

SOLVED PRACTICE WORKBOOK

Argument, Counterargument and Synthesis - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Argument, Counterargument and Synthesis - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which option applies Purpose and scope as an Essay-method distinction?	6
Q2. Which use of Purpose and scope stays closest to the printed prompt?	6
Q3. Which statement preserves the strategy-versus-official-rule boundary for Purpose and scope?	6
Q4. Which option avoids the standard Essay-method trap about Purpose and scope?	6
Q5. Which option applies Core terms in plain language as an Essay-method distinction?	7
Q6. Which use of Core terms in plain language stays closest to the printed prompt?	7
Q7. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language?	7
Q8. Which option avoids the standard Essay-method trap about Core terms in plain language?	7
Q9. Which option applies Core terms in plain language - 2 as an Essay-method distinction?	8
Q10. Which use of Core terms in plain language - 2 stays closest to the printed prompt?	8
Q11. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 2?	8
Q12. Which option avoids the standard Essay-method trap about Core terms in plain language - 2?	8
Q13. Which option applies Core terms in plain language - 3 as an Essay-method distinction?	9
Q14. Which use of Core terms in plain language - 3 stays closest to the printed prompt?	9
Q15. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 3?	9
Q16. Which option avoids the standard Essay-method trap about Core terms in plain language - 3?	9
Q17. Which option applies Core terms in plain language - 4 as an Essay-method distinction?	10
Q18. Which use of Core terms in plain language - 4 stays closest to the printed prompt?	10
Q19. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 4?	10
Q20. Which option avoids the standard Essay-method trap about Core terms in plain language - 4?	10
Q21. Which option applies Core terms in plain language - 5 as an Essay-method distinction?	11
Q22. Which use of Core terms in plain language - 5 stays closest to the printed prompt?	11
Q23. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 5?	11
Q24. Which option avoids the standard Essay-method trap about Core terms in plain language - 5?	12
Q25. Which option applies Exam facts / source basis as an Essay-method distinction?	12
Q26. Which use of Exam facts / source basis stays closest to the printed prompt?	12
Q27. Which statement preserves the strategy-versus-official-rule boundary for Exam facts / source basis?	12

Q28. Which option avoids the standard Essay-method trap about Exam facts / source basis?	13
Q29. Which option applies The central idea and common misreading as an Essay-method distinction?	13
Q30. Which use of The central idea and common misreading stays closest to the printed prompt?	13
Q31. Which statement preserves the strategy-versus-official-rule boundary for The central idea and common misreading?	13
Q32. Which option avoids the standard Essay-method trap about The central idea and common misreading?	14
Q33. Which option applies Basic decomposition questions as an Essay-method distinction?	14
Q34. Which use of Basic decomposition questions stays closest to the printed prompt?	14
Q35. Which statement preserves the strategy-versus-official-rule boundary for Basic decomposition questions?	15
Q36. Which option avoids the standard Essay-method trap about Basic decomposition questions?	15
Q37. Which option applies India-first illustration starters as an Essay-method distinction?	15
Q38. Which use of India-first illustration starters stays closest to the printed prompt?	15
Q39. Which statement preserves the strategy-versus-official-rule boundary for India-first illustration starters?	16
Q40. Which option avoids the standard Essay-method trap about India-first illustration starters?	16
Q41. Which option applies Thesis options and selection as an Essay-method distinction?	16
Q42. Which use of Thesis options and selection stays closest to the printed prompt?	16
Q43. Which statement preserves the strategy-versus-official-rule boundary for Thesis options and selection?	17
Q44. Which option avoids the standard Essay-method trap about Thesis options and selection?	17
Q45. Which option applies Simple essay architecture as an Essay-method distinction?	17
Q46. Which use of Simple essay architecture stays closest to the printed prompt?	17
Q47. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture?	18
Q48. Which option avoids the standard Essay-method trap about Simple essay architecture?	18
Q49. Which option applies Opening, body and closure moves as an Essay-method distinction?	18
Q50. Which use of Opening, body and closure moves stays closest to the printed prompt?	18
Q51. Which statement preserves the strategy-versus-official-rule boundary for Opening, body and closure moves?	19
Q52. Which option avoids the standard Essay-method trap about Opening, body and closure moves?	19
Q53. Which option applies Traps and repair moves as an Essay-method distinction?	19
Q54. Which use of Traps and repair moves stays closest to the printed prompt?	19
Q55. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves?	20
Q56. Which option avoids the standard Essay-method trap about Traps and repair moves?	20
Q57. Which option applies Advanced proposition and boundary as an Essay-method distinction?	20
Q58. Which use of Advanced proposition and boundary stays closest to the printed prompt?	20
Q59. Which statement preserves the strategy-versus-official-rule boundary for Advanced proposition and boundary?	21

Q60. Which option avoids the standard Essay-method trap about Advanced proposition and boundary?	21
Q61. Which option applies Concept definition and taxonomy as an Essay-method distinction?	21
Q62. Which use of Concept definition and taxonomy stays closest to the printed prompt?	22
Q63. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy?	22
Q64. Which option avoids the standard Essay-method trap about Concept definition and taxonomy?	22
Q65. Which option applies Levels of analysis and temporal-spatial scale as an Essay-method distinction?	22
Q66. Which use of Levels of analysis and temporal-spatial scale stays closest to the printed prompt?	23
Q67. Which statement preserves the strategy-versus-official-rule boundary for Levels of analysis and temporal-spatial scale?	23
Q68. Which option avoids the standard Essay-method trap about Levels of analysis and temporal-spatial scale?	23
Q69. Which option applies Stakeholder map and distributional effects as an Essay-method distinction?	24
Q70. Which use of Stakeholder map and distributional effects stays closest to the printed prompt?	24
Q71. Which statement preserves the strategy-versus-official-rule boundary for Stakeholder map and distributional effects?	24
Q72. Which option avoids the standard Essay-method trap about Stakeholder map and distributional effects?	25
Q73. Which option applies Causality, mechanisms and feedback loops as an Essay-method distinction?	25
Q74. Which use of Causality, mechanisms and feedback loops stays closest to the printed prompt?	25
Q75. Which statement preserves the strategy-versus-official-rule boundary for Causality, mechanisms and feedback loops?	26
Q76. Which option avoids the standard Essay-method trap about Causality, mechanisms and feedback loops?	26
Q77. Which option applies Causality, mechanisms and feedback loops - 2 as an Essay-method distinction?	26
Q78. Which use of Causality, mechanisms and feedback loops - 2 stays closest to the printed prompt?	27
Q79. Which statement preserves the strategy-versus-official-rule boundary for Causality, mechanisms and feedback loops - 2?	27
Q80. Which option avoids the standard Essay-method trap about Causality, mechanisms and feedback loops - 2?	27

Argument, Counterargument and Synthesis - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which option applies Purpose and scope as an Essay-method distinction?

A. This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. B. Use Purpose and scope to add more headings or dimensions without testing coherence. C. Treat Purpose and scope as a compulsory UPSC formula even when it distorts the prompt. D. Replace Purpose and scope with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q2. Which use of Purpose and scope stays closest to the printed prompt?

A. Apply Purpose and scope only after drafting, when topic drift can no longer be prevented. B. This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. C. Use Purpose and scope while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Purpose and scope regardless of thesis fit.

Answer: B. Explanation: This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q3. Which statement preserves the strategy-versus-official-rule boundary for Purpose and scope?

A. Support Purpose and scope with an unverified statistic, attribution or current claim. B. Present Purpose and scope as an official marking rule rather than a pedagogical scaffold. C. This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. D. Use Purpose and scope to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q4. Which option avoids the standard Essay-method trap about Purpose and scope?

A. Silently tidy the printed prompt before applying Purpose and scope to make it easier to answer. B. Allow an exception discovered through Purpose and scope to replace the central proposition. C. Maximise the number of outputs produced by Purpose and scope, even if they repeat one claim. D. This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging.

Answer: D. Explanation: This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q5. Which option applies Core terms in plain language as an Essay-method distinction?

A. to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. B. Use Core terms in plain language to add more headings or dimensions without testing coherence. C. Replace Core terms in plain language with a familiar adjacent GS topic and maximise factual coverage. D. Treat Core terms in plain language as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q6. Which use of Core terms in plain language stays closest to the printed prompt?

A. Apply Core terms in plain language only after drafting, when topic drift can no longer be prevented. B. to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. C. Let a striking anecdote or quotation determine Core terms in plain language regardless of thesis fit. D. Use Core terms in plain language while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q7. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language?

A. Present Core terms in plain language as an official marking rule rather than a pedagogical scaffold. B. Support Core terms in plain language with an unverified statistic, attribution or current claim. C. to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. D. Use Core terms in plain language to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q8. Which option avoids the standard Essay-method trap about Core terms in plain language?

A. Maximise the number of outputs produced by Core terms in plain language, even if they repeat one claim. B. Allow an exception discovered through Core terms in plain language to replace the central proposition. C. Silently tidy the printed prompt before applying Core terms in plain language to make it easier to answer. D. to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it.

Answer: D. Explanation: to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position , and in a good essay it is stated as its own advocate would state it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q9. Which option applies Core terms in plain language - 2 as an Essay-method distinction?

A. on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. B. Treat Core terms in plain language - 2 as a compulsory UPSC formula even when it distorts the prompt. C. Replace Core terms in plain language - 2 with a familiar adjacent GS topic and maximise factual coverage. D. Use Core terms in plain language - 2 to add more headings or dimensions without testing coherence.

Answer: A. Explanation: on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q10. Which use of Core terms in plain language - 2 stays closest to the printed prompt?

A. Use Core terms in plain language - 2 while dropping the prompt's operator, qualifier or scale. B. on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. C. Apply Core terms in plain language - 2 only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Core terms in plain language - 2 regardless of thesis fit.

Answer: B. Explanation: on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q11. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 2?

A. Support Core terms in plain language - 2 with an unverified statistic, attribution or current claim. B. Use Core terms in plain language - 2 to avoid stating a serious counter-case or qualification. C. on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. D. Present Core terms in plain language - 2 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q12. Which option avoids the standard Essay-method trap about Core terms in plain language - 2?

A. Silently tidy the printed prompt before applying Core terms in plain language - 2 to make it easier to answer. B. Maximise the number of outputs produced by Core terms in plain language - 2, even if they repeat one claim. C. Allow an exception discovered through Core terms in plain language - 2 to replace the central proposition. D. on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing.

Answer: D. Explanation: on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q13. Which option applies Core terms in plain language - 3 as an Essay-method distinction?

A. each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. B. Replace Core terms in plain language - 3 with a familiar adjacent GS topic and maximise factual coverage. C. Use Core terms in plain language - 3 to add more headings or dimensions without testing coherence. D. Treat Core terms in plain language - 3 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q14. Which use of Core terms in plain language - 3 stays closest to the printed prompt?

A. Use Core terms in plain language - 3 while dropping the prompt's operator, qualifier or scale. B. each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. C. Let a striking anecdote or quotation determine Core terms in plain language - 3 regardless of thesis fit. D. Apply Core terms in plain language - 3 only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q15. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 3?

A. Support Core terms in plain language - 3 with an unverified statistic, attribution or current claim. B. Use Core terms in plain language - 3 to avoid stating a serious counter-case or qualification. C. each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. D. Present Core terms in plain language - 3 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q16. Which option avoids the standard Essay-method trap about Core terms in plain language - 3?

A. Maximise the number of outputs produced by Core terms in plain language - 3, even if they repeat one claim. B. Silently tidy the printed prompt before applying Core terms in plain language - 3 to make it easier to answer. C. Allow an exception discovered through Core terms in plain language - 3 to replace the central proposition. D. each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference.

Answer: D. Explanation: each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q17. Which option applies Core terms in plain language - 4 as an Essay-method distinction?

A. COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." B. Treat Core terms in plain language - 4 as a compulsory UPSC formula even when it distorts the prompt. C. Use Core terms in plain language - 4 to add more headings or dimensions without testing coherence. D. Replace Core terms in plain language - 4 with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q18. Which use of Core terms in plain language - 4 stays closest to the printed prompt?

A. Apply Core terms in plain language - 4 only after drafting, when topic drift can no longer be prevented. B. COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." C. Let a striking anecdote or quotation determine Core terms in plain language - 4 regardless of thesis fit. D. Use Core terms in plain language - 4 while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q19. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 4?

A. Support Core terms in plain language - 4 with an unverified statistic, attribution or current claim. B. Use Core terms in plain language - 4 to avoid stating a serious counter-case or qualification. C. COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." D. Present Core terms in plain language - 4 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q20. Which option avoids the standard Essay-method trap about Core terms in plain language - 4?

A. Maximise the number of outputs produced by Core terms in plain language - 4, even if they repeat one claim. B. Silently tidy the printed prompt before applying Core terms in plain language - 4 to make it easier to answer. C. Allow an exception discovered through Core terms in plain language - 4 to replace the central proposition. D. COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not."

Answer: D. Explanation: COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded;

apply precaution where it is not." The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q21. Which option applies Core terms in plain language - 5 as an Essay-method distinction?

A. Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. B. Replace Core terms in plain language - 5 with a familiar adjacent GS topic and maximise factual coverage. C. Use Core terms in plain language - 5 to add more headings or dimensions without testing coherence. D. Treat Core terms in plain language - 5 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q22. Which use of Core terms in plain language - 5 stays closest to the printed prompt?

A. Apply Core terms in plain language - 5 only after drafting, when topic drift can no longer be prevented. B. Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. C. Use Core terms in plain language - 5 while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Core terms in plain language - 5 regardless of thesis fit.

Answer: B. Explanation: Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q23. Which statement preserves the strategy-versus-official-rule boundary for Core terms in plain language - 5?

A. Support Core terms in plain language - 5 with an unverified statistic, attribution or current claim. B. Present Core terms in plain language - 5 as an official marking rule rather than a pedagogical scaffold. C. Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. D. Use Core terms in plain language - 5 to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q24. Which option avoids the standard Essay-method trap about Core terms in plain language - 5?

A. Maximise the number of outputs produced by Core terms in plain language - 5, even if they repeat one claim. B. Allow an exception discovered through Core terms in plain language - 5 to replace the central proposition. C. Silently tidy the printed prompt before applying Core terms in plain language - 5 to make it easier to answer. D. Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve.

Answer: D. Explanation: Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q25. Which option applies Exam facts / source basis as an Essay-method distinction?

A. handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). B. Use Exam facts / source basis to add more headings or dimensions without testing coherence. C. Treat Exam facts / source basis as a compulsory UPSC formula even when it distorts the prompt. D. Replace Exam facts / source basis with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q26. Which use of Exam facts / source basis stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Exam facts / source basis regardless of thesis fit. B. handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). C. Use Exam facts / source basis while dropping the prompt's operator, qualifier or scale. D. Apply Exam facts / source basis only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q27. Which statement preserves the strategy-versus-official-rule boundary for Exam facts / source basis?

A. Use Exam facts / source basis to avoid stating a serious counter-case or qualification. B. Support Exam facts / source basis with an unverified statistic, attribution or current claim. C. handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). D. Present Exam facts / source basis as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q28. Which option avoids the standard Essay-method trap about Exam facts / source basis?

A. Silently tidy the printed prompt before applying Exam facts / source basis to make it easier to answer. B. Maximise the number of outputs produced by Exam facts / source basis, even if they repeat one claim. C. Allow an exception discovered through Exam facts / source basis to replace the central proposition. D. handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md).

Answer: D. Explanation: handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q29. Which option applies The central idea and common misreading as an Essay-method distinction?

A. Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. B. Use The central idea and common misreading to add more headings or dimensions without testing coherence. C. Replace The central idea and common misreading with a familiar adjacent GS topic and maximise factual coverage. D. Treat The central idea and common misreading as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q30. Which use of The central idea and common misreading stays closest to the printed prompt?

A. Use The central idea and common misreading while dropping the prompt's operator, qualifier or scale. B. Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. C. Let a striking anecdote or quotation determine The central idea and common misreading regardless of thesis fit. D. Apply The central idea and common misreading only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q31. Which statement preserves the strategy-versus-official-rule boundary for The central idea and common misreading?

A. Use The central idea and common misreading to avoid stating a serious counter-case or qualification. B. Support The central idea and common misreading with an unverified statistic, attribution or current claim. C. Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. D. Present The central idea and common misreading as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is

considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q32. Which option avoids the standard Essay-method trap about The central idea and common misreading?

A. Allow an exception discovered through The central idea and common misreading to replace the central proposition. B. Maximise the number of outputs produced by The central idea and common misreading, even if they repeat one claim. C. Silently tidy the printed prompt before applying The central idea and common misreading to make it easier to answer. D. Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement.

Answer: D. Explanation: Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q33. Which option applies Basic decomposition questions as an Essay-method distinction?

A. 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? B. Replace Basic decomposition questions with a familiar adjacent GS topic and maximise factual coverage. C. Use Basic decomposition questions to add more headings or dimensions without testing coherence. D. Treat Basic decomposition questions as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q34. Which use of Basic decomposition questions stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Basic decomposition questions regardless of thesis fit. B. 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? C. Apply Basic decomposition questions only after drafting, when topic drift can no longer be prevented. D. Use Basic decomposition questions while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q35. Which statement preserves the strategy-versus-official-rule boundary for Basic decomposition questions?

A. Present Basic decomposition questions as an official marking rule rather than a pedagogical scaffold. B. Support Basic decomposition questions with an unverified statistic, attribution or current claim. C. 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? D. Use Basic decomposition questions to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q36. Which option avoids the standard Essay-method trap about Basic decomposition questions?

A. Maximise the number of outputs produced by Basic decomposition questions, even if they repeat one claim. B. Silently tidy the printed prompt before applying Basic decomposition questions to make it easier to answer. C. Allow an exception discovered through Basic decomposition questions to replace the central proposition. D. 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged?

Answer: D. Explanation: 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q37. Which option applies India-first illustration starters as an Essay-method distinction?

A. Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. B. Replace India-first illustration starters with a familiar adjacent GS topic and maximise factual coverage. C. Use India-first illustration starters to add more headings or dimensions without testing coherence. D. Treat India-first illustration starters as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q38. Which use of India-first illustration starters stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine India-first illustration starters regardless of thesis fit. B. Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. C. Apply India-first illustration starters only after drafting, when topic drift can no longer be prevented. D. Use India-first illustration starters while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test

the "doing nothing" thesis. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q39. Which statement preserves the strategy-versus-official-rule boundary for India-first illustration starters?

A. Support India-first illustration starters with an unverified statistic, attribution or current claim. B. Present India-first illustration starters as an official marking rule rather than a pedagogical scaffold. C. Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. D. Use India-first illustration starters to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q40. Which option avoids the standard Essay-method trap about India-first illustration starters?

A. Maximise the number of outputs produced by India-first illustration starters, even if they repeat one claim. B. Silently tidy the printed prompt before applying India-first illustration starters to make it easier to answer. C. Allow an exception discovered through India-first illustration starters to replace the central proposition. D. Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12.

Answer: D. Explanation: Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q41. Which option applies Thesis options and selection as an Essay-method distinction?

A. If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. B. Treat Thesis options and selection as a compulsory UPSC formula even when it distorts the prompt. C. Replace Thesis options and selection with a familiar adjacent GS topic and maximise factual coverage. D. Use Thesis options and selection to add more headings or dimensions without testing coherence.

Answer: A. Explanation: If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q42. Which use of Thesis options and selection stays closest to the printed prompt?

A. Use Thesis options and selection while dropping the prompt's operator, qualifier or scale. B. If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. C. Apply Thesis options and selection only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Thesis options and selection regardless of thesis fit.

Answer: B. Explanation: If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q43. Which statement preserves the strategy-versus-official-rule boundary for Thesis options and selection?

A. Use Thesis options and selection to avoid stating a serious counter-case or qualification. B. Support Thesis options and selection with an unverified statistic, attribution or current claim. C. If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. D. Present Thesis options and selection as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q44. Which option avoids the standard Essay-method trap about Thesis options and selection?

A. Allow an exception discovered through Thesis options and selection to replace the central proposition. B. Silently tidy the printed prompt before applying Thesis options and selection to make it easier to answer. C. Maximise the number of outputs produced by Thesis options and selection, even if they repeat one claim. D. If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it.

Answer: D. Explanation: If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q45. Which option applies Simple essay architecture as an Essay-method distinction?

A. Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. B. Replace Simple essay architecture with a familiar adjacent GS topic and maximise factual coverage. C. Use Simple essay architecture to add more headings or dimensions without testing coherence. D. Treat Simple essay architecture as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q46. Which use of Simple essay architecture stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Simple essay architecture regardless of thesis fit. B. Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. C. Use Simple essay architecture while dropping the prompt's operator, qualifier or scale. D. Apply Simple essay architecture only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q47. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture?

A. Use Simple essay architecture to avoid stating a serious counter-case or qualification. B. Present Simple essay architecture as an official marking rule rather than a pedagogical scaffold. C. Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. D. Support Simple essay architecture with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q48. Which option avoids the standard Essay-method trap about Simple essay architecture?

A. Allow an exception discovered through Simple essay architecture to replace the central proposition. B. Maximise the number of outputs produced by Simple essay architecture, even if they repeat one claim. C. Silently tidy the printed prompt before applying Simple essay architecture to make it easier to answer. D. Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing.

Answer: D. Explanation: Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q49. Which option applies Opening, body and closure moves as an Essay-method distinction?

A. Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. B. Replace Opening, body and closure moves with a familiar adjacent GS topic and maximise factual coverage. C. Treat Opening, body and closure moves as a compulsory UPSC formula even when it distorts the prompt. D. Use Opening, body and closure moves to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q50. Which use of Opening, body and closure moves stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Opening, body and closure moves regardless of thesis fit. B. Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. C. Apply Opening, body and closure moves only after drafting, when topic drift can no longer be prevented. D. Use Opening, body and closure moves while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q51. Which statement preserves the strategy-versus-official-rule boundary for Opening, body and closure moves?

A. Support Opening, body and closure moves with an unverified statistic, attribution or current claim. B. Present Opening, body and closure moves as an official marking rule rather than a pedagogical scaffold. C. Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. D. Use Opening, body and closure moves to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q52. Which option avoids the standard Essay-method trap about Opening, body and closure moves?

A. Allow an exception discovered through Opening, body and closure moves to replace the central proposition. B. Maximise the number of outputs produced by Opening, body and closure moves, even if they repeat one claim. C. Silently tidy the printed prompt before applying Opening, body and closure moves to make it easier to answer. D. Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis.

Answer: D. Explanation: Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q53. Which option applies Traps and repair moves as an Essay-method distinction?

A. where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. B. Use Traps and repair moves to add more headings or dimensions without testing coherence. C. Replace Traps and repair moves with a familiar adjacent GS topic and maximise factual coverage. D. Treat Traps and repair moves as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q54. Which use of Traps and repair moves stays closest to the printed prompt?

A. Use Traps and repair moves while dropping the prompt's operator, qualifier or scale. B. where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. C. Let a striking anecdote or quotation determine Traps and repair moves regardless of thesis fit. D. Apply Traps and repair moves only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q55. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves?

A. Use Traps and repair moves to avoid stating a serious counter-case or qualification. B. Present Traps and repair moves as an official marking rule rather than a pedagogical scaffold. C. where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. D. Support Traps and repair moves with an unverified statistic, attribution or current claim.

Answer: C. Explanation: where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q56. Which option avoids the standard Essay-method trap about Traps and repair moves?

A. Allow an exception discovered through Traps and repair moves to replace the central proposition. B. Silently tidy the printed prompt before applying Traps and repair moves to make it easier to answer. C. Maximise the number of outputs produced by Traps and repair moves, even if they repeat one claim. D. where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle.

Answer: D. Explanation: where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q57. Which option applies Advanced proposition and boundary as an Essay-method distinction?

A. Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. B. Treat Advanced proposition and boundary as a compulsory UPSC formula even when it distorts the prompt. C. Use Advanced proposition and boundary to add more headings or dimensions without testing coherence. D. Replace Advanced proposition and boundary with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q58. Which use of Advanced proposition and boundary stays closest to the printed prompt?

A. Use Advanced proposition and boundary while dropping the prompt's operator, qualifier or scale. B. Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. C. Apply Advanced proposition and boundary only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Advanced proposition and boundary regardless of thesis fit.

Answer: B. Explanation: Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn

from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q59. Which statement preserves the strategy-versus-official-rule boundary for Advanced proposition and boundary?

A. Use Advanced proposition and boundary to avoid stating a serious counter-case or qualification. B. Present Advanced proposition and boundary as an official marking rule rather than a pedagogical scaffold. C. Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. D. Support Advanced proposition and boundary with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q60. Which option avoids the standard Essay-method trap about Advanced proposition and boundary?

A. Maximise the number of outputs produced by Advanced proposition and boundary, even if they repeat one claim. B. Allow an exception discovered through Advanced proposition and boundary to replace the central proposition. C. Silently tidy the printed prompt before applying Advanced proposition and boundary to make it easier to answer. D. Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself.

Answer: D. Explanation: Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q61. Which option applies Concept definition and taxonomy as an Essay-method distinction?

A. thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. B. Use Concept definition and taxonomy to add more headings or dimensions without testing coherence. C. Replace Concept definition and taxonomy with a familiar adjacent GS topic and maximise factual coverage. D. Treat Concept definition and taxonomy as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q62. Which use of Concept definition and taxonomy stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Concept definition and taxonomy regardless of thesis fit. B. thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. C. Use Concept definition and taxonomy while dropping the prompt's operator, qualifier or scale. D. Apply Concept definition and taxonomy only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q63. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy?

A. Support Concept definition and taxonomy with an unverified statistic, attribution or current claim. B. Present Concept definition and taxonomy as an official marking rule rather than a pedagogical scaffold. C. thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. D. Use Concept definition and taxonomy to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q64. Which option avoids the standard Essay-method trap about Concept definition and taxonomy?

A. Silently tidy the printed prompt before applying Concept definition and taxonomy to make it easier to answer. B. Maximise the number of outputs produced by Concept definition and taxonomy, even if they repeat one claim. C. Allow an exception discovered through Concept definition and taxonomy to replace the central proposition. D. thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions.

Answer: D. Explanation: thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q65. Which option applies Levels of analysis and temporal-spatial scale as an Essay-method distinction?

A. Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. B. Use Levels of analysis and temporal-spatial scale to add more headings or dimensions without testing coherence. C. Treat Levels of analysis and temporal-spatial scale as a compulsory UPSC formula even when it distorts the prompt. D. Replace Levels of analysis and temporal-spatial scale with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q66. Which use of Levels of analysis and temporal-spatial scale stays closest to the printed prompt?

- A. Let a striking anecdote or quotation determine Levels of analysis and temporal-spatial scale regardless of thesis fit. B. Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. C. Apply Levels of analysis and temporal-spatial scale only after drafting, when topic drift can no longer be prevented. D. Use Levels of analysis and temporal-spatial scale while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q67. Which statement preserves the strategy-versus-official-rule boundary for Levels of analysis and temporal-spatial scale?

- A. Use Levels of analysis and temporal-spatial scale to avoid stating a serious counter-case or qualification. B. Present Levels of analysis and temporal-spatial scale as an official marking rule rather than a pedagogical scaffold. C. Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. D. Support Levels of analysis and temporal-spatial scale with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q68. Which option avoids the standard Essay-method trap about Levels of analysis and temporal-spatial scale?

- A. Maximise the number of outputs produced by Levels of analysis and temporal-spatial scale, even if they repeat one claim. B. Allow an exception discovered through Levels of analysis and temporal-spatial scale to replace the central proposition. C. Silently tidy the printed prompt before applying Levels of analysis and temporal-spatial scale to make it easier to answer. D. Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away.

Answer: D. Explanation: Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q69. Which option applies Stakeholder map and distributional effects as an Essay-method distinction?

A. For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. B. Use Stakeholder map and distributional effects to add more headings or dimensions without testing coherence. C. Replace Stakeholder map and distributional effects with a familiar adjacent GS topic and maximise factual coverage. D. Treat Stakeholder map and distributional effects as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q70. Which use of Stakeholder map and distributional effects stays closest to the printed prompt?

A. Use Stakeholder map and distributional effects while dropping the prompt's operator, qualifier or scale. B. For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. C. Apply Stakeholder map and distributional effects only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Stakeholder map and distributional effects regardless of thesis fit.

Answer: B. Explanation: For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q71. Which statement preserves the strategy-versus-official-rule boundary for Stakeholder map and distributional effects?

A. Use Stakeholder map and distributional effects to avoid stating a serious counter-case or qualification. B. Support Stakeholder map and distributional effects with an unverified statistic, attribution or current claim. C. For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. D. Present Stakeholder map and distributional effects as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and

Q72. Which option avoids the standard Essay-method trap about Stakeholder map and distributional effects?

A. Allow an exception discovered through Stakeholder map and distributional effects to replace the central proposition. B. Silently tidy the printed prompt before applying Stakeholder map and distributional effects to make it easier to answer. C. Maximise the number of outputs produced by Stakeholder map and distributional effects, even if they repeat one claim. D. For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position.

Answer: D. Explanation: For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q73. Which option applies Causality, mechanisms and feedback loops as an Essay-method distinction?

A. THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) B. Use Causality, mechanisms and feedback loops to add more headings or dimensions without testing coherence. C. Replace Causality, mechanisms and feedback loops with a familiar adjacent GS topic and maximise factual coverage. D. Treat Causality, mechanisms and feedback loops as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q74. Which use of Causality, mechanisms and feedback loops stays closest to the printed prompt?

A. Apply Causality, mechanisms and feedback loops only after drafting, when topic drift can no longer be prevented. B. THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) C. Let a striking anecdote or quotation determine Causality, mechanisms and feedback loops regardless of thesis fit. D. Use Causality, mechanisms and feedback loops while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q75. Which statement preserves the strategy-versus-official-rule boundary for Causality, mechanisms and feedback loops?

A. Present Causality, mechanisms and feedback loops as an official marking rule rather than a pedagogical scaffold. B. Use Causality, mechanisms and feedback loops to avoid stating a serious counter-case or qualification. C. THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) D. Support Causality, mechanisms and feedback loops with an unverified statistic, attribution or current claim.

Answer: C. Explanation: THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q76. Which option avoids the standard Essay-method trap about Causality, mechanisms and feedback loops?

A. Allow an exception discovered through Causality, mechanisms and feedback loops to replace the central proposition. B. Silently tidy the printed prompt before applying Causality, mechanisms and feedback loops to make it easier to answer. C. Maximise the number of outputs produced by Causality, mechanisms and feedback loops, even if they repeat one claim. D. THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition)

Answer: D. Explanation: THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q77. Which option applies Causality, mechanisms and feedback loops - 2 as an Essay-method distinction?

A. The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. B. Use Causality, mechanisms and feedback loops - 2 to add more headings or dimensions without testing coherence. C. Treat Causality, mechanisms and feedback loops - 2 as a compulsory UPSC formula even when it distorts the prompt. D. Replace Causality, mechanisms and feedback loops - 2 with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q78. Which use of Causality, mechanisms and feedback loops - 2 stays closest to the printed prompt?

- A. Apply Causality, mechanisms and feedback loops - 2 only after drafting, when topic drift can no longer be prevented. B. The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. C. Let a striking anecdote or quotation determine Causality, mechanisms and feedback loops - 2 regardless of thesis fit. D. Use Causality, mechanisms and feedback loops - 2 while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q79. Which statement preserves the strategy-versus-official-rule boundary for Causality, mechanisms and feedback loops - 2?

- A. Use Causality, mechanisms and feedback loops - 2 to avoid stating a serious counter-case or qualification. B. Present Causality, mechanisms and feedback loops - 2 as an official marking rule rather than a pedagogical scaffold. C. The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. D. Support Causality, mechanisms and feedback loops - 2 with an unverified statistic, attribution or current claim.

Answer: C. Explanation: The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q80. Which option avoids the standard Essay-method trap about Causality, mechanisms and feedback loops - 2?

- A. Silently tidy the printed prompt before applying Causality, mechanisms and feedback loops - 2 to make it easier to answer. B. Maximise the number of outputs produced by Causality, mechanisms and feedback loops - 2, even if they repeat one claim. C. Allow an exception discovered through Causality, mechanisms and feedback loops - 2 to replace the central proposition. D. The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything.

Answer: D. Explanation: The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

Three application cards use the repository's explicit V1/V2 status. No unavailable official model answer, marking rubric or attribution is invented.

PYQ DEMAND CARD 1 - 2025-A1 Essay

Demand: Truth knows no color.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Truth should not vary with identity or power, yet access to evidence and credibility is socially unequal; a just search for truth therefore combines common standards with attention to excluded experience. **Evidence:** Public claims need reasons and verification that remain open to challenge. **Equality:** The identity of a speaker should neither disqualify testimony nor exempt it from scrutiny. **History:** Dominant institutions have sometimes silenced evidence carried by marginal groups. **Science:** Reproducibility and correction protect inquiry from authority and prejudice. **Counter-view:** Claims of colour-blind neutrality can preserve unequal power when the conditions of testimony and investigation are ignored. This is a repository-authored answer route, not an official model answer.

PYQ DEMAND CARD 2 - 2019-B7 Essay

Demand: Biased media is a real threat to Indian democracy.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Biased media threatens Indian democracy when systematic distortion deprives citizens of reliable information, weakens scrutiny and polarises public reason, although viewpoint diversity must be protected and bias distinguished from mere disagreement. **Informed citizenship:** Elections are meaningful only when citizens can evaluate competing claims through sufficiently reliable information. **Accountability:** Selective silence or partisan framing can shield power and make public institutions less answerable. **Polarisation:** Sensational and identity-driven coverage can replace deliberation with permanent mobilisation against imagined enemies. **Ownership and incentives:** Concentrated ownership, advertising dependence and attention metrics can shape editorial priorities without explicit censorship. **Counter-view:** Government control in the name of neutrality can itself become a greater democratic threat, and complete value-neutrality is neither possible nor desirable. This is a repository-authored answer route, not an official model answer.

PYQ DEMAND CARD 3 - 2014-A4 Essay

Demand: Words are sharper than the two-edged sword.

Status: V2 carried-forward practice wording; re-check before verbatim use.

Model solution: Working thesis: Words can wound more deeply than physical force because they shape identity, legitimacy and collective memory, yet the same power also enables truth, reconciliation and democratic action. **Identity:** Language can dignify persons or reduce them to stereotypes. **Politics:** Public speech frames who belongs, who threatens and what action appears legitimate. **Law:** Reasoned judgments and constitutional language can restrain coercive authority. **Media:** Repeated falsehood or dehumanising rhetoric can normalise exclusion. **Counter-view:** Physical violence has immediate bodily consequences that metaphor should not trivialise, and restrictions on speech can themselves become weapons. This is a repository-authored answer route, not an official model answer.

COMPLETE MODEL ESSAYS

COMPLETE MODEL ESSAY 1 - 2025-A1

Prompt: Truth knows no color.

Verification: V1 - directly verified from a local official UPSC paper.

Model essay (978 words):

"Truth knows no color." is not a decorative slogan but a proposition about how human choices, institutions and consequences relate. Truth should not vary with identity or power, yet access to evidence and credibility is socially unequal; a just search for truth therefore combines common standards with attention to excluded experience. This reading keeps the discussion centred on the prompt while using steelman, counter-case, concession, rebuttal, condition, synthesis as a method rather than as visible scaffolding.

At the level of the person, **evidence** clarifies the proposition. Public claims need reasons and verification that remain open to challenge. A useful illustration is India's constitutional commitment to justice, liberty, equality and fraternity; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The personal insight becomes social, **equality** clarifies the proposition. The identity of a speaker should neither disqualify testimony nor exempt it from scrutiny. A useful illustration is the Universal Declaration of Human Rights and its common standard of equal dignity; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

Institutions then determine, **history** clarifies the proposition. Dominant institutions have sometimes silenced evidence carried by marginal groups. A useful illustration is India's constitutional system of limited office, judicial review and public accountability; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The argument also changes across time, **science** clarifies the proposition. Reproducibility and correction protect inquiry from authority and prejudice. A useful illustration is India's scientific institutions and public digital systems, whose benefits depend on access and accountability; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

An Indian and democratic perspective adds, **democracy** clarifies the proposition. Shared facts make disagreement governable without demanding uniform opinion. A useful illustration is the Right to Information framework and constitutional protection of reasoned public debate; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The widest test is ethical and intergenerational, **ethics** clarifies the proposition. Humility recognises that perspective can reveal blind spots without making every claim equally true. A useful illustration is India's educational, scientific and public-health institutions; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

A serious essay must now confront the strongest objection. Claims of colour-blind neutrality can preserve unequal power when the conditions of testimony and investigation are ignored. This objection deserves to be stated in its strongest form because a weak caricature produces only a ceremonial rebuttal. It changes the argument by identifying the condition under which the prompt fails, becomes incomplete or generates unequal costs. The response is therefore not to abandon the thesis, but to qualify its reach, specify safeguards and distinguish a defensible principle from its simplistic imitation.

The synthesis follows from that qualification. Individual agency matters, but institutions shape the options within which agency operates. Material capacity matters, but dignity and justice determine whether capacity is worthwhile. National action matters, but ecological and international interdependence prevent self-contained solutions. This is why GS knowledge must enter the essay as analysed evidence rather than as a catalogue of constitutional articles, schemes, reports or sectors.

India makes this synthesis concrete because diversity, unequal capability and democratic aspiration coexist at every scale. The Constitution's language of justice, liberty, equality and fraternity supplies a normative direction, but constitutional vocabulary earns its place only when the essay explains a mechanism: how rights restrain power, how public capability widens agency, how local participation corrects distant administration, or how scientific temper enables revision. Likewise, an example from social reform, cooperative action, public health, education, technology or

ecology should illuminate one claim rather than stand as a miniature GS note. This discipline allows an India-centric essay to remain reflective and universal without becoming abstract, celebratory or scheme-heavy. It also preserves balance by connecting aspiration to capacity, rights to remedies, and public purpose to accountable implementation.

Truth has no colour, but the path to it has social conditions; impartial standards become credible when every person can contribute evidence and every claim remains answerable to reason. The prompt is thus neither accepted as an absolute nor dissolved into a balanced list. Its insight survives in a more precise form: one that connects character with institutions, freedom with responsibility, innovation with justice, and present action with the future. That sustained central argument gives the essay coherence, while careful evidence, transitions and qualification give it credibility.

ORIGINAL MAINS 1 - 10 MARKS

Question: Define the core writing problem in Argument, Counterargument and Synthesis. Answer in about 150 words.

Model thesis: **Claim:** Purpose and scope. **Named evidence/example:** This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language. **Named evidence/example:** to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position, and in a good essay it is stated as its own advocate would state it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging.
- to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position, and in a good essay it is stated as its own advocate would state it.

Qualified conclusion: **Claim:** Purpose and scope. **Named evidence/example:** This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language. **Named evidence/example:** to your thesis, stated fairly and at full strength, not a weak "straw man" version easy to knock down. It is a position, and in a good essay it is stated as its own advocate would state it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 2 - 10 MARKS

Question: Distinguish the valid method from its closest misuse in Argument, Counterargument and Synthesis. Answer in about 150 words.

Model thesis: **Claim:** Core terms in plain language - 2. **Named evidence/example:** on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move, and it can succeed without the objection disappearing. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language - 3. **Named evidence/example:** each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome, and it is not the same as splitting the difference. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing.
- each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference.

Qualified conclusion: Claim: Core terms in plain language - 2. **Named evidence/example:** on a false premise, applies only under conditions that do not hold here, or has been over-generalised. A rebuttal is a move , and it can succeed without the objection disappearing. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language - 3. **Named evidence/example:** each side governs, incorporating what is valid in the counter-view while still defending a version of the original thesis. A synthesis is an outcome , and it is not the same as splitting the difference. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 3 - 15 MARKS

Question: Apply Argument, Counterargument and Synthesis to one philosophical UPSC Essay prompt. Answer in about 250 words.

Model thesis: Claim: Core terms in plain language - 4. **Named evidence/example:** COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language - 5. **Named evidence/example:** Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Exam facts / source basis. **Named evidence/example:** handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** The central idea and common misreading. **Named evidence/example:** Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not."
- Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some

bounded form, which is precisely what gives the synthesis something to resolve.

- handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md).
- Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement.

Qualified conclusion: Claim: Core terms in plain language - 4. **Named evidence/example:** COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language - 5. **Named evidence/example:** Three common collapses: stating a counterargument and calling it balance (no rebuttal); rebutting without synthesising (the objection is defeated but nothing is learned); and presenting a synthesis with no counterargument behind it (a resolution to a conflict never actually staged). A rebuttal that fully destroys the objection usually signals the objection was too weak - the best counterarguments survive rebuttal in some bounded form, which is precisely what gives the synthesis something to resolve. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Exam facts / source basis. **Named evidence/example:** handled; no official rubric rewards or penalises a specific counterargument format (see ../README.md). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** The central idea and common misreading. **Named evidence/example:** Central idea: a thesis is strengthened, not weakened, by confronting its best objection directly and showing how the argument still holds (with a qualification) once that objection is considered. Common misreading: either ignoring counter-views entirely (one-sided moralising) or presenting a counter-view merely to reject it dismissively without genuine engagement - both under-use the paper's test of balanced judgement. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 4 - 15 MARKS

Question: Apply Argument, Counterargument and Synthesis to one issue-based or hybrid UPSC Essay prompt. Answer in about 250 words.

Model thesis: Claim: Basic decomposition questions. **Named evidence/example:** 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** India-first illustration starters. **Named evidence/example:** Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis options and selection. **Named evidence/example:** If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric,

compulsory formula or model answer. **Claim:** Simple essay architecture. **Named evidence/example:** Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged?
- Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. Full discipline: 12.
- If the counter-view turns out to be stronger than your original thesis can withstand, revise the thesis's qualification (see 05) rather than ignoring the objection - a thesis that survives its strongest objection, suitably qualified, is more defensible than one that never faced it.
- Place the counter-view/synthesis as one distinct paragraph (or two) after the main argument-map cycles and before the conclusion - see 07 for exact sequencing.

Qualified conclusion: Claim: Basic decomposition questions. **Named evidence/example:** 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** India-first illustration starters. **Named evidence/example:** Recall one Indian illustration for the counter-view itself, not only for the original thesis - e.g. a documented instance where excessive caution (not boldness) caused harm, to genuinely test the "doing nothing" thesis. ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate the limits, counter-cases and repair protocol for Argument, Counterargument and Synthesis. Answer in about 300 words.

Model thesis: Claim: Opening, body and closure moves. **Named evidence/example:** Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves. **Named evidence/example:** where a serious objection exists). ->

Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Advanced proposition and boundary. **Named evidence/example:** Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy. **Named evidence/example:** thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Levels of analysis and temporal-spatial scale. **Named evidence/example:** Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis.
- where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle.
- Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. Boundary: this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself.
- thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions.
- Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away.

Qualified conclusion: Claim: Opening, body and closure moves. **Named evidence/example:** Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic.

Qualification: It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves. **Named evidence/example:** where a serious objection exists). -> Repair: use Section 5's Q1-Q2 to test the thesis; where no separate counter-view paragraph is needed, integrate the qualification into the relevant argument cycle. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Advanced proposition and boundary. **Named evidence/example:** Proposition: Core 08 supplies two simple, evidence-disciplined mini-cycles. This companion keeps the optional harder task: dialectical synthesis is strongest

when the counter-claim is drawn from a genuinely different value or mechanism than the thesis, not merely a softened restatement of it - real tension produces real synthesis. **Boundary:** this topic does not construct the original thesis (05) or decide paragraph placement (07) - it supplies the counter-argument-and-synthesis content itself. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy. **Named evidence/example:** thesis and counter-claim, but a reframing that shows both are correct under different, now-specified conditions. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Levels of analysis and temporal-spatial scale. **Named evidence/example:** Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 6 - 20 MARKS

Question: Construct an examiner-ready answer architecture using Argument, Counterargument and Synthesis. Answer in about 300 words.

Model thesis: **Claim:** Purpose and scope. **Named evidence/example:** This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Core terms in plain language - 4. **Named evidence/example:** COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Basic decomposition questions. **Named evidence/example:** 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Opening, body and closure moves. **Named evidence/example:** Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Levels of analysis and temporal-spatial scale. **Named evidence/example:** Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Stakeholder map and distributional effects. **Named evidence/example:** For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents -

e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Causality, mechanisms and feedback loops. **Named evidence/example:** THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Causality, mechanisms and feedback loops - 2. **Named evidence/example:** The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging.
- COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not."
- 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged?
- Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis.
- Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away.
- For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position.
- THESIS (mechanism A supports claim X) v STRONG COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition)
- The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything.

Qualified conclusion: Claim: Purpose and scope. **Named evidence/example:** This topic teaches the counter-view/synthesis step of the argument map (05) in depth - how to state a real objection, engage it fairly, and resolve it, rather than dismissing it or leaving it hanging. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It

remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim: Core terms in plain language - 4. **Named evidence/example:** COUNTERARGUMENT "Some errors are irreversible and catastrophic." (stated at full strength; not yet answered) v REBUTTAL "That is true of a narrow class of decisions - irreversibility, not error itself, is the danger." v SYNTHESIS "So: prefer experimentation where error is reversible and safeguarded; apply precaution where it is not." **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim: Basic decomposition questions. **Named evidence/example:** 1. What is the single strongest objection a fair-minded reader could raise against my thesis? 2. Is there a genuine trade-off my thesis requires accepting (not just a minor caveat)? 3. What does the objection get right, even partially? 4. How does my synthesis incorporate that partial truth while still defending my central claim? 5. Does my synthesis avoid simply restating my original thesis unchanged? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Opening, body and closure moves. **Named evidence/example:** Introduce the counter-view with a fair, non-dismissive phrase ("A reasonable objection holds that"), develop it briefly with its own mechanism/illustration, then pivot to synthesis ("Yet this need not defeat the broader claim, because"). Avoid closing the counter-view paragraph without a clear pivot back to your thesis.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Levels of analysis and temporal-spatial scale.

Named evidence/example: Test whether the counter-claim operates at the same scale as the thesis or a different one - e.g. for 2024-B7, the thesis may hold at the scale of moral/political principle (simple) while the counter-claim holds at the scale of implementation mechanics (complex); recognising this scale-shift is itself the synthesis ("simple compass, sophisticated implementation"), rather than a contradiction to be argued away. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Stakeholder map and distributional effects. **Named evidence/example:** For value-conflict theses (2025-B8 contentment/luxury; 2024-B6 power/ character), identify which stakeholder's interest the counter-claim represents - e.g. the counter-claim to "contentment is natural wealth" might represent the interests of those still below a basic sufficiency threshold, for whom aspiration is not luxury but legitimate need. A synthesis should explicitly preserve this stakeholder's claim (e.g. sufficiency-with-equity) rather than universalising a comfortable position. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Causality, mechanisms and feedback loops. **Named evidence/example:** THESIS (mechanism A supports claim X) v STRONG

COUNTER-CLAIM (mechanism B supports NOT-X, or a different X') v IDENTIFY THE CONDITION under which each mechanism dominates (e.g. reversibility, urgency, existing sufficiency level, disciplined vs undisciplined form) v HIGHER SYNTHESIS: state which mechanism governs under which condition (not "both are somewhat true" - name the actual switching condition) **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Causality, mechanisms and feedback loops - 2. **Named evidence/example:** The switching condition (the "identify the condition" step) is the single most valuable output of this process - an essay that skips it and simply asserts "there is truth on both sides" has not actually synthesised anything. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.
