.

13.1 Directive-to-structure map

Demand family	What is tested	Structure that scores
Elucidate/Discuss homogenisation and specificity	Simultaneous convergence and adaptation	global channel -> homogenising effect -> glocalised response -> limitation
Justify only consumer culture	Reject the false exclusivity	acknowledge consumption -> work/family/digital/culture channels -> verdict
Justify threat to diversity/pluralism	Conditional risk, not deterministic loss	vulnerability -> resistance/adaptation -> institutional/social condition
Elucidate technology with scarce resources	Social benefits and material/ecological costs	access/efficiency -> energy/mineral/e-waste/inequality -> cross-owner boundary
Illustrate fast-food paradox	Behavioural and structural mechanisms	time/price/delivery/aspiration/glocalisation -> health trade-off

13.2 Thesis bank

- **T1: ANALYSIS:** Globalisation homogenises selected markets and media formats while glocalisation reworks products, language and practice locally; neither process cancels the other.
- **T2: ANALYSIS:** Consumer culture is visible but not the whole social effect: labour, migration, household authority, digital access and identity are distinct channels.
- **T3: ANALYSIS:** Technology can widen capability or resource pressure depending on who has access, what material/energy chain it uses and who bears the cost.

13.3 Mark-scaled spines

10 marks - only aggressive consumer culture (2025 GS-I). Open by rejecting "only." Acknowledge brands/status consumption; then use one work/family, one digital and one globalisation channel. Add inequality/digital-divide caution and conclude with T2.

15 marks - globalisation, culture and pluralism (2018-20 demands). Use T1: map homogenising media/market pressure, language/local-identity risk and countervailing vernacular/local adaptation. Explain that pluralism depends on voice/access, not simply the presence of global products. Close conditionally, avoiding a nostalgia claim.

20 marks - globalisation, new technology and scarce resources. Separate the social effect from the instrument's macro/technical ownership. Analyse access and productivity, then energy/material demand, e-waste and unequal control; cross-link Economy, Environment and Science/Technology for verified technical facts. End with T3 rather than claiming technology is inherently green or destructive.

13.4 Evidence bank - claim -> named evidence/example -> significance -> limitation

- **E1 - Glocalisation.** *Claim:* adoption is not identical to cultural replacement.

Evidence: **homogenisation versus glocalisation**, illustrated by locally adapted menus and vernacular content on global platforms. *Significance:* directly answers cultural specificity. *Limitation:* an illustration is not a measure of the vitality of every language or culture.

- **E2 - Gendered migration caution.** *Claim:* aggregate labour participation cannot prove

the precise migration stream in a PYQ. *Evidence:* **PLFS Annual Reports 2023-24 and 2025** measure aggregate female LFPR with changed reference periods. *Significance:* supports cautious analysis of the 2024 demand. *Limitation:* neither establishes age, marital status, destination or cause of migration.

- **E3 - Family renegotiation.** *Claim:* independent urban work can expand freedom while

retaining ties. *Evidence:* the migration-income/residence -> mobility/voice -> remittance and continuing kinship mechanism, cross-linked to Topic 04. *Significance:* avoids a freedom-versus-family false binary. *Limitation:* no uniform outcome by class/region.

- **E4 - Food paradox.** *Claim:* health awareness can coexist with purchase. *Evidence:*

convenience, time constraints, delivery, aspiration and local adaptation. *Significance:* supplies the causal chain for the 2025 demand. *Limitation:* do not invent consumption or disease figures, or attribute every food trend to globalisation.

- **E5 - Digital access.** *Claim:* access evidence is not agency or social outcome.

Evidence: NFHS-5's historical internet-use indicator. *Significance:* supports a digital-divide caution. *Limitation:* NFHS-6 is the current released national round; use its fact sheet for current values.

13.5 Balance bank and verdict scaffolds

- **ANALYSIS:** Do not infer a causal migration trend from LFPR or a cultural outcome from a brand.

- **ANALYSIS:** Do not write "globalisation destroys culture" without showing mechanism and counter-adaptation.

- **ANALYSIS:** Do not treat new technology's resource use as a Society fact when verified technical evidence belongs to Economy/Environment/Science.

- **Verdict:** "Globalisation is a set of uneven channels: it can standardise the market

while diversifying voice, widen choice while exposing unequal access, and reshape family without erasing local agency."

Routing correction: Core routing supersedes old advanced/11 pointers. Technical, legal and macroeconomic owners are named cross-links, not gaps in this social-analysis Core.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	19	Globalization and urban migration of skilled young unmarried women	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	GS-I	10	Whether globalization results only in aggressive consumer culture	Justify · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Globalization and urban migration of skilled young unmarried women
- Whether globalization results only in aggressive consumer culture

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** globalisation is analysed through cross-border flows of goods, services, capital, people, information and culture as they alter consumption, work, migration, household authority, food systems, media and digital access. Economy owns trade/investment mechanics; Social Justice owns labour-code and platform-work regulation.
- **Indispensable sociology and distinctions:** homogenisation predicts convergence, glocalisation describes local adaptation, and hybridisation describes recombination. Globalisation is not westernisation, liberalisation is not privatisation, structural consumerism is not cultural consumerism and connectivity is not inclusion.
- **Mechanism and Indian variation:** compare Bengaluru IT and service work,

garment clusters, Kerala-Gulf migration, women's urban labour migration, domestic and global food chains, regional-language media, artisan/farmer value chains and platform mediation. Policy, firm strategy, technology, household agency, caste, class, gender and region can move in different directions; no outcome is automatic.

- **Data/source control:** MoSPI's PLFS Annual Report 2025 uses a

January-December reference period and reports usual-status female LFPR for age 15+ at 40.0 per cent. It can establish aggregate labour context, not the size, age, marital status, destination or cause of a migration stream. NFHS-6 (2023-24), released 29 May 2026, is sample-based; provisional internet-use measures are not current connectivity counts.

- **Intersectional and causal discipline:** gains and risks differ by skill, income, gender, caste, region, generation and household bargaining power. Remittances can coexist with family-authority renegotiation; freedom can coexist with thinner support networks. Association between global exposure and change never proves a single cause or uniform response.

- **Four-ledger hostile audit:** literal syllabus, prerequisites, textbook taxonomy and PYQs were checked for channel separation, theory distinctions, Indian mechanisms, intersectionality, source periods, measurement limits and cross-owner boundaries.

- **Verified PYQ ownership, 2018-2026:** direct routes cover globalisation and cultural specificity in 2018, global/local identity in 2019, pluralism in 2020, technology and scarce resources in 2022, women's urban migration in 2024 and consumer culture in 2025. The 2025 fast-food demand remains Social Change-owned in the audited ledger despite a local owner conflict. No unavailable 2026 demand, market share or migration statistic is invented.

INDIAN SOCIETY DEEP-REVIEW CORE CONTROL

- **Must remember:** Globalisation intensifies cross-border flows of capital, goods, services, people, information and culture, producing glocalisation, consumption change, labour-market restructuring, care chains, diaspora networks and uneven bargaining power.
- **Close distinction:** Globalisation is not westernisation, liberalisation is not privatisation, cultural diffusion is not homogenisation, hybridity is not equal exchange, and aggregate growth or connectivity does not establish inclusion, causation or uniform local response.
- **Evidence / interpretation limit:** Use IT-Bengaluru, garment clusters, Kerala-Gulf migration, platform work, food/media hybridity and farmer/artisan value chains with sector and region qualifications; distinguish policy chronology, firm strategy, technology and household agency.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Globalisation as a set of channels?

A. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. B. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. C. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. D. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.

Answer: A. Explanation: Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather

than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Globalisation as a set of channels?

A. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. B. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. C. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. D. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.

Answer: B. Explanation: Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Globalisation as a set of channels?

A. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. B. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. C. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. D. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Answer: C. Explanation: Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Globalisation as a set of channels?

A. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. B. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. C. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from

consumption behaviour alone. D. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

Answer: D. Explanation: Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Consumer culture?

A. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. B. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. C. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. D. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

Answer: A. Explanation: Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Consumer culture?

A. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. B. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. C. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. D. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Answer: B. Explanation: Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Consumer culture?

A. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. B. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. C. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. D. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

Answer: C. Explanation: Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Consumer culture?

A. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. B. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. C. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. D. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.

Answer: D. Explanation: Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Structural and cultural consumerism?

A. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. B. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. C. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. D. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

Answer: A. Explanation: Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. The remaining options belong to different

Q10. Which chronology card should be filed under Structural and cultural consumerism?

A. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. B. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. C. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. D. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.

Answer: B. Explanation: Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Structural and cultural consumerism?

A. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. B. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. C. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. D. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Answer: C. Explanation: Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Structural and cultural consumerism?

A. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. B. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. C. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. D. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.

Answer: D. Explanation: Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Homogenisation?

A. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. B. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. C. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. D. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

Answer: A. Explanation: Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Homogenisation?

A. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. B. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. C. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. D. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Answer: B. Explanation: Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a

prediction about convergence rather than a proven description of every Indian domain. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Homogenisation?

A. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. B. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. C. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. D. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.

Answer: C. Explanation: Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Homogenisation?

A. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. B. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. C. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. D. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.

Answer: D. Explanation: Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Glocalisation?

A. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. B. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. C. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. D. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Answer: A. Explanation: Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. The

remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Glocalisation?

A. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. B. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. C. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. D. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.

Answer: B. Explanation: Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Glocalisation?

A. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. B. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. C. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. D. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.

Answer: C. Explanation: Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Glocalisation?

A. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. B. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. C. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. D. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

Answer: D. Explanation: Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. The

remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Simultaneity rule?

A. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. B. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. C. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. D. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.

Answer: A. Explanation: Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Simultaneity rule?

A. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. B. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. C. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. D. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.

Answer: B. Explanation: Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Simultaneity rule?

A. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. B. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. C. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. D. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.

Answer: C. Explanation: Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Simultaneity rule?

A. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. B. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. C. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. D. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Answer: D. Explanation: Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies The exclusivity trap?

A. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. B. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. C. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. D. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.

Answer: A. Explanation: The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under The exclusivity trap?

A. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. B. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. C. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. D. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

Answer: B. Explanation: The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of The exclusivity trap?

A. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. B. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. C. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. D. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.

Answer: C. Explanation: The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about The exclusivity trap?

A. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. B. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. C. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. D. The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.

Answer: D. Explanation: The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Service-sector labour pull?

A. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. B. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. C. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. D. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

Answer: A. Explanation: Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Service-sector labour pull?

A. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. B. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. C. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. D. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

Answer: B. Explanation: Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Service-sector labour pull?

A. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. B. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. C. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration

stream. D. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.

Answer: C. Explanation: Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Service-sector labour pull?

A. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. B. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. C. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. D. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.

Answer: D. Explanation: Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies PLFS 2023-24 anchor?

A. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. B. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. C. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. D. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.

Answer: A. Explanation: The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under PLFS 2023-24 anchor?

A. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. B. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. C. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. D. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.

Answer: B. Explanation: The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of PLFS 2023-24 anchor?

A. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. B. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. C. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. D. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.

Answer: C. Explanation: The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about PLFS 2023-24 anchor?

A. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. B. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. C. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. D. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.

Answer: D. Explanation: The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.

The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies PLFS 2025 reference-period change?

A. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. B. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. C. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. D. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

Answer: A. Explanation: The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under PLFS 2025 reference-period change?

A. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. B. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. C. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. D. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.

Answer: B. Explanation: The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of PLFS 2025 reference-period change?

A. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. B. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. C. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a

January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. D. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.

Answer: C. Explanation: The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about PLFS 2025 reference-period change?

A. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and globalised menu adaptation rather than through any denial of health risk. B. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. C. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. D. The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.

Answer: D. Explanation: The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies A participation rate is not a migration stream?

A. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. B. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. C. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. D. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.

Answer: A. Explanation: A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under A participation rate is not a migration stream?

A. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. B. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. C. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. D. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.

Answer: B. Explanation: A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of A participation rate is not a migration stream?

A. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. B. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. C. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. D. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.

Answer: C. Explanation: A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about A participation rate is not a migration stream?

A. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. B. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. C. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. D. A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.

Answer: D. Explanation: A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Personal-freedom expansion?

A. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. B. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. C. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. D. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.

Answer: A. Explanation: Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Personal-freedom expansion?

A. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. B. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. C. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. D. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.

Answer: B. Explanation: Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Personal-freedom expansion?

A. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. B. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. C. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. D. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than

proof that one motive dominates every purchase.

Answer: C. Explanation: Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Personal-freedom expansion?

A. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. B. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. C. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. D. Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.

Answer: D. Explanation: Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Family renegotiation rather than severance?

A. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. B. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. C. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. D. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.

Answer: A. Explanation: Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Family renegotiation rather than severance?

A. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. B. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. C. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational

branding and glocalised menu adaptation rather than through any denial of health risk. D. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.

Answer: B. Explanation: Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Family renegotiation rather than severance?

A. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. B. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. C. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. D. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate.

Answer: C. Explanation: Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Family renegotiation rather than severance?

A. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. B. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. C. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. D. Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.

Answer: D. Explanation: Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Freedom and security trade-off?

A. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. B. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. C. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. D. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.

Answer: A. Explanation: The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Freedom and security trade-off?

A. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. B. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. C. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. D. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate.

Answer: B. Explanation: The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Freedom and security trade-off?

A. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. B. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. C. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. D. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

Answer: C. Explanation: The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Freedom and security trade-off?

A. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. B. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. C. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. D. The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.

Answer: D. Explanation: The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Fast-food paradox?

A. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. B. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. C. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. D. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

Answer: A. Explanation: The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Fast-food paradox?

A. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. B. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. C. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. D. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

Answer: B. Explanation: The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through

any denial of health risk. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Fast-food paradox?

A. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. B. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. C. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. D. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Answer: C. Explanation: The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Fast-food paradox?

A. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. B. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. C. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. D. The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.

Answer: D. Explanation: The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Bounded rationality as one lens?

A. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. B. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. C. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. D. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

Answer: A. Explanation: Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Bounded rationality as one lens?

A. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. B. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. C. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. D. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Answer: B. Explanation: Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Bounded rationality as one lens?

A. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. B. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. C. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. D. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Answer: C. Explanation: Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Bounded rationality as one lens?

A. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. B. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. C. Consumer culture is a social pattern in which the consumption

of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. D. Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.

Answer: D. Explanation: Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Domestic food systems belong in the answer?

A. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. B. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. C. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. D. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one.

Answer: A. Explanation: An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Domestic food systems belong in the answer?

A. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. B. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. C. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. D. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Answer: B. Explanation: An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Domestic food systems belong in the answer?

A. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. B. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. C. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. D. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

Answer: C. Explanation: An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Domestic food systems belong in the answer?

A. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. B. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. C. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. D. An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.

Answer: D. Explanation: An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Digital-access anchor?

A. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. B. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. C. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. D. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025

fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Answer: A. Explanation: This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Digital-access anchor?

A. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. B. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. C. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. D. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.

Answer: B. Explanation: This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Digital-access anchor?

A. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. B. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. C. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. D. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

Answer: C. Explanation: This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Digital-access anchor?

A. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. B. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. C. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. D. This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate.

Answer: D. Explanation: This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Digital divide?

A. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. B. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. C. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. D. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

Answer: A. Explanation: The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Digital divide?

A. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. B. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. C. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. D. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is

most visible in urban middle-class lifestyle and aspiration.

Answer: B. Explanation: The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Digital divide?

A. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. B. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. C. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. D. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.

Answer: C. Explanation: The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Digital divide?

A. Globalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. B. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. C. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. D. The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one.

Answer: D. Explanation: The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified direct Mains demands and one ownership conflict?

A. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. B. Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. C. Consumer culture is a social pattern in which the consumption of goods and

brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. D. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.

Answer: A. Explanation: Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified direct Mains demands and one ownership conflict?

A. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. B. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. C. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. D. Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.

Answer: B. Explanation: Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands and one ownership conflict?

A. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. B. Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. C. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. D. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.

Answer: C. Explanation: Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic

owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified direct Mains demands and one ownership conflict?

A. Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. B. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. C. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. D. Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Answer: D. Explanation: Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Six direct General Studies Paper-I Mains demands are routed to this topic and each is recorded with its exact routing status. The 2018 Q19 demand on globalisation, cultural homogenisation and Indian cultural specificities, the 2019 Q20 demand on losing local identity for a global identity, the 2020 Q18 demand on diversity and pluralism under threat from globalisation and the 2022 Q20 demand on globalisation and new technology in a world of scarce resources are routed in the audited 2018-2023 Mains ledger to the Advanced owner, while the Core owner's own answer-architecture table records that Core routing supersedes those pointers, so all four are answered here from the Basic spine. The locally held official question papers for 2018, 2019, 2020 and 2022 are scanned images from which reliable English text cannot be extracted, so the audited ledger's neutral demand rendering is used for those four years and no verbatim wording is claimed. The 2024 Q19 demand on globalisation and the urban migration of skilled, young and unmarried women and the 2025 Q10 demand on whether globalisation results only in an aggressive consumer culture are routed in the audited 2024-2025 ledger to this Basic owner, and the wording of both was confirmed in the locally held official 2024 and 2025 General Studies Paper-I question papers. A seventh demand, the 2025 Q18 fast-food question, is claimed by this owner's own answer-architecture table while the audited 2024-2025 ledger routes it to the Social Change and Modernisation owner; that cross-owner conflict is stated openly here and the demand is answered under the owner the ledger names rather than duplicated. No marking scheme, official key or model answer of the Union Public Service Commission is held locally, and none is reproduced or inferred.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the sociological demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

1. **Claim and named evidence:** Define the central concept and separate it from the nearest social or legal category. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Trace the historical and institutional setting instead of assuming a timeless practice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Explain the norm, incentive, network, power or agency mechanism producing the outcome. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Use one named Indian community, movement, region, institution or source-dated dataset. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** Qualify the pattern through intersectionality, regional variation, causation and implementation limits. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The answer must resolve the sociological demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- FACT: **2025 GS-I PYQ (10 marks, verbatim):** "Do you think that globalization results in only an aggressive consumer culture? Justify your answer." The expected answer: reject the "only" framing - acknowledge genuine consumer-culture intensification, but argue globalisation equally reshapes employment patterns, family structures, digital access and cultural adaptation (glocalisation), justifying a "more than just consumer culture" position with concrete Indian examples.

- FACT: **2024 GS-I PYQ (15 marks, verbatim):** "Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?" The expected answer: trace independent income and urban residence expanding personal freedom (mobility, spending, partner-choice voice) while family relationships are renegotiated through continued remittance and periodic contact rather than severed outright - full treatment also in 04_Family-Marriage-and-Kinship.md.

- FACT: **2025 GS-I PYQ (15 marks, verbatim):** "How do you account for the growing fast food

industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience." The expected answer: explain the paradox through convenience, dual-income urban household time constraints, aspirational branding and glocalised Indian-taste menu adaptation, showing behaviour is not purely health-rational.

9. PYQ application

- FACT: **2025 Q10 (10 marks)**: reject the "only consumer culture" framing with a multi-domain argument (employment, family, digital access, glocalisation).
- FACT: **2024 Q19 (15 marks)**: analyse possible personal-freedom expansion and family renegotiation using the exact "skilled, young, unmarried women" framing; distinguish the PYQ proposition from a verified national migration series.
- FACT: **2025 Q18 (15 marks)**: explain the fast-food paradox through convenience, time constraints, pricing/delivery, aspiration and local adaptation, including domestic as well as global food systems.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	19	Globalization and urban migration of skilled young unmarried women	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	GS-I	10	Whether globalization results only in aggressive consumer culture	Justify · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Globalization and urban migration of skilled young unmarried women
- Whether globalization results only in aggressive consumer culture

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

10. PYQ-based analytical application

- FACT: **2025 Q10 (10 marks, verbatim)**: "Do you think that globalization results in only an aggressive consumer culture? Justify your answer." Analytical route: reject the "only" framing using the structural-versus-cultural-consumerism distinction and the multi-domain causal chain (labour, family, digital access, glocalisation).
- FACT: **2024 Q19 (15 marks, verbatim)**: "Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?" Analytical route: apply the gender-specific push-pull refinement and the freedom-family-coexistence framing, citing PLFS female-participation data as evidence of the underlying employment pull.
- FACT: **2025 Q18 (15 marks, verbatim)**: "How do you account for the growing fast food

industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience." Analytical route: apply the bounded-rationality chain (convenience, aspiration, glocalised menu adaptation outweighing health-rational choice) with Indian examples.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2018, 2019, 2020, 2022
- **Paper(s):** GS-I
- **Routed question demands:** 4

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-I	19	Globalization, cultural homogenization and Indian cultural specificities	Elucidate · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2019	GS-I	20	Losing local identity for a global identity	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-I	18	Diversity and pluralism in India under threat from globalisation	Justify your answer · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-I	20	Globalization and new technology in a world of scarce resources	Elucidate · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Globalization, cultural homogenization and Indian cultural specificities
- Losing local identity for a global identity
- Diversity and pluralism in India under threat from globalisation
- Globalization and new technology in a world of scarce resources

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2018 GS-I Q19

Demand: Audited ledger demand rendering: globalisation, cultural homogenisation and Indian cultural specificities. Elucidate, 15 marks, 250 words.

Status: Routed in the audited 2018-2023 Mains ledger to the Advanced owner, with the Core owner recording that Core routing supersedes. The locally held official 2018 paper is a scanned image without reliable English text extraction, so the ledger rendering is used and no verbatim wording is claimed.

Model solution: Set the two processes against each other at the start, because the demand is about specificity and not about whether globalisation exists. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats; it is a convergence prediction. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts, illustrated in this owner by locally customised menus at global chains and by regional-language

content on global digital platforms. Show that Indian evidence carries both. Global brand recognition and shared media formats are the domains where convergence is strongest, while menu adaptation and vernacular platform content are the domains where local specificity reasserts itself, and because the two run at once the correct analytical stance names the domain rather than declaring a single winner. Add the structural half of the argument so the answer is not only cultural. Structural consumerism, meaning the expansion of market access and purchasing capacity through income growth, retail expansion and credit, can precede and operate independently of the cultural meaning attached to consumption, so convergence in purchasing capacity is not the same as convergence in identity. Qualify the claim honestly. An illustration of adaptation is not a measurement of how much adaptation is occurring, and no figure for the vitality of any language or cultural form is held by this owner, so the answer must not assert either loss or resilience as a quantity. Conclude that Indian cultural specificity survives inside globalisation through adaptation rather than by exclusion from it, and that a specificity answer therefore reports a mixed, domain-graded pattern instead of a civilisational verdict.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2018 GS-I Q19", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Set the two processes against each other at the start, because the demand is about specificity and not about whether globalisation exists. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats; it is a convergence prediction. Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. Show that Indian evidence carries both. Global brand recognition and shared media formats are the domains where convergence is strongest, while menu adaptation and vernacular platform content are the domains where local specificity reasserts itself, and because the two run at once the correct analytical stance names the domain rather than declaring a single winner. Add the structural half of the argument so the answer is not only cultural. Structural consumerism, meaning the expansion of market access and purchasing capacity through income growth, retail expansion and credit, can precede and operate independently of the cultural meaning attached to consumption, so convergence in purchasing capacity is not the same as convergence in identity. Qualify the claim honestly. An illustration of adaptation is not a measurement of how much adaptation is occurring, and no figure for the vitality of any language or cultural form is held by this owner, so the answer must not assert either loss or resilience as a quantity. Conclude that Indian cultural specificity survives inside globalisation through adaptation rather than by exclusion from it, and that a specificity answer therefore reports a mixed, domain-graded pattern instead of a civilisational verdict.

Analytical body:

1. **Claim and named evidence:** Demand: Audited ledger demand rendering: globalisation, cultural homogenisation and Indian cultural specificities. Elucidate, 15 marks, 250 words. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Set the two processes against each other at the start, because the demand is about specificity and not about whether globalisation exists. Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats; it is a convergence prediction. Global brand recognition and shared media formats are the domains where convergence is strongest, while menu adaptation and vernacular platform content are the domains where local specificity reasserts itself, and because the two run at once the correct analytical stance names the domain rather than declaring a single winner. Add the structural half of the argument so the answer

is not only cultural. Structural consumerism, meaning the expansion of market access and purchasing capacity through income growth, retail expansion and credit, can precede and operate independently of the cultural meaning attached to consumption, so convergence in purchasing capacity is not the same as convergence in identity. Qualify the claim honestly. An illustration of adaptation is not a measurement of how much adaptation is occurring, and no figure for the vitality of any language or cultural form is held by this owner, so the answer must not assert either loss or resilience as a quantity. Conclude that Indian cultural specificity survives inside globalisation through adaptation rather than by exclusion from it, and that a specificity answer therefore reports a mixed, domain-graded pattern instead of a civilisational verdict.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2018 GS-I Q19", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2019 GS-I Q20

Demand: Audited ledger demand rendering: losing local identity for a global identity. Discuss, 15 marks, 250 words.

Status: Routed in the audited 2018-2023 Mains ledger to the Advanced owner, with the Core owner recording that Core routing supersedes. The locally held official 2019 paper is a scanned image without reliable English text extraction, so the ledger rendering is used and no verbatim wording is claimed.

Model solution: Refuse the substitution premise before discussing it, because the demand is framed as a loss and the examinable move is to test whether loss is the right description. Establish what could support the premise. Homogenisation predicts convergence toward globally uniform consumption and cultural patterns, and global brand recognition, shared media formats and English-medium aspiration are the domains where that prediction has visible Indian purchase. Then establish what defeats a simple substitution reading. Glocalisation shows global products and practices being adapted rather than adopted unchanged, so regional-language content on global platforms and locally customised menus are cases in which a global vehicle carries local content instead of replacing it. Add a second, non-cultural channel so the discussion is not confined to symbols. Service-sector employment growth in cities changes work patterns and household authority, and independent urban income can expand a migrant's mobility and voice while remittance, ritual participation and periodic visits keep the local tie intact, which is a renegotiation of identity rather than its replacement. Bring the access qualification. The digital channel through which global identity is supposed to arrive is itself stratified, because the digital divide distributes connectivity unequally by income, gender, region and generation, so any claim of uniform identity change overstates the reach of the mechanism that would produce it. State the evidence boundary plainly: this owner holds no survey of identity, language use or cultural attachment, so the answer argues from mechanisms and named illustrations and quotes no figure for identity loss. Conclude that the honest description is layered identity, in which local, regional and global affiliations are held together and reweighted, rather than one identity being surrendered for another.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2019 GS-I Q20", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Refuse the substitution premise before discussing it, because the demand is framed as a loss and the examinable move is to test whether loss is the right description. Establish what could support the premise. Homogenisation predicts convergence toward globally uniform consumption and cultural patterns, and global brand recognition, shared media formats and English-medium aspiration are the domains where that prediction has visible Indian purchase. Then establish what defeats a simple substitution reading. Glocalisation shows global products and practices being adapted rather than adopted unchanged, so regional-language content on global platforms and locally customised menus are cases in which a global vehicle carries local content instead of replacing

it. Add a second, non-cultural channel so the discussion is not confined to symbols. Service-sector employment growth in cities changes work patterns and household authority, and independent urban income can expand a migrant's mobility and voice while remittance, ritual participation and periodic visits keep the local tie intact, which is a renegotiation of identity rather than its replacement. Bring the access qualification. The digital channel through which global identity is supposed to arrive is itself stratified, because the digital divide distributes connectivity unequally by income, gender, region and generation, so any claim of uniform identity change overstates the reach of the mechanism that would produce it. State the evidence boundary plainly: this owner holds no survey of identity, language use or cultural attachment, so the answer argues from mechanisms and named illustrations and quotes no figure for identity loss. Conclude that the honest description is layered identity, in which local, regional and global affiliations are held together and reweighted, rather than one identity being surrendered for another.

Analytical body:

1. **Claim and named evidence:** Demand: Audited ledger demand rendering: losing local identity for a global identity. Discuss, 15 marks, 250 words. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Refuse the substitution premise before discussing it, because the demand is framed as a loss and the examinable move is to test whether loss is the right description. Establish what could support the premise. Homogenisation predicts convergence toward globally uniform consumption and cultural patterns, and global brand recognition, shared media formats and English-medium aspiration are the domains where that prediction has visible Indian purchase. Then establish what defeats a simple substitution reading. Glocalisation shows global products and practices being adapted rather than adopted unchanged, so regional-language content on global platforms and locally customised menus are cases in which a global vehicle carries local content instead of replacing it. Add a second, non-cultural channel so the discussion is not confined to symbols. Service-sector employment growth in cities changes work patterns and household authority, and independent urban income can expand a migrant's mobility and voice while remittance, ritual participation and periodic visits keep the local tie intact, which is a renegotiation of identity rather than its replacement. Bring the access qualification. The digital channel through which global identity is supposed to arrive is itself stratified, because the digital divide distributes connectivity unequally by income, gender, region and generation, so any claim of uniform identity change overstates the reach of the mechanism that would produce it. State the evidence boundary plainly: this owner holds no survey of identity, language use or cultural attachment, so the answer argues from mechanisms and named illustrations and quotes no figure for identity loss. Conclude that the honest description is layered identity, in which local, regional and global affiliations are held together and reweighted, rather than one identity being surrendered for another.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 2 - 2019 GS-I Q20", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 3 - 2020 GS-I Q18

Demand: Audited ledger demand rendering: diversity and pluralism in India under threat from globalisation. Justify your answer, 15 marks, 250 words.

Status: Routed in the audited 2018-2023 Mains ledger to the Advanced owner, with the Core owner recording that Core routing supersedes. The locally held official 2020 paper is a scanned image without reliable English text extraction, so the ledger rendering is used and no verbatim wording is claimed.

Model solution: Treat the demand as conditional rather than as a yes-or-no verdict, because a justify directive rewards the conditions under which the threat is real. Name the vulnerability first. Homogenising market and media pressure can narrow the range of formats, languages and consumption styles that are commercially viable, and where a local practice depends on a market that global formats displace, its transmission becomes harder. Then name the countervailing process with equal precision. Glocalisation reworks global products, language and practice locally, and regional-language content on global platforms is the clearest Indian case of a global channel expanding rather than shrinking the space available to a local form. Introduce the decisive variable, which is access rather than presence. Pluralism depends on whether a group has voice and reach, not on whether global products are visible in its market, and the digital divide means connectivity gains reach the already better positioned first, so the same channel can widen the voice of one group while leaving another dependent on intermediaries. Add the labour and household channel so the justification is not only about culture. Service-sector demand and urban migration reorganise family authority and residence, and the observed pattern is renegotiation with continuing remittance and periodic contact rather than the severance that a cultural-loss thesis would predict. Qualify the whole answer with the evidence boundary: no measure of linguistic vitality, cultural attachment or pluralism is held by this owner, so the answer justifies a conditional position and quotes no figure. Conclude that globalisation places diversity and pluralism under conditional pressure whose severity depends on voice, access and institutional support, and that this is a policy variable rather than a fate.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 3 - 2020 GS-I Q18", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Treat the demand as conditional rather than as a yes-or-no verdict, because a justify directive rewards the conditions under which the threat is real. Name the vulnerability first. Homogenising market and media pressure can narrow the range of formats, languages and consumption styles that are commercially viable, and where a local practice depends on a market that global formats displace, its transmission becomes harder. Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 3 - 2020 GS-I Q18", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 4 - 2022 GS-I Q20

Demand: Audited ledger demand rendering: globalisation and new technology in a world of scarce resources. Elucidate, 15 marks, 250 words.

Status: Routed in the audited 2018-2023 Mains ledger to the Advanced owner, with the Core owner recording that Core routing supersedes. The locally held official 2022 paper is a scanned image without reliable English text extraction, so the ledger rendering is used and no verbatim wording is claimed.

Model solution: Separate the two layers of the demand in the opening sentence, because the commonest failure here is to answer with technical or macroeconomic material that this owner does not own. The society layer analyses access, trust, work, identity and unequal risk; the instrument layer, meaning energy and material chains, trade and investment mechanics and technical performance, is cross-linked to Economy, Environment and Science and Technology and is not re-derived. Elucidate the social gain first. New technology delivered through globalised platforms can widen access to information, markets and services, and the digital channel is the clearest Indian illustration because it reaches households directly. Then elucidate the distributional cost, which is where the scarce-resource half of the demand belongs on the society layer. Access is not uniform, because the digital divide distributes connectivity unequally by income, gender, region and generation, so an efficiency gain that is real in aggregate can still concentrate among those already better positioned. Add the consumption mechanism that links technology to resource pressure without importing an environmental statistic. Platform-mediated convenience, illustrated by delivery-based food consumption in dual-income urban households, converts time scarcity into higher throughput of goods and packaging, so technology can raise material demand at the same time as it raises productivity. Anchor the evidence available here. This owner's dated access measure is the National Family Health Survey ever-internet-use figure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national

fact sheets against 33.3 per cent in the round five comparator, and because the round six results are labelled provisional the figure shows direction rather than a current connectivity level. Conclude that a technology's social effect in a resource-constrained world depends on who has access, who bears the cost and how use is regulated, not on the technology's label.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 4 - 2022 GS-I Q20", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Separate the two layers of the demand in the opening sentence, because the commonest failure here is to answer with technical or macroeconomic material that this owner does not own. The society layer analyses access, trust, work, identity and unequal risk; the instrument layer, meaning energy and material chains, trade and investment mechanics and technical performance, is cross-linked to Economy, Environment and Science and Technology and is not re-derived. Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 4 - 2022 GS-I Q20", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 5 - 2024 GS-I Q19

Demand: Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family? (Answer in 250 words) 15 marks.

Status: Wording confirmed in the locally held official 2024 General Studies Paper-I. Routed in the audited 2024-2025 Mains ledger to this Basic owner with no cross-owner conflict recorded.

Model solution: Accept the stem's proposition as the premise the examiner supplies and then answer the two questions actually asked, which are about personal freedom and about the relationship with family. Begin with the pull mechanism, stated as a possibility rather than a proof. Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and education, safety, housing and prevailing family norms condition whether a particular young woman can act on that demand. State the statistical boundary immediately, because it is the discipline this demand rewards. The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported female labour force participation at 41.7 per cent against 37.0 per cent in 2022-23, and the Annual Report 2025 released in March 2026 reports usual-status female participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period rather than the earlier July to June cycle; these measure aggregate participation and establish neither the size nor the composition nor the cause of the migration stream in the stem, and the changed reference period must be named before the two are compared. Answer the freedom half specifically. Independent income and separate residence expand physical mobility, spending autonomy, the timing of marriage and the migrant's voice in partner selection, and naming each freedom is what distinguishes an answer from a summary. Answer the family half as renegotiation. Remittance flows, ritual participation and periodic visits continue while day-to-day parental oversight weakens, so the relationship is redefined rather than severed and the two halves of the demand are not in opposition. Close with the qualification that keeps the answer honest: the same independence that expands freedom thins the family-based support available during workplace harassment or a health emergency far from home, so the outcome varies with class, occupation, housing and city, and no uniform result may be claimed.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 5 - 2024 GS-I Q19", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 5 - 2024 GS-I Q19", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 6 - 2025 GS-I Q10

Demand: Do you think that globalization results in only an aggressive consumer culture? Justify your answer. (Answer in 150 words) 10 marks.

Status: Wording confirmed in the locally held official 2025 General Studies Paper-I. Routed in the audited 2024-2025 Mains ledger to this Basic owner with no cross-owner conflict recorded.

Model solution: Attack the word only in the first line, because the entire mark difference on this demand sits there. Concede what is true so the refusal is credible. Consumer culture, meaning the pattern in which consumption of goods and brands becomes a primary vehicle for identity, status and social participation, has genuinely intensified under expanded market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. Then separate the two layers of that concession. Structural consumerism, the expansion of market access and purchasing capacity through income growth, retail expansion and credit, can precede and operate independently of cultural consumerism, the symbolic status meaning attached to consumption, which already shows that a single consumption story is doing too much work. Now supply the channels that do not run through consumption at all. Service-sector employment growth reorganises work; urban migration renegotiates household authority through remittance and periodic contact while expanding a migrant's mobility and voice; and digital access reorganises information and participation, with the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine reported at 64.3 per cent in the round six national fact sheets and labelled provisional. Add the cultural counter-process. Glocalisation shows global products and practices being adapted to local tastes rather than adopted unchanged, which contradicts the picture of a single aggressive consumer culture arriving intact. Justify the verdict rather than merely stating it: because these effects operate through separate mechanisms of labour demand, technology diffusion and cultural exposure, the exclusivity claim is empirically too narrow. Conclude that globalisation produces an intensified consumer culture among other simultaneous social changes, and that the honest answer is more than consumption rather than a denial of it.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 6 - 2025 GS-I Q10", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Attack the word only in the first line, because the entire mark difference on this demand sits there. Concede what is true so the refusal is credible. Consumer culture, meaning the pattern in which consumption of goods and brands becomes a primary vehicle for identity, status and social participation, has genuinely intensified under expanded market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. Then separate the two layers of that concession. Structural consumerism, the expansion of market access and purchasing capacity through income growth, retail expansion and credit, can precede and operate independently of cultural consumerism, the symbolic status meaning attached to consumption, which already shows that a single consumption story is doing too much work. Now supply the channels that do not run through consumption at all. Service-sector employment growth reorganises work; urban migration renegotiates household authority through remittance and periodic contact while expanding a migrant's mobility and voice; and digital access reorganises information and participation, with the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine reported at 64.3 per cent in the round six national fact sheets and labelled provisional. Add the cultural counter-process. Glocalisation shows global products and practices being adapted to local tastes rather than adopted unchanged, which contradicts the picture of a single aggressive consumer culture arriving intact. Justify the verdict rather than merely stating it: because these effects operate through separate mechanisms of labour demand, technology diffusion and cultural exposure, the exclusivity claim is empirically too narrow. Conclude that globalisation produces an intensified consumer culture among other simultaneous social changes, and that the honest answer is more than consumption rather than a denial of it.

Analytical body:

1. **Claim and named evidence:** Demand: Do you think that globalization results in only an aggressive consumer culture? Justify your answer. (Answer in 150 words) 10 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

2. **Claim and named evidence:** Status: Wording confirmed in the locally held official 2025 General Studies Paper-I. Routed in the audited 2024-2025 Mains ledger to this Basic owner with no cross-owner conflict recorded.

Analysis: Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Attack the word only in the first line, because the entire mark difference on this demand sits there. Concede what is true so the refusal is credible. Consumer culture, meaning the pattern in which consumption of goods and brands becomes a primary vehicle for identity, status and social participation, has genuinely intensified under expanded market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. Then separate the two layers of that concession. Structural consumerism, the expansion of market access and purchasing capacity through income growth, retail expansion and credit, can precede and operate independently of cultural consumerism, the symbolic status meaning attached to consumption, which already shows that a single consumption story is doing too much work. Now supply the channels that do not run through consumption at all. Service-sector employment growth reorganises work; urban migration renegotiates household authority through remittance and periodic contact while expanding a migrant's mobility and voice; and digital access reorganises information and participation, with the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine reported at 64.3 per cent in the round six national fact sheets and labelled provisional. Add the cultural counter-process. Globalisation shows global products and practices being adapted to local tastes rather than adopted unchanged, which contradicts the picture of a single aggressive consumer culture arriving intact. Justify the verdict rather than merely stating it: because these effects operate through separate mechanisms of labour demand, technology diffusion and cultural exposure, the exclusivity claim is empirically too narrow. Conclude that globalisation produces an intensified consumer culture among other simultaneous social changes, and that the honest answer is more than consumption rather than a denial of it.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "PYQ DEMAND CARD 6 - 2025 GS-I Q10", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish structural consumerism from cultural consumerism and explain why the distinction changes a globalisation answer. Answer in about 150 words.

Model thesis: Naming the structural and the cultural layer separately is what allows an answer to concede that consumption has genuinely intensified while still refusing the claim that consumption is the whole social effect of globalisation.

Claim -> named evidence -> analysis -> qualification:

- Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.
- Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is

most visible in urban middle-class lifestyle and aspiration.

- Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

Qualified conclusion: Naming the structural and the cultural layer separately is what allows an answer to concede that consumption has genuinely intensified while still refusing the claim that consumption is the whole social effect of globalisation.

Demand decoding: The directive **explain** requires a direct position on "Distinguish structural consumerism from cultural consumerism and explain why the distinction...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Naming the structural and the cultural layer separately is what allows an answer to concede that consumption has genuinely intensified while still refusing the claim that consumption is the whole social effect of globalisation.

Analytical body:

1. **Claim and named evidence:** Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Naming the structural and the cultural layer separately is what allows an answer to concede that consumption has genuinely intensified while still refusing the claim that consumption is the whole social effect of globalisation.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Distinguish structural consumerism from cultural consumerism and explain why the distinction...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain glocalisation and show why it must be presented alongside homogenisation in an Indian answer. Answer in about 150 words.

Model thesis: Homogenisation is a convergence prediction and glocalisation is an observed adaptation, so the defensible Indian position is domain-specific rather than a choice between the two.

Claim -> named evidence -> analysis -> qualification:

- Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.
- Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.
- Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.

Qualified conclusion: Homogenisation is a convergence prediction and glocalisation is an observed adaptation, so the defensible Indian position is domain-specific rather than a choice between the two.

Demand decoding: The directive **explain** requires a direct position on "Explain glocalisation and show why it must be presented alongside homogenisation in an Indian...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Homogenisation is a convergence prediction and glocalisation is an observed adaptation, so the defensible Indian position is domain-specific rather than a choice between the two.

Analytical body:

1. **Claim and named evidence:** Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power,

agency, intersectionality, region, period and evidence status.

Qualified conclusion: Homogenisation is a convergence prediction and glocalisation is an observed adaptation, so the defensible Indian position is domain-specific rather than a choice between the two.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "Explain glocalisation and show why it must be presented alongside homogenisation in an Indian...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 3 - 15 MARKS

Question: Examine the limits of using an aggregate labour-force statistic as evidence about a specific migration stream. Answer in about 250 words.

Model thesis: An aggregate participation rate can establish the employment context in which a migration decision is taken but never the composition or cause of the stream itself, and stating that limit is what converts a citation into analysis.

Claim -> named evidence -> analysis -> qualification:

- The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.
- The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.
- A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.
- Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.

Qualified conclusion: An aggregate participation rate can establish the employment context in which a migration decision is taken but never the composition or cause of the stream itself, and stating that limit is what converts a citation into analysis.

Demand decoding: The directive **examine** requires a direct position on "Examine the limits of using an aggregate labour-force statistic as evidence about a specific...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: An aggregate participation rate can establish the employment context in which a migration decision is taken but never the composition or cause of the stream itself, and stating that limit is what converts a citation into analysis.

Analytical body:

1. **Claim and named evidence:** The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per

cent. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

2. **Claim and named evidence:** The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

4. **Claim and named evidence:** Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: An aggregate participation rate can establish the employment context in which a migration decision is taken but never the composition or cause of the stream itself, and stating that limit is what converts a citation into analysis.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Examine the limits of using an aggregate labour-force statistic as evidence about a specific...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine how urban work can expand a woman migrant's personal freedom while her family relationship is renegotiated rather than severed. Answer in about 250 words.

Model thesis: Freedom and family tie are not substitutes under migration, because remittance, ritual participation and periodic contact persist while daily oversight weakens, and the honest qualification is the security that independent residence can cost.

Claim -> named evidence -> analysis -> qualification:

- Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.
- Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the

pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.

- The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.
- Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.

Qualified conclusion: Freedom and family tie are not substitutes under migration, because remittance, ritual participation and periodic contact persist while daily oversight weakens, and the honest qualification is the security that independent residence can cost.

Demand decoding: The directive **examine** requires a direct position on "Examine how urban work can expand a woman migrant's personal freedom while her family...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Freedom and family tie are not substitutes under migration, because remittance, ritual participation and periodic contact persist while daily oversight weakens, and the honest qualification is the security that independent residence can cost.

Analytical body:

1. **Claim and named evidence:** Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Freedom and family tie are not substitutes under migration, because remittance, ritual participation and periodic contact persist while daily oversight weakens, and the honest qualification is the security

that independent residence can cost.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Examine how urban work can expand a woman migrant's personal freedom while her family...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess the social explanations for the growth of fast-food industries in India despite rising health concern. Answer in about 300 words.

Model thesis: The paradox is explained by time constraint, price and delivery convenience, aspirational branding and local menu adaptation acting together with domestic supply chains, and no single behavioural lens may be promoted to a complete account.

Claim -> named evidence -> analysis -> qualification:

- The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.
- Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.
- An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.
- Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.

Qualified conclusion: The paradox is explained by time constraint, price and delivery convenience, aspirational branding and local menu adaptation acting together with domestic supply chains, and no single behavioural lens may be promoted to a complete account.

Demand decoding: The directive **assess** requires a direct position on "Assess the social explanations for the growth of fast-food industries in India despite rising...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The paradox is explained by time constraint, price and delivery convenience, aspirational branding and local menu adaptation acting together with domestic supply chains, and no single behavioural lens may be promoted to a complete account.

Analytical body:

1. **Claim and named evidence:** The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

3. **Claim and named evidence:** An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The paradox is explained by time constraint, price and delivery convenience, aspirational branding and local menu adaptation acting together with domestic supply chains, and no single behavioural lens may be promoted to a complete account.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess the social explanations for the growth of fast-food industries in India despite rising...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess the claim that globalisation's digital channel benefits Indian society uniformly. Answer in about 300 words.

Model thesis: The digital channel is stratified before it is universal, because access is unequal by income, gender, region and generation, and the dated access anchor available here shows direction without licensing a current-connectivity claim.

Claim -> named evidence -> analysis -> qualification:

- This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate.
- The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one.
- Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the

macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.

- Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Qualified conclusion: The digital channel is stratified before it is universal, because access is unequal by income, gender, region and generation, and the dated access anchor available here shows direction without licensing a current-connectivity claim.

Demand decoding: The directive **assess** requires a direct position on "Assess the claim that globalisation's digital channel benefits Indian society uniformly....", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The digital channel is stratified before it is universal, because access is unequal by income, gender, region and generation, and the dated access anchor available here shows direction without licensing a current-connectivity claim.

Analytical body:

1. **Claim and named evidence:** This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The digital channel is stratified before it is universal, because access is unequal by income, gender, region and generation, and the dated access anchor available here shows direction without licensing a

current-connectivity claim.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess the claim that globalisation's digital channel benefits Indian society uniformly....", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Indian Society | **Tier:** Advanced | **GS Paper:** GS-I. **Core area:** The homogenisation-glocalisation theoretical architecture, the causal chain linking globalisation to women's migration and family renegotiation, and the fast-food-paradox behavioural-economics angle. **Grounded in:** MoSPI PLFS 2023-24 and 2025; NFHS-5 (2019-21; historical comparator; NFHS-6 was released 29 May 2026); audited 2024 and 2025 GS-I Mains PYQs (three direct questions). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/11_Effects-of-Globalisation-on-Indian-Society.md.

Data-status correction (13 August 2026): NFHS-6 (2023-24) was released on 29 May 2026. NFHS-5 (2019-21) values below are historical comparators, not the latest national NFHS result. Do not quote an NFHS-6 metric unless taken directly from its released national fact sheet; neither NFHS round is a Census stock or by itself proof of causation.

1. Architecture

Analytical claim: ANALYSIS: All three PYQs on this topic share a single underlying analytical error to avoid: treating globalisation as a single, uniform, one-directional force. The correct advanced framing is that each channel (market, labour, consumption, media) produces a *simultaneous* mix of homogenising and localising effects, and that behavioural outcomes (fast-food growth despite health awareness; consumer culture despite non-consumer changes; family renegotiation despite freedom expansion) are best explained by behavioural/structural factors that are not reducible to a single "globalisation causes X" statement.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Homogenisation vs glocalisation	Homogenisation theory predicts convergence toward globally uniform consumption and cultural patterns; glocalisation describes the empirically observed adaptation of global products/practices to local context - Indian evidence shows both operating simultaneously in different domains (global brand aspiration alongside vernacular digital content, for instance), so a sound answer must show both, not pick one.
ANALYSIS: Push-pull migration reframed for gender	Classical push-pull theory explains migration generally. For the 2024 Q19 proposition, assess how labour demand, education, safety, housing and family norms may shape a skilled young woman's migration choice; do not infer the stream's size or cause from aggregate female LFPR alone.
ANALYSIS: Bounded rationality vs full health-rational choice	Classical rational-choice theory would predict health-conscious consumers reduce fast-food consumption as awareness rises; behavioural-economics-informed bounded rationality explains the observed paradox - convenience, time-poverty in dual-income households, present-bias in food choice, and aspirational branding outweigh long-run health considerations in actual decision-making.
ANALYSIS: Personal-freedom expansion vs family-authority renegotiation	Personal freedom expansion (mobility, independent income, later marriage, partner-choice voice) and family-authority renegotiation (continued remittance, periodic contact, redefined but not eliminated parental influence) are not contradictory outcomes - both occur together, and treating the PYQ as a binary "freedom versus family" question misses that the actual empirical pattern is one of coexistence and renegotiation.
ANALYSIS: Structural consumerism vs cultural consumerism	Structural consumerism refers to the expansion of market access and purchasing capacity (income growth, retail expansion, credit access); cultural consumerism refers to the symbolic and identity-related meaning attached to consumption (status signalling, brand identity) - the 2025 Q10 PYQ's "aggressive consumer culture" language points mainly to the cultural dimension, but the "only" framing fails because structural changes (labour markets, digital access) operate independently of, and sometimes prior to, cultural consumerism.

3. Detailed causal chain

Consumer-culture-versus-multi-domain chain (2025 Q10)

1. Trade liberalisation and foreign investment expand the availability and marketing reach of global consumer brands in Indian cities.
2. ANALYSIS: This visibly intensifies consumer culture, especially among the urban middle class, supporting the "aggressive consumer culture" observation the PYQ's premise references.
3. FACT: Simultaneously, globalisation independently reshapes labour markets (service-sector job growth), family structures (via migration) and information ecosystems (digital platforms) - domains not reducible to consumption behaviour.
4. ANALYSIS: Because these effects operate through separate mechanisms (labour demand, technology diffusion, cultural exposure) rather than all flowing from a single consumerism channel, the "only" framing in the PYQ's premise is empirically too narrow, justifying a "more than just consumer culture" answer.

Women's-migration-family chain (2024 Q19)

1. The PYQ's proposition invites analysis of how service-sector demand, education, safety, housing and family norms may shape urban work migration by skilled, young, unmarried women.
2. PLFS female LFPR (41.7% in 2023-24; 40.0% in the calendar-year 2025 report) measures

aggregate labour-force participation, not the size, age/marital composition or causal source of that migration stream. Its changed reporting period also limits comparison.

3. Independent urban income and residence expand personal freedom - mobility, spending autonomy, delayed marriage, greater voice in partner selection.

4. ANALYSIS: Family relationships are simultaneously renegotiated: remittance flows, continued ritual participation and periodic visits persist even as day-to-day parental oversight weakens - a coexistence, not a substitution, of freedom and family tie.

Fast-food-paradox chain (2025 Q18)

1. Rising urban dual-income households face genuine time constraints on home cooking, raising the practical value of convenience food.

2. ANALYSIS: Aspirational branding (global fast-food chains as markers of urban modern identity) adds a status-consumption motive independent of nutritional content.

3. ANALYSIS: Glocalised menu adaptation (India-specific vegetarian and spice-profile options) lowers the cultural barrier to adoption, expanding the addressable consumer base beyond what an unmodified global menu could reach.

4. ANALYSIS: Health concern can coexist with purchase behaviour because convenience, price, delivery, aspiration and local adaptation compete with long-run health considerations. Use bounded rationality as one analytical lens, not as proof that one motive outweighs all others in every purchase.

4. Institutional and reform architecture

- ANALYSIS: **Digital-divide correction efforts:** rural and gender-linked internet-access gaps remain important. NFHS-6's 64.3% ever-internet-use estimate for women aged 15-49 is a provisional dated 2019-21 indicator, not a current connectivity estimate.

5. Indian applications and boundary cases

- ANALYSIS: **Boundary case 1 - pure homogenisation:** near-identical global smartphone/social-media app usage patterns across urban Indian youth regardless of region illustrates strong homogenisation.

- ANALYSIS: **Boundary case 2 - pure glocalisation:** a global fast-food chain's India-specific vegetarian menu and regional-language digital-platform content illustrate strong local adaptation.

- ANALYSIS: **Boundary case 3 - freedom-family coexistence:** a woman migrant retaining significant personal freedom in her city job while continuing to remit income and defer to family on major decisions (property, some marriage negotiations) shows the coexistence, not substitution, pattern the 2024 Q19 PYQ rewards, paralleled by a health-conscious urban professional who still orders fast food multiple times weekly due to time constraints, exemplifying the bounded-rationality explanation for the 2025 Q18 paradox.

6. Limitations and trade-offs

- ANALYSIS: **Homogenisation-glocalisation measurement difficulty:** it is analytically hard to cleanly separate "how much" homogenisation versus glocalisation is occurring in a given domain, since most real cases show a blend rather than a pure type.

- ANALYSIS: **Freedom-versus-security trade-off:** independent urban migration expands personal freedom for women but can also reduce traditional family-based social-security and support networks, particularly in cases of workplace harassment or health emergencies away from family.

- ANALYSIS: **Convenience-versus-health-outcome trade-off:** the fast-food paradox reflects a genuine, unresolved societal trade-off between time-poverty-driven convenience needs and long-run public-health outcomes, not merely a messaging or awareness gap that better communication could resolve.

7. Must-Know Facts for Advanced Prelims

- FACT: MoSPI's PLFS Annual Report 2023-24 (released 23 September 2024) recorded female labour force participation rate at 41.7% (up from 37.0% in 2022-23) and female worker population ratio at 40.3%.

- **FACT:** NFHS-6 (2023-24) national fact sheets report women's ever-internet-use at 64.3% for ages 15-49; it is a dated access measure, not a current national digital-use rate.
- **ANALYSIS:** Bounded rationality is one useful behavioural-economics lens for the fast-food paradox; price, delivery, marketing and local food systems also need consideration.
- **ANALYSIS:** Glocalisation and homogenisation are not mutually exclusive; Indian evidence shows both operating simultaneously across different globalisation channels.
- **ANALYSIS:** All three PYQs analysed here (2024 Q19, 2025 Q10, 2025 Q18) share the underlying analytical requirement to reject single-cause, one-directional explanations of globalisation's social effect.

8. Advanced Prelims traps

- **WRONG:** Globalisation's effects on Indian society are reducible to consumer culture. -> The 2025 Q10 PYQ specifically rewards a multi-domain rejection of the "only" framing.
- **WRONG:** Rising personal freedom for migrant women necessarily means weakened or severed family ties. -> The 2024 Q19 PYQ's expected answer treats freedom expansion and family renegotiation as coexisting, not substitutive.
- **WRONG:** Rational-choice theory alone can explain rising health awareness alongside rising fast-food consumption. -> Bounded rationality (convenience, aspiration, present-bias) is the more complete explanation for the 2025 Q18 paradox.
- **WRONG:** Homogenisation and glocalisation are competing theories where only one can be correct for India. -> Indian evidence shows both operating simultaneously in different domains.

9. CURRENT: Current-anchor note

- **CURRENT:** PLFS 2023-24's female labour-force participation (41.7%) and worker-population ratio (40.3%) are dated comparators. **PLFS Annual Report 2025**, released March 2026, reports usual-status female LFPR for age 15+ at **40.0%**. Because the newer report uses a January-December 2025 reference period rather than the earlier July-June cycle, cite period and measure before comparing them. NFHS-5's 33.3% ever-internet-use figure for women ages 15-49 is the dated digital-access anchor; do not cite an unverified NFHS-6 metric.

10. PYQ-based analytical application

- **FACT: 2025 Q10 (10 marks, verbatim):** "Do you think that globalization results in only an aggressive consumer culture? Justify your answer." Analytical route: reject the "only" framing using the structural-versus-cultural-consumerism distinction and the multi-domain causal chain (labour, family, digital access, glocalisation).
- **FACT: 2024 Q19 (15 marks, verbatim):** "Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?" Analytical route: apply the gender-specific push-pull refinement and the freedom-family-coexistence framing, citing PLFS female-participation data as evidence of the underlying employment pull.
- **FACT: 2025 Q18 (15 marks, verbatim):** "How do you account for the growing fast food industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience." Analytical route: apply the bounded-rationality chain (convenience, aspiration, glocalised menu adaptation outweighing health-rational choice) with Indian examples.

11. Mains-ready framework

Central thesis: Globalisation's effect on Indian society cannot be reduced to a single process - it operates through market, labour, consumption and digital-media channels simultaneously, each producing a blend of homogenisation and glocalisation, and its observed paradoxes (rising fast-food consumption alongside health awareness; expanding personal freedom alongside continued family ties) are best explained by structural and behavioural factors, not by treating globalisation as one uniform cultural force.

1. Reject any single-channel or single-direction framing of globalisation at the outset.

2. Apply the homogenisation-glocalisation pairing with domain-specific Indian examples.
3. Analyse the gender-specific labour-pull chain for the women's-migration PYQ, using PLFS only for aggregate LFPR and stating that it does not prove the specific migration stream.
4. Apply the freedom-family-coexistence framing rather than a binary freedom-versus-family position.
5. Apply the bounded-rationality chain to explain the fast-food paradox.
6. Flag the freedom-versus-security and convenience-versus-health-outcome trade-offs.
7. Cross-link labour-code, trade/FDI and digital-divide detail without restating them.
8. Conclude by tying all three PYQs to the shared "reject single-cause explanations" principle.

12. Probable questions

- ANALYSIS: **Prelims**: What behavioural-economics concept best explains fast-food-industry growth despite rising health awareness?
- FACT: **Mains (10 marks, 2025 GS-I PYQ, verbatim)**: Do you think that globalization results in only an aggressive consumer culture? Justify your answer.
- FACT: **Mains (15 marks, 2024 GS-I PYQ, verbatim)**: Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?
- FACT: **Mains (15 marks, 2025 GS-I PYQ, verbatim)**: How do you account for the growing fast food industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance**: Audited local official-paper routing ledgers: `_PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md`.

- **Years represented**: 2018, 2019, 2020, 2022
- **Paper(s)**: GS-I
- **Routed question demands**: 4

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-I	19	Globalization, cultural homogenization and Indian cultural specificities	Elucidate · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2019	GS-I	20	Losing local identity for a global identity	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-I	18	Diversity and pluralism in India under threat from globalisation	Justify your answer · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-I	20	Globalization and new technology in a world of scarce resources	Elucidate · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Globalization, cultural homogenization and Indian cultural specificities
- Losing local identity for a global identity
- Diversity and pluralism in India under threat from globalisation
- Globalization and new technology in a world of scarce resources

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

Effects of Globalisation on Indian Society: RAPID CONCEPT AND EVIDENCE MAP

1. **Globalisation as a set of channels:** Globalisation is treated in this owner as a set of traceable channels into Indian society, namely consumer markets, urban labour migration, food-industry growth and digital access, rather than as one uniform cultural force, while the macroeconomics of trade and investment liberalisation remains with Economy and the labour-code and gig-work dimension remains with Social Justice.
2. **Consumer culture:** Consumer culture is a social pattern in which the consumption of goods and brands becomes a primary vehicle for identity, status and social participation, intensified by globalisation-driven market access and advertising, and it is most visible in urban middle-class lifestyle and aspiration.
3. **Structural and cultural consumerism:** Structural consumerism is the expansion of market access and purchasing capacity through income growth, retail expansion and credit access, while cultural consumerism is the symbolic status and identity meaning attached to consumption, and because the structural change can precede and operate independently of the cultural one the pairing of structural consumerism vs cultural consumerism belongs in the core answer rather than in optional enrichment.
4. **Homogenisation:** Homogenisation is the theory that globalisation makes cultures and consumption patterns increasingly similar worldwide through the spread of global brands and media formats, and it is a prediction about convergence rather than a proven description of every Indian domain.
5. **Glocalisation:** Glocalisation is the observed adaptation of global products and practices to local tastes, norms and contexts instead of their unchanged adoption, illustrated in this owner by locally customised menus at global chains and by regional-language content on global digital platforms.

6. **Simultaneity rule:** Indian evidence shows homogenisation and glocalisation operating simultaneously in different domains rather than as rival theories of which only one can be true, and the analytical claim carried into the core answer is therefore that a competent response names the domain each process describes instead of selecting a single winner.
7. **The exclusivity trap:** The 2025 General Studies Paper-I demand asks whether globalisation results in only an aggressive consumer culture, and the examinable move is to reject the word only by showing that labour markets, family structure and digital access change through separate mechanisms rather than flowing from consumption behaviour alone.
8. **Service-sector labour pull:** Service-sector employment growth in cities is the labour channel through which globalisation reaches households, and for the 2024 demand it is analysed as one possible pull factor alongside education, safety, housing and family norms rather than as a proven cause of any particular migration stream.
9. **PLFS 2023-24 anchor:** The Periodic Labour Force Survey Annual Report 2023-24 of the Ministry of Statistics and Programme Implementation, released on 23 September 2024, reported a female labour force participation rate of 41.7 per cent against 37.0 per cent in 2022-23 and a female worker population ratio of 40.3 per cent.
10. **PLFS 2025 reference-period change:** The Periodic Labour Force Survey Annual Report 2025, released in March 2026, reports usual-status female labour force participation for age fifteen and above at 40.0 per cent on a January to December 2025 reference period instead of the earlier July to June cycle, so the reference period and the measure must be stated before the two reports are compared.
11. **A participation rate is not a migration stream:** A labour force participation rate measures aggregate participation in the labour force and does not establish the size, age composition, marital status, destination or cause of the skilled, young and unmarried women's urban migration named in the 2024 demand, so the statistic may supply context but never proof of that stream.
12. **Personal-freedom expansion:** Independent urban income and separate residence can expand a migrant woman's personal freedom through physical mobility, spending autonomy, later marriage and a greater voice in partner selection, and these are the specific freedoms the 2024 demand asks to be traced rather than merely asserted.
13. **Family renegotiation rather than severance:** Family relationships under such migration are typically renegotiated rather than severed, because remittance flows, ritual participation and periodic visits continue even as day-to-day parental oversight weakens, so the pairing of personal-freedom expansion vs family-authority renegotiation is a core requirement of the answer and expanded freedom and a continuing family tie coexist instead of replacing one another.
14. **Freedom and security trade-off:** The same independent migration that expands freedom can thin the family-based support network a woman could otherwise draw upon during workplace harassment or a health emergency far from home, and this is the qualification that keeps a freedom answer from becoming a celebration.
15. **Fast-food paradox:** The fast-food paradox is the coexistence of rising health concern with growing fast-food industries, and this owner explains it through urban time constraints in dual-income households, price and delivery convenience, aspirational branding and glocalised menu adaptation rather than through any denial of health risk.
16. **Bounded rationality as one lens:** Bounded rationality is offered as one behavioural-economics lens on that paradox, showing that convenience, present-oriented food choice and status motives can outweigh long-run health considerations in an actual purchase, and it is a lens rather than proof that one motive dominates every purchase.
17. **Domestic food systems belong in the answer:** An Indian illustration of the paradox must include domestic chains and food-delivery ecosystems alongside global brands, because attributing the entire trend to globalisation alone misreads a market in which local supply and platform logistics carry much of the growth.
18. **Digital-access anchor:** This owner's digital-access anchor is the National Family Health Survey ever-internet-use measure for women aged fifteen to forty-nine, reported at 64.3 per cent in the round six national fact sheets and at 33.3 per cent in the earlier round five comparator, and because the round six results are labelled provisional neither figure may be quoted as a current connectivity estimate.
19. **Digital divide:** The digital divide is unequal access to digital technology and connectivity across income, gender, region and generation, and it is the reason globalisation's connectivity gains reach those already better positioned first, which converts an apparently universal channel into a stratified one.

20. **Verified direct Mains demands and one ownership conflict:** Six General Studies Paper-I demands are routed to this topic across the audited ledgers, four of them from 2018 to 2022 to the Advanced owner and two from 2024 and 2025 to the Basic owner, while the 2025 fast-food demand is routed by the audited 2024-2025 ledger to the Social Change and Modernisation owner even though this owner's own answer-architecture table also claims it, and that conflict is recorded openly rather than resolved by assertion.

Effects of Globalisation on Indian Society: CLOSE-OPTION AND CAUSAL TRAPS

- Do not answer a globalisation question as though consumer culture were its only social effect.
- Do not treat homogenisation and glocalisation as rival theories of which only one can describe India.
- Do not convert a female labour force participation rate into evidence about a specific migration stream.
- Do not compare the two Periodic Labour Force Survey reports without naming their different reference periods.
- Do not present the 2024 migration demand as a choice between personal freedom and family relationship.
- Do not claim that migrant women's family relationships are severed rather than renegotiated.
- Do not celebrate freedom expansion without naming the loss of family-based security that can accompany it.
- Do not explain the fast-food paradox by denying that health concern is real.
- Do not attribute fast-food growth only to global brands while omitting domestic chains and delivery platforms.
- Do not present bounded rationality as proof that convenience outweighs health in every purchase.
- Do not quote a National Family Health Survey internet-use figure as a current connectivity rate.
- Do not treat digital access as a uniform national gain when the digital divide stratifies it.
- Do not restate trade, investment or labour-code mechanics owned by Economy and Social Justice.
- Do not invent a brand, a market share, a consumption figure or a migration statistic.

Effects of Globalisation on Indian Society: ANSWER-WRITING SPINE

DEFINE THE SOCIAL UNIT -> STATE THE BOUNDARY RULE AND WHO IS INCLUDED
-> GROUP NAMED EVIDENCE BY MECHANISM OF REPRODUCTION OR CHANGE
-> TEST COUNTER-CASES, REGIONAL VARIATION AND CATEGORY LIMITS
-> SEPARATE CORRELATION FROM CAUSATION AND LAW FROM SOCIAL ACCEPTANCE
-> CLOSE WITH A GRADED, POLICY-AWARE VERDICT AND A DATA CAVEAT

Effects of Globalisation on Indian Society: CURRENT-LINK AND DATA BOUNDARY

No new live current-affairs item was verified for this topic on 2026-09-02. The package uses only the dated official anchors already carried by the repository owners, each with its issuing body, release date and reference period, namely the Periodic Labour Force Survey Annual Report 2023-24 released on 23 September 2024, the Periodic Labour Force Survey Annual Report 2025 released in March 2026, and the National Family Health Survey ever-internet-use measure with its provisional round six status. No brand, market share, consumption figure, migration statistic or connectivity estimate is invented, and no trade, investment or labour-code claim owned by Economy or Social Justice is asserted here.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Globalisation channels

ENTRY -> consumer markets, urban labour migration, food industry, digital access
SOCIETY LAYER -> identity, household authority, work patterns, information access
EXCLUDED -> trade and investment macroeconomics owned by Economy
EXCLUDED -> labour codes and gig-work law owned by Social Justice
MUST REMEMBER: Globalisation intensifies cross-border flows of capital, goods, services, people, information and culture, producing glocalisation, consumption change, labour-market restructuring, care chains, diaspora networks and uneven bargaining power.

ASCII MASTER FLOW - PANEL 2/12: Consumer culture in two layers

STRUCTURAL -> market access, purchasing capacity, retail expansion, credit
CULTURAL -> status signalling, brand identity, aspiration
ORDER -> the structural layer can precede and outlive the cultural one
USE -> concede consumption precisely, then refuse the exclusivity claim

ASCII MASTER FLOW - PANEL 3/12: Convergence against adaptation

HOMOGENISATION -> predicted convergence of brands, formats and consumption
GLOCALISATION -> observed adaptation of menus, language and platform content
STATUS -> one is a prediction, the other an observation
ERROR -> treating them as rival theories with one winner

ASCII MASTER FLOW - PANEL 4/12: Domain matrix

STRONG CONVERGENCE -> global brand recognition and shared media formats
STRONG ADAPTATION -> regional-language content and locally customised menus
RULE -> both processes run at once in different domains
ANSWER MOVE -> name the domain, do not deliver a single global verdict

ASCII MASTER FLOW - PANEL 5/12: Labour evidence card

PLFS 2023-24 -> released 23 September 2024, female LFPR 41.7 per cent
COMPARATOR -> 37.0 per cent in 2022-23, worker population ratio 40.3 per cent
PLFS 2025 -> released March 2026, usual-status female LFPR 40.0 per cent
CAUTION -> January to December 2025 period replaces the July to June cycle

ASCII MASTER FLOW - PANEL 6/12: Evidence-strength ladder

ESTABLISHES -> aggregate participation in the labour force
SUGGESTS -> the employment context of a migration decision
DOES NOT ESTABLISH -> size, age, marital status, destination or cause
PROHIBITION -> no migration stream may be inferred from a participation rate
CLOSE DISTINCTION: Globalisation is not westernisation, liberalisation is not privatisation, cultural diffusion is not homogenisation, hybridity is not equal exchange, and aggregate growth or connectivity does not establish inclusion, causation or uniform local response.

ASCII MASTER FLOW - PANEL 7/12: Freedom and renegotiation

INCOME AND RESIDENCE -> mobility, spending autonomy, later marriage, partner voice
CONTINUING TIE -> remittance, ritual participation, periodic visits
WEAKENED -> day-to-day parental oversight
VERDICT -> coexistence and renegotiation, never severance

ASCII MASTER FLOW - PANEL 8/12: Freedom and security trade-off

GAIN -> independent decision-making away from household supervision
COST -> thinner family support during harassment or health emergency
IMPLICATION -> workplace and housing safety become the binding constraint
ANSWER USE -> qualify the freedom claim instead of celebrating it

ASCII MASTER FLOW - PANEL 9/12: Fast-food paradox drivers

TIME -> dual-income urban households face real constraints on home cooking
PRICE AND DELIVERY -> platform logistics lower the cost of convenience
ASPIRATION -> branded consumption signals urban modern identity
ADAPTATION -> locally customised menus widen the addressable market

ASCII MASTER FLOW - PANEL 10/12: Behavioural lens card

CLASSICAL PREDICTION -> rising health awareness reduces consumption
OBSERVED -> awareness and industry growth coexist
LENS -> bounded rationality weighs convenience and status against long-run health
LIMIT -> a lens, not proof that one motive dominates every purchase

ASCII MASTER FLOW - PANEL 11/12: Digital access ladder

ROUND SIX FACT SHEETS -> ever-internet use 64.3 per cent, women aged 15 to 49
ROUND FIVE COMPARATOR -> 33.3 per cent for the same measure
STATUS -> round six results are labelled provisional
DIVIDE -> access is unequal by income, gender, region and generation

ASCII MASTER FLOW - PANEL 12/12: Globalisation answer spine

OPEN -> name the channels, refuse the single-force framing
BODY -> concede consumption, then add labour, family and digital channels
TEST -> convergence against adaptation, domain by domain
CLOSE -> graded verdict with the statistic and status caveats
EVIDENCE LIMIT: Use IT-Bengaluru, garment clusters, Kerala-Gulf migration, platform work, food/media hybridity and farmer/artisan value chains with sector and region qualifications; distinguish policy chronology, firm strategy, technology and household agency.
