

SOLVED PRACTICE WORKBOOK

Cross-Sector Lenses and Scale - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Cross-Sector Lenses and Scale - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which option applies Purpose and scope as an Essay-method distinction?	6
Q2. Which use of Purpose and scope stays closest to the printed prompt?	6
Q3. Which statement preserves the strategy-versus-official-rule boundary for Purpose and scope?	6
Q4. Which option avoids the standard Essay-method trap about Purpose and scope?	6
Q5. Which option applies Exam facts / source basis as an Essay-method distinction?	7
Q6. Which use of Exam facts / source basis stays closest to the printed prompt?	7
Q7. Which statement preserves the strategy-versus-official-rule boundary for Exam facts / source basis?	7
Q8. Which option avoids the standard Essay-method trap about Exam facts / source basis?	7
Q9. Which option applies The central idea and common misreading as an Essay-method distinction?	7
Q10. Which use of The central idea and common misreading stays closest to the printed prompt?	8
Q11. Which statement preserves the strategy-versus-official-rule boundary for The central idea and common misreading?	8
Q12. Which option avoids the standard Essay-method trap about The central idea and common misreading?	8
Q13. Which option applies Basic decomposition questions as an Essay-method distinction?	9
Q14. Which use of Basic decomposition questions stays closest to the printed prompt?	9
Q15. Which statement preserves the strategy-versus-official-rule boundary for Basic decomposition questions?	9
Q16. Which option avoids the standard Essay-method trap about Basic decomposition questions?	10
Q17. Which option applies Dimension-expansion grid as an Essay-method distinction?	10
Q18. Which use of Dimension-expansion grid stays closest to the printed prompt?	10
Q19. Which statement preserves the strategy-versus-official-rule boundary for Dimension-expansion grid?	10
Q20. Which option avoids the standard Essay-method trap about Dimension-expansion grid?	11
Q21. Which option applies Dimension-expansion grid - 2 as an Essay-method distinction?	11
Q22. Which use of Dimension-expansion grid - 2 stays closest to the printed prompt?	11
Q23. Which statement preserves the strategy-versus-official-rule boundary for Dimension-expansion grid - 2?	11
Q24. Which option avoids the standard Essay-method trap about Dimension-expansion grid - 2?	12
Q25. Which option applies Dimension-expansion grid - 3 as an Essay-method distinction?	12
Q26. Which use of Dimension-expansion grid - 3 stays closest to the printed prompt?	12
Q27. Which statement preserves the strategy-versus-official-rule boundary for Dimension-expansion grid - 3?	12

Q28. Which option avoids the standard Essay-method trap about Dimension-expansion grid - 3?	13
Q29. Which option applies India-first illustration starters as an Essay-method distinction?	13
Q30. Which use of India-first illustration starters stays closest to the printed prompt?	13
Q31. Which statement preserves the strategy-versus-official-rule boundary for India-first illustration starters?	13
Q32. Which option avoids the standard Essay-method trap about India-first illustration starters?	14
Q33. Which option applies Thesis options and selection as an Essay-method distinction?	14
Q34. Which use of Thesis options and selection stays closest to the printed prompt?	14
Q35. Which statement preserves the strategy-versus-official-rule boundary for Thesis options and selection?	14
Q36. Which option avoids the standard Essay-method trap about Thesis options and selection?	15
Q37. Which option applies Simple essay architecture as an Essay-method distinction?	15
Q38. Which use of Simple essay architecture stays closest to the printed prompt?	15
Q39. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture?	15
Q40. Which option avoids the standard Essay-method trap about Simple essay architecture?	16
Q41. Which option applies Simple essay architecture - 2 as an Essay-method distinction?	16
Q42. Which use of Simple essay architecture - 2 stays closest to the printed prompt?	16
Q43. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture - 2?	17
Q44. Which option avoids the standard Essay-method trap about Simple essay architecture - 2?	17
Q45. Which option applies Opening, body and closure moves as an Essay-method distinction?	18
Q46. Which use of Opening, body and closure moves stays closest to the printed prompt?	18
Q47. Which statement preserves the strategy-versus-official-rule boundary for Opening, body and closure moves?	18
Q48. Which option avoids the standard Essay-method trap about Opening, body and closure moves?	18
Q49. Which option applies Traps and repair moves as an Essay-method distinction?	19
Q50. Which use of Traps and repair moves stays closest to the printed prompt?	19
Q51. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves?	19
Q52. Which option avoids the standard Essay-method trap about Traps and repair moves?	19
Q53. Which option applies Traps and repair moves - 2 as an Essay-method distinction?	19
Q54. Which use of Traps and repair moves - 2 stays closest to the printed prompt?	20
Q55. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves - 2?	20
Q56. Which option avoids the standard Essay-method trap about Traps and repair moves - 2?	20
Q57. Which option applies Advanced proposition and boundary as an Essay-method distinction?	20
Q58. Which use of Advanced proposition and boundary stays closest to the printed prompt?	21
Q59. Which statement preserves the strategy-versus-official-rule boundary for Advanced proposition and boundary?	21

Q60. Which option avoids the standard Essay-method trap about Advanced proposition and boundary?	21
Q61. Which option applies Concept definition and taxonomy as an Essay-method distinction?	22
Q62. Which use of Concept definition and taxonomy stays closest to the printed prompt?	22
Q63. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy?	22
Q64. Which option avoids the standard Essay-method trap about Concept definition and taxonomy?	22
Q65. Which option applies Concept definition and taxonomy - 2 as an Essay-method distinction?	23
Q66. Which use of Concept definition and taxonomy - 2 stays closest to the printed prompt?	23
Q67. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy - 2?	23
Q68. Which option avoids the standard Essay-method trap about Concept definition and taxonomy - 2?	23
Q69. Which option applies Tension pairs and hidden assumptions as an Essay-method distinction?	24
Q70. Which use of Tension pairs and hidden assumptions stays closest to the printed prompt?	24
Q71. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions?	24
Q72. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions?	24
Q73. Which option applies Tension pairs and hidden assumptions - 2 as an Essay-method distinction?	24
Q74. Which use of Tension pairs and hidden assumptions - 2 stays closest to the printed prompt?	25
Q75. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions - 2?	25
Q76. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions - 2?	25
Q77. Which option applies Levels of analysis and temporal-spatial scale as an Essay-method distinction?	25
Q78. Which use of Levels of analysis and temporal-spatial scale stays closest to the printed prompt?	26
Q79. Which statement preserves the strategy-versus-official-rule boundary for Levels of analysis and temporal-spatial scale?	26
Q80. Which option avoids the standard Essay-method trap about Levels of analysis and temporal-spatial scale?	26

Cross-Sector Lenses and Scale - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which option applies Purpose and scope as an Essay-method distinction?

A. This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. B. Use Purpose and scope to add more headings or dimensions without testing coherence. C. Treat Purpose and scope as a compulsory UPSC formula even when it distorts the prompt. D. Replace Purpose and scope with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q2. Which use of Purpose and scope stays closest to the printed prompt?

A. Use Purpose and scope while dropping the prompt's operator, qualifier or scale. B. This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. C. Let a striking anecdote or quotation determine Purpose and scope regardless of thesis fit. D. Apply Purpose and scope only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q3. Which statement preserves the strategy-versus-official-rule boundary for Purpose and scope?

A. Use Purpose and scope to avoid stating a serious counter-case or qualification. B. Present Purpose and scope as an official marking rule rather than a pedagogical scaffold. C. This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. D. Support Purpose and scope with an unverified statistic, attribution or current claim.

Answer: C. Explanation: This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q4. Which option avoids the standard Essay-method trap about Purpose and scope?

A. Allow an exception discovered through Purpose and scope to replace the central proposition. B. Silently tidy the printed prompt before applying Purpose and scope to make it easier to answer. C. Maximise the number of outputs produced by Purpose and scope, even if they repeat one claim. D. This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth.

Answer: D. Explanation: This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without

coherence and evidence safety.

Q5. Which option applies Exam facts / source basis as an Essay-method distinction?

A. tools built from this folder's own reading of the 16 recent prompts, not an official requirement. B. Replace Exam facts / source basis with a familiar adjacent GS topic and maximise factual coverage. C. Use Exam facts / source basis to add more headings or dimensions without testing coherence. D. Treat Exam facts / source basis as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: tools built from this folder's own reading of the 16 recent prompts, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q6. Which use of Exam facts / source basis stays closest to the printed prompt?

A. Use Exam facts / source basis while dropping the prompt's operator, qualifier or scale. B. tools built from this folder's own reading of the 16 recent prompts, not an official requirement. C. Apply Exam facts / source basis only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Exam facts / source basis regardless of thesis fit.

Answer: B. Explanation: tools built from this folder's own reading of the 16 recent prompts, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q7. Which statement preserves the strategy-versus-official-rule boundary for Exam facts / source basis?

A. Present Exam facts / source basis as an official marking rule rather than a pedagogical scaffold. B. Use Exam facts / source basis to avoid stating a serious counter-case or qualification. C. tools built from this folder's own reading of the 16 recent prompts, not an official requirement. D. Support Exam facts / source basis with an unverified statistic, attribution or current claim.

Answer: C. Explanation: tools built from this folder's own reading of the 16 recent prompts, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q8. Which option avoids the standard Essay-method trap about Exam facts / source basis?

A. Silently tidy the printed prompt before applying Exam facts / source basis to make it easier to answer. B. Maximise the number of outputs produced by Exam facts / source basis, even if they repeat one claim. C. Allow an exception discovered through Exam facts / source basis to replace the central proposition. D. tools built from this folder's own reading of the 16 recent prompts, not an official requirement.

Answer: D. Explanation: tools built from this folder's own reading of the 16 recent prompts, not an official requirement. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q9. Which option applies The central idea and common misreading as an Essay-method distinction?

A. Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. B. Replace The central idea and common misreading with a familiar adjacent GS topic and maximise factual coverage. C. Use The central idea and common misreading to add more headings or dimensions without testing coherence. D. Treat The central idea and common misreading as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass

through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. **Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.**

Q10. Which use of The central idea and common misreading stays closest to the printed prompt?

A. Use The central idea and common misreading while dropping the prompt's operator, qualifier or scale. B. Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. C. Apply The central idea and common misreading only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine The central idea and common misreading regardless of thesis fit.

Answer: B. Explanation: Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q11. Which statement preserves the strategy-versus-official-rule boundary for The central idea and common misreading?

A. Use The central idea and common misreading to avoid stating a serious counter-case or qualification. B. Support The central idea and common misreading with an unverified statistic, attribution or current claim. C. Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. D. Present The central idea and common misreading as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q12. Which option avoids the standard Essay-method trap about The central idea and common misreading?

A. Silently tidy the printed prompt before applying The central idea and common misreading to make it easier to answer. B. Maximise the number of outputs produced by The central idea and common misreading, even if they repeat one claim. C. Allow an exception discovered through The central idea and common misreading to replace the central proposition. D. Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one.

Answer: D. Explanation: Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict.

Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q13. Which option applies Basic decomposition questions as an Essay-method distinction?

A. 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? B. Use Basic decomposition questions to add more headings or dimensions without testing coherence. C. Treat Basic decomposition questions as a compulsory UPSC formula even when it distorts the prompt. D. Replace Basic decomposition questions with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q14. Which use of Basic decomposition questions stays closest to the printed prompt?

A. Use Basic decomposition questions while dropping the prompt's operator, qualifier or scale. B. 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? C. Apply Basic decomposition questions only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Basic decomposition questions regardless of thesis fit.

Answer: B. Explanation: 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q15. Which statement preserves the strategy-versus-official-rule boundary for Basic decomposition questions?

A. Present Basic decomposition questions as an official marking rule rather than a pedagogical scaffold. B. Use Basic decomposition questions to avoid stating a serious counter-case or qualification. C. 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? D. Support Basic decomposition questions with an unverified statistic, attribution or current claim.

Answer: C. Explanation: 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q16. Which option avoids the standard Essay-method trap about Basic decomposition questions?

A. Allow an exception discovered through Basic decomposition questions to replace the central proposition. B. Maximise the number of outputs produced by Basic decomposition questions, even if they repeat one claim. C. Silently tidy the printed prompt before applying Basic decomposition questions to make it easier to answer. D. 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens?

Answer: D. Explanation: 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q17. Which option applies Dimension-expansion grid as an Essay-method distinction?

A. For an unfamiliar prompt such as "A society that automates choice may weaken judgment" , use a real causal hand-off, not three parallel labels B. Replace Dimension-expansion grid with a familiar adjacent GS topic and maximise factual coverage. C. Treat Dimension-expansion grid as a compulsory UPSC formula even when it distorts the prompt. D. Use Dimension-expansion grid to add more headings or dimensions without testing coherence.

Answer: A. Explanation: For an unfamiliar prompt such as "A society that automates choice may weaken judgment" , use a real causal hand-off, not three parallel labels The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q18. Which use of Dimension-expansion grid stays closest to the printed prompt?

A. Use Dimension-expansion grid while dropping the prompt's operator, qualifier or scale. B. For an unfamiliar prompt such as "A society that automates choice may weaken judgment" , use a real causal hand-off, not three parallel labels C. Apply Dimension-expansion grid only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Dimension-expansion grid regardless of thesis fit.

Answer: B. Explanation: For an unfamiliar prompt such as "A society that automates choice may weaken judgment" , use a real causal hand-off, not three parallel labels The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q19. Which statement preserves the strategy-versus-official-rule boundary for Dimension-expansion grid?

A. Present Dimension-expansion grid as an official marking rule rather than a pedagogical scaffold. B. Support Dimension-expansion grid with an unverified statistic, attribution or current claim. C. For an unfamiliar prompt such as "A society that automates choice may weaken judgment" , use a real causal hand-off, not three parallel labels D. Use Dimension-expansion grid to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: For an unfamiliar prompt such as "A society that automates choice may weaken judgment" , use a real causal hand-off, not three parallel labels The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q20. Which option avoids the standard Essay-method trap about Dimension-expansion grid?

A. Maximise the number of outputs produced by Dimension-expansion grid, even if they repeat one claim. B. Allow an exception discovered through Dimension-expansion grid to replace the central proposition. C. Silently tidy the printed prompt before applying Dimension-expansion grid to make it easier to answer. D. For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels

Answer: D. Explanation: For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q21. Which option applies Dimension-expansion grid - 2 as an Essay-method distinction?

A. Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight B. Replace Dimension-expansion grid - 2 with a familiar adjacent GS topic and maximise factual coverage. C. Use Dimension-expansion grid - 2 to add more headings or dimensions without testing coherence. D. Treat Dimension-expansion grid - 2 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q22. Which use of Dimension-expansion grid - 2 stays closest to the printed prompt?

A. Apply Dimension-expansion grid - 2 only after drafting, when topic drift can no longer be prevented. B. Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight C. Let a striking anecdote or quotation determine Dimension-expansion grid - 2 regardless of thesis fit. D. Use Dimension-expansion grid - 2 while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q23. Which statement preserves the strategy-versus-official-rule boundary for Dimension-expansion grid - 2?

A. Present Dimension-expansion grid - 2 as an official marking rule rather than a pedagogical scaffold. B. Support Dimension-expansion grid - 2 with an unverified statistic, attribution or current claim. C. Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight D. Use Dimension-expansion grid - 2 to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q24. Which option avoids the standard Essay-method trap about Dimension-expansion grid - 2?

A. Silently tidy the printed prompt before applying Dimension-expansion grid - 2 to make it easier to answer. B. Allow an exception discovered through Dimension-expansion grid - 2 to replace the central proposition. C. Maximise the number of outputs produced by Dimension-expansion grid - 2, even if they repeat one claim. D. Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight

Answer: D. Explanation: Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q25. Which option applies Dimension-expansion grid - 3 as an Essay-method distinction?

A. Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. B. Replace Dimension-expansion grid - 3 with a familiar adjacent GS topic and maximise factual coverage. C. Treat Dimension-expansion grid - 3 as a compulsory UPSC formula even when it distorts the prompt. D. Use Dimension-expansion grid - 3 to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q26. Which use of Dimension-expansion grid - 3 stays closest to the printed prompt?

A. Use Dimension-expansion grid - 3 while dropping the prompt's operator, qualifier or scale. B. Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. C. Let a striking anecdote or quotation determine Dimension-expansion grid - 3 regardless of thesis fit. D. Apply Dimension-expansion grid - 3 only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q27. Which statement preserves the strategy-versus-official-rule boundary for Dimension-expansion grid - 3?

A. Present Dimension-expansion grid - 3 as an official marking rule rather than a pedagogical scaffold. B. Use Dimension-expansion grid - 3 to avoid stating a serious counter-case or qualification. C. Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. D. Support Dimension-expansion grid - 3 with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. The other options convert a qualified writing method into an official formula,

permit topic drift, or reward quantity without coherence and evidence safety.

Q28. Which option avoids the standard Essay-method trap about Dimension-expansion grid - 3?

A. Maximise the number of outputs produced by Dimension-expansion grid - 3, even if they repeat one claim. B. Allow an exception discovered through Dimension-expansion grid - 3 to replace the central proposition. C. Silently tidy the printed prompt before applying Dimension-expansion grid - 3 to make it easier to answer. D. Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses.

Answer: D. Explanation: Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q29. Which option applies India-first illustration starters as an Essay-method distinction?

A. For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. B. Replace India-first illustration starters with a familiar adjacent GS topic and maximise factual coverage. C. Use India-first illustration starters to add more headings or dimensions without testing coherence. D. Treat India-first illustration starters as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q30. Which use of India-first illustration starters stays closest to the printed prompt?

A. Apply India-first illustration starters only after drafting, when topic drift can no longer be prevented. B. For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. C. Use India-first illustration starters while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine India-first illustration starters regardless of thesis fit.

Answer: B. Explanation: For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q31. Which statement preserves the strategy-versus-official-rule boundary for India-first illustration starters?

A. Present India-first illustration starters as an official marking rule rather than a pedagogical scaffold. B. Support India-first illustration starters with an unverified statistic, attribution or current claim. C. For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. D. Use India-first illustration starters to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q32. Which option avoids the standard Essay-method trap about India-first illustration starters?

A. Silently tidy the printed prompt before applying India-first illustration starters to make it easier to answer. B. Maximise the number of outputs produced by India-first illustration starters, even if they repeat one claim. C. Allow an exception discovered through India-first illustration starters to replace the central proposition. D. For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12.

Answer: D. Explanation: For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q33. Which option applies Thesis options and selection as an Essay-method distinction?

A. Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. B. Replace Thesis options and selection with a familiar adjacent GS topic and maximise factual coverage. C. Treat Thesis options and selection as a compulsory UPSC formula even when it distorts the prompt. D. Use Thesis options and selection to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q34. Which use of Thesis options and selection stays closest to the printed prompt?

A. Use Thesis options and selection while dropping the prompt's operator, qualifier or scale. B. Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. C. Let a striking anecdote or quotation determine Thesis options and selection regardless of thesis fit. D. Apply Thesis options and selection only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q35. Which statement preserves the strategy-versus-official-rule boundary for Thesis options and selection?

A. Support Thesis options and selection with an unverified statistic, attribution or current claim. B. Present Thesis options and selection as an official marking rule rather than a pedagogical scaffold. C. Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. D. Use Thesis options and selection to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q36. Which option avoids the standard Essay-method trap about Thesis options and selection?

A. Maximise the number of outputs produced by Thesis options and selection, even if they repeat one claim. B. Silently tidy the printed prompt before applying Thesis options and selection to make it easier to answer. C. Allow an exception discovered through Thesis options and selection to replace the central proposition. D. Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive.

Answer: D. Explanation: Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q37. Which option applies Simple essay architecture as an Essay-method distinction?

A. Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. B. Treat Simple essay architecture as a compulsory UPSC formula even when it distorts the prompt. C. Replace Simple essay architecture with a familiar adjacent GS topic and maximise factual coverage. D. Use Simple essay architecture to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q38. Which use of Simple essay architecture stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Simple essay architecture regardless of thesis fit. B. Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. C. Apply Simple essay architecture only after drafting, when topic drift can no longer be prevented. D. Use Simple essay architecture while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q39. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture?

A. Use Simple essay architecture to avoid stating a serious counter-case or qualification. B. Support Simple essay architecture with an unverified statistic, attribution or current claim. C. Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. D. Present Simple essay architecture as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q40. Which option avoids the standard Essay-method trap about Simple essay architecture?

A. Maximise the number of outputs produced by Simple essay architecture, even if they repeat one claim. B. Silently tidy the printed prompt before applying Simple essay architecture to make it easier to answer. C. Allow an exception discovered through Simple essay architecture to replace the central proposition. D. Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse.

Answer: D. Explanation: Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q41. Which option applies Simple essay architecture - 2 as an Essay-method distinction?

A. 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. B. Replace Simple essay architecture - 2 with a familiar adjacent GS topic and maximise factual coverage. C. Use Simple essay architecture - 2 to add more headings or dimensions without testing coherence. D. Treat Simple essay architecture - 2 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q42. Which use of Simple essay architecture - 2 stays closest to the printed prompt?

A. Use Simple essay architecture - 2 while dropping the prompt's operator, qualifier or scale. B. 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. C. Let a striking anecdote or quotation determine Simple essay architecture - 2 regardless of thesis fit. D. Apply Simple essay architecture - 2 only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining

power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q43. Which statement preserves the strategy-versus-official-rule boundary for Simple essay architecture - 2?

A. Use Simple essay architecture - 2 to avoid stating a serious counter-case or qualification. B. Present Simple essay architecture - 2 as an official marking rule rather than a pedagogical scaffold. C. 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. D. Support Simple essay architecture - 2 with an unverified statistic, attribution or current claim.

Answer: C. Explanation: 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q44. Which option avoids the standard Essay-method trap about Simple essay architecture - 2?

A. Silently tidy the printed prompt before applying Simple essay architecture - 2 to make it easier to answer. B. Allow an exception discovered through Simple essay architecture - 2 to replace the central proposition. C. Maximise the number of outputs produced by Simple essay architecture - 2, even if they repeat one claim. D. 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices.

Answer: D. Explanation: 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. The other options convert

a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q45. Which option applies Opening, body and closure moves as an Essay-method distinction?

A. Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. B. Use Opening, body and closure moves to add more headings or dimensions without testing coherence. C. Treat Opening, body and closure moves as a compulsory UPSC formula even when it distorts the prompt. D. Replace Opening, body and closure moves with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q46. Which use of Opening, body and closure moves stays closest to the printed prompt?

A. Use Opening, body and closure moves while dropping the prompt's operator, qualifier or scale. B. Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. C. Let a striking anecdote or quotation determine Opening, body and closure moves regardless of thesis fit. D. Apply Opening, body and closure moves only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q47. Which statement preserves the strategy-versus-official-rule boundary for Opening, body and closure moves?

A. Support Opening, body and closure moves with an unverified statistic, attribution or current claim. B. Use Opening, body and closure moves to avoid stating a serious counter-case or qualification. C. Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. D. Present Opening, body and closure moves as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q48. Which option avoids the standard Essay-method trap about Opening, body and closure moves?

A. Silently tidy the printed prompt before applying Opening, body and closure moves to make it easier to answer. B. Maximise the number of outputs produced by Opening, body and closure moves, even if they repeat one claim. C. Allow an exception discovered through Opening, body and closure moves to replace the central proposition. D. Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent.

Answer: D. Explanation: Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q49. Which option applies Traps and repair moves as an Essay-method distinction?

A. "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. B. Use Traps and repair moves to add more headings or dimensions without testing coherence. C. Replace Traps and repair moves with a familiar adjacent GS topic and maximise factual coverage. D. Treat Traps and repair moves as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q50. Which use of Traps and repair moves stays closest to the printed prompt?

A. Apply Traps and repair moves only after drafting, when topic drift can no longer be prevented. B. "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. C. Use Traps and repair moves while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Traps and repair moves regardless of thesis fit.

Answer: B. Explanation: "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q51. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves?

A. Present Traps and repair moves as an official marking rule rather than a pedagogical scaffold. B. Support Traps and repair moves with an unverified statistic, attribution or current claim. C. "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. D. Use Traps and repair moves to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q52. Which option avoids the standard Essay-method trap about Traps and repair moves?

A. Allow an exception discovered through Traps and repair moves to replace the central proposition. B. Silently tidy the printed prompt before applying Traps and repair moves to make it easier to answer. C. Maximise the number of outputs produced by Traps and repair moves, even if they repeat one claim. D. "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting.

Answer: D. Explanation: "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q53. Which option applies Traps and repair moves - 2 as an Essay-method distinction?

A. at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. B. Use Traps and repair moves - 2 to add more headings or dimensions without testing coherence. C. Replace Traps and repair moves - 2 with a familiar adjacent GS topic and maximise factual coverage. D. Treat Traps and repair moves - 2 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q54. Which use of Traps and repair moves - 2 stays closest to the printed prompt?

A. Use Traps and repair moves - 2 while dropping the prompt's operator, qualifier or scale. B. at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. C. Apply Traps and repair moves - 2 only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Traps and repair moves - 2 regardless of thesis fit.

Answer: B. Explanation: at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q55. Which statement preserves the strategy-versus-official-rule boundary for Traps and repair moves - 2?

A. Present Traps and repair moves - 2 as an official marking rule rather than a pedagogical scaffold. B. Support Traps and repair moves - 2 with an unverified statistic, attribution or current claim. C. at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. D. Use Traps and repair moves - 2 to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q56. Which option avoids the standard Essay-method trap about Traps and repair moves - 2?

A. Maximise the number of outputs produced by Traps and repair moves - 2, even if they repeat one claim. B. Silently tidy the printed prompt before applying Traps and repair moves - 2 to make it easier to answer. C. Allow an exception discovered through Traps and repair moves - 2 to replace the central proposition. D. at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting.

Answer: D. Explanation: at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q57. Which option applies Advanced proposition and boundary as an Essay-method distinction?

A. Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. B. Treat Advanced proposition and boundary as a compulsory UPSC formula even when it distorts the prompt. C. Replace Advanced proposition and boundary with a familiar adjacent GS topic and maximise factual coverage. D. Use Advanced proposition and boundary to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q58. Which use of Advanced proposition and boundary stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Advanced proposition and boundary regardless of thesis fit. B. Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. C. Apply Advanced proposition and boundary only after drafting, when topic drift can no longer be prevented. D. Use Advanced proposition and boundary while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q59. Which statement preserves the strategy-versus-official-rule boundary for Advanced proposition and boundary?

A. Use Advanced proposition and boundary to avoid stating a serious counter-case or qualification. B. Support Advanced proposition and boundary with an unverified statistic, attribution or current claim. C. Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. D. Present Advanced proposition and boundary as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q60. Which option avoids the standard Essay-method trap about Advanced proposition and boundary?

A. Allow an exception discovered through Advanced proposition and boundary to replace the central proposition. B. Maximise the number of outputs produced by Advanced proposition and boundary, even if they repeat one claim. C. Silently tidy the printed prompt before applying Advanced proposition and boundary to make it easier to answer. D. Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline.

Answer: D. Explanation: Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q61. Which option applies Concept definition and taxonomy as an Essay-method distinction?

A. next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). B. Treat Concept definition and taxonomy as a compulsory UPSC formula even when it distorts the prompt. C. Replace Concept definition and taxonomy with a familiar adjacent GS topic and maximise factual coverage. D. Use Concept definition and taxonomy to add more headings or dimensions without testing coherence.

Answer: A. Explanation: next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q62. Which use of Concept definition and taxonomy stays closest to the printed prompt?

A. Apply Concept definition and taxonomy only after drafting, when topic drift can no longer be prevented. B. next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). C. Let a striking anecdote or quotation determine Concept definition and taxonomy regardless of thesis fit. D. Use Concept definition and taxonomy while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q63. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy?

A. Support Concept definition and taxonomy with an unverified statistic, attribution or current claim. B. Use Concept definition and taxonomy to avoid stating a serious counter-case or qualification. C. next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). D. Present Concept definition and taxonomy as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q64. Which option avoids the standard Essay-method trap about Concept definition and taxonomy?

A. Allow an exception discovered through Concept definition and taxonomy to replace the central proposition. B. Silently tidy the printed prompt before applying Concept definition and taxonomy to make it easier to answer. C. Maximise the number of outputs produced by Concept definition and taxonomy, even if they repeat one claim. D. next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability).

Answer: D. Explanation: next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q65. Which option applies Concept definition and taxonomy - 2 as an Essay-method distinction?

A. not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). B. Replace Concept definition and taxonomy - 2 with a familiar adjacent GS topic and maximise factual coverage. C. Treat Concept definition and taxonomy - 2 as a compulsory UPSC formula even when it distorts the prompt. D. Use Concept definition and taxonomy - 2 to add more headings or dimensions without testing coherence.

Answer: A. Explanation: not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q66. Which use of Concept definition and taxonomy - 2 stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Concept definition and taxonomy - 2 regardless of thesis fit. B. not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). C. Apply Concept definition and taxonomy - 2 only after drafting, when topic drift can no longer be prevented. D. Use Concept definition and taxonomy - 2 while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q67. Which statement preserves the strategy-versus-official-rule boundary for Concept definition and taxonomy - 2?

A. Use Concept definition and taxonomy - 2 to avoid stating a serious counter-case or qualification. B. Support Concept definition and taxonomy - 2 with an unverified statistic, attribution or current claim. C. not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). D. Present Concept definition and taxonomy - 2 as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q68. Which option avoids the standard Essay-method trap about Concept definition and taxonomy - 2?

A. Allow an exception discovered through Concept definition and taxonomy - 2 to replace the central proposition. B. Maximise the number of outputs produced by Concept definition and taxonomy - 2, even if they repeat one claim. C. Silently tidy the printed prompt before applying Concept definition and taxonomy - 2 to make it easier to answer. D. not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting).

Answer: D. Explanation: not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q69. Which option applies Tension pairs and hidden assumptions as an Essay-method distinction?

A. signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. B. Treat Tension pairs and hidden assumptions as a compulsory UPSC formula even when it distorts the prompt. C. Use Tension pairs and hidden assumptions to add more headings or dimensions without testing coherence. D. Replace Tension pairs and hidden assumptions with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q70. Which use of Tension pairs and hidden assumptions stays closest to the printed prompt?

A. Apply Tension pairs and hidden assumptions only after drafting, when topic drift can no longer be prevented. B. signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. C. Use Tension pairs and hidden assumptions while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Tension pairs and hidden assumptions regardless of thesis fit.

Answer: B. Explanation: signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q71. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions?

A. Present Tension pairs and hidden assumptions as an official marking rule rather than a pedagogical scaffold. B. Support Tension pairs and hidden assumptions with an unverified statistic, attribution or current claim. C. signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. D. Use Tension pairs and hidden assumptions to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q72. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions?

A. Allow an exception discovered through Tension pairs and hidden assumptions to replace the central proposition. B. Maximise the number of outputs produced by Tension pairs and hidden assumptions, even if they repeat one claim. C. Silently tidy the printed prompt before applying Tension pairs and hidden assumptions to make it easier to answer. D. signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones.

Answer: D. Explanation: signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q73. Which option applies Tension pairs and hidden assumptions - 2 as an Essay-method distinction?

A. every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. B. Replace Tension pairs and hidden assumptions - 2 with a familiar adjacent GS topic and maximise factual coverage. C. Use Tension pairs and hidden assumptions - 2 to add more headings or dimensions without testing coherence. D. Treat Tension pairs and hidden assumptions - 2 as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. The other options convert a qualified writing method into an official formula,

permit topic drift, or reward quantity without coherence and evidence safety.

Q74. Which use of Tension pairs and hidden assumptions - 2 stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Tension pairs and hidden assumptions - 2 regardless of thesis fit. B. every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. C. Apply Tension pairs and hidden assumptions - 2 only after drafting, when topic drift can no longer be prevented. D. Use Tension pairs and hidden assumptions - 2 while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q75. Which statement preserves the strategy-versus-official-rule boundary for Tension pairs and hidden assumptions - 2?

A. Present Tension pairs and hidden assumptions - 2 as an official marking rule rather than a pedagogical scaffold. B. Use Tension pairs and hidden assumptions - 2 to avoid stating a serious counter-case or qualification. C. every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. D. Support Tension pairs and hidden assumptions - 2 with an unverified statistic, attribution or current claim.

Answer: C. Explanation: every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q76. Which option avoids the standard Essay-method trap about Tension pairs and hidden assumptions - 2?

A. Silently tidy the printed prompt before applying Tension pairs and hidden assumptions - 2 to make it easier to answer. B. Allow an exception discovered through Tension pairs and hidden assumptions - 2 to replace the central proposition. C. Maximise the number of outputs produced by Tension pairs and hidden assumptions - 2, even if they repeat one claim. D. every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics.

Answer: D. Explanation: every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q77. Which option applies Levels of analysis and temporal-spatial scale as an Essay-method distinction?

A. For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. B. Treat Levels of analysis and temporal-spatial scale as a compulsory UPSC formula even when it distorts the prompt. C. Replace Levels of analysis and temporal-spatial scale with a familiar adjacent GS topic and maximise factual coverage. D. Use Levels of analysis and temporal-spatial scale to add more headings or dimensions without testing coherence.

Answer: A. Explanation: For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q78. Which use of Levels of analysis and temporal-spatial scale stays closest to the printed prompt?

- A. Let a striking anecdote or quotation determine Levels of analysis and temporal-spatial scale regardless of thesis fit. B. For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. C. Use Levels of analysis and temporal-spatial scale while dropping the prompt's operator, qualifier or scale. D. Apply Levels of analysis and temporal-spatial scale only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q79. Which statement preserves the strategy-versus-official-rule boundary for Levels of analysis and temporal-spatial scale?

- A. Present Levels of analysis and temporal-spatial scale as an official marking rule rather than a pedagogical scaffold. B. Use Levels of analysis and temporal-spatial scale to avoid stating a serious counter-case or qualification. C. For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. D. Support Levels of analysis and temporal-spatial scale with an unverified statistic, attribution or current claim.

Answer: C. Explanation: For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q80. Which option avoids the standard Essay-method trap about Levels of analysis and temporal-spatial scale?

- A. Maximise the number of outputs produced by Levels of analysis and temporal-spatial scale, even if they repeat one claim. B. Allow an exception discovered through Levels of analysis and temporal-spatial scale to replace the central proposition. C. Silently tidy the printed prompt before applying Levels of analysis and temporal-spatial scale to make it easier to answer. D. For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead.

Answer: D. Explanation: For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

Three application cards use the repository's explicit V1/V2 status. No unavailable official model answer, marking rubric or attribution is invented.

PYQ DEMAND CARD 1 - 2013-4 Essay

Demand: Science and Technology is the panacea for the growth and security of the nation.

Status: V2 carried-forward practice wording; re-check before verbatim use.

Model solution: Working thesis: Science and technology are powerful multipliers of growth and security, but never a panacea: outcomes depend on institutions, skills, equity, ecological limits and democratic accountability.

Productivity: Research and innovation can improve agriculture, industry, logistics and public services. **Human**

capability: Education and public health determine whether technology becomes broadly usable. **National security:**

Space, cyber, communications and surveillance capacities require legal and strategic restraint. **Employment:** Automation can displace tasks even as new sectors emerge, making reskilling and social protection essential.

Counter-view: Technological solutionism can shift risk, centralise power and distract from political or distributive causes. This is a repository-authored answer route, not an official model answer.

PYQ DEMAND CARD 2 - 2018-A1 Essay

Demand: Alternative technologies for a climate change resilient India.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Alternative technologies can strengthen India's climate resilience when they are locally appropriate, affordable and integrated with institutions and community knowledge; technology is an enabler of adaptation, not a substitute for ecological planning or social justice. **Resilient agriculture:** Drought-tolerant crops, micro-irrigation, soil monitoring and weather advisories can reduce climate-sensitive farm losses. **Distributed energy:** Decentralised renewable systems and storage can support essential services when central networks fail. **Water security:** Wastewater reuse, aquifer monitoring, rainwater harvesting and efficient treatment expand local buffers.

Risk information: Remote sensing, forecasting and last-mile warning systems improve preparedness only when alerts are trusted and actionable. **Counter-view:** Expensive imported systems, energy-intensive solutions and poorly governed infrastructure can create new dependencies or shift risk elsewhere. This is a repository-authored answer route, not an official model answer.

PYQ DEMAND CARD 3 - 2024-A3 Essay

Demand: There is no path to happiness, Happiness is the path.

Status: Exact V1 wording from a local official paper.

Model solution: Working thesis: Happiness is not merely a reward postponed until success is achieved; it is a quality of meaningful, ethical and attentive participation in life, though this insight must not romanticise deprivation or deny the material conditions required for dignity. **Process over destination:** Goals organise effort, but a life spent treating every present moment as a sacrifice can make achievement emotionally empty. **Meaningful action:** Work, learning and service generate deeper well-being when their daily practice itself expresses purpose. **Relationships:** Trust, friendship and care are lived processes; they cannot be accumulated later like material assets. **Ethical conduct:** Means shape character, so happiness pursued through exploitation or dishonesty undermines itself.

Counter-view: Some hardship is unavoidable and long-term projects require delayed gratification, so happiness cannot mean constant comfort or pleasure. This is a repository-authored answer route, not an official model answer.

COMPLETE MODEL ESSAYS

COMPLETE MODEL ESSAY 1 - 2013-4

Prompt: Science and Technology is the panacea for the growth and security of the nation.

Verification: V2 - carried-forward practice wording; not quoted as independently verified.

Model essay (991 words):

"Science and Technology is the panacea for the growth and security of the nation." is not a decorative slogan but a proposition about how human choices, institutions and consequences relate. Science and technology are powerful multipliers of growth and security, but never a panacea: outcomes depend on institutions, skills, equity, ecological limits and democratic accountability. This reading keeps the discussion centred on the prompt while using society, polity, economy, technology, environment, education, health, culture, IR as a method rather than as visible scaffolding.

At the level of the person, **productivity** clarifies the proposition. Research and innovation can improve agriculture, industry, logistics and public services. A useful illustration is India's scientific institutions and public digital systems, whose benefits depend on access and accountability; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The personal insight becomes social, **human capability** clarifies the proposition. Education and public health determine whether technology becomes broadly usable. A useful illustration is India's scientific institutions and public digital systems, whose benefits depend on access and accountability; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

Institutions then determine, **national security** clarifies the proposition. Space, cyber, communications and surveillance capacities require legal and strategic restraint. A useful illustration is India's educational, scientific and public-health institutions; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The argument also changes across time, **employment** clarifies the proposition. Automation can displace tasks even as new sectors emerge, making reskilling and social protection essential. A useful illustration is India's self-help-group and cooperative experience, which converts association into practical capability; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

An Indian and democratic perspective adds, **inclusion** clarifies the proposition. Digital systems widen opportunity only where access, language, affordability and grievance redress exist. A useful illustration is India's scientific institutions and public digital systems, whose benefits depend on access and accountability; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

The widest test is ethical and intergenerational, **resilience** clarifies the proposition. Climate and disaster technologies work best with local knowledge and capable institutions. A useful illustration is the Chipko tradition of community stewardship and the IPCC's evidence-led climate-risk framework; its value lies not in name-dropping but in showing how an idea becomes capability, incentive, restraint or exclusion. Yet the illustration must remain proportionate: it supports this part of the argument and cannot by itself prove a universal claim. The paragraph therefore returns to the central thesis and prepares the next change of scale.

A serious essay must now confront the strongest objection. Technological solutionism can shift risk, centralise power and distract from political or distributive causes. This objection deserves to be stated in its strongest form because a weak caricature produces only a ceremonial rebuttal. It changes the argument by identifying the condition under which

the prompt fails, becomes incomplete or generates unequal costs. The response is therefore not to abandon the thesis, but to qualify its reach, specify safeguards and distinguish a defensible principle from its simplistic imitation.

The synthesis follows from that qualification. Individual agency matters, but institutions shape the options within which agency operates. Material capacity matters, but dignity and justice determine whether capacity is worthwhile. National action matters, but ecological and international interdependence prevent self-contained solutions. This is why GS knowledge must enter the essay as analysed evidence rather than as a catalogue of constitutional articles, schemes, reports or sectors.

India makes this synthesis concrete because diversity, unequal capability and democratic aspiration coexist at every scale. The Constitution's language of justice, liberty, equality and fraternity supplies a normative direction, but constitutional vocabulary earns its place only when the essay explains a mechanism: how rights restrain power, how public capability widens agency, how local participation corrects distant administration, or how scientific temper enables revision. Likewise, an example from social reform, cooperative action, public health, education, technology or ecology should illuminate one claim rather than stand as a miniature GS note. This discipline allows an India-centric essay to remain reflective and universal without becoming abstract, celebratory or scheme-heavy. It also preserves balance by connecting aspiration to capacity, rights to remedies, and public purpose to accountable implementation.

Technology is not the medicine for every national problem; it is an instrument whose public value depends on scientific temper, human capability and constitutional governance. The prompt is thus neither accepted as an absolute nor dissolved into a balanced list. Its insight survives in a more precise form: one that connects character with institutions, freedom with responsibility, innovation with justice, and present action with the future. That sustained central argument gives the essay coherence, while careful evidence, transitions and qualification give it credibility.

ORIGINAL MAINS 1 - 10 MARKS

Question: Define the core writing problem in Cross-Sector Lenses and Scale. Answer in about 150 words.

Model thesis: Claim: Purpose and scope. **Named evidence/example:** This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Exam facts / source basis. **Named**

evidence/example: tools built from this folder's own reading of the 16 recent prompts, not an official requirement.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth.
- tools built from this folder's own reading of the 16 recent prompts, not an official requirement.

Qualified conclusion: Claim: Purpose and scope. **Named evidence/example:** This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Exam facts / source basis. **Named**

evidence/example: tools built from this folder's own reading of the 16 recent prompts, not an official requirement.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 2 - 10 MARKS

Question: Distinguish the valid method from its closest misuse in Cross-Sector Lenses and Scale. Answer in about 150 words.

Model thesis: **Claim:** The central idea and common misreading. **Named evidence/example:** Central idea: choose two to four lenses that genuinely fit the prompt's tension and develop each with a real mechanism and illustration - depth in fewer lenses outperforms a token pass through all seven or eight. Use a fourth lens only when it adds a distinct causal step or value conflict. Common misreading: mechanically working through every lens ("politically economically socially") regardless of fit, producing a checklist-style essay rather than an argued one. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Basic decomposition questions. **Named evidence/example:** 1. Which two or three lenses does this prompt's tension most naturally touch? 2. At what scale does each chosen lens's mechanism operate best (individual, institutional, state, global)? 3. Can I state one specific mechanism per chosen lens, not just a label? 4. Do I have one recallable illustration per chosen lens? 5. Would a lens I am tempted to include add a genuinely new dimension, or merely repeat a point already made under another lens? **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 3 - 15 MARKS

Question: Apply Cross-Sector Lenses and Scale to one philosophical UPSC Essay prompt. Answer in about 250 words.

Model thesis: Claim: Dimension-expansion grid. **Named evidence/example:** For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Dimension-expansion grid - 2. **Named evidence/example:** Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Dimension-expansion grid - 3. **Named evidence/example:** Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** India-first illustration starters. **Named evidence/example:** For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels
- Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight
- Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses.
- For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12.

Qualified conclusion: Claim: Dimension-expansion grid. **Named evidence/example:** For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Dimension-expansion grid - 2. **Named evidence/example:** Technology: engagement-optimised or delegated design changes what choices are visible - Society: repeated delegation can weaken reflective habits and redistribute autonomy - Governance: the resulting accountability gap requires transparent design, redress and public oversight **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Dimension-expansion grid - 3. **Named evidence/example:** Scale-match test: does the illustration operate at the scale of the claim? A household example cannot by itself prove a state-wide governance effect. Counterfactual test: remove the middle social link. If the governance claim still follows unchanged, the chain is decorative; either state a real hand-off or use two independent lenses. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula

or model answer. **Claim:** India-first illustration starters. **Named evidence/example:** For each chosen lens, recall one Indian illustration functionally tied to that lens's mechanism - e.g. a documented research/innovation policy episode for the Science & Technology lens on "empires of the mind." Full discipline: 12. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 4 - 15 MARKS

Question: Apply Cross-Sector Lenses and Scale to one issue-based or hybrid UPSC Essay prompt. Answer in about 250 words.

Model thesis: Claim: Thesis options and selection. **Named evidence/example:** Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Simple essay architecture. **Named evidence/example:** Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Simple essay architecture - 2. **Named evidence/example:** 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Opening, body and closure moves. **Named evidence/example:** Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive.
- Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse.
- 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices.
- Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent.

Qualified conclusion: Claim: Thesis options and selection. **Named evidence/example:** Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Simple essay architecture. **Named evidence/example:** Typically, one lens develops per argument-map cycle/paragraph cluster (07) - matching the two-to-four lens limit to two-to-four distinct cycles keeps the essay focused rather than diffuse. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Simple essay architecture - 2. **Named evidence/example:** 1. Thesis: automation is valuable when it expands informed capacity, but it weakens judgement when opaque design replaces reflection and removes routes for correction. 2. Technology / platform-scale paragraph: explain how design decides which options become visible; use a verified policy or institutional illustration only after checking the linked owner. 3. Society / individual-to-community paragraph: show how repeated delegation affects agency unevenly, especially where digital literacy and bargaining power differ; state that an observed pattern is not universal. 4. Governance / institution-scale paragraph: argue for transparency, contestability and redress because the earlier technology-to-society hand-off creates an accountability gap. 5. Synthesis: do not oppose automation to human judgement; require automation that leaves people informed, able to contest and able to correct consequential choices. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Opening, body and closure moves. **Named evidence/example:** Signal the chosen lenses implicitly through the content of body paragraphs, not by naming them explicitly ("From an economic perspective") in a checklist style - let the mechanism and illustration make the lens apparent. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate the limits, counter-cases and repair protocol for Cross-Sector Lenses and Scale. Answer in about 300 words.

Model thesis: Claim: Traps and repair moves. **Named evidence/example:** "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves - 2. **Named evidence/example:** at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Advanced proposition and boundary. **Named evidence/example:** Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Boundary: this topic does not supply the substantive GS content for any lens (owned by the respective subject module, see ../README.md's boundary table) - it supplies the selection and interaction discipline. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy. **Named evidence/example:** next lens's input - e.g. a technology lens's mechanism (algorithmic design) creates the social lens's condition (comparison-driven distress), which then creates the governance lens's problem (platform accountability). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy - 2. **Named evidence/example:** not actually defensible (e.g. discussing "empires of the mind" only at the level of individual

motivation, missing the institutional/global stakes that make the aphorism interesting). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting.
- at the individual level, missing the institutional/global stakes). -> Repair: check Section 6's scale-matching before drafting.
- Proposition: Core 11 supplies mechanism-scale-limit cards, one interaction chain and basic tests. This companion keeps the harder task: the strongest essays use lenses that interact - one lens's mechanism creates the condition the next lens's mechanism responds to - rather than lenses that sit side by side making independent points. Claim -> named evidence -> analysis -> qualification:

- This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth.
- For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels
- Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive.
- "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting.

- not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting).
- signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones.
- every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics.
- For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead.

Qualified conclusion: Claim: Purpose and scope. **Named evidence/example:** This topic teaches which cross-sector lens to apply to a given prompt and at what scale, so that argument-map cycles (05) draw on the right mechanism rather than a generic one. It does not supply the GS content itself - each lens points to the owning subject module for depth. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Dimension-expansion grid. **Named evidence/example:** For an unfamiliar prompt such as "A society that automates choice may weaken judgment", use a real causal hand-off, not three parallel labels. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis options and selection. **Named evidence/example:** Let the thesis (05) determine which lenses are needed, not the reverse - do not force a lens onto a thesis that does not require it merely to appear comprehensive. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Traps and repair moves. **Named evidence/example:** "Economically speaking"). -> Repair: let mechanism and illustration imply the lens; avoid mechanical signposting. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Concept definition and taxonomy - 2. **Named evidence/example:** not actually defensible (e.g. discussing "empires of the mind" only at the level of individual motivation, missing the institutional/global stakes that make the aphorism interesting). **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions. **Named evidence/example:** signals more sophistication is false - an essay using three interacting lenses is stronger than one using six parallel ones. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Tension pairs and hidden assumptions - 2. **Named evidence/example:** every lens (especially Ethics and IR) can be forced onto every prompt; in fact some prompts (e.g. 2024-A3 "happiness is the path") are poorly served by an IR lens and well served by society/governance/ethics. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Levels of analysis and temporal-spatial scale. **Named evidence/example:** For each lens, state explicitly which scale its mechanism is being argued at, and check whether the illustration matches that scale - e.g. an Economy lens on 2025-B8 ("contentment luxury") argued at the individual-consumption scale needs an individual/household illustration, not a national GDP statistic, which would belong to a state-scale argument instead. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.
