

COMPLETE LEARNING SESSION

Left-Wing Extremism and Integrated Response - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Left-Wing Extremism and Integrated Response - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-04. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-04.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. OCR-searchable official UPSC papers were supplementary only for printed routed demands. No answer key, attribution, operational method, notification effect, implementation outcome or security metric was inferred.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** The audited GS-III ledgers route the 2018, 2020, 2022 and 2025 LWE demands here. The module preserves directive and marks metadata, grades dated official claims, and does not infer tactical details or objective keys.
- **Live-link boundary:** The December 2025 MHA metrics and the June 2026 PIB phrase 'effectively free from Left-Wing Extremism' are kept as separate dated claims. Neither proves zero violence, completed rehabilitation, implemented forest rights or irreversible grievance resolution.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

LIVE OFFICIAL-SOURCE ATTEMPT LOG

The checks below were made on 2026-09-04. Substantive official text is used only for the proposition it supports; title-only, blocked or thin pages are recorded and supply no factual claim.

- <https://www.mha.gov.in/en/divisionofmha/left-wing-extremism-division> - searched 2026-09-04; the official MHA LWE division is treated as the policy owner for the National Policy and Action Plan and current scheme/status material. No force disposition or operational method is reproduced.
- <https://www.pib.gov.in/PressReleasePage.aspx?PRID=2292864> - attempted 2026-09-04; direct fetch returned 403, while official-domain search surfaced the post-deadline 'Naxal-Free India' assessment. The module preserves qualified official wording and does not convert it into literal zero violence or resolved grievances.
- <https://www.pib.gov.in/PressReleasePage.aspx?PRID=2179489> - searched 2026-09-04 for the December 2025 LWE position; official search results report decline metrics, but nearby official releases can use different cut-off dates and incident totals. The authored fact follows the canonical owner's dated 89%, 91% and 218 formulation and never combines unlike reporting periods.
- <https://www.indiacode.nic.in/> - searched 2026-09-04 for the Forest Rights Act, 2006 and PESA, 1996; the module uses their owner-audited rights and Gram Sabha roles without claiming that enactment proves title recognition, consultation or implementation.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Internal Security Basic/Core is easy-first and answer-complete before optional Advanced depth.
Threat boundary	Actor, intent, capability, geography, target, harm and security-development nexus remain distinct.
Law/status boundary	Constitution, statute, rule, notification, guideline, advisory, designation, investigation, prosecution, conviction and measured outcome are not conflated.
Institutional boundary	Intelligence, police, NIA, prosecution, courts, CAPFs, armed forces, CERT-In, NCIIPC, I4C, Coast Guard and regulators retain exact mandates and federal limits.
Process boundary	Prevention, preparedness, response, investigation, prosecution, recovery and resilience are separate stages.
Current-data boundary	Every incident, casualty, budget, force, border, seizure, conviction, timeline and operational claim keeps source, date, unit, jurisdiction and status.
Practice contract	Every solved item has demand decoding, detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
PYQ contract	Official wording and keys are asserted only when verified; routed or reconstructed demands remain labelled.
Dual-flow contract	Graphical and ASCII masters independently reconstruct the same complete Basic-to-optional-Advanced evidence spine.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Internal-Security\basic\03_Left-Wing-Extremism-and-Integrated-Response.md **Substantive canonical provenance owner:** upsc-ai-kit\knowledge\Internal-Security\learning-sessions\v2\subject-wide-syllabus\internal-security-03_Learning-Session.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Internal-Security\advanced\03_Left-Wing-Extremism-and-Integrated-Response.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Internal-Security\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- Law is separated from rules, notifications, guidelines and advisories; designation from conviction; investigation from prosecution.
- Intelligence is separated from admissible evidence; ceasefire/framework agreement from final settlement and implementation.
- Border guarding is separated from law and order; cyber incident from cybercrime; prevention from response; security output from development outcome.
- Every current Jammu and Kashmir, border, insurgency, terrorism, cyber, maritime, organised-crime, force or legal-status claim retains source/date/status.
- **Current-status note, rechecked 2026-09-06:** failed official fetches remain explicit and supply no invented fact.

Generation-local live/current sources:

- <https://www.mha.gov.in/en/divisionofmha/left-wing-extremism-division> - searched 2026-09-04; the official MHA LWE division is treated as the policy owner for the National Policy and Action Plan and current scheme/status material. No force disposition or operational method is reproduced.
- <https://www.pib.gov.in/PressReleasePage.aspx?PRID=2292864> - attempted 2026-09-04; direct fetch returned 403, while official-domain search surfaced the post-deadline 'Naxal-Free India' assessment. The module preserves qualified official wording and does not convert it into literal zero violence or resolved grievances.
- <https://www.pib.gov.in/PressReleasePage.aspx?PRID=2179489> - searched 2026-09-04 for the December 2025 LWE position; official search results report decline metrics, but

nearby official releases can use different cut-off dates and incident totals. The authored fact follows the canonical owner's dated 89%, 91% and 218 formulation and never combines unlike reporting periods.

- <https://www.indiacode.nic.in/> - searched 2026-09-04 for the Forest Rights Act, 2006 and PESA, 1996; the module uses their owner-audited rights and Gram Sabha roles without claiming that enactment proves title recognition, consultation or implementation.

Topic-routed verified PYQ owners:

- Repository PYQ routing ledgers control wording, year, marks and verification status.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - NAXALBARI ORIGIN AND MAOIST OBJECTIVE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Technical definition: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

MUST-WRITE KEYWORDS

- FOUNDATION
- Naxalbari origin
- Maoist objective

- Mechanism chain
- Qualified use
- The Naxalite

How to use them: Frame the answer through FOUNDATION; define Naxalbari origin, connect Maoist objective with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

NAXALBARI ORIGIN AND MAOIST OBJECTIVE

01. Naxalbari origin

|

v

02. LWE objective

STATUS / CATEGORY FIREWALL -> Do not describe LWE as a secessionist movement.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

SIMPLE SYSTEM EXAMPLE

Read Naxalbari origin and Maoist objective as a sequence: identify Naxalbari origin, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not describe LWE as a secessionist movement. This keeps Naxalbari origin and LWE objective in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.
- Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

EXAMINER CAUTION

- Do not describe LWE as a secessionist movement.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Define LWE's objective and distinguish it from separatism.

MINI RECAP

- **Mechanism chain:** Naxalbari origin -> LWE objective
- **Qualified use:** Define LWE's objective and distinguish it from separatism.

CLOSING RECALL FLOW - FOUNDATION - NAXALBARI ORIGIN AND MAOIST OBJECTIVE

START / CONCEPT: FOUNDATION - Naxalbari origin and Maoist objective

|

v

EXACT TERMS: FOUNDATION · Naxalbari origin · Maoist objective · Mechanism chain · Qualified use · The Naxalite

|

v

MECHANISM / ARGUMENT: Read Naxalbari origin and Maoist objective as a sequence: identify Naxalbari origin, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|

v

CONSEQUENCE / CONTRAST: Mechanism chain: Naxalbari origin - LWE objective Qualified use: Define LWE's objective and distinguish it from separatism.

|

v

UPSC TRAP / ANSWER-USE: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

|

v

ANSWER-GRABBING FORMULATION: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

SESSION 2 - FOUNDATION - PROTRACTED PEOPLE'S WAR AND FIVE PHASES

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Technical definition: Read Protracted people's war and five phases as a sequence: identify Five-phase strategy, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Protracted people's war and five phases as a sequence: identify Five-phase strategy, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- Protracted people's war
- five phases
- Mechanism chain
- Qualified use
- The owner's Maoist spread sequence

How to use them: Frame the answer through FOUNDATION; define Protracted people's war, connect five phases with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

PROTRACTED PEOPLE'S WAR AND FIVE PHASES

01. Five-phase strategy

STATUS / CATEGORY FIREWALL -> Do not treat poverty or mineral resources as mechanically sufficient causes.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

SIMPLE SYSTEM EXAMPLE

Read Protracted people's war and five phases as a sequence: identify Five-phase strategy, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat poverty or mineral resources as mechanically sufficient causes. This keeps Five-phase strategy in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

EXAMINER CAUTION

- Do not treat poverty or mineral resources as mechanically sufficient causes.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Explain organisational progression without claiming current control.

MINI RECAP

- **Mechanism chain:** Five-phase strategy
- **Qualified use:** Explain organisational progression without claiming current control.

CLOSING RECALL FLOW - FOUNDATION - PROTRACTED PEOPLE'S WAR AND FIVE PHASES

START / CONCEPT: FOUNDATION - Protracted people's war and five phases

|

v

EXACT TERMS: FOUNDATION · Protracted people's war · five phases · Mechanism chain · Qualified use ·
The owner's Maoist spread sequence

|

v

MECHANISM / ARGUMENT: Mechanism chain: Five-phase strategy Qualified use: Explain organisational
progression without claiming current control.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not treat poverty or mineral resources as
mechanically sufficient causes.

|

v

UPSC TRAP / ANSWER-USE: Do not treat poverty or mineral resources as mechanically sufficient causes.

|

v

ANSWER-GRABBING FORMULATION: Read Protracted people's war and five phases as a sequence: identify
Five-phase strategy, follow the named mechanism to its institutional response, and stop at the last
verified status rather than assuming the next stage.

SESSION 3 - FOUNDATION - CPI MAOIST FORMATION AND LEGAL STATUS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The decisive boundary is Do not use a book-period Red Corridor map as current status.

Technical definition: Read CPI Maoist formation and legal status as a sequence: identify CPI Maoist formation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read CPI Maoist formation and legal status as a sequence: identify CPI Maoist formation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- CPI Maoist formation
- legal status
- Mechanism chain
- Qualified use
- CPI

How to use them: Frame the answer through FOUNDATION; define CPI Maoist formation, connect legal status with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

CPI MAOIST FORMATION AND LEGAL STATUS

01. CPI Maoist formation

STATUS / CATEGORY FIREWALL -> Do not use a book-period Red Corridor map as current status.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

SIMPLE SYSTEM EXAMPLE

Read CPI Maoist formation and legal status as a sequence: identify CPI Maoist formation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not use a book-period Red Corridor map as current status. This keeps CPI Maoist formation in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

EXAMINER CAUTION

- Do not use a book-period Red Corridor map as current status.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Separate historical formation, statutory listing and individual guilt.

MINI RECAP

- **Mechanism chain:** CPI Maoist formation
- **Qualified use:** Separate historical formation, statutory listing and individual guilt.

CLOSING RECALL FLOW - FOUNDATION - CPI MAOIST FORMATION AND LEGAL STATUS

START / CONCEPT: FOUNDATION - CPI Maoist formation and legal status

|

v

EXACT TERMS: FOUNDATION • CPI Maoist formation • legal status • Mechanism chain • Qualified use •
CPI

|

v

MECHANISM / ARGUMENT: Mechanism chain: CPI Maoist formation Qualified use: Separate historical
formation, statutory listing and individual guilt.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not use a book-period Red Corridor map as
current status.

|

v

UPSC TRAP / ANSWER-USE: Do not use a book-period Red Corridor map as current status.

|

v

ANSWER-GRABBING FORMULATION: Read CPI Maoist formation and legal status as a sequence: identify CPI
Maoist formation, follow the named mechanism to its institutional response, and stop at the last
verified status rather than assuming the next stage.

SESSION 4 - CORE - LAND FOREST AND JAL-JANGAL-ZAMEEN GRIEVANCES

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Technical definition: Read Land forest and jal-jangal-zameen grievances as a sequence: identify Land-forest causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

MUST-WRITE KEYWORDS

- Land forest
- jal-jangal-zameen grievances
- Mechanism chain
- Qualified use
- Land
- Read Land

How to use them: Frame the answer through Land forest; define jal-jangal-zameen grievances, connect Mechanism chain with Qualified use to explain the mechanism, and use Land for the decisive comparison or qualification.

VISUAL FIRST

LAND FOREST AND JAL-JANGAL-ZAMEEN GRIEVANCES

01. Land-forest causes

STATUS / CATEGORY FIREWALL -> Do not treat security operations as the whole response.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

SIMPLE SYSTEM EXAMPLE

Read Land forest and jal-jangal-zameen grievances as a sequence: identify Land-forest causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat security operations as the whole response. This keeps Land-forest causes in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

EXAMINER CAUTION

- Do not treat security operations as the whole response.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Link rights exclusion to vulnerability and recruitment.

MINI RECAP

- **Mechanism chain:** Land-forest causes
- **Qualified use:** Link rights exclusion to vulnerability and recruitment.

CLOSING RECALL FLOW - CORE - LAND FOREST AND JAL-JANGAL-ZAMEEN GRIEVANCES

START / CONCEPT: CORE - Land forest and jal-jangal-zameen grievances

|

v

EXACT TERMS: Land forest · jal-jangal-zameen grievances · Mechanism chain · Qualified use · Land ·
Read Land

|

v

MECHANISM / ARGUMENT: Read Land forest and jal-jangal-zameen grievances as a sequence: identify Land-forest causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not treat security operations as the whole response.

|

v

UPSC TRAP / ANSWER-USE: Do not treat security operations as the whole response.

|

v

ANSWER-GRABBING FORMULATION: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

SESSION 5 - CORE - POVERTY GOVERNANCE EXCLUSION AND ORGANISED CONVERSION

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read Poverty governance exclusion and organised conversion as a sequence: identify Development-governance causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Poverty governance exclusion and organised conversion as a sequence: identify Development-governance causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- Poverty governance exclusion
- organised conversion
- Mechanism chain
- Qualified use
- Poverty
- Read Poverty

How to use them: Frame the answer through Poverty governance exclusion; define organised conversion, connect Mechanism chain with Qualified use to explain the mechanism, and use Poverty for the decisive comparison or qualification.

VISUAL FIRST

POVERTY GOVERNANCE EXCLUSION AND ORGANISED CONVERSION

01. Development-governance causes

STATUS / CATEGORY FIREWALL -> Do not omit rights and entitlements from the 2015 policy.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

SIMPLE SYSTEM EXAMPLE

Read Poverty governance exclusion and organised conversion as a sequence: identify Development-governance causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not omit rights and entitlements from the 2015 policy. This keeps Development-governance causes in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

EXAMINER CAUTION

- Do not omit rights and entitlements from the 2015 policy.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Add the organised actor that converts grievance into coercion.

MINI RECAP

- **Mechanism chain:** Development-governance causes
- **Qualified use:** Add the organised actor that converts grievance into coercion.

CLOSING RECALL FLOW - CORE - POVERTY GOVERNANCE EXCLUSION AND ORGANISED CONVERSION

START / CONCEPT: CORE - Poverty governance exclusion and organised conversion

|

v

EXACT TERMS: Poverty governance exclusion · organised conversion · Mechanism chain · Qualified use
· Poverty · Read Poverty

|

v

MECHANISM / ARGUMENT: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not omit rights and entitlements from the 2015 policy.

|

v

UPSC TRAP / ANSWER-USE: Do not omit rights and entitlements from the 2015 policy.

|

v

ANSWER-GRABBING FORMULATION: Read Poverty governance exclusion and organised conversion as a sequence: identify Development-governance causes, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 6 - CORE - MINERAL BELT EXTORTION ECONOMY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read Mineral belt extortion economy as a sequence: identify Mineral-extortion nexus, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Mechanism chain: Mineral-extortion nexus - Instrumental underdevelopment Qualified use: Explain extortion opportunity without blaming resources themselves.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Mineral belt extortion economy as a sequence: identify Mineral-extortion nexus, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- **Mineral belt extortion economy**
- **Mechanism chain**
- **Qualified use**
- **LWE**
- **Maoists**
- **Read Mineral**

How to use them: Frame the answer through Mineral belt extortion economy; define Mechanism chain, connect Qualified use with LWE to explain the mechanism, and use Maoists for the decisive comparison or qualification.

VISUAL FIRST

MINERAL BELT EXTORTION ECONOMY

01. Mineral-extortion nexus

|
v

02. Instrumental underdevelopment

STATUS / CATEGORY FIREWALL -> Do not treat FRA or PESA enactment as implementation.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

SIMPLE SYSTEM EXAMPLE

Read Mineral belt extortion economy as a sequence: identify Mineral-extortion nexus, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat FRA or PESA enactment as implementation. This keeps Mineral-extortion nexus and Instrumental underdevelopment in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

EXAMINER CAUTION

- Do not treat FRA or PESA enactment as implementation.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Explain extortion opportunity without blaming resources themselves.

MINI RECAP

- **Mechanism chain:** Mineral-extortion nexus -> Instrumental underdevelopment
- **Qualified use:** Explain extortion opportunity without blaming resources themselves.

SESSION 7 - CORE - INSTRUMENTAL UNDERDEVELOPMENT AND BLOCKED ADMINISTRATION

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The decisive boundary is Do not equate clearing an area with holding trusted administration.

Technical definition: Read Instrumental underdevelopment and blocked administration as a sequence: identify Civilian impact, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Instrumental underdevelopment and blocked administration as a sequence: identify Civilian impact, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- Instrumental underdevelopment
- blocked administration
- Mechanism chain
- Qualified use
- Read Instrumental
- Civilian

How to use them: Frame the answer through Instrumental underdevelopment; define blocked administration, connect Mechanism chain with Qualified use to explain the mechanism, and use Read Instrumental for the decisive comparison or qualification.

VISUAL FIRST

INSTRUMENTAL UNDERDEVELOPMENT AND BLOCKED ADMINISTRATION

01. Civilian impact

STATUS / CATEGORY FIREWALL -> Do not equate clearing an area with holding trusted administration.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

SIMPLE SYSTEM EXAMPLE

Read Instrumental underdevelopment and blocked administration as a sequence: identify Civilian impact, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not equate clearing an area with holding trusted administration. This keeps Civilian impact in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

EXAMINER CAUTION

- Do not equate clearing an area with holding trusted administration.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Show how development obstruction can sustain the movement.

MINI RECAP

ANSWER-GRABBING FORMULATION: Read Greyhounds surrender and rehabilitation design as a sequence:
identify Specialised-force lesson, follow the named mechanism to its institutional response, and
stop at the last verified status rather than assuming the next stage.

SESSION 15 - CORE SYNTHESIS - DATED DECLINE EFFECTIVELY-FREE CLAIM AND DURABLE END-STATE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Technical definition: Read Dated decline effectively-free claim and durable end-state as a sequence: identify Dated decline metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Dated decline effectively-free claim and durable end-state as a sequence: identify Dated decline metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Dated decline effectively-free claim
- durable end-state
- Mechanism chain
- Qualified use
- Subject

How to use them: Frame the answer through CORE SYNTHESIS; define Dated decline effectively-free claim, connect durable end-state with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

DATED DECLINE EFFECTIVELY-FREE CLAIM AND DURABLE END-STATE

01. Dated decline metrics

|
v

02. Post-deadline status

STATUS / CATEGORY FIREWALL -> Do not use a book-period Red Corridor map as current status.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

SIMPLE SYSTEM EXAMPLE

Read Dated decline effectively-free claim and durable end-state as a sequence: identify Dated decline metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not use a book-period Red Corridor map as current status. This keeps Dated decline metrics and Post-deadline status in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.
- PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

EXAMINER CAUTION

- Do not use a book-period Red Corridor map as current status.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Grade target, metric, classification and qualified status separately.

MINI RECAP

- **Mechanism chain:** Dated decline metrics -> Post-deadline status
- **Qualified use:** Grade target, metric, classification and qualified status separately.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Internal Security | **Tier:** Must-Do (foundation) | **GS Paper:** GS-III. **Core area:** Naxalism/Maoism definition and ideology; phases and evolution; causation (land, forest, governance); civilian impact; security-development-rights response architecture. **Grounded in:** Ashok Kumar Singh, *Challenges to Internal Security of India*, PDF pp. 51-65; 00_Master-Framework.md Sections 4-5; audited GS-III syllabus; MHA National Policy and Action Plan to address LWE (2015); MHA parliamentary replies (December 2025 and February 2026); PIB "Naxal-Free India" explainer (June 2026). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. *Companion:* advanced/03_Left-Wing-Extremism-and-Integrated-Response.md.

1. Visual foundation

IDEOLOGY

Maoist "Protracted People's War" ->
capture state power via armed insurgency +
mass mobilisation (Singh, PDF p. 52)

ROOT CAUSES

land/forest-rights exclusion | mineral-belt
extortion economy | governance deficit |
poverty, unemployment, under-development

MODUS OPERANDI

guerrilla warfare | parallel government/
Jan Adalat | extortion of infrastructure
and mining projects | front organisations

CIVILIAN IMPACT

denial of development | displacement |
targeting of infrastructure and police

INTEGRATED RESPONSE

security + development + governance +
rights (Forest Rights Act) + surrender-
rehabilitation + trust restoration

Core proposition: FACT: Singh explains Maoism as a doctrine to "capture State power through a combination of armed insurgency, mass mobilization and strategic alliances," which Mao termed the "Protracted Peoples War," under which "bearing of arms is non-negotiable" (PDF p. 52).

2. Essential definitions

Concept	Exam-ready meaning
FACT: Naxalism	Term deriving from Naxalbari village, Darjeeling district, West Bengal, where the movement began in May 1967 under Charu Majumdar and Kanu Sanyal; refers to violence to destabilise the state through communist guerrilla groups (Singh, PDF p. 51).
FACT: Left-Wing Extremism (LWE)	The broader, current umbrella term for Naxalism/Maoism-inspired violence aimed at capturing political power by force to install a "people's government" (Singh, PDF pp. 51, 56).
FACT: Five-phase spread strategy	Preparatory -> Perspective -> Guerrilla -> Base -> Liberated phase - Maoists' own systematic method of area expansion (Singh, PDF p. 52).
FACT: CPI (Maoist)	Formed in 2004 by the merger of the People's War Group and the Maoist Communist Centre of India - historically, the principal LWE outfit (Singh, PDF pp. 53-54; book-period organisational detail).
ANALYSIS: Red Corridor / Dandakaranya region	Book-period term for the contiguous mineral-rich belt (parts of Jharkhand, Chhattisgarh, Odisha and adjoining states) most affected by LWE violence - its precise current extent must be verified from a dated MHA source, not assumed from the book.

3. How LWE causation and response work

1. **Ideological method:** FACT: Naxalites "do not seek to secede from the Indian Union" (unlike border-region militancy); their aim is "to capture political power through armed struggle" (Singh, PDF p. 52) - a key distinction from J&K/North-East threats.
2. **Root causes:** FACT: Singh groups causes into "evasion of ceiling laws,"

"encroachment... of government and community lands," "non- regularization of traditional land rights," "land acquisition without appropriate compensation," "disruption of the age-old tribal... jal- jangal-zameen" relationship, alongside "unemployment," "poverty," "infrastructure deficit," governance deficit and "social exclusion and alienation" (PDF p. 59).

3. **Extortion economy:** FACT: LWE is "most intense precisely in areas which are rich in natural mineral resources" - coal, iron, bauxite, manganese, nickel and copper - because these provide "enough scope for extortion" from government and corporate infrastructure projects (Singh, PDF p. 58).

4. **Development obstruction as strategy:** FACT: Singh's sharp critique: "Maoists have vested interest in keeping poverty alive because it enables them to expand their territory. They don't allow district administration to do any development work like building roads and improving electricity and water supply" (PDF p. 59) - development denial is instrumental to the movement's own survival, not accidental.

5. **Response architecture:** FACT: Singh's own three-part strategy - development strategy (infrastructure, land rights, Forest Rights Act implementation), security strategy (professional dominance, state- police primacy, specialised forces on the Greyhounds model) and psychological operations (media/public-perception management, restoring trust) (PDF pp. 63-64). CURRENT: MHA's **National Policy and Action Plan (2015)** states the same logic in official language as a three-pronged approach - security, development, and ensuring the rights and entitlements of local communities.

6. ****Clear, hold, develop - and why the middle step decides the outcome:**** ANALYSIS: Security operations *clear* an area; a permanent administrative and police presence *holds* it; schemes and rights delivery *develop* it. Most reversals in LWE history occurred at the holding stage, when forces moved on before civil administration arrived. This is why "number of districts cleared" is a weaker indicator than "number of districts holding a functioning police station, panchayat and service-delivery presence."

4. Institutions, laws and reference points

- FACT: ****Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006: cited by Singh as a rights-based instrument whose "coordination and implementation" in LWE-affected states is part of the development strategy (PDF p. 63). ANALYSIS: Its companion instruments - the Panchayats (Extension to the Scheduled Areas) Act, 1996 (PESA), which vests Gram Sabhas in Fifth Schedule areas with consultative rights over land acquisition and minor minerals, and the Fifth Schedule**** administrative framework itself - are the constitutional/statutory core of the "governance deficit" root cause and should be named alongside FRA, not left implicit.

- FACT: **CPI (Maoist) is a banned terrorist organisation** listed in the First Schedule of the UAPA (along with its front organisations and all formations). ANALYSIS: This is the legal reason LWE cases can attract UAPA and NIA jurisdiction, not merely State penal law - a link Mains answers on "measures taken" frequently omit.

- CURRENT: ****National Policy and Action Plan to address Left Wing Extremism (2015): MHA's standing policy frame, built on three prongs - a security response, a development response, and ensuring the rights and entitlements of local communities**** (the third prong is the one candidates most often drop). ANALYSIS: Verify its current operative status and any successor framing from the MHA Annual Report before describing it as the latest policy.

- ANALYSIS: ****Security Related Expenditure (SRE) Scheme, Special Infrastructure Scheme (SIS), Special Central Assistance (SCA) for the most LWE-affected districts, the Road Requirement Plan and its successor road connectivity project for LWE areas, the LWE Mobile Tower Project, Civic Action Programme (CAP) and Fortified Police Stations:**** the central scheme cluster for LWE-affected States (Singh, PDF pp. 60-61, for the book-period subset) - ANALYSIS: verify current scheme names, coverage and allocations from a dated MHA source before citing any figure.

- FACT: **Operation Greyhound (Andhra Pradesh):** a specialised, trained state police force credited with substantially curbing Naxalism within undivided Andhra Pradesh - an institutional design precedent (Singh, PDF pp. 61-64). ANALYSIS: Its later analogues include CRPF's **CoBRA** (jungle-warfare) battalions

and locally recruited units such as the **Bastariya Battalion**; name the specific unit rather than "central forces" generically.

- CURRENT: **MHA December 2025 parliamentary reply**: reported an **89% decline in LWE violence **and a 91% decline in resultant deaths since 2010, with 218 incidents in 2025****. These are security metrics; do not turn them into a claim of completed land, forest-rights or governance reform.

5. Indian applications and examples

- ANALYSIS: Singh's book-period figures (estimated cadre strength, number of affected police stations/districts, People's Liberation Guerrilla Army structure) reflect roughly the mid-2010s and must not be cited as current; see topic's Current Anchor section below for the verified, dated current picture.

- FACT: Singh cites the 2010 Dantewada ambush (76 CRPF personnel killed) and the 2013 Sukma attack (27 killed, including senior politicians) as the clearest illustrations of the movement's operational capacity at the time (PDF p. 55) - book-period case studies, not current-status claims.

- CURRENT: **PYQ mapping - verbatim (2025 Q10)**: "The Government of India recently stated that Left Wing Extremism (LWE) will be eliminated by 2026. What do you understand by LWE and how are the people affected by it? What measures have been taken by the government to eliminate LWE?" (local paper text reproduced verbatim).

6. Must-Know Facts for Prelims

- FACT: Naxalism originated in May 1967 in Naxalbari, Khoribari and Phansidewa police-station areas of Darjeeling district, West Bengal, under Charu Majumdar and Kanu Sanyal.

- FACT: CPI (Maoist) was formed in 2004 by the merger of the People's War Group (Andhra Pradesh) and the Maoist Communist Centre of India (Bihar).

- FACT: The Maoist doctrine's central slogan is "Political power grows out of the barrel of a gun"; its strategic method is Mao's "Protracted People's War."

- FACT: Naxalites, unlike J&K or North-East militants, do not seek secession from the Indian Union; their objective is to capture state power.

- FACT: CPI (Maoist) and its front organisations are listed as a terrorist organisation in the First Schedule of the UAPA - the statutory basis for UAPA charges and NIA jurisdiction in LWE cases.

- CURRENT: MHA's **National Policy and Action Plan (2015)** is the three-pronged policy frame: security, development, and rights/entitlements of local communities.

- CURRENT: A December 2025 MHA parliamentary reply reported an **89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025**. The earlier 73%/86%/38-district formulation is an MHA 2024 baseline and must not be re-dated as a 2026 reply.

7. UPSC traps

- WRONG: Naxalism seeks a separate sovereign state, like some border-region militancy. -> Singh is explicit that Naxalites do not seek secession; their aim is to capture political power within India through armed struggle.

- WRONG: LWE is purely a law-and-order problem. -> Singh states plainly that "Naxalism is not merely a law and order issue... it is directly related to under-development" (PDF p. 62) - governance and development failures are root causes, not side issues.

- WRONG: Development delivery alone will end LWE, since the movement claims to fight for the poor. -> Singh's own critique shows the movement has "a vested interest in keeping poverty alive" and actively obstructs development works, so development alone, without security and trust- restoration, is insufficient.

- WRONG: Any 2013-2016-era cadre strength, district count or force-level figure

in this book reflects the present. -> These are book-period historical figures; use the December 2025 MHA reply or a later dated official release for a current security metric.

- WRONG: A district removed from the "LWE-affected" list is a district where the root causes are resolved. -> The list is an administrative classification driving scheme eligibility and force deployment; de-listing records a security-metric change, not the completion of land, forest or service-delivery reform. Keep classification, security outcome and development outcome as three separate claims.

- WRONG: "Surrender" and "rehabilitation" are the same thing. -> Surrender is a one-time act with an immediate incentive package; rehabilitation is a multi-year process (skilling, livelihood, protection from reprisal, social reintegration) that State surrender-and-rehabilitation policies vary widely on - a variation Maoists have historically exploited (advanced companion, Section 5).

8. CURRENT: Current anchor

- CURRENT: The **December 2025 MHA parliamentary reply** reports an ****89% decline** in LWE violence, **a 91% decline in deaths since 2010 and 218 incidents in 2025****. This records a reported security position before the March 2026 target; it does not settle root-cause or rehabilitation outcomes.

- CURRENT: PIB's **June 2026 "Naxal-Free India"** explainer subsequently describes India as **"effectively free from Left-Wing Extremism"** after 31 March 2026. Preserve that exact qualification: it records the Government's post-deadline assessment, not a claim of literally zero incidents or completed root-cause resolution.

10. Mains angles

- ANALYSIS: Any "how are people affected by LWE" sub-question should cover: denial of development and basic services, displacement and livelihood loss, extortion burden, exposure to both extremist and state-security coercion, and disruption of local governance institutions (panchayats forced to resign, per Singh, PDF p. 55 - book-period example, cited illustratively).

- ANALYSIS: Use Singh's own three-part strategy (development, security, psychological operations) as the answer's structural backbone for "measures taken," rather than a generic list of schemes.

- ANALYSIS: Where asked to assess "elimination by 2026," distinguish the government's stated objective from verified outcome, citing the 4 February 2026 reply's own figures rather than assuming completion.

11. Probable questions

- ANALYSIS: **Prelims**: In which district and year did the Naxalite movement originate, and under whose leadership?

- ANALYSIS: **Mains (10 marks)**: "Left-Wing Extremism thrives on the persistence of underdevelopment it also helps sustain." Examine.

- ANALYSIS: **Mains (15 marks, PYQ-style)**: Explain LWE's meaning and impact on affected populations, and assess the government's measures to eliminate it.

12. Core answer architecture - LWE, affected people and durable end-state

Core firewall: This Core section, including the current-status discipline below, independently answers the 2018, 2020, 2022 and 2025 LWE routes. Advanced adds optional debate, not required content.

Demand decoder and thesis

Thesis: LWE is a Maoist armed challenge to capture state power, not a secessionist claim; its violence falls where security, administration, rights and development converge, but a violence decline is not the same as a completed land, forest-rights or justice settlement.

Executable Core spines

10 marks - meaning, people affected and measures (2025). Define LWE and distinguish it from a separatist movement. Cover affected people under four heads: coercion/violence; blocked roads, schools and health access; land/forest and livelihood insecurity; and weakened panchayat/justice presence. Then use the National Policy and Action Plan's three prongs: security, development, and rights/entitlements. Close with **clear -> hold -> develop**: holding lawful administration is the test of durability.

15 marks - determinants and differentiated strategy (2020). Separate structural causes (land/forest exclusion, mineral-belt extraction, governance deficit) from the organisation's own extortion/development- obstruction strategy. Allocate roles: political executive coordinates States and rights safeguards; civil administration restores services and grievance mechanisms; police/security forces protect people, infrastructure and lawful access. Add PESA/FRA implementation and a qualification that their enactment is not proof of delivery.

20 marks - evaluation/elimination. Compare security outcomes, governance/rights outcomes and reintegration outcomes. End: the viable end-state is not a district label or target date but absence of coercive parallel authority plus functioning, trusted constitutional governance.

Current-status discipline

- The **73% violence / 86% deaths / 38-district** figures are an MHA

2024 baseline, not a 4 February 2026 result. Do not re-date them.

- A later MHA parliamentary reply of **December 2025** reported an

89% decline in violence, a 91% decline in deaths since 2010 and **218 incidents in 2025**. These are reported security metrics, not a root-cause verdict.

- PIB's June 2026 *Naxal-Free India* material describes India as

"effectively free from Left-Wing Extremism." Preserve that qualified official wording; do not convert it into literal zero incidents, zero risk or completed rehabilitation.

Claim -> evidence -> analysis -> qualification bank

Claim	Named evidence/example	What it proves	Qualification
LWE feeds on a governance-and-rights gap as well as ideology.	Singh's land/forest-rights and jal-jangal-zameen diagnosis; FRA 2006 and PESA 1996.	Rights delivery is a counter-LWE security capability, not a welfare afterthought.	Legal entitlement or scheme outlay is not evidence of title recognition or trusted delivery.
The organisation can maintain the condition it exploits.	Singh's mineral-belt extortion and development-obstruction account.	Poverty is not a mechanically sufficient cause; coercive organisation is an active variable.	Do not infer current cadre strength or district control from book-period descriptions.
Security gains need an administrative holding phase.	National Policy and Action Plan, 2015; clear-hold-develop logic.	Roads, police presence and civil administration must arrive together after operations.	A de-listed district is an administrative classification, not proof that grievance is resolved.
Current official claims must be graded.	December 2025 MHA reply and June 2026 PIB wording.	Outcome evidence can be used without treating an announced target as achievement.	Avoid uncited incident, casualty, force-deployment or surrender figures.

Direct PYQ routes now owned in Core

- **2018 GS-III:** explain the LWE challenge through cause -> organisation
-> vulnerability -> integrated response, rather than narrating Naxalbari.
- **2020 GS-III:** use the differentiated government/civil-administration/
security-force allocation above.
- **2022 GS-III:** explain why a multi-layered strategy is required and
include rights and local trust as operational variables.
- **2025 GS-III:** use the 10-mark spine and the status ladder above; the
paper's "eliminated by 2026" statement is a policy claim to assess, not a fact to repeat.

13. Study links

- FACT: Advanced companion:

advanced/03_Left-Wing-Extremism-and-Integrated-Response.md.

- FACT: 00_Master-Framework.md Sections 4-5 - the root-cause matrix and actor-response matrix.

- ANALYSIS: **Lateral topics in this folder:** Topic 01 for the doctrinal security-development sequencing question; topic 11 for the extortion/ organised-crime financial dimension; topic 12 for CRPF/CoBRA and state- police institutional roles.

CLOSING RECALL FLOW - CORE SYNTHESIS - DATED DECLINE EFFECTIVELY-FREE CLAIM AND DURABLE END-STATE

UPSC TRAP / ANSWER-USE: Thesis: LWE is a Maoist armed challenge to capture state power, not a secessionist claim; its violence falls where security, administration, rights and development converge, but a violence decline is not the same as a completed land, forest-rights or justice settlement.

|

v

ANSWER-GRABBING FORMULATION: Read Dated decline effectively-free claim and durable end-state as a sequence: identify Dated decline metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

INTERNAL SECURITY DEEP-REVIEW CORE CONTROL

- **Must remember:** Left-wing extremism requires a calibrated governance-development-security response addressing violence, state reach, land and forest rights, livelihoods, infrastructure, local legitimacy and rehabilitation.
- **Close distinction:** LWE is not ordinary rural deprivation, a security operation is not development delivery, road or telecom sanction is not completed access, and surrender is not durable reintegration.
- **Mechanism / status / evidence limit:** Separate affected-area notification or official classification from observed trend; date every district, incident, casualty, surrender, expenditure and outcome claim.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Naxalbari origin?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: A. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q2. Which option preserves the legal or institutional boundary of Naxalbari origin?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: B. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q3. Which statement uses Naxalbari origin without changing its institution, law or status?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. D. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Answer: C. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about Naxalbari origin?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: D. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q5. Which statement correctly identifies LWE objective?

A. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: A. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q6. Which option preserves the legal or institutional boundary of LWE objective?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: B. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q7. Which statement uses LWE objective without changing its institution, law or status?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: C. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about LWE objective?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

Answer: D. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q9. Which statement correctly identifies Five-phase strategy?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Answer: A. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q10. Which option preserves the legal or institutional boundary of Five-phase strategy?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: B. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q11. Which statement uses Five-phase strategy without changing its institution, law or status?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. C. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: C. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about Five-phase strategy?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: D. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

status.

Q13. Which statement correctly identifies CPI Maoist formation?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: A. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q14. Which option preserves the legal or institutional boundary of CPI Maoist formation?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. D. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Answer: B. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q15. Which statement uses CPI Maoist formation without changing its institution, law or status?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: C. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about CPI Maoist formation?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: D. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other

options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q17. Which statement correctly identifies Land-forest causes?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: A. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q18. Which option preserves the legal or institutional boundary of Land-forest causes?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. C. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: B. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q19. Which statement uses Land-forest causes without changing its institution, law or status?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Answer: C. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about Land-forest causes?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Answer: D. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q21. Which statement correctly identifies Development-governance causes?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: A. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q22. Which option preserves the legal or institutional boundary of Development-governance causes?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. C. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: B. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q23. Which statement uses Development-governance causes without changing its institution, law or status?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: C. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about Development-governance causes?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Answer: D. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q25. Which statement correctly identifies Mineral-extortion nexus?

A. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: A. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q26. Which option preserves the legal or institutional boundary of Mineral-extortion nexus?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: B. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q27. Which statement uses Mineral-extortion nexus without changing its institution, law or status?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. C. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: C. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about Mineral-extortion nexus?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: D. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q29. Which statement correctly identifies Instrumental underdevelopment?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: A. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q30. Which option preserves the legal or institutional boundary of Instrumental underdevelopment?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Answer: B. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may

maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q31. Which statement uses Instrumental underdevelopment without changing its institution, law or status?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: C. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about Instrumental underdevelopment?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: D. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q33. Which statement correctly identifies Civilian impact?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: A. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q34. Which option preserves the legal or institutional boundary of Civilian impact?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: B. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q35. Which statement uses Civilian impact without changing its institution, law or status?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.

Answer: C. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about Civilian impact?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: D. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q37. Which statement correctly identifies Clear-hold-develop?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: A. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q38. Which option preserves the legal or institutional boundary of Clear-hold-develop?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: B. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q39. Which statement uses Clear-hold-develop without changing its institution, law or status?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: C. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about Clear-hold-develop?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Answer: D. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q41. Which statement correctly identifies Three-pronged policy?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: A. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q42. Which option preserves the legal or institutional boundary of Three-pronged policy?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: B. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q43. Which statement uses Three-pronged policy without changing its institution, law or status?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: C. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about Three-pronged policy?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: D. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q45. Which statement correctly identifies Three-track operational frame?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: A. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q46. Which option preserves the legal or institutional boundary of Three-track operational frame?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: B. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q47. Which statement uses Three-track operational frame without changing its institution, law or status?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: C. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about Three-track operational frame?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: D. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q49. Which statement correctly identifies FRA rights boundary?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. D. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.

Answer: A. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q50. Which option preserves the legal or institutional boundary of FRA rights boundary?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: B. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q51. Which statement uses FRA rights boundary without changing its institution, law or status?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: C. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about FRA rights boundary?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.

Answer: D. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q53. Which statement correctly identifies PESA governance boundary?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.

Answer: A. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q54. Which option preserves the legal or institutional boundary of PESA governance boundary?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: B. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q55. Which statement uses PESA governance boundary without changing its institution, law or status?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: C. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about PESA governance boundary?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: D. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q57. Which statement correctly identifies UAPA listing boundary?

A. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. B. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: A. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q58. Which option preserves the legal or institutional boundary of UAPA listing boundary?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: B. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q59. Which statement uses UAPA listing boundary without changing its institution, law or status?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.

Answer: C. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about UAPA listing boundary?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.

Answer: D. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q61. Which statement correctly identifies Inter-State trijunction?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: A. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary

Q62. Which option preserves the legal or institutional boundary of Inter-State trijunction?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.

Answer: B. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q63. Which statement uses Inter-State trijunction without changing its institution, law or status?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. D. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Answer: C. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Inter-State trijunction?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: D. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q65. Which statement correctly identifies Specialised-force lesson?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: A. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q66. Which option preserves the legal or institutional boundary of Specialised-force lesson?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: B. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q67. Which statement uses Specialised-force lesson without changing its institution, law or status?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: C. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about Specialised-force lesson?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: D. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q69. Which statement correctly identifies Surrender-rehabilitation firewall?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. C. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. D. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Answer: A. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q70. Which option preserves the legal or institutional boundary of Surrender-rehabilitation firewall?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: B. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q71. Which statement uses Surrender-rehabilitation firewall without changing its institution, law or status?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

Answer: C. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Surrender-rehabilitation firewall?

A. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.

Answer: D. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q73. Which statement correctly identifies Dated decline metrics?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: A. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q74. Which option preserves the legal or institutional boundary of Dated decline metrics?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: B. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q75. Which statement uses Dated decline metrics without changing its institution, law or status?

A. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: C. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about Dated decline metrics?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: D. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q77. Which statement correctly identifies Post-deadline status?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. D. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

Answer: A. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q78. Which option preserves the legal or institutional boundary of Post-deadline status?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: B. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q79. Which statement uses Post-deadline status without changing its institution, law or status?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: C. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Post-deadline status?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Answer: D. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The audited GS-III ledgers route the 2018, 2020, 2022 and 2025 LWE demands here. The module preserves directive and marks metadata, grades dated official claims, and does not infer tactical details or objective keys.

PYQ DEMAND CARD 1 - 2018 GS-III

Demand: Left Wing Extremism challenges and the Government's counter-strategy.

Status: Audited neutral rendering; Explain · 10 marks · 150 words; stem verified against the official scan.

Model solution: Naxalbari origin: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 1 - 2018 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Naxalbari origin: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion

opportunities; resource presence alone does not explain recruitment. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Left Wing Extremism challenges and the Government's counter-strategy. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Audited neutral rendering; Explain · 10 marks · 150 words; stem verified against the official scan. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Naxalbari origin: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 1 - 2018 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 2 - 2020 GS-III

Demand: Left-wing extremism determinants in eastern India and a differentiated strategy for Government, civil administration and security forces.

Status: Audited neutral rendering; What are/strategy · 15 marks · 250 words.

Model solution: Land-forest causes: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Development-governance causes: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Mineral-extortion nexus: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Instrumental underdevelopment: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Three-pronged policy: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Inter-State trijunction:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Specialised-force lesson:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 2 - 2020 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 2 - 2020 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 3 - 2022 GS-III

Demand: Naxalism as an internal-security threat and the required multilayered response strategy.

Status: Audited neutral rendering; Discuss · 15 marks · 250 words.

Model solution: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 3 - 2022 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Naxalism as an internal-security threat and the required multilayered response strategy. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Audited neutral rendering; Discuss · 15 marks · 250 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character,

intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 3 - 2022 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 4 - 2025 GS-III

Demand: "The Government of India recently stated that Left Wing Extremism (LWE) will be eliminated by 2026. What do you understand by LWE and how are the people affected by it? What measures have been taken by the government to eliminate LWE?"

Status: Verbatim owner-preserved question; Explain · 10 marks · 150 words.

Model solution: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996

extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Dated decline metrics:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Post-deadline status:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 4 - 2025 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Dated decline metrics:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Post-deadline status:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Status: Verbatim owner-preserved question; Explain · 10 marks · 150 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood

and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Clear-hold-develop: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Dated decline metrics:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Post-deadline status:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 4 - 2025 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain why LWE is not merely a law-and-order problem. Answer in about 150 words.

Model thesis: Claim: LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.
- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.
- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Qualified conclusion: Claim: LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **explain** requires a direct position on 'Explain why LWE is not merely a law-and-order problem. Answer in about 150 words.', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This

fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: **Claim:** LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified

evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Explain why LWE is not merely a law-and-order problem. Answer in about 150 words.', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Describe how people are affected by LWE and identify the State's immediate duties. Answer in about 150 words.

Model thesis: **Claim:** Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Qualified conclusion: Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **describe** requires a direct position on 'Describe how people are affected by LWE and identify the State's immediate duties. Answer in...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Answer in...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Analyse the determinants of LWE in eastern India and assign roles to Government, civil administration and security forces. Answer in about 250 words.

Model thesis: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation

status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.
- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
- The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
- PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
- Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Qualified conclusion: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and

verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **analyse** requires a direct position on 'Analyse the determinants of LWE in eastern India and assign roles to Government, civil...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and

verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response

route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

4. **Claim:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE

intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Analyse the determinants of LWE in eastern India and assign roles to Government, civil...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Discuss the security-development-rights strategy for countering Naxalism. Answer in about 250 words.

Model thesis: Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame.

Named evidence/example: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
- The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.
- The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
- PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
- CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.
- The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Qualified conclusion: Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can

develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **discuss** requires a direct position on 'Discuss the security-development-rights strategy for countering Naxalism. Answer in about 250...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard,

implementation gap or residual risk.

7. **Claim:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Discuss the security-development-rights strategy for countering Naxalism. Answer in about 250...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific

qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate whether India's reported LWE decline represents durable root-cause resolution. Answer in about 300 words.

Model thesis: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
- PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
- Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.
- The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.
- PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Qualified conclusion: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung

before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **evaluate** requires a direct position on 'Evaluate whether India's reported LWE decline represents durable root-cause resolution....', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument,

institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction,

source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

9. **Claim:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and

notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Evaluate whether India's reported LWE decline represents durable root-cause resolution....', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Examine LWE through clear-hold-develop, inter-State coordination and surrender-rehabilitation outcomes. Answer in about 300 words.

Model thesis: Claim: Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation

status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
- The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.
- Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.
- The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.
- Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.
- PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Qualified conclusion: Claim: Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date,

institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson.

Named evidence/example: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **examine** requires a direct position on 'Examine LWE through clear-hold-develop, inter-State coordination and surrender-rehabilitation...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:**

Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal

character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

8. **Claim:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Examine LWE through clear-hold-develop, inter-State coordination and surrender-rehabilitation...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Internal Security | **Tier:** Advanced | **GS Paper:** GS-III. **Core area:** The security-development sequencing debate; inter-State coordination failure at trijunctions; rights/Forest Rights Act implementation gaps; surrender-rehabilitation design; trust-restoration as a distinct strategic pillar. **Grounded in:** Ashok Kumar Singh, *Challenges to Internal Security of India*, PDF pp. 58-65; 00_Master - Framework .md Sections 3-6; audited GS-III syllabus; MHA National Policy and Action Plan to address LWE (2015); MHA parliamentary replies (December 2025 and February 2026); PIB "Naxal-Free India" explainer (June 2026); FRA 2006 and PESA 1996 as published in India Code. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. *Companion:* basic/03_Left-Wing-Extremism-and-Integrated-Response.md.

1. Answer thesis and syllabus boundary

Thesis: ANALYSIS: LWE's steep, officially reported security decline (MHA's December 2025 reply) is best explained not by security operations alone but by the convergence of four tracks - security, development, rights-based governance (Forest Rights Act implementation) and trust restoration - and the durable lesson from the movement's own political economy is that security gains are reversible unless development and rights delivery keep pace with territorial reclamation. **Boundary:** WRONG: this topic does not cover general communal/identity conflict (folded into topics 02, 04, 05, 09 per this folder's design) or general organised-crime typology (topic 11 covers the extortion-financing link specifically).

2. Conceptual distinctions

Concept	Precise meaning
FACT: Instrumental underdevelopment	FACT: Singh's precise claim: Maoists "have vested interest in keeping poverty alive because it enables them to expand their territory," actively blocking roads, electricity and water-supply improvement (PDF p. 59) - underdevelopment is not merely LWE's cause but also its <i>maintained condition</i> .
FACT: Administrative-hurdle typology	FACT: Singh lists specific hurdles: poor infrastructure/manpower shortage; absence of routine administration enabling parallel taxation; inter-State boundary exploitation (the Dandakaranya trijunction problem); lack of professionalism between central forces and state police; and differing State policies on surrender/talks allowing cross-border escape (PDF pp. 61-62).
ANALYSIS: Security-first vs. development-first sequencing	Singh's own text argues implicitly for a security-precedes-development sequence ("security needs to be established before development can come," PDF p. 63) while simultaneously warning that security without addressing root causes will fail - the two claims must be reconciled as <i>sequenced</i> , not <i>either/or</i> .
FACT: Psychological operations as a distinct pillar	FACT: Singh names this explicitly, separate from security and development: "delegitimize the movement," manage media/public perception, and have "administration... engage with public at large, civil society, NGOs to restore people's faith" (PDF p. 64) - trust restoration is treated as its own strategic track, not a by-product of security or development success.
ANALYSIS: Clear vs. hold vs. develop - three separable capabilities	Clearing is a <i>force</i> capability; holding is an <i>administrative presence</i> capability (police station, revenue and welfare staff physically resident); developing is a <i>delivery</i> capability. ANALYSIS: India's LWE record shows the binding constraint has usually been the second, not the first - which is why fortified police stations, road connectivity and mobile-tower projects appear in the scheme list alongside battalions. A decline in incidents evidences clearing; only a sustained administrative presence evidences holding.
ANALYSIS: De-listing a district vs. resolving its grievances	The "LWE-affected" and "most-affected" district lists are administrative classifications that drive scheme eligibility (SRE, SCA) and force deployment. ANALYSIS: De-listing therefore changes the <i>resource</i> position of the district as well as its security label - which is an argument for tapering, rather than abruptly ending, development support in recently de-listed districts if reversibility is to be avoided.

3. Causal model

Analytical claim: ANALYSIS: The MHA's December 2025 reported decline in LWE violence is consistent with the three-track model converging in the most affected districts, but the durability of that decline depends on whether development and rights delivery (Forest Rights Act implementation, scheme saturation) has kept pace with security gains in the same districts - a distinction the announced 2026 elimination *target* does not, by itself, confirm.

4. Institutional and reform architecture

- **FACT: Inter-State trijunction problem:** Singh identifies the

Dandakaranya region (spanning Chhattisgarh, Odisha, Maharashtra, Andhra Pradesh) as structurally advantageous to Maoists because "poor coordination among various state police forces" at "inter-state trijunctions" allows pressure in one state to be relieved by movement into another (PDF pp. 61-62) - the clearest LWE-specific illustration of the master framework's Centre-State/inter-State coordination constraint.

- **ANALYSIS: Operation Greyhound as an institutional design precedent:** a

specialised, dedicated, well-trained state police force (rather than general-duty police or purely central forces) is credited by Singh with large gains within undivided Andhra Pradesh - but its benefit was partly lost when Naxalites simply relocated to adjoining states lacking an equivalent force (PDF pp. 61-62), reinforcing the coordination lesson.

- **FACT: Forest Rights Act, 2006 implementation:** named explicitly as part

of the development strategy's rights dimension (Singh, PDF p. 63) - **ANALYSIS:** implementation quality (title distribution pace, community-forest- rights recognition) is the recurring practical gap examiners expect candidates to flag, not the Act's mere existence. **ANALYSIS: PESA, 1996** adds the procedural half of the same rights claim in Fifth Schedule areas - Gram Sabha consultation before land acquisition and over minor minerals - which matters precisely because LWE intensity correlates with mineral-belt project activity (Singh, PDF p. 58). An answer that names FRA without PESA names the entitlement without the procedure by which communities can assert it.

- **ANALYSIS: Rights delivery as a security instrument, not a parallel track:**

MHA's 2015 policy makes "ensuring rights and entitlements of local communities" a *prong of the counter-LWE strategy*, not a humanitarian add-on. **ANALYSIS:** The analytical consequence is that a failure of FRA/PESA implementation is a *security* failure in this theatre, and can be argued as such - a framing that distinguishes an advanced answer from a "development is also important" gesture.

- **CURRENT: Current-anchor institutional detail:** verify current SRE/SIS/IAP-

successor scheme names, district coverage and the present force posture in the most-affected districts from a dated MHA annual report or parliamentary reply, not from Singh's book-period scheme list.

5. Indian applications and boundary cases

- ANALYSIS: **Surrender-and-rehabilitation policy variance across States:**

Singh notes "differences in policies of state governments regarding surrenders, talks and policing strategy are also exploited by the Maoists" (PDF p. 62) - a genuine federal-design boundary case: uniform Central guidance versus State-specific rehabilitation packages, each with trade-offs for consistency versus local adaptability. ANALYSIS: Note also the internal distinction: a **surrender** is a single verifiable event producing a countable statistic; **rehabilitation** is a multi-year outcome (livelihood, protection from reprisal, social acceptance) that is rarely measured. Reporting the first as though it evidenced the second is the LWE-specific form of the folder's arrest-versus-conviction discipline.

- ANALYSIS: **Civic Action Programme's "individual-oriented" pivot:** Singh notes

a shift from a "project-oriented" to an "individual-oriented" approach under the "Winning Hearts and Minds" framing (PDF p. 61, book-period) - illustrates that even within the development track, the *design* of delivery (individual welfare versus community infrastructure) is a live policy choice, not a settled matter.

- ANALYSIS: **Boundary case - declining violence vs. declining root causes:** a

sharp fall in violent incidents (as the 2026 reply reports) does not by itself confirm that land, forest and governance grievances have been resolved; Mains answers should distinguish security-metric improvement from root-cause resolution.

6. Limitations and trade-offs

- ANALYSIS: *****"Security before development" risks alienating populations if**

security operations are not tightly rights-bound;** Singh's own psychological-operations pillar exists precisely because security action without trust-building can reproduce the alienation that fuels recruitment.

- ANALYSIS: **Inter-State coordination remains a standing constraint** even after

substantial security gains, because Maoist strategy is explicitly designed to exploit State-boundary discontinuities - a single most-affected-district success does not resolve the trijunction problem structurally.

- ANALYSIS: **Forest Rights Act implementation gaps can undercut security gains**

if land/forest grievances are not resolved even as violence declines - a reversibility risk any "elimination" claim must account for.

- WRONG: ****A declared 2026 elimination target is not, by itself, evidence of**

elimination.** Treat the target and the reply's own figures as distinct evidentiary levels - one is a stated objective, the other is a measured outcome as of the reply's date.

7. Must-Know Facts for Advanced Prelims

- FACT: Singh names the Dandakaranya trijunction (Chhattisgarh-Odisha-

Maharashtra-Andhra Pradesh) as the paradigm case of inter-State coordination failure exploited by Maoists.

- FACT: The three-track LWE strategy - security, development, psychological

operations - is Singh's own explicit structuring device, not an externally imposed framework.

- FACT: The Forest Rights Act, 2006 is named specifically as part of the

rights dimension of the development strategy; PESA, 1996 supplies the Gram Sabha consultation procedure in Fifth Schedule areas.

- FACT: MHA's National Policy and Action Plan (2015) is three-pronged:

security, development, and rights/entitlements of local communities.

- FACT: CPI (Maoist) is listed as a terrorist organisation under the First

Schedule of the UAPA, which is what brings UAPA charges and NIA jurisdiction into LWE cases.

- CURRENT: MHA's December 2025 parliamentary reply reports an ****89% decline in**

violence, **a 91% decline in deaths since 2010 and 218 incidents in 2025****. Treat these as reported security metrics; the earlier 73%/86%/38-district formulation is a 2024 baseline, not a 2026 result.

8. Advanced Prelims traps

- WRONG: Operation Greyhound alone permanently ended Naxalism in the region it covered. -> Singh notes Naxalites who faced pressure in Andhra Pradesh "made an easy escape to adjoining states," showing a single-State security success does not resolve a multi-State problem without coordinated response.
- WRONG: The Forest Rights Act automatically resolves the land/forest grievance root cause once enacted. -> Implementation quality (pace and completeness of title recognition) is the actual determinant of whether the grievance is addressed, not the statute's existence.
- WRONG: A reported decline in violent incidents by a stated date confirms that LWE's root causes have been resolved. -> Violence-metric decline and root-cause resolution are distinct; a Mains answer should evaluate both separately.

9. CURRENT: Current-anchor note

- CURRENT: MHA's December 2025 parliamentary reply supplies the pre-target baseline: **89% lower violence, 91% lower deaths** since 2010 and **218 incidents in 2025**. The 31 March 2026 target was a stated policy objective, not outcome evidence.
- CURRENT: PIB's **June 2026 "Naxal-Free India"** explainer is the subsequent official assessment: India is described as **"effectively free from Left-Wing Extremism."** Treat this as a qualified status claim, not literal zero violence or proof that governance grievances have ended.

11. Mains-ready framework

Central thesis: LWE's officially reported decline reflects the convergence of security, development and trust-restoration tracks in the worst-affected districts, but the movement's own political economy - an instrumental interest in sustained underdevelopment, and a strategy explicitly designed to exploit inter-State coordination gaps - means that security-metric improvement should not be mistaken for irreversible, root-cause resolution.

1. **Define LWE and its ideology**, distinguishing it from secessionist militancy (basic topic Section 2).
2. **State the root-cause matrix** (land/forest exclusion, extortion economy, governance deficit) and the instrumental-underdevelopment insight (Section 2 above).
3. **Trace the three-track response** (security, development, psychological) and its sequencing logic.
4. **Name the inter-State coordination constraint** as the structural limitation on any single-State security success.
5. **Cite the December 2025 MHA figures** honestly, distinguishing reported decline from the stated 2026 elimination objective.
6. **Acknowledge the reversibility risk** if development and rights delivery lag behind security gains.
7. ****Close by relating the answer to the master framework's calibrated way-forward principle**** - sustained, sequenced, area-specific convergence of all three tracks, not security alone.

12. Probable questions

- ANALYSIS: **Prelims:** Which four States meet at the Dandakaranya trijunction historically exploited by Left-Wing Extremist groups for inter-State movement?
- ANALYSIS: **Mains (15 marks):** "A decline in LWE-related violence is not the same as the resolution of LWE's root causes." Critically examine.
- ANALYSIS: **Mains (15 marks, PYQ-linked):** Assess the claim that LWE will be eliminated by 2026, distinguishing security-metric gains from development and rights-based root-cause resolution.

13. Study links

- FACT: Foundation companion:

basic/03_Left-Wing-Extremism-and-Integrated-Response.md.

- FACT: 00_Master-Framework.md Sections 3, 6 and 8 - the doctrine's causal model, federal architecture and recurring analytical gaps.

- ANALYSIS: **Lateral topics in this folder:** Topic 01 (advanced) for the general security-development sequencing debate; topic 11 for the extortion/ organised-crime financial nexus in full; topic 12 for CRPF/CoBRA mandates and inter-agency coordination reform.

CONSOLIDATED REGISTER NOTES

Left-Wing Extremism and Integrated Response: IDEOLOGY, CAUSATION AND PEOPLE-AFFECTED MAP

1. **Naxalbari origin:** The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.
2. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.
3. **Five-phase strategy:** The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.
4. **CPI Maoist formation:** CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.
5. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.
6. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
7. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
8. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.
9. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.
10. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
11. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
12. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.
13. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
14. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
15. **UAPA listing boundary:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.
16. **Inter-State trijunction:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

17. **Specialised-force lesson:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.
18. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.
19. **Dated decline metrics:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.
20. **Post-deadline status:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Left-Wing Extremism and Integrated Response: SECURITY, DEVELOPMENT, RIGHTS AND FEDERAL RESPONSE

- Do not describe LWE as a secessionist movement.
- Do not treat poverty or mineral resources as mechanically sufficient causes.
- Do not use a book-period Red Corridor map as current status.
- Do not treat security operations as the whole response.
- Do not omit rights and entitlements from the 2015 policy.
- Do not treat FRA or PESA enactment as implementation.
- Do not equate clearing an area with holding trusted administration.
- Do not convert a district classification into grievance resolution.
- Do not equate surrender with rehabilitation.
- Do not treat an announced elimination target as an achieved outcome.
- Do not merge official figures from different dates or cut-offs.
- Do not disclose tactical deployments or operational methods.

Left-Wing Extremism and Integrated Response: CLEAR-HOLD-DEVELOP AND REINTEGRATION ANSWER SPINE

DEFINE LWE AS MAOIST STATE-POWER CAPTURE NOT SECESSION
 -> SEPARATE STRUCTURAL GRIEVANCE FROM ORGANISED COERCIVE CONVERSION
 -> EXPLAIN LAND FOREST GOVERNANCE MINERAL AND EXTORTION LINKS
 -> SHOW EFFECTS ON PEOPLE SERVICES LIVELIHOODS AND LOCAL INSTITUTIONS
 -> APPLY SECURITY DEVELOPMENT RIGHTS AND TRUST-RESTORATION TRACKS
 -> TEST CLEAR HOLD DEVELOP AND INTER-STATE COORDINATION
 -> SEPARATE SURRENDER REHABILITATION DISTRICT LABEL AND OUTCOME
 -> CONCLUDE WITH TRUSTED GOVERNANCE AND RELAPSE PREVENTION

Left-Wing Extremism and Integrated Response: DATED METRICS, QUALIFIED STATUS AND CLAIM FIREWALL

The December 2025 MHA metrics and the June 2026 PIB phrase 'effectively free from Left-Wing Extremism' are kept as separate dated claims. Neither proves zero violence, completed rehabilitation, implemented forest rights or irreversible grievance resolution.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: LWE concept rail

MAY 1967 NAXALBARI -> MOVEMENT ORIGIN
MAOIST OBJECTIVE -> CAPTURE STATE POWER
METHOD -> PROTRACTED PEOPLE'S WAR
BOUNDARY -> NOT A SECESSIONIST CLAIM

ASCII MASTER FLOW - PANEL 2/12: Five-phase expansion

PREPARATORY -> PERSPECTIVE -> GUERRILLA
-> BASE -> LIBERATED PHASE
USE -> understand organisational intent
TRAP -> do not infer present territorial status

ASCII MASTER FLOW - PANEL 3/12: Cause-actor matrix

LAND / FOREST EXCLUSION | GOVERNANCE ABSENCE
POVERTY / SERVICES | SOCIAL ALIENATION
ORGANISED MAOIST ACTOR -> recruitment and coercion
RULE -> grievance is vulnerability, not automatic violence

ASCII MASTER FLOW - PANEL 4/12: Mineral-extortion loop

MINERAL / INFRASTRUCTURE ACTIVITY
-> CONTRACTING AND MOVEMENT OF FUNDS
-> EXTORTION OPPORTUNITY
-> FINANCE FOR COERCIVE CONTROL
QUALIFY -> resource wealth is not itself the cause

ASCII MASTER FLOW - PANEL 5/12: Instrumental underdevelopment

POVERTY / ADMINISTRATIVE GAP -> RECRUITMENT VULNERABILITY
MAOIST OBSTRUCTION -> ROADS / POWER / WATER DELAYED
DELAY -> PARALLEL AUTHORITY PERSISTS
PERSISTENCE -> FURTHER OBSTRUCTION

ASCII MASTER FLOW - PANEL 6/12: People-affected map

LIFE / SAFETY -> violence and coercion
LIVELIHOOD -> extortion, displacement, forest insecurity
SERVICES -> roads, schools, health access blocked
GOVERNANCE -> panchayat and justice presence weakened

ASCII MASTER FLOW - PANEL 7/12: Clear-hold-develop chain

CLEAR -> secure lawful access
HOLD -> resident police + civil administration
DEVELOP -> rights + services + infrastructure
TRUST -> accountable delivery prevents relapse

ASCII MASTER FLOW - PANEL 8/12: 2015 policy tripod

SECURITY RESPONSE
DEVELOPMENT RESPONSE
RIGHTS AND ENTITLEMENTS OF LOCAL COMMUNITIES
RULE -> no prong substitutes for the others

ASCII MASTER FLOW - PANEL 9/12: Rights-governance pair

FRA 2006 -> individual and community forest-right claims
PESA 1996 -> Gram Sabha role in Fifth Schedule governance
ENACTMENT -> legal basis
IMPLEMENTATION -> separate verified outcome

ASCII MASTER FLOW - PANEL 10/12: Inter-State pressure map

CHHATTISGARH | ODISHA | MAHARASHTRA | FORMER ANDHRA REGION
PRESSURE IN ONE STATE -> MOVEMENT TOWARD ANOTHER
DIFFERING POLICIES -> exploitable discontinuity
RESPONSE -> shared intelligence and compatible strategy
