

SOLVED PRACTICE WORKBOOK

Brainstorming and Dimensional Expansion - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Brainstorming and Dimensional Expansion - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which option applies Purpose and scope as an Essay-method distinction?	6
Q2. Which use of Purpose and scope stays closest to the printed prompt?	6
Q3. Which statement preserves the strategy-versus-official-rule boundary for Purpose and scope?	6
Q4. Which option avoids the standard Essay-method trap about Purpose and scope?	6
Q5. Which option applies Exam facts / source basis as an Essay-method distinction?	7
Q6. Which use of Exam facts / source basis stays closest to the printed prompt?	7
Q7. Which statement preserves the strategy-versus-official-rule boundary for Exam facts / source basis?	7
Q8. Which option avoids the standard Essay-method trap about Exam facts / source basis?	7
Q9. Which option applies The central idea and common misreading as an Essay-method distinction?	7
Q10. Which use of The central idea and common misreading stays closest to the printed prompt?	8
Q11. Which statement preserves the strategy-versus-official-rule boundary for The central idea and common misreading?	8
Q12. Which option avoids the standard Essay-method trap about The central idea and common misreading?	8
Q13. Which option applies Basic decomposition questions as an Essay-method distinction?	9
Q14. Which use of Basic decomposition questions stays closest to the printed prompt?	9
Q15. Which statement preserves the strategy-versus-official-rule boundary for Basic decomposition questions?	9
Q16. Which option avoids the standard Essay-method trap about Basic decomposition questions?	10
Q17. Which option applies Keep filter: coherence, evidence and limitation as an Essay-method distinction?	10
Q18. Which use of Keep filter: coherence, evidence and limitation stays closest to the printed prompt?	10
Q19. Which statement preserves the strategy-versus-official-rule boundary for Keep filter: coherence, evidence and limitation?	11
Q20. Which option avoids the standard Essay-method trap about Keep filter: coherence, evidence and limitation?	11
Q21. Which option applies Keep filter: coherence, evidence and limitation - 2 as an Essay-method distinction?	11
Q22. Which use of Keep filter: coherence, evidence and limitation - 2 stays closest to the printed prompt?	11
Q23. Which statement preserves the strategy-versus-official-rule boundary for Keep filter: coherence, evidence and limitation - 2?	12
Q24. Which option avoids the standard Essay-method trap about Keep filter: coherence, evidence and limitation - 2?	12
Q25. Which option applies India-first illustration starters as an Essay-method distinction?	12
Q26. Which use of India-first illustration starters stays closest to the printed prompt?	12

Q27. Which statement preserves the strategy-versus-official-rule boundary for India-first illustration starters?	13
Q28. Which option avoids the standard Essay-method trap about India-first illustration starters?	13
Q29. Which option applies Thesis options and selection as an Essay-method distinction?	13
Q30. Which use of Thesis options and selection stays closest to the printed prompt?	13
Q31. Which statement preserves the strategy-versus-official-rule boundary for Thesis options and selection?	14
Q32. Which option avoids the standard Essay-method trap about Thesis options and selection?	14
Q33. Which option applies Simple essay architecture as an Essay-method distinction?	14
Q34. Which use of Simple essay architecture stays closest to the printed prompt?	14
Q35. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture?	15
Q36. Which option avoids the standard Essay-method trap about Simple essay architecture?	15
Q37. Which option applies Opening, body and closure moves as an Essay-method distinction?	15
Q38. Which use of Opening, body and closure moves stays closest to the printed prompt?	15
Q39. Which statement preserves the strategy-versus-official-rule boundary for Opening, body and closure moves?	16
Q40. Which option avoids the standard Essay-method trap about Opening, body and closure moves?	16
Q41. Which option applies Traps and repair moves as an Essay-method distinction?	16
Q42. Which use of Traps and repair moves stays closest to the printed prompt?	16
Q43. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves?	17
Q44. Which option avoids the standard Essay-method trap about Traps and repair moves?	17
Q45. Which option applies Traps and repair moves - 2 as an Essay-method distinction?	17
Q46. Which use of Traps and repair moves - 2 stays closest to the printed prompt?	17
Q47. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves - 2?	17
Q48. Which option avoids the standard Essay-method trap about Traps and repair moves - 2?	18
Q49. Which option applies Traps and repair moves - 3 as an Essay-method distinction?	18
Q50. Which use of Traps and repair moves - 3 stays closest to the printed prompt?	18
Q51. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves - 3?	18
Q52. Which option avoids the standard Essay-method trap about Traps and repair moves - 3?	18
Q53. Which option applies Timed micro-drill and self-check as an Essay-method distinction?	19
Q54. Which use of Timed micro-drill and self-check stays closest to the printed prompt?	19
Q55. Which statement preserves the strategy-versus-official-rule boundary for Timed micro-drill and self-check?	19
Q56. Which option avoids the standard Essay-method trap about Timed micro-drill and self-check?	19
Q57. Which option applies Advanced proposition and boundary as an Essay-method distinction?	20
Q58. Which use of Advanced proposition and boundary stays closest to the printed prompt?	20

Q59. Which statement preserves the strategy-versus-official-rule boundary for Advanced proposition and boundary?	20
Q60. Which option avoids the standard Essay-method trap about Advanced proposition and boundary?	21
Q61. Which option applies Concept definition and taxonomy as an Essay-method distinction?	21
Q62. Which use of Concept definition and taxonomy stays closest to the printed prompt?	21
Q63. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy?	21
Q64. Which option avoids the standard Essay-method trap about Concept definition and taxonomy?	22
Q65. Which option applies Tension pairs and hidden assumptions as an Essay-method distinction?	22
Q66. Which use of Tension pairs and hidden assumptions stays closest to the printed prompt?	22
Q67. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions?	22
Q68. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions?	22
Q69. Which option applies Tension pairs and hidden assumptions - 2 as an Essay-method distinction?	23
Q70. Which use of Tension pairs and hidden assumptions - 2 stays closest to the printed prompt?	23
Q71. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions - 2?	23
Q72. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions - 2?	24
Q73. Which option applies Tension pairs and hidden assumptions - 3 as an Essay-method distinction?	24
Q74. Which use of Tension pairs and hidden assumptions - 3 stays closest to the printed prompt?	24
Q75. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions - 3?	25
Q76. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions - 3?	25
Q77. Which option applies Levels of analysis and temporal-spatial scale as an Essay-method distinction?	25
Q78. Which use of Levels of analysis and temporal-spatial scale stays closest to the printed prompt?	25
Q79. Which statement preserves the strategy-versus-official-rule boundary for Levels of analysis and temporal-spatial scale?	26
Q80. Which option avoids the standard Essay-method trap about Levels of analysis and temporal-spatial scale?	26

Brainstorming and Dimensional Expansion - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which option applies Purpose and scope as an Essay-method distinction?

A. Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. B. Replace Purpose and scope with a familiar adjacent GS topic and maximise factual coverage. C. Treat Purpose and scope as a compulsory UPSC formula even when it distorts the prompt. D. Use Purpose and scope to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q2. Which use of Purpose and scope stays closest to the printed prompt?

A. Use Purpose and scope while dropping the prompt's operator, qualifier or scale. B. Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. C. Apply Purpose and scope only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Purpose and scope regardless of thesis fit.

Answer: B. Explanation: Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q3. Which statement preserves the strategy-versus-official-rule boundary for Purpose and scope?

A. Support Purpose and scope with an unverified statistic, attribution or current claim. B. Use Purpose and scope to avoid stating a serious counter-case or qualification. C. Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. D. Present Purpose and scope as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q4. Which option avoids the standard Essay-method trap about Purpose and scope?

A. Allow an exception discovered through Purpose and scope to replace the central proposition. B. Maximise the number of outputs produced by Purpose and scope, even if they repeat one claim. C. Silently tidy the printed prompt before applying Purpose and scope to make it easier to answer. D. Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise.

Answer: D. Explanation: Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself

(05) - it supplies the raw dimensional material the thesis will select from and organise. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q5. Which option applies Exam facts / source basis as an Essay-method distinction?

A. should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. B. Use Exam facts / source basis to add more headings or dimensions without testing coherence. C. Replace Exam facts / source basis with a familiar adjacent GS topic and maximise factual coverage. D. Treat Exam facts / source basis as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q6. Which use of Exam facts / source basis stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Exam facts / source basis regardless of thesis fit. B. should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. C. Apply Exam facts / source basis only after drafting, when topic drift can no longer be prevented. D. Use Exam facts / source basis while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q7. Which statement preserves the strategy-versus-official-rule boundary for Exam facts / source basis?

A. Present Exam facts / source basis as an official marking rule rather than a pedagogical scaffold. B. Use Exam facts / source basis to avoid stating a serious counter-case or qualification. C. should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. D. Support Exam facts / source basis with an unverified statistic, attribution or current claim.

Answer: C. Explanation: should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q8. Which option avoids the standard Essay-method trap about Exam facts / source basis?

A. Maximise the number of outputs produced by Exam facts / source basis, even if they repeat one claim. B. Silently tidy the printed prompt before applying Exam facts / source basis to make it easier to answer. C. Allow an exception discovered through Exam facts / source basis to replace the central proposition. D. should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement.

Answer: D. Explanation: should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q9. Which option applies The central idea and common misreading as an Essay-method distinction?

A. Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. B. Treat The central idea and common misreading as a compulsory UPSC formula even when it distorts the prompt. C. Use The central idea and common misreading to add more headings or dimensions without testing coherence. D. Replace The central idea and common misreading with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q10. Which use of The central idea and common misreading stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine The central idea and common misreading regardless of thesis fit. B. Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. C. Use The central idea and common misreading while dropping the prompt's operator, qualifier or scale. D. Apply The central idea and common misreading only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q11. Which statement preserves the strategy-versus-official-rule boundary for The central idea and common misreading?

A. Present The central idea and common misreading as an official marking rule rather than a pedagogical scaffold. B. Use The central idea and common misreading to avoid stating a serious counter-case or qualification. C. Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. D. Support The central idea and common misreading with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q12. Which option avoids the standard Essay-method trap about The central idea and common misreading?

A. Silently tidy the printed prompt before applying The central idea and common misreading to make it easier to answer. B. Maximise the number of outputs produced by The central idea and common misreading, even if they repeat one claim. C. Allow an exception discovered through The central idea and common misreading to replace the central proposition. D. Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary.

Answer: D. Explanation: Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without

Q13. Which option applies Basic decomposition questions as an Essay-method distinction?

A. 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? B. Replace Basic decomposition questions with a familiar adjacent GS topic and maximise factual coverage. C. Use Basic decomposition questions to add more headings or dimensions without testing coherence. D. Treat Basic decomposition questions as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q14. Which use of Basic decomposition questions stays closest to the printed prompt?

A. Use Basic decomposition questions while dropping the prompt's operator, qualifier or scale. B. 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? C. Apply Basic decomposition questions only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Basic decomposition questions regardless of thesis fit.

Answer: B. Explanation: 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q15. Which statement preserves the strategy-versus-official-rule boundary for Basic decomposition questions?

A. Present Basic decomposition questions as an official marking rule rather than a pedagogical scaffold. B. Support Basic decomposition questions with an unverified statistic, attribution or current claim. C. 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? D. Use Basic decomposition questions to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? The other options convert a qualified writing method into an official formula, permit topic drift, or reward

quantity without coherence and evidence safety.

Q16. Which option avoids the standard Essay-method trap about Basic decomposition questions?

A. Maximise the number of outputs produced by Basic decomposition questions, even if they repeat one claim. B. Silently tidy the printed prompt before applying Basic decomposition questions to make it easier to answer. C. Allow an exception discovered through Basic decomposition questions to replace the central proposition. D. 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)?

Answer: D. Explanation: 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q17. Which option applies Keep filter: coherence, evidence and limitation as an Essay-method distinction?

A. distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward B. Treat Keep filter: coherence, evidence and limitation as a compulsory UPSC formula even when it distorts the prompt. C. Replace Keep filter: coherence, evidence and limitation with a familiar adjacent GS topic and maximise factual coverage. D. Use Keep filter: coherence, evidence and limitation to add more headings or dimensions without testing coherence.

Answer: A. Explanation: distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q18. Which use of Keep filter: coherence, evidence and limitation stays closest to the printed prompt?

A. Apply Keep filter: coherence, evidence and limitation only after drafting, when topic drift can no longer be prevented. B. distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward C. Let a striking anecdote or quotation determine Keep filter: coherence, evidence and limitation regardless of thesis fit. D. Use Keep filter: coherence, evidence and limitation while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q19. Which statement preserves the strategy-versus-official-rule boundary for Keep filter: coherence, evidence and limitation?

A. Use Keep filter: coherence, evidence and limitation to avoid stating a serious counter-case or qualification. B. Present Keep filter: coherence, evidence and limitation as an official marking rule rather than a pedagogical scaffold. C. distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward D. Support Keep filter: coherence, evidence and limitation with an unverified statistic, attribution or current claim.

Answer: C. Explanation: distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q20. Which option avoids the standard Essay-method trap about Keep filter: coherence, evidence and limitation?

A. Maximise the number of outputs produced by Keep filter: coherence, evidence and limitation, even if they repeat one claim. B. Silently tidy the printed prompt before applying Keep filter: coherence, evidence and limitation to make it easier to answer. C. Allow an exception discovered through Keep filter: coherence, evidence and limitation to replace the central proposition. D. distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward

Answer: D. Explanation: distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q21. Which option applies Keep filter: coherence, evidence and limitation - 2 as an Essay-method distinction?

A. Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. B. Use Keep filter: coherence, evidence and limitation - 2 to add more headings or dimensions without testing coherence. C. Replace Keep filter: coherence, evidence and limitation - 2 with a familiar adjacent GS topic and maximise factual coverage. D. Treat Keep filter: coherence, evidence and limitation - 2 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q22. Which use of Keep filter: coherence, evidence and limitation - 2 stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Keep filter: coherence, evidence and limitation - 2 regardless of thesis fit. B. Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. C. Apply Keep filter: coherence, evidence and limitation - 2 only after drafting, when topic drift can no longer be prevented. D. Use Keep filter: coherence, evidence and limitation - 2 while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q23. Which statement preserves the strategy-versus-official-rule boundary for Keep filter: coherence, evidence and limitation - 2?

A. Support Keep filter: coherence, evidence and limitation - 2 with an unverified statistic, attribution or current claim. B. Use Keep filter: coherence, evidence and limitation - 2 to avoid stating a serious counter-case or qualification. C. Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. D. Present Keep filter: coherence, evidence and limitation - 2 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q24. Which option avoids the standard Essay-method trap about Keep filter: coherence, evidence and limitation - 2?

A. Silently tidy the printed prompt before applying Keep filter: coherence, evidence and limitation - 2 to make it easier to answer. B. Allow an exception discovered through Keep filter: coherence, evidence and limitation - 2 to replace the central proposition. C. Maximise the number of outputs produced by Keep filter: coherence, evidence and limitation - 2, even if they repeat one claim. D. Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay.

Answer: D. Explanation: Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q25. Which option applies India-first illustration starters as an Essay-method distinction?

A. For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. B. Use India-first illustration starters to add more headings or dimensions without testing coherence. C. Treat India-first illustration starters as a compulsory UPSC formula even when it distorts the prompt. D. Replace India-first illustration starters with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q26. Which use of India-first illustration starters stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine India-first illustration starters regardless of thesis fit. B. For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. C. Apply India-first illustration starters only after drafting, when topic drift can no longer be prevented. D. Use India-first illustration starters while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q27. Which statement preserves the strategy-versus-official-rule boundary for India-first illustration starters?

A. Use India-first illustration starters to avoid stating a serious counter-case or qualification. B. Present India-first illustration starters as an official marking rule rather than a pedagogical scaffold. C. For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. D. Support India-first illustration starters with an unverified statistic, attribution or current claim.

Answer: C. Explanation: For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q28. Which option avoids the standard Essay-method trap about India-first illustration starters?

A. Maximise the number of outputs produced by India-first illustration starters, even if they repeat one claim. B. Allow an exception discovered through India-first illustration starters to replace the central proposition. C. Silently tidy the printed prompt before applying India-first illustration starters to make it easier to answer. D. For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12.

Answer: D. Explanation: For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q29. Which option applies Thesis options and selection as an Essay-method distinction?

A. Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. B. Treat Thesis options and selection as a compulsory UPSC formula even when it distorts the prompt. C. Replace Thesis options and selection with a familiar adjacent GS topic and maximise factual coverage. D. Use Thesis options and selection to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q30. Which use of Thesis options and selection stays closest to the printed prompt?

A. Apply Thesis options and selection only after drafting, when topic drift can no longer be prevented. B. Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. C. Let a striking anecdote or quotation determine Thesis options and selection regardless of thesis fit. D. Use Thesis options and selection while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q31. Which statement preserves the strategy-versus-official-rule boundary for Thesis options and selection?

A. Support Thesis options and selection with an unverified statistic, attribution or current claim. B. Use Thesis options and selection to avoid stating a serious counter-case or qualification. C. Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. D. Present Thesis options and selection as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q32. Which option avoids the standard Essay-method trap about Thesis options and selection?

A. Maximise the number of outputs produced by Thesis options and selection, even if they repeat one claim. B. Silently tidy the printed prompt before applying Thesis options and selection to make it easier to answer. C. Allow an exception discovered through Thesis options and selection to replace the central proposition. D. Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05.

Answer: D. Explanation: Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q33. Which option applies Simple essay architecture as an Essay-method distinction?

A. Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. B. Treat Simple essay architecture as a compulsory UPSC formula even when it distorts the prompt. C. Use Simple essay architecture to add more headings or dimensions without testing coherence. D. Replace Simple essay architecture with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q34. Which use of Simple essay architecture stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Simple essay architecture regardless of thesis fit. B. Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. C. Use Simple essay architecture while dropping the prompt's operator, qualifier or scale. D. Apply Simple essay architecture only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q35. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture?

A. Use Simple essay architecture to avoid stating a serious counter-case or qualification. B. Support Simple essay architecture with an unverified statistic, attribution or current claim. C. Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. D. Present Simple essay architecture as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q36. Which option avoids the standard Essay-method trap about Simple essay architecture?

A. Silently tidy the printed prompt before applying Simple essay architecture to make it easier to answer. B. Maximise the number of outputs produced by Simple essay architecture, even if they repeat one claim. C. Allow an exception discovered through Simple essay architecture to replace the central proposition. D. Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07.

Answer: D. Explanation: Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q37. Which option applies Opening, body and closure moves as an Essay-method distinction?

A. The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. B. Treat Opening, body and closure moves as a compulsory UPSC formula even when it distorts the prompt. C. Use Opening, body and closure moves to add more headings or dimensions without testing coherence. D. Replace Opening, body and closure moves with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q38. Which use of Opening, body and closure moves stays closest to the printed prompt?

A. Apply Opening, body and closure moves only after drafting, when topic drift can no longer be prevented. B. The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. C. Let a striking anecdote or quotation determine Opening, body and closure moves regardless of thesis fit. D. Use Opening, body and closure moves while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q39. Which statement preserves the strategy-versus-official-rule boundary for Opening, body and closure moves?

A. Support Opening, body and closure moves with an unverified statistic, attribution or current claim. B. Use Opening, body and closure moves to avoid stating a serious counter-case or qualification. C. The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. D. Present Opening, body and closure moves as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q40. Which option avoids the standard Essay-method trap about Opening, body and closure moves?

A. Allow an exception discovered through Opening, body and closure moves to replace the central proposition. B. Silently tidy the printed prompt before applying Opening, body and closure moves to make it easier to answer. C. Maximise the number of outputs produced by Opening, body and closure moves, even if they repeat one claim. D. The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06.

Answer: D. Explanation: The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q41. Which option applies Traps and repair moves as an Essay-method distinction?

A. "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). B. Use Traps and repair moves to add more headings or dimensions without testing coherence. C. Replace Traps and repair moves with a familiar adjacent GS topic and maximise factual coverage. D. Treat Traps and repair moves as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q42. Which use of Traps and repair moves stays closest to the printed prompt?

A. Apply Traps and repair moves only after drafting, when topic drift can no longer be prevented. B. "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). C. Use Traps and repair moves while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Traps and repair moves regardless of thesis fit.

Answer: B. Explanation: "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q43. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves?

A. Present Traps and repair moves as an official marking rule rather than a pedagogical scaffold. B. Use Traps and repair moves to avoid stating a serious counter-case or qualification. C. "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). D. Support Traps and repair moves with an unverified statistic, attribution or current claim.

Answer: C. Explanation: "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q44. Which option avoids the standard Essay-method trap about Traps and repair moves?

A. Maximise the number of outputs produced by Traps and repair moves, even if they repeat one claim. B. Allow an exception discovered through Traps and repair moves to replace the central proposition. C. Silently tidy the printed prompt before applying Traps and repair moves to make it easier to answer. D. "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4).

Answer: D. Explanation: "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q45. Which option applies Traps and repair moves - 2 as an Essay-method distinction?

A. same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. B. Replace Traps and repair moves - 2 with a familiar adjacent GS topic and maximise factual coverage. C. Treat Traps and repair moves - 2 as a compulsory UPSC formula even when it distorts the prompt. D. Use Traps and repair moves - 2 to add more headings or dimensions without testing coherence.

Answer: A. Explanation: same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q46. Which use of Traps and repair moves - 2 stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Traps and repair moves - 2 regardless of thesis fit. B. same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. C. Use Traps and repair moves - 2 while dropping the prompt's operator, qualifier or scale. D. Apply Traps and repair moves - 2 only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q47. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves - 2?

A. Present Traps and repair moves - 2 as an official marking rule rather than a pedagogical scaffold. B. Use Traps and repair moves - 2 to avoid stating a serious counter-case or qualification. C. same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. D. Support Traps and repair moves - 2 with an unverified statistic, attribution or current claim.

Answer: C. Explanation: same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q48. Which option avoids the standard Essay-method trap about Traps and repair moves - 2?

A. Allow an exception discovered through Traps and repair moves - 2 to replace the central proposition. B. Maximise the number of outputs produced by Traps and repair moves - 2, even if they repeat one claim. C. Silently tidy the printed prompt before applying Traps and repair moves - 2 to make it easier to answer. D. same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate.

Answer: D. Explanation: same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q49. Which option applies Traps and repair moves - 3 as an Essay-method distinction?

A. or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. B. Treat Traps and repair moves - 3 as a compulsory UPSC formula even when it distorts the prompt. C. Replace Traps and repair moves - 3 with a familiar adjacent GS topic and maximise factual coverage. D. Use Traps and repair moves - 3 to add more headings or dimensions without testing coherence.

Answer: A. Explanation: or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q50. Which use of Traps and repair moves - 3 stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Traps and repair moves - 3 regardless of thesis fit. B. or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. C. Use Traps and repair moves - 3 while dropping the prompt's operator, qualifier or scale. D. Apply Traps and repair moves - 3 only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q51. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves - 3?

A. Present Traps and repair moves - 3 as an official marking rule rather than a pedagogical scaffold. B. Support Traps and repair moves - 3 with an unverified statistic, attribution or current claim. C. or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. D. Use Traps and repair moves - 3 to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q52. Which option avoids the standard Essay-method trap about Traps and repair moves - 3?

A. Allow an exception discovered through Traps and repair moves - 3 to replace the central proposition. B. Maximise the number of outputs produced by Traps and repair moves - 3, even if they repeat one claim. C. Silently tidy the printed prompt before applying Traps and repair moves - 3 to make it easier to answer. D. or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration.

Answer: D. Explanation: or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q53. Which option applies Timed micro-drill and self-check as an Essay-method distinction?

A. 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. B. Treat Timed micro-drill and self-check as a compulsory UPSC formula even when it distorts the prompt. C. Replace Timed micro-drill and self-check with a familiar adjacent GS topic and maximise factual coverage. D. Use Timed micro-drill and self-check to add more headings or dimensions without testing coherence.

Answer: A. Explanation: 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q54. Which use of Timed micro-drill and self-check stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Timed micro-drill and self-check regardless of thesis fit. B. 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. C. Use Timed micro-drill and self-check while dropping the prompt's operator, qualifier or scale. D. Apply Timed micro-drill and self-check only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q55. Which statement preserves the strategy-versus-official-rule boundary for Timed micro-drill and self-check?

A. Present Timed micro-drill and self-check as an official marking rule rather than a pedagogical scaffold. B. Use Timed micro-drill and self-check to avoid stating a serious counter-case or qualification. C. 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. D. Support Timed micro-drill and self-check with an unverified statistic, attribution or current claim.

Answer: C. Explanation: 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q56. Which option avoids the standard Essay-method trap about Timed micro-drill and self-check?

A. Allow an exception discovered through Timed micro-drill and self-check to replace the central proposition. B. Maximise the number of outputs produced by Timed micro-drill and self-check, even if they repeat one claim. C. Silently tidy the printed prompt before applying Timed micro-drill and self-check to make it easier to answer. D. 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones.

Answer: D. Explanation: 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q57. Which option applies Advanced proposition and boundary as an Essay-method distinction?

A. Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. B. Treat Advanced proposition and boundary as a compulsory UPSC formula even when it distorts the prompt. C. Replace Advanced proposition and boundary with a familiar adjacent GS topic and maximise factual coverage. D. Use Advanced proposition and boundary to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q58. Which use of Advanced proposition and boundary stays closest to the printed prompt?

A. Apply Advanced proposition and boundary only after drafting, when topic drift can no longer be prevented. B. Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. C. Let a striking anecdote or quotation determine Advanced proposition and boundary regardless of thesis fit. D. Use Advanced proposition and boundary while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q59. Which statement preserves the strategy-versus-official-rule boundary for Advanced proposition and boundary?

A. Use Advanced proposition and boundary to avoid stating a serious counter-case or qualification. B. Present Advanced proposition and boundary as an official marking rule rather than a pedagogical scaffold. C. Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. D. Support Advanced proposition and boundary with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q60. Which option avoids the standard Essay-method trap about Advanced proposition and boundary?

A. Allow an exception discovered through Advanced proposition and boundary to replace the central proposition. B. Silently tidy the printed prompt before applying Advanced proposition and boundary to make it easier to answer. C. Maximise the number of outputs produced by Advanced proposition and boundary, even if they repeat one claim. D. Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method.

Answer: D. Explanation: Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q61. Which option applies Concept definition and taxonomy as an Essay-method distinction?

A. different vocabulary (e.g. "social" and "community" angles that actually make the same point). B. Replace Concept definition and taxonomy with a familiar adjacent GS topic and maximise factual coverage. C. Treat Concept definition and taxonomy as a compulsory UPSC formula even when it distorts the prompt. D. Use Concept definition and taxonomy to add more headings or dimensions without testing coherence.

Answer: A. Explanation: different vocabulary (e.g. "social" and "community" angles that actually make the same point). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q62. Which use of Concept definition and taxonomy stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Concept definition and taxonomy regardless of thesis fit. B. different vocabulary (e.g. "social" and "community" angles that actually make the same point). C. Apply Concept definition and taxonomy only after drafting, when topic drift can no longer be prevented. D. Use Concept definition and taxonomy while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: different vocabulary (e.g. "social" and "community" angles that actually make the same point). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q63. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy?

A. Use Concept definition and taxonomy to avoid stating a serious counter-case or qualification. B. Support Concept definition and taxonomy with an unverified statistic, attribution or current claim. C. different vocabulary (e.g. "social" and "community" angles that actually make the same point). D. Present Concept definition and taxonomy as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: different vocabulary (e.g. "social" and "community" angles that actually make the same point). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q64. Which option avoids the standard Essay-method trap about Concept definition and taxonomy?

A. Silently tidy the printed prompt before applying Concept definition and taxonomy to make it easier to answer. B. Allow an exception discovered through Concept definition and taxonomy to replace the central proposition. C. Maximise the number of outputs produced by Concept definition and taxonomy, even if they repeat one claim. D. different vocabulary (e.g. "social" and "community" angles that actually make the same point).

Answer: D. Explanation: different vocabulary (e.g. "social" and "community" angles that actually make the same point). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q65. Which option applies Tension pairs and hidden assumptions as an Essay-method distinction?

A. signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. B. Treat Tension pairs and hidden assumptions as a compulsory UPSC formula even when it distorts the prompt. C. Use Tension pairs and hidden assumptions to add more headings or dimensions without testing coherence. D. Replace Tension pairs and hidden assumptions with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q66. Which use of Tension pairs and hidden assumptions stays closest to the printed prompt?

A. Apply Tension pairs and hidden assumptions only after drafting, when topic drift can no longer be prevented. B. signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. C. Let a striking anecdote or quotation determine Tension pairs and hidden assumptions regardless of thesis fit. D. Use Tension pairs and hidden assumptions while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q67. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions?

A. Present Tension pairs and hidden assumptions as an official marking rule rather than a pedagogical scaffold. B. Support Tension pairs and hidden assumptions with an unverified statistic, attribution or current claim. C. signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. D. Use Tension pairs and hidden assumptions to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q68. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions?

A. Maximise the number of outputs produced by Tension pairs and hidden assumptions, even if they repeat one claim. B. Allow an exception discovered through Tension pairs and hidden assumptions to replace the central proposition. C. Silently tidy the printed prompt before applying Tension pairs and hidden assumptions to make it easier to answer. D. signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones.

Answer: D. Explanation: signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q69. Which option applies Tension pairs and hidden assumptions - 2 as an Essay-method distinction?

A. breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. B. Use Tension pairs and hidden assumptions - 2 to add more headings or dimensions without testing coherence. C. Treat Tension pairs and hidden assumptions - 2 as a compulsory UPSC formula even when it distorts the prompt. D. Replace Tension pairs and hidden assumptions - 2 with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q70. Which use of Tension pairs and hidden assumptions - 2 stays closest to the printed prompt?

A. Apply Tension pairs and hidden assumptions - 2 only after drafting, when topic drift can no longer be prevented. B. breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. C. Use Tension pairs and hidden assumptions - 2 while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Tension pairs and hidden assumptions - 2 regardless of thesis fit.

Answer: B. Explanation: breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q71. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions - 2?

A. Support Tension pairs and hidden assumptions - 2 with an unverified statistic, attribution or current claim. B. Use Tension pairs and hidden assumptions - 2 to avoid stating a serious counter-case or qualification. C. breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. D. Present Tension pairs and hidden assumptions - 2 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. The other options convert a qualified writing method into an official

formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q72. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions - 2?

A. Maximise the number of outputs produced by Tension pairs and hidden assumptions - 2, even if they repeat one claim. B. Silently tidy the printed prompt before applying Tension pairs and hidden assumptions - 2 to make it easier to answer. C. Allow an exception discovered through Tension pairs and hidden assumptions - 2 to replace the central proposition. D. breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument. An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection.

Answer: D. Explanation: breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument. An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q73. Which option applies Tension pairs and hidden assumptions - 3 as an Essay-method distinction?

A. axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. B. Replace Tension pairs and hidden assumptions - 3 with a familiar adjacent GS topic and maximise factual coverage. C. Use Tension pairs and hidden assumptions - 3 to add more headings or dimensions without testing coherence. D. Treat Tension pairs and hidden assumptions - 3 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q74. Which use of Tension pairs and hidden assumptions - 3 stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Tension pairs and hidden assumptions - 3 regardless of thesis fit. B. axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. C. Use Tension pairs and hidden assumptions - 3 while dropping the prompt's operator, qualifier or scale. D. Apply Tension pairs and hidden assumptions - 3 only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q75. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions - 3?

A. Support Tension pairs and hidden assumptions - 3 with an unverified statistic, attribution or current claim. B. Use Tension pairs and hidden assumptions - 3 to avoid stating a serious counter-case or qualification. C. axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. D. Present Tension pairs and hidden assumptions - 3 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q76. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions - 3?

A. Maximise the number of outputs produced by Tension pairs and hidden assumptions - 3, even if they repeat one claim. B. Allow an exception discovered through Tension pairs and hidden assumptions - 3 to replace the central proposition. C. Silently tidy the printed prompt before applying Tension pairs and hidden assumptions - 3 to make it easier to answer. D. axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured.

Answer: D. Explanation: axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q77. Which option applies Levels of analysis and temporal-spatial scale as an Essay-method distinction?

A. Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. B. Treat Levels of analysis and temporal-spatial scale as a compulsory UPSC formula even when it distorts the prompt. C. Replace Levels of analysis and temporal-spatial scale with a familiar adjacent GS topic and maximise factual coverage. D. Use Levels of analysis and temporal-spatial scale to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q78. Which use of Levels of analysis and temporal-spatial scale stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Levels of analysis and temporal-spatial scale regardless of thesis fit. B. Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. C. Apply Levels of analysis and temporal-spatial scale only after drafting, when topic drift can no longer be prevented. D. Use Levels of analysis and temporal-spatial scale while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q79. Which statement preserves the strategy-versus-official-rule boundary for Levels of analysis and temporal-spatial scale?

A. Present Levels of analysis and temporal-spatial scale as an official marking rule rather than a pedagogical scaffold. B. Support Levels of analysis and temporal-spatial scale with an unverified statistic, attribution or current claim. C. Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. D. Use Levels of analysis and temporal-spatial scale to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q80. Which option avoids the standard Essay-method trap about Levels of analysis and temporal-spatial scale?

A. Maximise the number of outputs produced by Levels of analysis and temporal-spatial scale, even if they repeat one claim. B. Allow an exception discovered through Levels of analysis and temporal-spatial scale to replace the central proposition. C. Silently tidy the printed prompt before applying Levels of analysis and temporal-spatial scale to make it easier to answer. D. Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions.

Answer: D. Explanation: Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

Three application cards use the repository's explicit V1/V2 status. No unavailable official model answer, marking rubric or attribution is invented.

PYQ DEMAND CARD 1 - 2023-B5 Essay

Demand: Girls are weighed down by restrictions, boys with demands - two equally harmful disciplines.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Patriarchal gender norms harm girls through restricted autonomy and boys through coercive expectations of strength, success and emotional silence; the burdens differ in form and power, so equality requires removing both without falsely equating their consequences. **Restrictions on girls:** Control over mobility, education, work, clothing and marriage narrows agency and exposes women to structural dependence. **Demands on boys:** Pressure to earn, dominate, suppress vulnerability and take risks damages mental health and relationships. **Unequal power:** The two disciplines are mutually reinforcing, but restrictions on girls often carry deeper legal, economic and bodily consequences. **Family and education:** Homes and schools reproduce norms through different freedoms, chores, subjects, punishments and career expectations. **Counter-view:** Calling the disciplines equally harmful must not obscure violence, exclusion and material disadvantage disproportionately borne by girls and women. This is a repository-authored answer route, not an official model answer.

PYQ DEMAND CARD 2 - 2024-B6 Essay

Demand: Nearly all men can stand adversity, but to test the character, give him power.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Adversity reveals endurance, but power more searchingly reveals character because it reduces external restraint and exposes whether authority is treated as public trust, personal entitlement or licence. **Freedom of choice:** Power expands the consequences of preference and therefore reveals values that hardship may keep hidden. **Institutional temptation:** Control over appointments, information or resources creates opportunities for favouritism and self-dealing. **Public trust:** Constitutional office is legitimate when authority remains bounded by law, transparency and accountability. **Everyday power:** Character is also tested in families, workplaces and social hierarchies where unequal dependence can be exploited. **Counter-view:** Adversity can also reveal cruelty, solidarity or courage, while even decent individuals may be distorted by institutions that reward abuse. This is a repository-authored answer route, not an official model answer.

PYQ DEMAND CARD 3 - 2025-B8 Essay

Demand: Contentment is natural wealth; luxury is artificial poverty.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Contentment frees desire from endless comparison and can support ethical sufficiency, while luxury becomes poverty when possession enlarges dependence and ecological cost; nevertheless, contentment must not romanticise deprivation. **Inner freedom:** Contentment distinguishes enough from endless accumulation and reduces status anxiety. **Dignity floor:** Food, health, shelter, education and security are conditions of agency, not dispensable luxuries. **Consumption:** Competitive display converts wants into obligations and erodes autonomy. **Inequality:** Conspicuous luxury can coexist with unmet basic capability and weaken social trust. **Counter-view:** Innovation, comfort and aspiration are not inherently corrupt; the problem is excess detached from social and ecological responsibility. This is a repository-authored answer route, not an official model answer.

COMPLETE MODEL ESSAYS

COMPLETE MODEL ESSAY 1 - 2023-B5

Prompt: Girls are weighed down by restrictions, boys with demands - two equally harmful disciplines.

Verification: V1 - directly verified from a local official UPSC paper.

Model essay (1057 words):

"Girls are weighed down by restrictions, boys with demands - two equally harmful disciplines." is not a decorative slogan but a proposition about how human choices, institutions and consequences relate. Patriarchal gender norms harm girls through restricted autonomy and boys through coercive expectations of strength, success and emotional silence; the burdens differ in form and power, so equality requires removing both without falsely equating their consequences. This reading keeps the discussion centred on the prompt while using actor, scale, time, domain,

causality, distribution, clustering as a method rather than as visible scaffolding.

At the level of the person, **restrictions on girls** clarifies the proposition. Control over mobility, education, work, clothing and marriage narrows agency and exposes women to structural dependence. A useful illustration is constitutional equality and the work of Indian social reformers who expanded women's education and agency; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The personal insight becomes social, **demands on boys** clarifies the proposition. Pressure to earn, dominate, suppress vulnerability and take risks damages mental health and relationships. A useful illustration is constitutional equality and the work of Indian social reformers who expanded women's education and agency; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

Institutions then determine, **unequal power** clarifies the proposition. The two disciplines are mutually reinforcing, but restrictions on girls often carry deeper legal, economic and bodily consequences. A useful illustration is constitutional equality and the work of Indian social reformers who expanded women's education and agency; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The argument also changes across time, **family and education** clarifies the proposition. Homes and schools reproduce norms through different freedoms, chores, subjects, punishments and career expectations. A useful illustration is constitutional equality and the work of Indian social reformers who expanded women's education and agency; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

An Indian and democratic perspective adds, **work and care** clarifies the proposition. Men are pushed toward breadwinning while women carry unpaid care, limiting both shared parenthood and economic equality. A useful illustration is constitutional equality and the work of Indian social reformers who expanded women's education and agency; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The widest test is ethical and intergenerational, **transformative equality** clarifies the proposition. Safety, autonomy, emotional literacy, shared care and freedom from rigid roles should be expanded for every gender. A useful illustration is constitutional equality and the work of Indian social reformers who expanded women's education and agency; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

A serious essay must now confront the strongest objection. Calling the disciplines equally harmful must not obscure violence, exclusion and material disadvantage disproportionately borne by girls and women. This objection deserves to be stated in its strongest form because a weak caricature produces only a ceremonial rebuttal. It changes the argument by identifying the condition under which the prompt fails, becomes incomplete or generates unequal costs. The response is therefore not to abandon the thesis, but to qualify its reach, specify safeguards and distinguish a defensible principle from its simplistic imitation.

The synthesis follows from that qualification. Individual agency matters, but institutions shape the options within which agency operates. Material capacity matters, but dignity and justice determine whether capacity is worthwhile. National action matters, but ecological and international interdependence prevent self-contained solutions. This is why GS knowledge must enter the essay as analysed evidence rather than as a catalogue of constitutional articles, schemes, reports or sectors.

India makes this synthesis concrete because diversity, unequal capability and democratic aspiration coexist at every scale. The Constitution's language of justice, liberty, equality and fraternity supplies a normative direction, but

constitutional vocabulary earns its place only when the essay explains a mechanism: how rights restrain power, how public capability widens agency, how local participation corrects distant administration, or how scientific temper enables revision. Likewise, an example from social reform, cooperative action, public health, education, technology or ecology should illuminate one claim rather than stand as a miniature GS note. This discipline allows an India-centric essay to remain reflective and universal without becoming abstract, celebratory or scheme-heavy. It also preserves balance by connecting aspiration to capacity, rights to remedies, and public purpose to accountable implementation.

A just society will neither protect girls by confining them nor prepare boys by hardening them; it will equip all children with autonomy, care and equal responsibility. The prompt is thus neither accepted as an absolute nor dissolved into a balanced list. Its insight survives in a more precise form: one that connects character with institutions, freedom with responsibility, innovation with justice, and present action with the future. That sustained central argument gives the essay coherence, while careful evidence, transitions and qualification give it credibility.

ORIGINAL MAINS 1 - 10 MARKS

Question: Define the core writing problem in Brainstorming and Dimensional Expansion. Answer in about 150 words.

Model thesis: **Claim:** Purpose and scope. **Named evidence/example:** Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Exam facts / source basis. **Named evidence/example:** should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise.
- should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement.

Qualified conclusion: **Claim:** Purpose and scope. **Named evidence/example:** Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Exam facts / source basis. **Named evidence/example:** should contain - this folder's guidance on dimension count is a pedagogical heuristic, not an official requirement. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 2 - 10 MARKS

Question: Distinguish the valid method from its closest misuse in Brainstorming and Dimensional Expansion. Answer in about 150 words.

Model thesis: **Claim:** The central idea and common misreading. **Named evidence/example:** Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Basic decomposition questions. **Named evidence/example:** 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does

the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary.
- 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)?

Qualified conclusion: Claim: The central idea and common misreading. **Named evidence/example:** Central idea: expand only until the thesis is well-supported by two to four genuinely distinct dimensions - quality and distinctness matter more than quantity. Common misreading: listing every possible angle mechanically ("past-present-future," "social-economic- political-environmental") as a template, producing four paragraphs that say the same thing in different vocabulary. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Basic decomposition questions.

Named evidence/example: 1. Which scale does the prompt's tension operate at most naturally (Section 2)? 2. Does the tension look different at an earlier historical moment than it does today? 3. Which domain (material, institutional, ethical, ecological, digital, cultural) does the prompt's tension most concretely touch? 4. For each candidate dimension, can you state one distinct claim (not a restatement of another dimension's claim)? 5. Which two or three dimensions, taken together, best support the thesis you are leaning toward (see 05)? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 3 - 15 MARKS

Question: Apply Brainstorming and Dimensional Expansion to one philosophical UPSC Essay prompt. Answer in about 250 words.

Model thesis: Claim: Keep filter: coherence, evidence and limitation. **Named evidence/example:** distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Keep filter: coherence, evidence and limitation - 2. **Named evidence/example:** Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim: India-first illustration starters. **Named evidence/example:** For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis

options and selection. **Named evidence/example:** Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward
- Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay.
- For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12.
- Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05.

Qualified conclusion: Claim: Keep filter: coherence, evidence and limitation. **Named evidence/example:** distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Keep filter: coherence, evidence and limitation - 2. **Named evidence/example:** Compare the final link across all kept dimensions. If one dimension does not help prove the same thesis, it is a parallel mini-essay, not useful breadth. If the illustration is not recallable safely, park the dimension rather than padding the essay. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** India-first illustration starters. **Named evidence/example:** For each selected dimension, recall one Indian illustration that makes it concrete rather than abstract - e.g. education/research policy for the "empires of the mind" institutional dimension, or a documented consumption/sustainability pattern for the contentment/luxury domain dimension. Full discipline: 12. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis options and selection. **Named evidence/example:** Use the two to three strongest dimensions (not all available ones) to build alternative thesis sentences, then pick the one with the most coherent support. Over-broad brainstorming without a filter is the most common cause of a diffuse, unfocused essay. Full method: 05. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 4 - 15 MARKS

Question: Apply Brainstorming and Dimensional Expansion to one issue-based or hybrid UPSC Essay prompt. Answer in about 250 words.

Model thesis: Claim: Simple essay architecture. **Named evidence/example:** Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Opening, body and closure moves. **Named evidence/example:** The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss"

announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves. **Named evidence/example:** "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves - 2. **Named evidence/example:** same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07.
- The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. Full method: 06.
- "social-economic-political-environmental" regardless of fit). -> Repair: only use a dimension that yields a genuinely distinct claim (Section 5, Q4).
- same point in different vocabulary). -> Repair: before drafting, write one claim-sentence per intended paragraph and check none duplicate.

Qualified conclusion: Claim: Simple essay architecture. **Named evidence/example:** Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Opening, body and closure moves. **Named evidence/example:** The opening should signal which dimensions the essay will develop (without a mechanical "in this essay I will discuss" announcement); the closure should show how the developed dimensions combine into the final synthesis. ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate the limits, counter-cases and repair protocol for Brainstorming and Dimensional Expansion.
Answer in about 300 words.

Model thesis: **Claim:** Traps and repair moves - 3. **Named evidence/example:** or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Timed micro-drill and self-check. **Named evidence/example:** 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Advanced proposition and boundary. **Named evidence/example:** Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy. **Named evidence/example:** different vocabulary (e.g. "social" and "community" angles that actually make the same point). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions. **Named evidence/example:** signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration.
- 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones.
- Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method.
- different vocabulary (e.g. "social" and "community" angles that actually make the same point).
- signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones.

Qualified conclusion: **Claim:** Traps and repair moves - 3. **Named evidence/example:** or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Timed micro-drill and self-check. **Named evidence/example:** 5-minute drill: For any prompt from ../README.md, list four candidate dimensions across scale, time, domain and effect-direction. Cross out any that would restate another; keep only the genuinely distinct ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Advanced proposition and boundary. **Named evidence/example:** Proposition: dimensional expansion is a search-and-prune process, not a listing exercise - the value is in discarding dimensions that restate an existing claim, not in maximising the count generated. Boundary: this topic does not itself decide which dimensions to keep for the final thesis (05) or how to sequence them into paragraphs (07) - it supplies a disciplined generation-and-filtering method. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the

response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy. **Named evidence/example:** different vocabulary (e.g. "social" and "community" angles that actually make the same point). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions. **Named evidence/example:** signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 6 - 20 MARKS

Question: Construct an examiner-ready answer architecture using Brainstorming and Dimensional Expansion. Answer in about 300 words.

Model thesis: **Claim:** Purpose and scope. **Named evidence/example:** Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Keep filter: coherence, evidence and limitation. **Named evidence/example:** distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Simple essay architecture. **Named evidence/example:** Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves - 3. **Named evidence/example:** or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions. **Named evidence/example:** signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions - 2. **Named evidence/example:** breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument. An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions - 3. **Named evidence/example:** axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Levels of analysis and temporal-spatial scale. **Named evidence/example:** Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present ->

future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise.
- distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward
- Map each selected dimension onto one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07.
- or two sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration.
- signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones.
- breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument . An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title. The diagnostic: state each kept dimension's claim in one line, then ask whether the second claim would change if the first were false. If not, you have breadth without coherence, and 07's sequencing will not rescue it - the fix belongs here, at selection.
- axis (scale/time/domain/distribution) must be represented is false - some prompts (e.g. 2025-B5, "muddy water") are richer on the individual-to-institutional scale axis than on the time axis, and forcing a historical dimension can feel manufactured.
- Use the scale axis (person -> family/community -> institution -> state -> global order -> civilisation) as the primary generative tool, and treat time (historical -> present -> future) and domain (material/ institutional/ethical/ecological/digital/cultural) as secondary filters applied within a chosen scale, not as independent axes to expand separately - this avoids a combinatorial explosion of thin dimensions.

Qualified conclusion: Claim: Purpose and scope. **Named evidence/example:** Once a prompt is decoded (02/03), this topic teaches how to generate enough genuinely distinct material to sustain 1000-1200 words without repetition. It does not build the thesis itself (05) - it supplies the raw dimensional material the thesis will select from and organise.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Keep filter: coherence, evidence and limitation.

Named evidence/example: distinct claim - explains a mechanism - has a named, verifiable illustration - carries a relevant limit or counter-case - moves the same central thesis forward **Analysis:** This identifies the exact

Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Simple essay architecture. **Named evidence/example:** Map each selected dimension onto

one or two paragraphs in sequence - typically ordered from the most immediate/individual to the broadest/ civilisational, or vice versa, whichever creates a clearer build toward the conclusion. Full architecture: 07. **Analysis:**

This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves - 3. **Named evidence/example:** or two

sentences). -> Repair: cut to two-to-four dimensions and develop each with mechanism and illustration. **Analysis:**

This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions. **Named**

evidence/example: signals more depth is false; four shallow dimensions read as thinner than two deeply developed ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed

proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an

official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions - 2. **Named evidence/example:** breadth vs. depth. Breadth asks how many distinct angles the essay covers; coherence asks whether those angles build one argument. An essay can be broad and deep and still be incoherent - three well-developed dimensions that never speak to each other are three essays sharing a title.
