

SOLVED PRACTICE WORKBOOK

Left-Wing Extremism and Integrated Response

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Left-Wing Extremism and Integrated Response - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which statement correctly identifies Naxalbari origin?	6
Q2. Which option preserves the legal or institutional boundary of Naxalbari origin?	6
Q3. Which statement uses Naxalbari origin without changing its institution, law or status?	6
Q4. Which option avoids the standard UPSC close-option trap about Naxalbari origin?	7
Q5. Which statement correctly identifies LWE objective?	7
Q6. Which option preserves the legal or institutional boundary of LWE objective?	7
Q7. Which statement uses LWE objective without changing its institution, law or status?	7
Q8. Which option avoids the standard UPSC close-option trap about LWE objective?	8
Q9. Which statement correctly identifies Five-phase strategy?	8
Q10. Which option preserves the legal or institutional boundary of Five-phase strategy?	8
Q11. Which statement uses Five-phase strategy without changing its institution, law or status?	8
Q12. Which option avoids the standard UPSC close-option trap about Five-phase strategy?	9
Q13. Which statement correctly identifies CPI Maoist formation?	9
Q14. Which option preserves the legal or institutional boundary of CPI Maoist formation?	9
Q15. Which statement uses CPI Maoist formation without changing its institution, law or status?	9
Q16. Which option avoids the standard UPSC close-option trap about CPI Maoist formation?	10
Q17. Which statement correctly identifies Land-forest causes?	10
Q18. Which option preserves the legal or institutional boundary of Land-forest causes?	10
Q19. Which statement uses Land-forest causes without changing its institution, law or status?	11
Q20. Which option avoids the standard UPSC close-option trap about Land-forest causes?	11
Q21. Which statement correctly identifies Development-governance causes?	11
Q22. Which option preserves the legal or institutional boundary of Development-governance causes?	11
Q23. Which statement uses Development-governance causes without changing its institution, law or status?	12
Q24. Which option avoids the standard UPSC close-option trap about Development-governance causes?	12
Q25. Which statement correctly identifies Mineral-extortion nexus?	12
Q26. Which option preserves the legal or institutional boundary of Mineral-extortion nexus?	12
Q27. Which statement uses Mineral-extortion nexus without changing its institution, law or status?	13

Q28. Which option avoids the standard UPSC close-option trap about Mineral-extortion nexus?	13
Q29. Which statement correctly identifies Instrumental underdevelopment?	13
Q30. Which option preserves the legal or institutional boundary of Instrumental underdevelopment?	14
Q31. Which statement uses Instrumental underdevelopment without changing its institution, law or status?	14
Q32. Which option avoids the standard UPSC close-option trap about Instrumental underdevelopment?	14
Q33. Which statement correctly identifies Civilian impact?	14
Q34. Which option preserves the legal or institutional boundary of Civilian impact?	15
Q35. Which statement uses Civilian impact without changing its institution, law or status?	15
Q36. Which option avoids the standard UPSC close-option trap about Civilian impact?	15
Q37. Which statement correctly identifies Clear-hold-develop?	16
Q38. Which option preserves the legal or institutional boundary of Clear-hold-develop?	16
Q39. Which statement uses Clear-hold-develop without changing its institution, law or status?	16
Q40. Which option avoids the standard UPSC close-option trap about Clear-hold-develop?	16
Q41. Which statement correctly identifies Three-pronged policy?	17
Q42. Which option preserves the legal or institutional boundary of Three-pronged policy?	17
Q43. Which statement uses Three-pronged policy without changing its institution, law or status?	17
Q44. Which option avoids the standard UPSC close-option trap about Three-pronged policy?	17
Q45. Which statement correctly identifies Three-track operational frame?	18
Q46. Which option preserves the legal or institutional boundary of Three-track operational frame?	18
Q47. Which statement uses Three-track operational frame without changing its institution, law or status?	18
Q48. Which option avoids the standard UPSC close-option trap about Three-track operational frame?	18
Q49. Which statement correctly identifies FRA rights boundary?	19
Q50. Which option preserves the legal or institutional boundary of FRA rights boundary?	19
Q51. Which statement uses FRA rights boundary without changing its institution, law or status?	19
Q52. Which option avoids the standard UPSC close-option trap about FRA rights boundary?	19
Q53. Which statement correctly identifies PESA governance boundary?	20
Q54. Which option preserves the legal or institutional boundary of PESA governance boundary?	20
Q55. Which statement uses PESA governance boundary without changing its institution, law or status?	20
Q56. Which option avoids the standard UPSC close-option trap about PESA governance boundary?	20
Q57. Which statement correctly identifies UAPA listing boundary?	21
Q58. Which option preserves the legal or institutional boundary of UAPA listing boundary?	21
Q59. Which statement uses UAPA listing boundary without changing its institution, law or status?	21

Q60. Which option avoids the standard UPSC close-option trap about UAPA listing boundary?	21
Q61. Which statement correctly identifies Inter-State trijunction?	22
Q62. Which option preserves the legal or institutional boundary of Inter-State trijunction?	22
Q63. Which statement uses Inter-State trijunction without changing its institution, law or status?	22
Q64. Which option avoids the standard UPSC close-option trap about Inter-State trijunction?	22
Q65. Which statement correctly identifies Specialised-force lesson?	23
Q66. Which option preserves the legal or institutional boundary of Specialised-force lesson?	23
Q67. Which statement uses Specialised-force lesson without changing its institution, law or status?	23
Q68. Which option avoids the standard UPSC close-option trap about Specialised-force lesson?	24
Q69. Which statement correctly identifies Surrender-rehabilitation firewall?	24
Q70. Which option preserves the legal or institutional boundary of Surrender-rehabilitation firewall?	24
Q71. Which statement uses Surrender-rehabilitation firewall without changing its institution, law or status?	24
Q72. Which option avoids the standard UPSC close-option trap about Surrender-rehabilitation firewall?	25
Q73. Which statement correctly identifies Dated decline metrics?	25
Q74. Which option preserves the legal or institutional boundary of Dated decline metrics?	25
Q75. Which statement uses Dated decline metrics without changing its institution, law or status?	26
Q76. Which option avoids the standard UPSC close-option trap about Dated decline metrics?	26
Q77. Which statement correctly identifies Post-deadline status?	26
Q78. Which option preserves the legal or institutional boundary of Post-deadline status?	26
Q79. Which statement uses Post-deadline status without changing its institution, law or status?	27
Q80. Which option avoids the standard UPSC close-option trap about Post-deadline status?	27

Left-Wing Extremism and Integrated Response - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Naxalbari origin?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: A. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q2. Which option preserves the legal or institutional boundary of Naxalbari origin?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: B. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q3. Which statement uses Naxalbari origin without changing its institution, law or status?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. D. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Answer: C. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about Naxalbari origin?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: D. Explanation: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q5. Which statement correctly identifies LWE objective?

A. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: A. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q6. Which option preserves the legal or institutional boundary of LWE objective?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: B. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q7. Which statement uses LWE objective without changing its institution, law or status?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: C. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about LWE objective?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

Answer: D. Explanation: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q9. Which statement correctly identifies Five-phase strategy?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Answer: A. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q10. Which option preserves the legal or institutional boundary of Five-phase strategy?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: B. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q11. Which statement uses Five-phase strategy without changing its institution, law or status?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. C. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: C. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about Five-phase strategy?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: D. Explanation: The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q13. Which statement correctly identifies CPI Maoist formation?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: A. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q14. Which option preserves the legal or institutional boundary of CPI Maoist formation?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. D. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Answer: B. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q15. Which statement uses CPI Maoist formation without changing its institution, law or status?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: C. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other

options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about CPI Maoist formation?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: D. Explanation: CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q17. Which statement correctly identifies Land-forest causes?

A. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: A. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q18. Which option preserves the legal or institutional boundary of Land-forest causes?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. C. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: B. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q19. Which statement uses Land-forest causes without changing its institution, law or status?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Answer: C. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about Land-forest causes?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Answer: D. Explanation: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q21. Which statement correctly identifies Development-governance causes?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: A. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q22. Which option preserves the legal or institutional boundary of Development-governance causes?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. C. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: B. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The

other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q23. Which statement uses Development-governance causes without changing its institution, law or status?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: C. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about Development-governance causes?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Answer: D. Explanation: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q25. Which statement correctly identifies Mineral-extortion nexus?

A. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: A. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q26. Which option preserves the legal or institutional boundary of Mineral-extortion nexus?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: B. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q27. Which statement uses Mineral-extortion nexus without changing its institution, law or status?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. C. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: C. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about Mineral-extortion nexus?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. D. LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Answer: D. Explanation: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q29. Which statement correctly identifies Instrumental underdevelopment?

A. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: A. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q30. Which option preserves the legal or institutional boundary of Instrumental underdevelopment?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Answer: B. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q31. Which statement uses Instrumental underdevelopment without changing its institution, law or status?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: C. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about Instrumental underdevelopment?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. D. The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Answer: D. Explanation: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q33. Which statement correctly identifies Civilian impact?

A. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: A. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q34. Which option preserves the legal or institutional boundary of Civilian impact?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: B. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q35. Which statement uses Civilian impact without changing its institution, law or status?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. D. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.

Answer: C. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about Civilian impact?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Answer: D. Explanation: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q37. Which statement correctly identifies Clear-hold-develop?

A. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: A. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q38. Which option preserves the legal or institutional boundary of Clear-hold-develop?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. C. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: B. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q39. Which statement uses Clear-hold-develop without changing its institution, law or status?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: C. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about Clear-hold-develop?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Answer: D. Explanation: Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q41. Which statement correctly identifies Three-pronged policy?

A. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: A. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q42. Which option preserves the legal or institutional boundary of Three-pronged policy?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: B. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q43. Which statement uses Three-pronged policy without changing its institution, law or status?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: C. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about Three-pronged policy?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.

Answer: D. Explanation: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q45. Which statement correctly identifies Three-track operational frame?

A. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: A. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q46. Which option preserves the legal or institutional boundary of Three-track operational frame?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: B. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q47. Which statement uses Three-track operational frame without changing its institution, law or status?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: C. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about Three-track operational frame?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Answer: D. Explanation: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q49. Which statement correctly identifies FRA rights boundary?

A. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. D. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.

Answer: A. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q50. Which option preserves the legal or institutional boundary of FRA rights boundary?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: B. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q51. Which statement uses FRA rights boundary without changing its institution, law or status?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: C. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about FRA rights boundary?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.

Answer: D. Explanation: The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q53. Which statement correctly identifies PESA governance boundary?

A. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.

Answer: A. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q54. Which option preserves the legal or institutional boundary of PESA governance boundary?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: B. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q55. Which statement uses PESA governance boundary without changing its institution, law or status?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: C. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about PESA governance boundary?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.

Answer: D. Explanation: PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q57. Which statement correctly identifies UAPA listing boundary?

A. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. B. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: A. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q58. Which option preserves the legal or institutional boundary of UAPA listing boundary?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: B. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q59. Which statement uses UAPA listing boundary without changing its institution, law or status?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. C. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. D. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.

Answer: C. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about UAPA listing boundary?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.

Answer: D. Explanation: CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. The other options change the

threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q61. Which statement correctly identifies Inter-State trijunction?

A. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. B. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: A. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q62. Which option preserves the legal or institutional boundary of Inter-State trijunction?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.

Answer: B. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q63. Which statement uses Inter-State trijunction without changing its institution, law or status?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. D. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Answer: C. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Inter-State trijunction?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Answer: D. Explanation: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q65. Which statement correctly identifies Specialised-force lesson?

A. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: A. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q66. Which option preserves the legal or institutional boundary of Specialised-force lesson?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: B. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q67. Which statement uses Specialised-force lesson without changing its institution, law or status?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. C. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: C. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about Specialised-force lesson?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Answer: D. Explanation: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q69. Which statement correctly identifies Surrender-rehabilitation firewall?

A. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. B. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. C. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. D. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Answer: A. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q70. Which option preserves the legal or institutional boundary of Surrender-rehabilitation firewall?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: B. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q71. Which statement uses Surrender-rehabilitation firewall without changing its institution, law or status?

A. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. D. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

Answer: C. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Surrender-rehabilitation firewall?

A. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. D. Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.

Answer: D. Explanation: Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q73. Which statement correctly identifies Dated decline metrics?

A. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. B. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: A. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q74. Which option preserves the legal or institutional boundary of Dated decline metrics?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map.

Answer: B. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q75. Which statement uses Dated decline metrics without changing its institution, law or status?

A. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: C. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about Dated decline metrics?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.

Answer: D. Explanation: The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q77. Which statement correctly identifies Post-deadline status?

A. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. B. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. C. The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. D. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.

Answer: A. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q78. Which option preserves the legal or institutional boundary of Post-deadline status?

A. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. B. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. C. Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. D. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control.

Answer: B. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q79. Which statement uses Post-deadline status without changing its institution, law or status?

A. The owner's Maoist spread sequence is preparatory, perspective, guerrilla, base and liberated phases; it describes organisational strategy rather than verified present territorial control. B. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. C. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. D. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification.

Answer: C. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Post-deadline status?

A. Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. B. CPI (Maoist) was formed in 2004 through the merger of the People's War Group and Maoist Communist Centre of India; current organisational claims require dated official verification. C. Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. D. PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Answer: D. Explanation: PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The audited GS-III ledgers route the 2018, 2020, 2022 and 2025 LWE demands here. The module preserves directive and marks metadata, grades dated official claims, and does not infer tactical details or objective keys.

PYQ DEMAND CARD 1 - 2018 GS-III

Demand: Left Wing Extremism challenges and the Government's counter-strategy.

Status: Audited neutral rendering; Explain · 10 marks · 150 words; stem verified against the official scan.

Model solution: Naxalbari origin: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 1 - 2018 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Naxalbari origin: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Left Wing Extremism challenges and the Government's counter-strategy. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Audited neutral rendering; Explain · 10 marks · 150 words; stem verified against the official scan. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Naxalbari origin: The Naxalite movement began in May 1967 in the Naxalbari area of Darjeeling district under leaders including Charu Majumdar and Kanu Sanyal; origin history is not a current spread map. **LWE objective:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 1 - 2018 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 2 - 2020 GS-III

Demand: Left-wing extremism determinants in eastern India and a differentiated strategy for Government, civil administration and security forces.

Status: Audited neutral rendering; What are/strategy · 15 marks · 250 words.

Model solution: Land-forest causes: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Development-governance causes: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Mineral-extortion nexus: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Instrumental underdevelopment: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Three-pronged policy: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Inter-State trijunction:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Specialised-force lesson:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 2 - 2020 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Land-forest causes: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest

Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Inter-State trijunction:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Specialised-force lesson:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Left-wing extremism determinants in eastern India and a differentiated strategy for Government, civil administration and security forces. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Audited neutral rendering; What are/strategy · 15 marks · 250 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Land-forest causes: Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

Development-governance causes: Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Mineral-extortion nexus: LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.

Instrumental underdevelopment: The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Three-pronged policy: MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Inter-State trijunction:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Specialised-force lesson:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 2 - 2020 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 3 - 2022 GS-III

Demand: Naxalism as an internal-security threat and the required multilayered response strategy.

Status: Audited neutral rendering; Discuss · 15 marks · 250 words.

Model solution: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 3 - 2022 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Naxalism as an internal-security threat and the required multilayered response strategy. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

2. **Claim:** Status: Audited neutral rendering; Discuss · 15 marks · 250 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Mineral-extortion nexus:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Three-track operational frame:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Surrender-rehabilitation firewall:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. PYQ DEMAND CARD 4 - 2025 GS-III

Demand: "The Government of India recently stated that Left Wing Extremism (LWE) will be eliminated by 2026. What do you understand by LWE and how are the people affected by it? What measures have been taken by the government to eliminate LWE?"

Status: Verbatim owner-preserved question; Explain · 10 marks · 150 words.

Model solution: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights,

services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Dated decline metrics:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Post-deadline status:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 4 - 2025 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: LWE objective: Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Land-forest causes:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Development-governance causes:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Instrumental underdevelopment:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Civilian impact:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Clear-hold-develop:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Three-pronged policy:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **FRA rights boundary:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **PESA governance boundary:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Dated decline metrics:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Post-deadline status:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. ORIGINAL MAINS 1 - 10 MARKS

Question: Explain why LWE is not merely a law-and-order problem. Answer in about 150 words.

Model thesis: **Claim:** LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State.
- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.
- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Qualified conclusion: **Claim:** LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **explain** requires a direct position on 'Explain why LWE is not merely a law-and-order problem. Answer in about 150 words.', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and

Analytical body:

1. **Claim:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: LWE objective. **Named evidence/example:** Left-Wing Extremism is a Maoist armed challenge aimed at capturing state power through protracted people's war, not a secessionist claim for a separate sovereign State. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Explain why LWE is not merely a law-and-order problem. Answer in about 150 words.', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Describe how people are affected by LWE and identify the State's immediate duties. Answer in about 150 words.

Model thesis: Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.

Qualified conclusion: **Claim:** Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **describe** requires a direct position on 'Describe how people are affected by LWE and identify the State's immediate duties. Answer in...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development

consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

3. **Claim:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:**

Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Describe how people are affected by LWE and identify the State's immediate duties. Answer in...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Analyse the determinants of LWE in eastern India and assign roles to Government, civil administration and security forces. Answer in about 250 words.

Model thesis: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat

category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.
- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
- The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
- PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
- Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.

Qualified conclusion: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **analyse** requires a direct position on 'Analyse the determinants of LWE in eastern India and assign roles to Government, civil...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:**

Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

3. **Claim:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak

justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Analyse the determinants of LWE in eastern India and assign roles to Government, civil...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Discuss the security-development-rights strategy for countering Naxalism. Answer in about 250 words.

Model thesis: Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame.

Named evidence/example: The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
- The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.
- The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
- PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
- CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty.
- The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Qualified conclusion: Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can

develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **discuss** requires a direct position on 'Discuss the security-development-rights strategy for countering Naxalism. Answer in about 250...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard,

implementation gap or residual risk.

7. **Claim:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** UAPA listing boundary. **Named evidence/example:** CPI (Maoist) and its formations are listed in the First Schedule of UAPA; a ban or listing is a legal status, not proof that every alleged member or front is guilty. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Discuss the security-development-rights strategy for countering Naxalism. Answer in about 250...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific

qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate whether India's reported LWE decline represents durable root-cause resolution. Answer in about 300 words.

Model thesis: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances.

- Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.
- The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area.
- PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately.
- Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.
- The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict.
- PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Qualified conclusion: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung

before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **evaluate** requires a direct position on 'Evaluate whether India's reported LWE decline represents durable root-cause resolution....', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument,

institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction,

source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

9. **Claim:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Land-forest causes. **Named evidence/example:** Land alienation, weak recognition of traditional forest rights, acquisition without adequate compensation and disruption of jal-jangal-zameen relationships are core enabling grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Development-governance causes. **Named evidence/example:** Poverty, unemployment, infrastructure deficit, administrative absence, weak justice, social exclusion and alienation create exploitable vulnerabilities but do not mechanically cause violence.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Instrumental underdevelopment. **Named evidence/example:** The owner records that Maoists can obstruct roads, electricity, water and administration because continued underdevelopment sustains territorial influence; the movement may maintain the condition it claims to oppose.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** FRA rights boundary. **Named evidence/example:** The Forest Rights Act, 2006 is a rights-based counter-LWE instrument, but enactment is not proof of individual or community forest-right recognition in an affected area. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** PESA governance boundary. **Named evidence/example:** PESA, 1996 extends self-governance and Gram Sabha roles in Fifth Schedule areas, including consultation-related safeguards; procedure and implementation must be evidenced separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dated decline metrics. **Named evidence/example:** The canonical owner records a December 2025 MHA reply reporting an 89% decline in violence, a 91% decline in deaths since 2010 and 218 incidents in 2025; these are security metrics, not a grievance-resolution verdict. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and

notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Evaluate whether India's reported LWE decline represents durable root-cause resolution....', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Examine LWE through clear-hold-develop, inter-State coordination and surrender-rehabilitation outcomes. Answer in about 300 words.

Model thesis: Claim: Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Civilian impact.

Named evidence/example: Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction.

Named evidence/example: Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation

status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment.
- Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action.
- Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it.
- MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities.
- The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations.
- Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited.
- The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.
- Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome.
- PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances.

Qualified conclusion: Claim: Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date,

institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson.

Named evidence/example: The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **examine** requires a direct position on 'Examine LWE through clear-hold-develop, inter-State coordination and surrender-rehabilitation...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surrender-rehabilitation firewall. **Named evidence/example:**

Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal

character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

8. **Claim:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Mineral-extortion nexus. **Named evidence/example:** LWE intensity historically overlapped mineral-rich areas because infrastructure, mining and contracting activity created extortion opportunities; resource presence alone does not explain recruitment. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Civilian impact. **Named evidence/example:** Affected people face coercion, violence, extortion, blocked education and health access, livelihood and displacement pressures, weakened panchayats and exposure to both extremist and State action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Clear-hold-develop. **Named evidence/example:** Security forces may clear access, but durable control requires police and civil administration to hold the area before rights, services and infrastructure can develop it. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-pronged policy. **Named evidence/example:** MHA's National Policy and Action Plan to address LWE, 2015 combines security, development, and ensuring the rights and entitlements of local communities. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Three-track operational frame. **Named evidence/example:** The owner separately emphasises security strategy, development strategy and psychological or trust-restoration work; trust is not an automatic by-product of operations. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Inter-State trijunction. **Named evidence/example:** Maoist movement across the Dandakaranya interfaces of Chhattisgarh, Odisha, Maharashtra and the former Andhra Pradesh region illustrates how differing State pressure and policy can be exploited. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Specialised-force lesson. **Named evidence/example:** The Greyhounds precedent shows the value of specialised, trained State-police capability, while displacement into adjoining States shows why one-State success needs inter-State coordination. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Surrender-rehabilitation firewall. **Named evidence/example:** Surrender is a verifiable event, while rehabilitation requires livelihood, safety, social reintegration and time; a surrender count cannot be reported as a completed rehabilitation outcome. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Post-deadline status. **Named evidence/example:** PIB's June 2026 material describes India as effectively free from Left-Wing Extremism; the qualifier does not mean zero risk, zero incidents, completed rehabilitation or resolved land and forest grievances. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Examine LWE through clear-hold-develop, inter-State coordination and surrender-rehabilitation...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.
