

Logical Reasoning Coding Counting and DI — ASCII Master

PANEL 01 – LOGIC VOCABULARY Separate implication, converse, contrapositive and equivalence.
 v
PANEL 02 – PATTERNS AND SERIES Test the simplest stable rule and verify every term.
 v
PANEL 03 – CODING-DECODING Infer a rule from all examples, not one coincidence.
 v
PANEL 04 – DIRECTIONS Use coordinates and final displacement.
 v
PANEL 05 – RELATIONS Build a labelled family graph without assuming gender or generation.
 v
PANEL 06 – SYLLOGISMS Use set containment and test existential claims carefully.
 v
PANEL 07 – ARRANGEMENTS Place fixed constraints before flexible ones.
 v
PANEL 08 – COUNTING Apply product, sum, permutation and combination rules with exclusions.
 v
PANEL 09 – PROBABILITY Define equally likely outcomes and conditional sample spaces.
 v
PANEL 10 – DATA INTERPRETATION Read labels, units, bases and totals before calculating.
 v
PANEL 11 – DECISION SCENARIOS Separate facts, constraints, objectives and feasible options.
 v
PANEL 12 – VERIFICATION Enumerate small cases, reverse codes and sanity-check totals.
