

SOLVED PRACTICE WORKBOOK

Internal-Security Foundations and Governance - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Internal-Security Foundations and Governance - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which statement correctly identifies Internal-security boundary?	5
Q2. Which option preserves the legal or institutional boundary of Internal-security boundary?	5
Q3. Which statement uses Internal-security boundary without changing its institution, law or status?	5
Q4. Which option avoids the standard UPSC close-option trap about Internal-security boundary?	6
Q5. Which statement correctly identifies MHA-MoD boundary?	6
Q6. Which option preserves the legal or institutional boundary of MHA-MoD boundary?	6
Q7. Which statement uses MHA-MoD boundary without changing its institution, law or status?	6
Q8. Which option avoids the standard UPSC close-option trap about MHA-MoD boundary?	7
Q9. Which statement correctly identifies Kautilya fourfold frame?	7
Q10. Which option preserves the legal or institutional boundary of Kautilya fourfold frame?	7
Q11. Which statement uses Kautilya fourfold frame without changing its institution, law or status?	8
Q12. Which option avoids the standard UPSC close-option trap about Kautilya fourfold frame?	8
Q13. Which statement correctly identifies Security attributes?	8
Q14. Which option preserves the legal or institutional boundary of Security attributes?	8
Q15. Which statement uses Security attributes without changing its institution, law or status?	9
Q16. Which option avoids the standard UPSC close-option trap about Security attributes?	9
Q17. Which statement correctly identifies Eight-element doctrine?	9
Q18. Which option preserves the legal or institutional boundary of Eight-element doctrine?	10
Q19. Which statement uses Eight-element doctrine without changing its institution, law or status?	10
Q20. Which option avoids the standard UPSC close-option trap about Eight-element doctrine?	10
Q21. Which statement correctly identifies Root-cause matrix?	10
Q22. Which option preserves the legal or institutional boundary of Root-cause matrix?	11
Q23. Which statement uses Root-cause matrix without changing its institution, law or status?	11
Q24. Which option avoids the standard UPSC close-option trap about Root-cause matrix?	11
Q25. Which statement correctly identifies Threat-vulnerability-capability?	11
Q26. Which option preserves the legal or institutional boundary of Threat-vulnerability-capability?	12
Q27. Which statement uses Threat-vulnerability-capability without changing its institution, law or status?	12

Q28. Which option avoids the standard UPSC close-option trap about Threat-vulnerability-capability?	12
Q29. Which statement correctly identifies Actor-means-objective?	12
Q30. Which option preserves the legal or institutional boundary of Actor-means-objective?	13
Q31. Which statement uses Actor-means-objective without changing its institution, law or status?	13
Q32. Which option avoids the standard UPSC close-option trap about Actor-means-objective?	13
Q33. Which statement correctly identifies State List primacy?	14
Q34. Which option preserves the legal or institutional boundary of State List primacy?	14
Q35. Which statement uses State List primacy without changing its institution, law or status?	14
Q36. Which option avoids the standard UPSC close-option trap about State List primacy?	14
Q37. Which statement correctly identifies Union aid boundary?	15
Q38. Which option preserves the legal or institutional boundary of Union aid boundary?	15
Q39. Which statement uses Union aid boundary without changing its institution, law or status?	15
Q40. Which option avoids the standard UPSC close-option trap about Union aid boundary?	15
Q41. Which statement correctly identifies Article 355 duty?	16
Q42. Which option preserves the legal or institutional boundary of Article 355 duty?	16
Q43. Which statement uses Article 355 duty without changing its institution, law or status?	16
Q44. Which option avoids the standard UPSC close-option trap about Article 355 duty?	16
Q45. Which statement correctly identifies Coordination constraint?	17
Q46. Which option preserves the legal or institutional boundary of Coordination constraint?	17
Q47. Which statement uses Coordination constraint without changing its institution, law or status?	17
Q48. Which option avoids the standard UPSC close-option trap about Coordination constraint?	17
Q49. Which statement correctly identifies Coercion-accommodation calibration?	18
Q50. Which option preserves the legal or institutional boundary of Coercion-accommodation calibration?	18
Q51. Which statement uses Coercion-accommodation calibration without changing its institution, law or status?	18
Q52. Which option avoids the standard UPSC close-option trap about Coercion-accommodation calibration?	18
Q53. Which statement correctly identifies Security-development sequencing?	19
Q54. Which option preserves the legal or institutional boundary of Security-development sequencing?	19
Q55. Which statement uses Security-development sequencing without changing its institution, law or status?	19
Q56. Which option avoids the standard UPSC close-option trap about Security-development sequencing?	20
Q57. Which statement correctly identifies Prevention-response distinction?	20
Q58. Which option preserves the legal or institutional boundary of Prevention-response distinction?	20
Q59. Which statement uses Prevention-response distinction without changing its institution, law or status?	20

Q60. Which option avoids the standard UPSC close-option trap about Prevention-response distinction?	21
Q61. Which statement correctly identifies Statutory-power boundary?	21
Q62. Which option preserves the legal or institutional boundary of Statutory-power boundary?	21
Q63. Which statement uses Statutory-power boundary without changing its institution, law or status?	22
Q64. Which option avoids the standard UPSC close-option trap about Statutory-power boundary?	22
Q65. Which statement correctly identifies Area-management end-state?	22
Q66. Which option preserves the legal or institutional boundary of Area-management end-state?	22
Q67. Which statement uses Area-management end-state without changing its institution, law or status?	23
Q68. Which option avoids the standard UPSC close-option trap about Area-management end-state?	23
Q69. Which statement correctly identifies Zero-FIR boundary?	23
Q70. Which option preserves the legal or institutional boundary of Zero-FIR boundary?	24
Q71. Which statement uses Zero-FIR boundary without changing its institution, law or status?	24
Q72. Which option avoids the standard UPSC close-option trap about Zero-FIR boundary?	24
Q73. Which statement correctly identifies OSA-Arms boundary?	24
Q74. Which option preserves the legal or institutional boundary of OSA-Arms boundary?	25
Q75. Which statement uses OSA-Arms boundary without changing its institution, law or status?	25
Q76. Which option avoids the standard UPSC close-option trap about OSA-Arms boundary?	25
Q77. Which statement correctly identifies Evidence-rung discipline?	26
Q78. Which option preserves the legal or institutional boundary of Evidence-rung discipline?	26
Q79. Which statement uses Evidence-rung discipline without changing its institution, law or status?	26
Q80. Which option avoids the standard UPSC close-option trap about Evidence-rung discipline?	26

Internal-Security Foundations and Governance - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Internal-security boundary?

A. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. B. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. C. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. D. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four.

Answer: A. Explanation: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q2. Which option preserves the legal or institutional boundary of Internal-security boundary?

A. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. B. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. C. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. D. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.

Answer: B. Explanation: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q3. Which statement uses Internal-security boundary without changing its institution, law or status?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. C. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. D. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.

Answer: C. Explanation: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about Internal-security boundary?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. C. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. D. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related.

Answer: D. Explanation: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q5. Which statement correctly identifies MHA-MoD boundary?

A. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. B. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. C. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. D. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four.

Answer: A. Explanation: The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q6. Which option preserves the legal or institutional boundary of MHA-MoD boundary?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. C. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. D. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.

Answer: B. Explanation: The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q7. Which statement uses MHA-MoD boundary without changing its institution, law or status?

A. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. B. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. C. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. D. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.

Answer: C. Explanation: The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about MHA-MoD boundary?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. C. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. D. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence.

Answer: D. Explanation: The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q9. Which statement correctly identifies Kautilya fourfold frame?

A. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. B. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. C. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. D. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.

Answer: A. Explanation: Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q10. Which option preserves the legal or institutional boundary of Kautilya fourfold frame?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. C. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. D. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.

Answer: B. Explanation: Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q11. Which statement uses Kautilya fourfold frame without changing its institution, law or status?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. C. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. D. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Answer: C. Explanation: Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about Kautilya fourfold frame?

A. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. B. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four.

Answer: D. Explanation: Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q13. Which statement correctly identifies Security attributes?

A. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. B. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. C. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. D. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.

Answer: A. Explanation: The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q14. Which option preserves the legal or institutional boundary of Security attributes?

A. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. B. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. C. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. D. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Answer: B. Explanation: The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q15. Which statement uses Security attributes without changing its institution, law or status?

A. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. B. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. C. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. D. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Answer: C. Explanation: The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about Security attributes?

A. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. B. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.

Answer: D. Explanation: The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q17. Which statement correctly identifies Eight-element doctrine?

A. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. B. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. C. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. D. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Answer: A. Explanation: The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q18. Which option preserves the legal or institutional boundary of Eight-element doctrine?

A. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. B. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. C. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. D. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.

Answer: B. Explanation: The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q19. Which statement uses Eight-element doctrine without changing its institution, law or status?

A. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. B. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. C. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: C. Explanation: The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about Eight-element doctrine?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.

Answer: D. Explanation: The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q21. Which statement correctly identifies Root-cause matrix?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. C. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. D. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.

Answer: A. Explanation: Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q22. Which option preserves the legal or institutional boundary of Root-cause matrix?

A. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. B. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. C. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. D. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.

Answer: B. Explanation: Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q23. Which statement uses Root-cause matrix without changing its institution, law or status?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. C. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. D. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.

Answer: C. Explanation: Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about Root-cause matrix?

A. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. B. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. C. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. D. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats.

Answer: D. Explanation: Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q25. Which statement correctly identifies Threat-vulnerability-capability?

A. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. B. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: A. Explanation: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q26. Which option preserves the legal or institutional boundary of Threat-vulnerability-capability?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: B. Explanation: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q27. Which statement uses Threat-vulnerability-capability without changing its institution, law or status?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: C. Explanation: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about Threat-vulnerability-capability?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. D. A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second.

Answer: D. Explanation: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q29. Which statement correctly identifies Actor-means-objective?

A. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. B. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: A. Explanation: External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q30. Which option preserves the legal or institutional boundary of Actor-means-objective?

A. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. B. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. C. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. D. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government.

Answer: B. Explanation: External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q31. Which statement uses Actor-means-objective without changing its institution, law or status?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. C. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. D. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement.

Answer: C. Explanation: External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about Actor-means-objective?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. D. External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Answer: D. Explanation: External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q33. Which statement correctly identifies State List primacy?

A. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: A. Explanation: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q34. Which option preserves the legal or institutional boundary of State List primacy?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. C. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. D. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement.

Answer: B. Explanation: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q35. Which statement uses State List primacy without changing its institution, law or status?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. D. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance.

Answer: C. Explanation: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about State List primacy?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. C. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. D. Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.

Answer: D. Explanation: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q37. Which statement correctly identifies Union aid boundary?

A. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. D. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations.

Answer: A. Explanation: Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q38. Which option preserves the legal or institutional boundary of Union aid boundary?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. C. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. D. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement.

Answer: B. Explanation: Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q39. Which statement uses Union aid boundary without changing its institution, law or status?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. C. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. D. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.

Answer: C. Explanation: Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about Union aid boundary?

A. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. B. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. C. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. D. Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Answer: D. Explanation: Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q41. Which statement correctly identifies Article 355 duty?

A. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. D. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations.

Answer: A. Explanation: Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q42. Which option preserves the legal or institutional boundary of Article 355 duty?

A. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. B. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. C. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. D. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations.

Answer: B. Explanation: Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q43. Which statement uses Article 355 duty without changing its institution, law or status?

A. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. B. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. C. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. D. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance.

Answer: C. Explanation: Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about Article 355 duty?

A. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. B. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. C. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. D. Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government.

Answer: D. Explanation: Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q45. Which statement correctly identifies Coordination constraint?

A. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. B. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. C. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. D. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.

Answer: A. Explanation: Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q46. Which option preserves the legal or institutional boundary of Coordination constraint?

A. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. B. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. C. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. D. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance.

Answer: B. Explanation: Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q47. Which statement uses Coordination constraint without changing its institution, law or status?

A. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. B. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. C. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. D. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions.

Answer: C. Explanation: Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about Coordination constraint?

A. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. B. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. C. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. D. Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement.

Answer: D. Explanation: Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. The other options change the threat category, institutional owner, legal instrument, evidentiary

Q49. Which statement correctly identifies Coercion-accommodation calibration?

A. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. B. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. C. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. D. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions.

Answer: A. Explanation: The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q50. Which option preserves the legal or institutional boundary of Coercion-accommodation calibration?

A. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. B. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. C. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. D. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.

Answer: B. Explanation: The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q51. Which statement uses Coercion-accommodation calibration without changing its institution, law or status?

A. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. B. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. C. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. D. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions.

Answer: C. Explanation: The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about Coercion-accommodation calibration?

A. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. B. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. C. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. D. The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations.

Answer: D. Explanation: The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. The other options

change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q53. Which statement correctly identifies Security-development sequencing?

A. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. B. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. C. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. D. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.

Answer: A. Explanation: Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q54. Which option preserves the legal or institutional boundary of Security-development sequencing?

A. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. B. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. C. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. D. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction.

Answer: B. Explanation: Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q55. Which statement uses Security-development sequencing without changing its institution, law or status?

A. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. B. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. C. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. D. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence.

Answer: C. Explanation: Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about Security-development sequencing?

A. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. B. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. C. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. D. Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance.

Answer: D. Explanation: Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q57. Which statement correctly identifies Prevention-response distinction?

A. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. B. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. C. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. D. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance.

Answer: A. Explanation: Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q58. Which option preserves the legal or institutional boundary of Prevention-response distinction?

A. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. B. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. C. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. D. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence.

Answer: B. Explanation: Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q59. Which statement uses Prevention-response distinction without changing its institution, law or status?

A. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. B. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. C. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. D. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and

transfer but does not alter final investigative jurisdiction.

Answer: C. Explanation: Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about Prevention-response distinction?

A. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. B. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. C. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. D. Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.

Answer: D. Explanation: Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q61. Which statement correctly identifies Statutory-power boundary?

A. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. B. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. C. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. D. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance.

Answer: A. Explanation: A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q62. Which option preserves the legal or institutional boundary of Statutory-power boundary?

A. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. B. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. C. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. D. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence.

Answer: B. Explanation: A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q63. Which statement uses Statutory-power boundary without changing its institution, law or status?

A. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. B. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. C. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. D. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Answer: C. Explanation: A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Statutory-power boundary?

A. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. B. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. C. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. D. A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions.

Answer: D. Explanation: A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q65. Which statement correctly identifies Area-management end-state?

A. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. B. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. C. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. D. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Answer: A. Explanation: Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q66. Which option preserves the legal or institutional boundary of Area-management end-state?

A. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. B. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. C. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. D. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Answer: B. Explanation: Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate

governance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q67. Which statement uses Area-management end-state without changing its institution, law or status?

A. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. B. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. C. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. D. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related.

Answer: C. Explanation: Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about Area-management end-state?

A. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. B. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. C. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. D. Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance.

Answer: D. Explanation: Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q69. Which statement correctly identifies Zero-FIR boundary?

A. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. B. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. C. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. D. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence.

Answer: A. Explanation: BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q70. Which option preserves the legal or institutional boundary of Zero-FIR boundary?

A. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. B. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. C. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. D. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related.

Answer: B. Explanation: BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q71. Which statement uses Zero-FIR boundary without changing its institution, law or status?

A. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. B. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. C. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. D. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related.

Answer: C. Explanation: BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Zero-FIR boundary?

A. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. B. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. C. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. D. BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction.

Answer: D. Explanation: BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q73. Which statement correctly identifies OSA-Arms boundary?

A. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. B. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. C. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. D. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Answer: A. Explanation: The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q74. Which option preserves the legal or institutional boundary of OSA-Arms boundary?

A. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. B. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. C. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. D. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence.

Answer: B. Explanation: The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q75. Which statement uses OSA-Arms boundary without changing its institution, law or status?

A. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. B. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. C. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. D. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.

Answer: C. Explanation: The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about OSA-Arms boundary?

A. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. B. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. C. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. D. The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence.

Answer: D. Explanation: The Official Secrets Act, 1923 addresses prohibited places, spying and wrongful communication, while Arms Act sections distinguish licensed possession from manufacture, sale or transfer; neither is a generic label for every security offence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q77. Which statement correctly identifies Evidence-rung discipline?

A. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. B. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. C. Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. D. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four.

Answer: A. Explanation: A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q78. Which option preserves the legal or institutional boundary of Evidence-rung discipline?

A. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. B. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. C. The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. D. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four.

Answer: B. Explanation: A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q79. Which statement uses Evidence-rung discipline without changing its institution, law or status?

A. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. B. Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. C. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. D. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.

Answer: C. Explanation: A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Evidence-rung discipline?

A. Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. B. The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. C. The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. D. A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Answer: D. Explanation: A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security

answer. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The audited ledgers route the 2020 area-management framework, the 2021 external-state/non-state actor demand and the provisional 2026 Zero FIR concept to this owner. Cross-topic wording is labelled rather than silently reassigned.

PYQ DEMAND CARD 1 - 2020 GS-III

Demand: Area management to deny militant support and improve local perception.

Status: Audited neutral rendering of the routed demand; Discuss · 10 marks · 150 words. The exact printed stem should be taken from the OCR-searchable official paper during final assembly.

Model solution: Threat-vulnerability-capability: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Security-development sequencing:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Area-management end-state:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 1 - 2020 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Threat-vulnerability-capability: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Security-development sequencing:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Area-management end-state:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Area management to deny militant support and improve local perception. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Audited neutral rendering of the routed demand; Discuss · 10 marks · 150 words. The exact printed stem should be taken from the OCR-searchable official paper during final assembly. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Threat-vulnerability-capability: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Security-development sequencing:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Area-management end-state:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 1 - 2020 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 2 - 2021 GS-III

Demand: Analyse the multidimensional challenges posed by external state and non-state actors to India's internal security.

Status: Verified routed demand; Analyse · 15 marks · 250 words.

Model solution: Internal-security boundary: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Kautilya fourfold frame:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Threat-vulnerability-capability:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Actor-means-objective:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Coordination constraint:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 2 - 2021 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Internal-security boundary: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Kautilya fourfold frame:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Threat-vulnerability-capability:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness,

capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Actor-means-objective:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Coordination constraint:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Analyse the multidimensional challenges posed by external state and non-state actors to India's internal security. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Verified routed demand; Analyse · 15 marks · 250 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Internal-security boundary: Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Kautilya fourfold frame:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Threat-vulnerability-capability:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Actor-means-objective:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Coordination constraint:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 2 - 2021 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 3 - 2026 Prelims GS-I

Demand: Zero FIR under BNSS and police jurisdiction for reported offences.

Status: Provisional routed objective concept; no answer letter is recorded or inferred.

Model solution: State List primacy: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Zero-FIR boundary:** BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: Treat 'PYQ DEMAND CARD 3 - 2026 Prelims GS-I' as a threat category, legal status, institution, process stage, jurisdiction, date and evidence problem.

Detailed examiner-grade model answer:

Introduction and thesis: State List primacy: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Zero-FIR boundary:** BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Zero FIR under BNSS and police jurisdiction for reported offences. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Provisional routed objective concept; no answer letter is recorded or inferred. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: State List primacy: Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Zero-FIR boundary:** BNSS section 173 permits information about a cognisable offence to be given irrespective of the area where it occurred; Zero FIR facilitates registration and transfer but does not alter final investigative jurisdiction. **Evidence-rung discipline:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: Identify the actor and object; fix statute/rule/notification or institutional mandate; separate prevention, incident, investigation, prosecution and outcome; test each option against date, jurisdiction and closest exception.

Why this earns marks: It prevents law from guidelines, designation from conviction, intelligence from evidence, border guarding from law and order, and incident from crime being conflated.

How to improve this answer: For 'PYQ DEMAND CARD 3 - 2026 Prelims GS-I', explain why the nearest distractor fails on actor, mandate, legal character, process stage, jurisdiction, status or date.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish internal security from external security in India's federal setting. Answer in about 150 words.

Model thesis: **Claim:** Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related.
- The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence.
- Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.
- Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.
- Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government.

Qualified conclusion: **Claim:** Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of

the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **answer** requires a direct position on 'Distinguish internal security from external security in India's federal setting. Answer in...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Named evidence/example:** Identify the exact Indian law, institution,

accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence.

Qualification: State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

4. **Claim:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source.

Analysis: Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

5. **Claim:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence.

Qualification: State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Distinguish internal security from external security in India's federal setting. Answer in...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific

qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain the utility of the threat-vulnerability-capability framework for internal-security policy. Answer in about 150 words.

Model thesis: Claim: Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability. **Named evidence/example:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats.
- A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second.
- Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.
- A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions.

Qualified conclusion: Claim: Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability. **Named evidence/example:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational

capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **explain** requires a direct position on 'Explain the utility of the threat-vulnerability-capability framework for internal-security...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability. **Named evidence/example:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Named evidence/example:** Identify the exact

Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source.

Analysis: Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability. **Named evidence/example:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Explain the utility of the threat-vulnerability-capability framework for internal-security...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Analyse the multidimensional challenges posed by external state and non-state actors to India's internal security. Answer in about 250 words.

Model thesis: Claim: Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Kautilya fourfold frame. **Named evidence/example:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability.

Named evidence/example: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related.
- Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four.
- A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second.
- External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.
- Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement.
- A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Qualified conclusion: Claim: Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Kautilya fourfold frame. **Named evidence/example:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability.

Named evidence/example: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and

notification-to-implementation status boundary. **Claim:** Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **analyse** requires a direct position on 'Analyse the multidimensional challenges posed by external state and non-state actors to...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Kautilya fourfold frame. **Named evidence/example:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability.

Named evidence/example: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

2. **Claim:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Internal-security boundary. **Named evidence/example:** Internal security concerns peace, law and order, rule of law and sovereignty within India's territory; external security addresses foreign aggression, but neighbourhood linkages make the two domains inter-related. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Kautilya fourfold frame. **Named evidence/example:** Kautilya's four-fold classification distinguishes internal, external, internally aided external and externally aided internal threats; India's threat environment can combine all four. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-vulnerability-capability.

Named evidence/example: A threat is a hostile actor or event, a vulnerability is an exploitable weakness, capability is the State's actual preventive or responsive means, and consequence is the realised harm when the first exploits the second. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Analyse the multidimensional challenges posed by external state and non-state actors to...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Discuss why Centre-State coordination is a structural requirement in internal-security governance. Answer in about 250 words.

Model thesis: **Claim:** MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence.
- Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation.
- Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority.
- Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government.
- Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement.
- A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions.

Qualified conclusion: Claim: MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **discuss** requires a direct position on 'Discuss why Centre-State coordination is a structural requirement in internal-security...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry

2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal

character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

6. **Claim:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: MHA-MoD boundary. **Named evidence/example:** The Ministry of Home Affairs is the Union ministry responsible for internal security, while the Ministry of Defence owns external defence; central assistance does not erase State policing competence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: State List primacy. **Named evidence/example:** Public order is State List Entry 1 and police is State List Entry 2, making the State the primary day-to-day authority for internal order and investigation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Union aid boundary. **Named evidence/example:** Union List Entry 2A permits deployment of an armed force of the Union in a State in aid of the civil power; assistance supplements rather than replaces the State authority. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Article 355 duty. **Named evidence/example:** Article 355 places a duty on the Union to protect every State against external aggression and internal disturbance and to ensure constitutional government. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Coordination constraint. **Named evidence/example:** Because policing is primarily State-owned while intelligence, border guarding and several central capabilities are Union-linked, Centre-State coordination is a structural constitutional requirement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Statutory-power boundary. **Named evidence/example:** A legal power is not operational capability: trained personnel, forensics, court time, lawful procedure and inter-agency trust remain separate implementation conditions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Discuss why Centre-State coordination is a structural requirement in internal-security...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate India's eight-element internal-security doctrine as a framework for calibrated security, development and rights-based response. Answer in about 300 words.

Model thesis: **Claim:** Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Eight-element doctrine. **Named evidence/example:** The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.
- The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements.
- Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats.

- The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations.
- Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance.
- Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.
- Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance.
- A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Qualified conclusion: Claim: Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Eight-element doctrine. **Named evidence/example:** The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **evaluate** requires a direct position on 'Evaluate India's eight-element internal-security doctrine as a framework for calibrated...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Eight-element doctrine. **Named evidence/example:** The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal

character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

3. **Claim:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension, porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Eight-element doctrine. **Named evidence/example:** The internal-security doctrine has political, socio-economic, governance, police and security-forces, Centre-State coordination, intelligence, border-management and cyber-security elements. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Root-cause matrix. **Named evidence/example:** Governance deficit, poverty, unemployment, inequitable growth, communal or caste tension,

porous borders, hostile neighbours, corruption and a weak criminal-justice system are enabling conditions rather than interchangeable threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Evaluate India's eight-element internal-security doctrine as a framework for calibrated...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Compare coercive, accommodative and preventive approaches to internal-security challenges and propose a legitimate end-state. Answer in about 300 words.

Model thesis: **Claim:** Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation

calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security.
- External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor.
- The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations.
- Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance.
- Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention.
- Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance.
- A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer.

Qualified conclusion: Claim: Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes

the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **compare** requires a direct position on 'Compare coercive, accommodative and preventive approaches to internal-security challenges and...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named evidence/example:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as

holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal

character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Security attributes. **Named evidence/example:** The owner identifies territorial integrity, domestic peace, law and order, rule of law and equality, freedom from fear, peaceful coexistence and communal harmony as attributes of internal security. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Actor-means-objective. **Named evidence/example:** External state and non-state actor analysis should identify actor, means, objective and intended end-state; proxy support can give a sponsor deniability without making sponsor and proxy the same legal actor. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coercion-accommodation calibration. **Named evidence/example:** The doctrine differentiates stringent response to secessionist or separatist violence from a softer and sympathetic approach to constitutional regional and ethnic aspirations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Security-development sequencing. **Named**

evidence/example: Security, development and rights cannot be reduced to a universal order; area-specific sequencing must restore access and administration without allowing coercion to reproduce grievance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Prevention-response distinction. **Named evidence/example:** Prevention reduces vulnerability through intelligence, community trust and governance, whereas response contains an event; visible response outputs cannot substitute for harder-to-measure prevention. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Area-management end-state. **Named evidence/example:** Area management should protect people, deny coercive support networks and restore durable civil administration; clearing territory is not the same as holding it through legitimate governance. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Evidence-rung discipline. **Named evidence/example:** A law, notification, deployment, arrest, charge-sheet, agreement, implementation step and verified outcome are distinct evidentiary rungs and must never be collapsed in an Internal Security answer. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Compare coercive, accommodative and preventive approaches to internal-security challenges and...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.
