

Arithmetic-and-Commercial-Math — ASCII Master

PANEL 01 – RATIO LANGUAGE Convert comparisons into common units and scalable parts.
↓
PANEL 02 – PROPORTION AND VARIATION Distinguish direct from inverse change.
↓
PANEL 03 – PERCENT FOUNDATION Percent means per hundred; identify the base before operating.
↓
PANEL 04 – SUCCESSIVE CHANGE Multiply factors; do not add percentages blindly.
↓
PANEL 05 – AVERAGE Use total divided by count and preserve group weights.
↓
PANEL 06 – PROFIT, LOSS AND DISCOUNT Keep CP, SP and MP bases distinct.
↓
PANEL 07 – INTEREST Derive SI from principal-rate-time and CI from repeated growth.
↓
PANEL 08 – MIXTURES Use conservation of quantity or alligation with validity checks.
↓
PANEL 09 – PARTNERSHIP Profit share follows capital multiplied by time.
↓
PANEL 10 – AGES Translate one timeline consistently.
↓
PANEL 11 – ESTIMATION AND OPTIONS Use smart numbers only when ratios remain invariant.
↓
PANEL 12 – VERIFICATION Reverse the change, recompute totals and inspect the percentage base.
