

ASCII MASTER FLOW – PANEL 1/12: Climate risk equation

CLIMATE HAZARD / TREND

+ EXPOSURE + VULNERABILITY - CAPACITY

-> DISASTER RISK

HAZARD SIGNAL ALONE DOES NOT FIX LOSS

ASCII MASTER FLOW – PANEL 2/12: Attribution firewall

VARIABILITY -> FLUCTUATION

ANTHROPOGENIC CHANGE -> LONG-TERM HUMAN-INFLUENCED SHIFT

EVENT ATTRIBUTION -> CHANGED LIKELIHOOD / INTENSITY?

LOSS ATTRIBUTION -> WHY DID HARM OCCUR?

ASCII MASTER FLOW – PANEL 3/12: Three-policy map

MITIGATION -> REDUCE FUTURE CLIMATE CHANGE

ADAPTATION -> ADJUST TO IMPACTS

DRR -> MANAGE EXISTING / PROSPECTIVE DISASTER RISK

OVERLAP EXISTS; PURPOSES REMAIN DISTINCT

ASCII MASTER FLOW – PANEL 4/12: Adaptation pathway

INCREMENTAL ADJUSTMENT

- > MONITOR THRESHOLDS AND DISTRIBUTION
- > TRANSFORMATION IF ACCEPTABLE RISK CANNOT BE MAINTAINED
- > AVOID MALADAPTIVE LOCK-IN

ASCII MASTER FLOW – PANEL 5/12: Residual risk and limits

RISK AFTER FEASIBLE ACTION -> RESIDUAL RISK

BARRIER REMOVABLE? -> SOFT LIMIT

NO ADAPTATION OPTION IN SYSTEM? -> HARD LIMIT

PREPARE PROTECT FINANCE AND ADDRESS REMAINING HARM

ASCII MASTER FLOW – PANEL 6/12: Avoid minimise address

1 AVERT -> MITIGATION / RISK AVOIDANCE

2 MINIMISE -> ADAPTATION / DRR

3 ADDRESS -> REALISED OR RESIDUAL IMPACT

LOSS AND DAMAGE IS NOT EVERY DISASTER PAYMENT

ASCII MASTER FLOW – PANEL 7/12: Loss taxonomy

ECONOMIC -> ASSETS OUTPUT INCOME; MONETARY METHOD

NON-ECONOMIC -> LIFE HEALTH CULTURE IDENTITY ECOSYSTEMS

BOTH -> DISTRIBUTION AND BASELINE MATTER

DO NOT FORCE NON-MARKET HARM INTO ONE PRICE

ASCII MASTER FLOW – PANEL 8/12: UNFCCC status ladder

WIM -> KNOWLEDGE COORDINATION ACTION / SUPPORT

SANTIAGO NETWORK -> TECHNICAL-ASSISTANCE LAYER

FUND -> DATED GOVERNANCE / ACCESS / OPERATIONAL STATUS ONLY

DECISION != ACCESS != DISBURSEMENT != OUTCOME

ASCII MASTER FLOW – PANEL 9/12: Climate-service chain

OBSERVE / MONITOR / FORECAST / PROJECT
CO-DESIGN FOR USER DECISION
COMMUNICATE UNCERTAINTY AND ACTION WINDOW
USE + FEEDBACK + EVALUATE DECISION OUTCOME

ASCII MASTER FLOW – PANEL 10/12: Locally led test

LOCAL PRIORITIES AND DECISION POWER

PREDICTABLE ACCESSIBLE RESOURCES

LOCAL + TECHNICAL KNOWLEDGE

INCLUSION GRIEVANCE LEARNING AND ACCOUNTABILITY

MUST REMEMBER: Climate adaptation and DRR overlap where climate-sensitive hazards,...

MUST REMEMBER: Climate adaptation and DRR overlap where climate-sensitive hazards,...

ASCII MASTER FLOW – PANEL 11/12: Justice and mobility

UNEQUAL EXPOSURE / CAPACITY -> UNEQUAL HARM

TEMPORARY / PROLONGED / INTERNAL / CROSS-BORDER MOVEMENT

NON-AUTOMATIC REFUGEE STATUS

PROTECTION LIVELIHOOD CULTURE AND DURABLE CHOICES

CLOSE DISTINCTION: Climate hazard is not disaster impact; adaptation is not synonymous...

CLOSE DISTINCTION: Climate hazard is not disaster impact; adaptation is not synonymous...

ASCII MASTER FLOW – PANEL 12/12: Climate-risk answer spine

DEFINE RISK -> FIX ATTRIBUTION BOUNDARY

DISTINGUISH MITIGATION ADAPTATION DRR AND ADAPTATION PATHWAYS

TRACE RESIDUAL RISK -> LOSS AND DAMAGE -> JUSTICE

ADD CLIMATE SERVICES LOCAL LEADERSHIP + VERIFIED STATUS / OUTCOME

EVIDENCE LIMIT: MECHANISM / STATUS / CAUSATION: Attribute framework, fund or policy...

EVIDENCE LIMIT: MECHANISM / STATUS / CAUSATION: Attribute framework, fund or policy...
