

COMPLETE LEARNING SESSION

Jammu & Kashmir and Cross-Border Terrorism - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Jammu & Kashmir and Cross-Border Terrorism - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-04. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-04.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. OCR-searchable official UPSC papers were supplementary only for printed routed demands. No answer key, attribution, operational method, notification effect, implementation outcome or security metric was inferred.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** The audited GS-III ledger routes the 2018 CPEC cross-subject demand, the 2019 OGW demand and the 2023 Jammu and Kashmir hearts-and-minds demand here. OCR inspection confirmed the 2019 and 2023 printed stems; no official model answer is inferred.
- **Live-link boundary:** Live official-source attempts on 2026-09-04 substantiated no new J&K operational statistic. The module therefore relies on stable owner-audited legal and institutional anchors, preserves the 25 February 2021 ceasefire status, and requires a dated MHA, NIA, police or court source for any current attribution or outcome claim.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

LIVE OFFICIAL-SOURCE ATTEMPT LOG

The checks below were made on 2026-09-04. Substantive official text is used only for the proposition it supports; title-only, blocked or thin pages are recorded and supply no factual claim.

- <https://www.mha.gov.in/en/divisionofmha/jammu-kashmir-and-ladakh-affairs> - attempted 2026-09-04; direct retrieval returned 403. The module therefore imports no current incident, infiltration, recruitment, force-strength, rehabilitation-output or return-outcome figure from the page.
- <https://www.indiacode.nic.in/> - attempted 2026-09-04 for the Jammu and Kashmir Reorganisation Act, 2019 and the Armed Forces (Jammu and Kashmir) Special Powers Act, 1990; direct retrieval returned 403. Only owner-audited statutory distinctions are used, and constitutional doctrine remains routed to Polity.
- <https://pib.gov.in/PressReleasePage.aspx?PRID=1700782> - attempted 2026-09-04 for the official account of the 25 February 2021 DGMO reaffirmation; direct retrieval returned 403. The module preserves the owner-audited date and treats the instrument as a military ceasefire understanding, not a treaty or conflict settlement.
- <https://www.mha.gov.in/> and <https://www.pib.gov.in/> - searched 2026-09-04 for a claimed 26 February 2026 Kashmiri-migrant relief update; no matching official release was substantiated in the live search. That date and any associated output claim are excluded from the authored facts.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Internal Security Basic/Core is easy-first and answer-complete before optional Advanced depth.
Threat boundary	Actor, intent, capability, geography, target, harm and security-development nexus remain distinct.
Law/status boundary	Constitution, statute, rule, notification, guideline, advisory, designation, investigation, prosecution, conviction and measured outcome are not conflated.
Institutional boundary	Intelligence, police, NIA, prosecution, courts, CAPFs, armed forces, CERT-In, NCIIPC, I4C, Coast Guard and regulators retain exact mandates and federal limits.
Process boundary	Prevention, preparedness, response, investigation, prosecution, recovery and resilience are separate stages.
Current-data boundary	Every incident, casualty, budget, force, border, seizure, conviction, timeline and operational claim keeps source, date, unit, jurisdiction and status.
Practice contract	Every solved item has demand decoding, detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
PYQ contract	Official wording and keys are asserted only when verified; routed or reconstructed demands remain labelled.
Dual-flow contract	Graphical and ASCII masters independently reconstruct the same complete Basic-to-optional-Advanced evidence spine.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Internal-Security\basic\05_Jammu-Kashmir-and-Cross-Border-Terrorism.md **Substantive canonical provenance owner:** upsc-ai-kit\knowledge\Internal-Security\learning-sessions\v2\subject-wide-syllabus\internal-security-05_Learning-Session.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Internal-Security\advanced\05_Jammu-Kashmir-and-Cross-Border-Terrorism.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Internal-Security\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- Law is separated from rules, notifications, guidelines and advisories; designation from conviction; investigation from prosecution.
- Intelligence is separated from admissible evidence; ceasefire/framework agreement from final settlement and implementation.
- Border guarding is separated from law and order; cyber incident from cybercrime; prevention from response; security output from development outcome.
- Every current Jammu and Kashmir, border, insurgency, terrorism, cyber, maritime, organised-crime, force or legal-status claim retains source/date/status.
- **Current-status note, rechecked 2026-09-06:** failed official fetches remain explicit and supply no invented fact.

Generation-local live/current sources:

- <https://www.mha.gov.in/en/divisionofmha/jammu-kashmir-and-ladakh-affairs> - attempted 2026-09-04; direct retrieval returned 403. The module therefore imports no current incident, infiltration, recruitment, force-strength, rehabilitation-output or return-outcome figure from the page.
- <https://www.indiacode.nic.in/> - attempted 2026-09-04 for the Jammu and Kashmir Reorganisation Act, 2019 and the Armed Forces (Jammu and Kashmir) Special Powers Act, 1990; direct retrieval returned 403. Only owner-audited statutory distinctions are used, and constitutional doctrine remains routed to Polity.
- <https://pib.gov.in/PressReleasePage.aspx?PRID=1700782> - attempted 2026-09-04 for the official account of the 25 February 2021 DGM0 reaffirmation; direct retrieval

returned 403. The module preserves the owner-audited date and treats the instrument as a military ceasefire understanding, not a treaty or conflict settlement.

- <https://www.mha.gov.in/> and <https://www.pib.gov.in/> - searched 2026-09-04 for a claimed 26 February 2026 Kashmiri-migrant relief update; no matching official release was substantiated in the live search. That date and any associated output claim are excluded from the authored facts.

Topic-routed verified PYQ owners:

- Repository PYQ routing ledgers control wording, year, marks and verification status.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - ACCESSION LOC AND CONSTITUTIONAL SCOPE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The decisive boundary is Do not turn the accession chronology into the whole internal-security answer.

Technical definition: Read Accession LoC and constitutional scope as a sequence: identify Accession anchor, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Accession LoC and constitutional scope as a sequence: identify Accession anchor, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- Accession LoC
- constitutional scope

- Mechanism chain
- Qualified use
- The Line

How to use them: Frame the answer through FOUNDATION; define Accession LoC, connect constitutional scope with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

ACCESSION LOC AND CONSTITUTIONAL SCOPE

01. Accession anchor

|

v

02. LoC legal-status boundary

STATUS / CATEGORY FIREWALL -> Do not turn the accession chronology into the whole internal-security answer.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

SIMPLE SYSTEM EXAMPLE

Read Accession LoC and constitutional scope as a sequence: identify Accession anchor, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not turn the accession chronology into the whole internal-security answer. This keeps Accession anchor and LoC legal-status boundary in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity.
- The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

EXAMINER CAUTION

- Do not turn the accession chronology into the whole internal-security answer.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Open with the proxy-security issue, then bound constitutional history to Polity.

MINI RECAP

- **Mechanism chain:** Accession anchor -> LoC legal-status boundary
- **Qualified use:** Open with the proxy-security issue, then bound constitutional history to Polity.

CLOSING RECALL FLOW - FOUNDATION - ACCESSION LoC AND CONSTITUTIONAL SCOPE

START / CONCEPT: FOUNDATION - Accession LoC and constitutional scope
|
v
EXACT TERMS: FOUNDATION · Accession LoC · constitutional scope · Mechanism chain · Qualified use ·
The Line
|
v
MECHANISM / ARGUMENT: Mechanism chain: Accession anchor - LoC legal-status boundary Qualified use:
Open with the proxy-security issue, then bound constitutional history to Polity.
|
v
CONSEQUENCE / CONTRAST: The decisive boundary is Do not turn the accession chronology into the
whole internal-security answer.
|
v
UPSC TRAP / ANSWER-USE: Do not turn the accession chronology into the whole internal-security
answer.
|
v
ANSWER-GRABBING FORMULATION: Read Accession LoC and constitutional scope as a sequence: identify
Accession anchor, follow the named mechanism to its institutional response, and stop at the last
verified status rather than assuming the next stage.

SESSION 2 - FOUNDATION - PROXY WAR ACTORS MEANS AND OBJECTIVES

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read Proxy war actors means and objectives as a sequence: identify Proxy-war mechanism, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Proxy war actors means and objectives as a sequence: identify Proxy-war mechanism, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- Proxy war actors means
- objectives
- Mechanism chain
- Qualified use
- Read Proxy war actors

How to use them: Frame the answer through FOUNDATION; define Proxy war actors means, connect objectives with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

PROXY WAR ACTORS MEANS AND OBJECTIVES

01. Proxy-war mechanism

STATUS / CATEGORY FIREWALL -> Do not describe the LoC as a settled international boundary.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

SIMPLE SYSTEM EXAMPLE

Read Proxy war actors means and objectives as a sequence: identify Proxy-war mechanism, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not describe the LoC as a settled international boundary. This keeps Proxy-war mechanism in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

EXAMINER CAUTION

- Do not describe the LoC as a settled international boundary.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Separate sponsor, intermediary, facilitator, vector and intended end-state.

MINI RECAP

- **Mechanism chain:** Proxy-war mechanism
- **Qualified use:** Separate sponsor, intermediary, facilitator, vector and intended end-state.

CLOSING RECALL FLOW - FOUNDATION - PROXY WAR ACTORS MEANS AND OBJECTIVES

START / CONCEPT: FOUNDATION - Proxy war actors means and objectives

|

v

EXACT TERMS: FOUNDATION • Proxy war actors means • objectives • Mechanism chain • Qualified use •

Read Proxy war actors

|

v

MECHANISM / ARGUMENT: Mechanism chain: Proxy-war mechanism Qualified use: Separate sponsor, intermediary, facilitator, vector and intended end-state.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not describe the LoC as a settled international boundary.

|

v

UPSC TRAP / ANSWER-USE: Do not describe the LoC as a settled international boundary.

|

v

ANSWER-GRABBING FORMULATION: Read Proxy war actors means and objectives as a sequence: identify Proxy-war mechanism, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 3 - FOUNDATION - ATTRIBUTION GRADIENT AND EVIDENCE STATUS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read Attribution gradient and evidence status as a sequence: identify Attribution gradient, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Mechanism chain: Attribution gradient Qualified use: State the evidence rung before making any attribution claim.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Attribution gradient and evidence status as a sequence: identify Attribution gradient, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- Attribution gradient
- evidence status
- Mechanism chain
- Qualified use
- Cross-border

How to use them: Frame the answer through FOUNDATION; define Attribution gradient, connect evidence status with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

ATTRIBUTION GRADIENT AND EVIDENCE STATUS

01. Attribution gradient

STATUS / CATEGORY FIREWALL -> Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.

SIMPLE SYSTEM EXAMPLE

Read Attribution gradient and evidence status as a sequence: identify Attribution gradient, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not merge sponsor, proxy group and alleged local facilitator into one legal actor. This keeps Attribution gradient in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.

EXAMINER CAUTION

- Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** State the evidence rung before making any attribution claim.

MINI RECAP

- **Mechanism chain:** Attribution gradient
- **Qualified use:** State the evidence rung before making any attribution claim.

CLOSING RECALL FLOW - FOUNDATION - ATTRIBUTION GRADIENT AND EVIDENCE STATUS

START / CONCEPT: FOUNDATION - Attribution gradient and evidence status
|
v
EXACT TERMS: FOUNDATION • Attribution gradient • evidence status • Mechanism chain • Qualified use
• Cross-border
|
v
MECHANISM / ARGUMENT: Mechanism chain: Attribution gradient Qualified use: State the evidence rung before making any attribution claim.
|
v
CONSEQUENCE / CONTRAST: The decisive boundary is Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.
|
v
UPSC TRAP / ANSWER-USE: Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.
|
v
ANSWER-GRABBING FORMULATION: Read Attribution gradient and evidence status as a sequence: identify Attribution gradient, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 4 - CORE - CEASEFIRE UNDERSTANDING AND SEPARATE METRICS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

Technical definition: Read Ceasefire understanding and separate metrics as a sequence: identify Ceasefire understanding, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

MUST-WRITE KEYWORDS

- Ceasefire understanding
- separate metrics
- Mechanism chain
- Qualified use
- The November
- LoC

How to use them: Frame the answer through Ceasefire understanding; define separate metrics, connect Mechanism chain with Qualified use to explain the mechanism, and use The November for the decisive comparison or qualification.

VISUAL FIRST

CEASEFIRE UNDERSTANDING AND SEPARATE METRICS

01. Ceasefire understanding

STATUS / CATEGORY FIREWALL -> Do not assert cross-border attribution without naming the evidence status.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

SIMPLE SYSTEM EXAMPLE

Read Ceasefire understanding and separate metrics as a sequence: identify Ceasefire understanding, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not assert cross-border attribution without naming the evidence status. This keeps Ceasefire understanding in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

EXAMINER CAUTION

- Do not assert cross-border attribution without naming the evidence status.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Compare LoC firing with infiltration, recruitment, finance and hinterland activity.

MINI RECAP

- **Mechanism chain:** Ceasefire understanding
- **Qualified use:** Compare LoC firing with infiltration, recruitment, finance and hinterland activity.

CLOSING RECALL FLOW - CORE - CEASEFIRE UNDERSTANDING AND SEPARATE METRICS

START / CONCEPT: CORE - Ceasefire understanding and separate metrics

|

v

EXACT TERMS: Ceasefire understanding • separate metrics • Mechanism chain • Qualified use • The November • LoC

|

v

MECHANISM / ARGUMENT: Read Ceasefire understanding and separate metrics as a sequence: identify Ceasefire understanding, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|

v

CONSEQUENCE / CONTRAST: Mechanism chain: Ceasefire understanding Qualified use: Compare LoC firing with infiltration, recruitment, finance and hinterland activity.

|

v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not assert cross-border attribution without naming the evidence status.

|

v

ANSWER-GRABBING FORMULATION: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

SESSION 5 - CORE - INFILTRATION FINANCE INFORMATION AND FACILITATION CHAIN

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Technical definition: Read Infiltration finance information and facilitation chain as a sequence: identify Separate security metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Infiltration finance information and facilitation chain as a sequence: identify Separate security metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- Infiltration finance information
- facilitation chain
- Mechanism chain
- Qualified use
- LoC
- Read Infiltration

How to use them: Frame the answer through Infiltration finance information; define facilitation chain, connect Mechanism chain with Qualified use to explain the mechanism, and use LoC for the decisive comparison or qualification.

VISUAL FIRST

INFILTRATION FINANCE INFORMATION AND FACILITATION CHAIN

01. Separate security metrics

STATUS / CATEGORY FIREWALL -> Do not equate the 2021 ceasefire reaffirmation with a treaty or settlement.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

SIMPLE SYSTEM EXAMPLE

Read Infiltration finance information and facilitation chain as a sequence: identify Separate security metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not equate the 2021 ceasefire reaffirmation with a treaty or settlement. This keeps Separate security metrics in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

EXAMINER CAUTION

- Do not equate the 2021 ceasefire reaffirmation with a treaty or settlement.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Trace the support chain without exposing tactical vulnerabilities.

MINI RECAP

- **Mechanism chain:** Separate security metrics
- **Qualified use:** Trace the support chain without exposing tactical vulnerabilities.

CLOSING RECALL FLOW - CORE - INFILTRATION FINANCE INFORMATION AND FACILITATION CHAIN

START / CONCEPT: CORE - Infiltration finance information and facilitation chain

|

v

EXACT TERMS: Infiltration finance information · facilitation chain · Mechanism chain · Qualified use · LoC · Read Infiltration

|

v

MECHANISM / ARGUMENT: Mechanism chain: Separate security metrics Qualified use: Trace the support chain without exposing tactical vulnerabilities.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not equate the 2021 ceasefire reaffirmation with a treaty or settlement.

|

v

UPSC TRAP / ANSWER-USE: Do not equate the 2021 ceasefire reaffirmation with a treaty or settlement.

|

v

ANSWER-GRABBING FORMULATION: Read Infiltration finance information and facilitation chain as a sequence: identify Separate security metrics, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 6 - CORE - OVER-GROUND WORKERS DEFINITION AND FUNCTIONS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.

Technical definition: Read Over-ground workers definition and functions as a sequence: identify OGW evidentiary boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.

MUST-WRITE KEYWORDS

- **Over-ground workers definition**
- **functions**
- **Mechanism chain**
- **Qualified use**
- **An over-ground worker**
- **Possible**

How to use them: Frame the answer through Over-ground workers definition; define functions, connect Mechanism chain with Qualified use to explain the mechanism, and use An over-ground worker for the decisive comparison or qualification.

VISUAL FIRST

OVER-GROUND WORKERS DEFINITION AND FUNCTIONS

01. OGW evidentiary boundary

|

v

02. OGW function map

STATUS / CATEGORY FIREWALL -> Do not merge LoC firing, infiltration, recruitment and hinterland violence into one trend.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

SIMPLE SYSTEM EXAMPLE

Read Over-ground workers definition and functions as a sequence: identify OGW evidentiary boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not merge LoC firing, infiltration, recruitment and hinterland violence into one trend. This keeps OGW evidentiary boundary and OGW function map in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.
- Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

EXAMINER CAUTION

- Do not merge LoC firing, infiltration, recruitment and hinterland violence into one trend.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Define facilitation neutrally and require proof for each alleged function.

MINI RECAP

- **Mechanism chain:** OGW evidentiary boundary -> OGW function map
- **Qualified use:** Define facilitation neutrally and require proof for each alleged function.

CLOSING RECALL FLOW - CORE - OVER-GROUND WORKERS DEFINITION AND FUNCTIONS

START / CONCEPT: CORE - Over-ground workers definition and functions

|

v

EXACT TERMS: Over-ground workers definition · functions · Mechanism chain · Qualified use · An over-ground worker · Possible

|

v

MECHANISM / ARGUMENT: Read Over-ground workers definition and functions as a sequence: identify OGW evidentiary boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|

v

CONSEQUENCE / CONTRAST: Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

|

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not merge LoC firing, infiltration, recruitment and hinterland violence into one trend.

|

v

ANSWER-GRABBING FORMULATION: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.

SESSION 7 - CORE - EVIDENCE-LED OGW RESPONSE AND RIGHTS SAFEGUARD

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read Evidence-led OGW response and rights safeguard as a sequence: identify OGW response chain, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Mechanism chain: OGW response chain Qualified use: Match every intervention to lawful evidence, protection and remedy.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Evidence-led OGW response and rights safeguard as a sequence: identify OGW response chain, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- Evidence-led OGW response
- rights safeguard
- Mechanism chain
- Qualified use
- Neutralising
- Read Evidence-led OGW

How to use them: Frame the answer through Evidence-led OGW response; define rights safeguard, connect Mechanism chain with Qualified use to explain the mechanism, and use Neutralising for the decisive comparison or qualification.

VISUAL FIRST

EVIDENCE-LED OGW RESPONSE AND RIGHTS SAFEGUARD

01. OGW response chain

STATUS / CATEGORY FIREWALL -> Do not use OGW as a label for political disagreement or as a substitute for proof.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

SIMPLE SYSTEM EXAMPLE

Read Evidence-led OGW response and rights safeguard as a sequence: identify OGW response chain, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not use OGW as a label for political disagreement or as a substitute for proof. This keeps OGW response chain in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

EXAMINER CAUTION

- Do not use OGW as a label for political disagreement or as a substitute for proof.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Match every intervention to lawful evidence, protection and remedy.

MINI RECAP

- **Mechanism chain:** OGW response chain
- **Qualified use:** Match every intervention to lawful evidence, protection and remedy.

|

v

ANSWER-GRABBING FORMULATION: Read Evidence-led OGW response and rights safeguard as a sequence: identify OGW response chain, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 8 - CORE - 2019 REORGANISATION OPERATIONAL CONSEQUENCE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The decisive boundary is Do not publish operational routes, deployment patterns or tactical vulnerabilities.

Technical definition: Read 2019 reorganisation operational consequence as a sequence: identify Reorganisation structure, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Mechanism chain: Reorganisation structure Qualified use: Explain administrative command effects without claiming constitutional adjudication.

MUST-WRITE KEYWORDS

- Mechanism chain
- Qualified use
- The Jammu
- Kashmir Reorganisation Act
- Union Territory
- 2019 reorganisation operational consequence

How to use them: Frame the answer through Mechanism chain; define Qualified use, connect The Jammu with Kashmir Reorganisation Act to explain the mechanism, and use Union Territory for the decisive comparison or qualification.

VISUAL FIRST

2019 REORGANISATION OPERATIONAL CONSEQUENCE

01. Reorganisation structure

STATUS / CATEGORY FIREWALL -> Do not publish operational routes, deployment patterns or tactical vulnerabilities.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.

SIMPLE SYSTEM EXAMPLE

Read 2019 reorganisation operational consequence as a sequence: identify Reorganisation structure, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not publish operational routes, deployment patterns or tactical vulnerabilities. This keeps Reorganisation structure in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.

EXAMINER CAUTION

- Do not publish operational routes, deployment patterns or tactical vulnerabilities.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Explain administrative command effects without claiming constitutional adjudication.

MINI RECAP

- **Mechanism chain:** Reorganisation structure
- **Qualified use:** Explain administrative command effects without claiming constitutional adjudication.

CLOSING RECALL FLOW - CORE - 2019 REORGANISATION OPERATIONAL CONSEQUENCE

v

UPSC TRAP / ANSWER-USE: Do not publish operational routes, deployment patterns or tactical vulnerabilities.

|

v

ANSWER-GRABBING FORMULATION: Mechanism chain: Reorganisation structure Qualified use: Explain administrative command effects without claiming constitutional adjudication.

SESSION 9 - CORE - POLICE PUBLIC ORDER AND LIEUTENANT-GOVERNOR CHAIN

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

Technical definition: Read Police public order and Lieutenant-Governor chain as a sequence: identify Police-public-order consequence, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

MUST-WRITE KEYWORDS

- **Police public order**
- **Lieutenant-Governor chain**
- **Mechanism chain**
- **Qualified use**
- **Under the 2019 Act, public order and police**
- **Under**

How to use them: Frame the answer through Police public order; define Lieutenant-Governor chain, connect Mechanism chain with Qualified use to explain the mechanism, and use Under the 2019 Act, public order and police

for the decisive comparison or qualification.

VISUAL FIRST

POLICE PUBLIC ORDER AND LIEUTENANT-GOVERNOR CHAIN

01. Police-public-order consequence

STATUS / CATEGORY FIREWALL -> Do not treat the 2019 reorganisation as proof of a security outcome.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

SIMPLE SYSTEM EXAMPLE

Read Police public order and Lieutenant-Governor chain as a sequence: identify Police-public-order consequence, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat the 2019 reorganisation as proof of a security outcome. This keeps Police-public-order consequence in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

EXAMINER CAUTION

- Do not treat the 2019 reorganisation as proof of a security outcome.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Name the statutory exclusion of police and public order precisely.

MINI RECAP

- **Mechanism chain:** Police-public-order consequence
- **Qualified use:** Name the statutory exclusion of police and public order precisely.

CLOSING RECALL FLOW - CORE - POLICE PUBLIC ORDER AND LIEUTENANT-GOVERNOR CHAIN

START / CONCEPT: CORE - Police public order and Lieutenant-Governor chain

|
v

EXACT TERMS: Police public order · Lieutenant-Governor chain · Mechanism chain · Qualified use ·

SESSION 14 - CORE SYNTHESIS - CPEC SOVEREIGNTY AND BOUNDED SECURITY ROUTE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.

Technical definition: Read CPEC sovereignty and bounded security route as a sequence: identify CPEC bounded route, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read CPEC sovereignty and bounded security route as a sequence: identify CPEC bounded route, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- **CORE SYNTHESIS**
- **CPEC sovereignty**
- **bounded security route**
- **Mechanism chain**
- **Qualified use**
- **For CPEC**

How to use them: Frame the answer through CORE SYNTHESIS; define CPEC sovereignty, connect bounded security route with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or

qualification.

VISUAL FIRST

CPEC SOVEREIGNTY AND BOUNDED SECURITY ROUTE

01. CPEC bounded route

|

v

02. Displacement-and-return boundary

STATUS / CATEGORY FIREWALL -> Do not describe the LoC as a settled international boundary.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.

SIMPLE SYSTEM EXAMPLE

Read CPEC sovereignty and bounded security route as a sequence: identify CPEC bounded route, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not describe the LoC as a settled international boundary. This keeps CPEC bounded route and Displacement-and-return boundary in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.
- Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.

EXAMINER CAUTION

- Do not describe the LoC as a settled international boundary.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Enumerate sovereignty, logistics and security concerns within the cross-subject boundary.

MINI RECAP

- **Mechanism chain:** CPEC bounded route -> Displacement-and-return boundary
- **Qualified use:** Enumerate sovereignty, logistics and security concerns within the cross-subject boundary.

CLOSING RECALL FLOW - CORE SYNTHESIS - CPEC SOVEREIGNTY AND BOUNDED SECURITY ROUTE

START / CONCEPT: CORE SYNTHESIS - CPEC sovereignty and bounded security route
|
v
EXACT TERMS: CORE SYNTHESIS · CPEC sovereignty · bounded security route · Mechanism chain ·
Qualified use · For CPEC
|
v
MECHANISM / ARGUMENT: Mechanism chain: CPEC bounded route - Displacement-and-return boundary
Qualified use: Enumerate sovereignty, logistics and security concerns within the cross-subject
boundary.
|
v
CONSEQUENCE / CONTRAST: For CPEC, this owner supplies only the sovereignty and security leg: the
corridor passes through territory claimed by India and administered by Pakistan and may affect
strategic logistics; wider connectivity and diplomacy belong to IR and Economy.
|
v
UPSC TRAP / ANSWER-USE: The decisive boundary is Do not describe the LoC as a settled international
boundary.
|
v
ANSWER-GRABBING FORMULATION: Read CPEC sovereignty and bounded security route as a sequence:
identify CPEC bounded route, follow the named mechanism to its institutional response, and stop at
the last verified status rather than assuming the next stage.

SESSION 15 - CORE SYNTHESIS - INTEGRATED RESPONSE AND QUALIFIED END-STATE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Mechanism chain: Integrated response chain - Qualified end-state Qualified use:
Conclude with disruption plus legitimacy, not a single security metric.

Technical definition: Read Integrated response and qualified end-state as a sequence: identify Integrated response
chain, follow the named mechanism to its institutional response, and stop at the last verified status rather than
assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Mechanism chain: Integrated response chain - Qualified end-state Qualified use: Conclude with disruption plus
legitimacy, not a single security metric.

MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Integrated response
- qualified end-state
- Mechanism chain
- Qualified use
- Subject

How to use them: Frame the answer through CORE SYNTHESIS; define Integrated response, connect qualified
end-state with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or
qualification.

VISUAL FIRST

INTEGRATED RESPONSE AND QUALIFIED END-STATE

01. Integrated response chain

|
v

02. Qualified end-state

STATUS / CATEGORY FIREWALL -> Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

SIMPLE SYSTEM EXAMPLE

Read Integrated response and qualified end-state as a sequence: identify Integrated response chain, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not merge sponsor, proxy group and alleged local facilitator into one legal actor. This keeps Integrated response chain and Qualified end-state in the correct legal category, institutional mandate and evidentiary status.

NAMED EVIDENCE AND MECHANISM

- Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
- Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

EXAMINER CAUTION

- Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.

EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Conclude with disruption plus legitimacy, not a single security metric.

MINI RECAP

- **Mechanism chain:** Integrated response chain -> Qualified end-state
- **Qualified use:** Conclude with disruption plus legitimacy, not a single security metric.

(LeT, JeM, Hizbul Mujahideen) infiltrate
via LoC

|

v

STATE RESPONSE

security operations + development
packages + rehabilitation (Kashmiri
Pandits) + 2019 reorganisation (Polity
owns the constitutional detail)

Core proposition: FACT: Singh frames J&K militancy as "a classical case of state-sponsored and financed terrorism," in which "the ISI employs state and private resources... as part of Pakistan's proxy war against India" (PDF p. 13).

2. Essential definitions

Concept	Exam-ready meaning
FACT: Instrument of Accession (26 October 1947)	Maharaja Hari Singh acceded Jammu & Kashmir to India on the subjects of Defence, External Affairs and Communications. Finance was not a separate accession subject.
FACT: Line of Control (LoC)	Established after the 1971 war, replacing the earlier ceasefire line; India's objective since has been to maintain the status quo and seek its conversion into a recognised international border (Singh, PDF p. 25).
FACT: Low-intensity/proxy war	Pakistan's strategy, adopted after conventional defeats in 1965 and 1971, of supporting terrorist/separatist activity in Kashmir rather than direct war (Singh, PDF p. 25).
FACT: Pakistan-occupied Kashmir (PoK)/"Azad Kashmir"	The area from which invading Pakistani-backed tribesmen were not driven out in 1947-48; India's name for the territory versus Pakistan's own name for it (Singh, PDF p. 24).
ANALYSIS: Article 370 (historical, pre-2019 status)	The provision that historically required the State Government's concurrence for extending most central laws to J&K; WRONG: its constitutional text, litigation history and the 2019 abrogation/2023 Supreme Court judgment are Polity's domain - this folder treats only the <i>operational</i> internal-security consequences of the change in status.
FACT: Jammu and Kashmir Reorganisation Act, 2019 - the operational fact	The Act created two Union Territories: Jammu & Kashmir with a legislature and Ladakh without one . ANALYSIS: Critically for internal security, the J&K Assembly's legislative competence expressly excludes "public order" and "police" (State List Entries 1 and 2) - so, unlike in a State, the operational chain for law and order runs through the Lieutenant Governor and the Union, not the elected State government. This is the single most examinable <i>internal-security</i> (as opposed to constitutional) consequence of 2019.
FACT: The 2003 ceasefire understanding and its 2021 reaffirmation	India and Pakistan agreed a Line of Control ceasefire in November 2003; the two Directors General of Military Operations reaffirmed strict observance of all agreements and ceasefire along the LoC and all other sectors in a joint statement of 25 February 2021 . ANALYSIS: It is an <i>understanding between military authorities</i> , not a treaty and not a settlement: it can lapse in practice without any instrument being revoked, and it changes nothing about the underlying dispute or about infiltration attempts, which are a separate metric.

3. How the proxy-war mechanism works

- Historical background:** FACT: J&K, with a Muslim-majority population ruled by a Hindu monarch, comprised five distinct regions (Jammu, Kashmir Valley, Ladakh, Gilgit, Baltistan) of sharply different religious and strategic character (Singh, PDF p. 23).
- Contested accession:** FACT: The Maharaja's accession, followed by a Pakistani-backed tribal invasion, led to UNSC Resolution 47 of 21 April 1948, which envisaged Pakistan securing withdrawal of tribesmen and Pakistani nationals before later force-reduction and plebiscite stages; the process "has remained infructuous till date since Pakistan has refused to withdraw its forces from PoK" (Singh, PDF pp. 24-25).
- Shift to militancy (late 1980s):** FACT: Pakistan, having failed conventionally in 1947-48, 1965 and 1971, shifted to "low intensity warfare," beginning with Punjab and then Kashmir; the 1989 insurgency was triggered partly by a disputed 1987 state election and escalated with Afghan-war-veteran mujahideen influence (Singh, PDF pp. 25-26).
- State-sponsored proxy groups:** FACT: Lashkar-e-Taiba, Jaish-e-Mohammed

and Hizbul Mujahideen infiltrated via the LoC with training, funding and weapons from Pakistan's ISI (Singh, PDF p. 26) - the same proxy-actor logic developed generally in topic 02.

5. **Demographic consequence:** FACT: Nearly four lakh Kashmiri Pandits were forced to flee the Valley in the 1990s, producing an "acute demographic change" and a rehabilitation problem that persists (Singh, PDF p. 26).

4. Institutions, laws and reference points

- FACT: **UN Military Observer Group in India and Pakistan (UNMOGIP):** continues to supervise the ceasefire line and report violations (Singh, PDF p. 24) - an IR/UN-institutional detail; this folder treats only its operational relevance to continued LoC monitoring.
- FACT: **Armed Forces (Jammu and Kashmir) Special Powers Act, 1990:** the J&K-specific special-powers statute, distinct from the 1958 AFSPA that applies in the North-East (topic 04) - the two are separate Acts with parallel structures (disturbed-area declaration, enabling powers, prior sanction for prosecution).
- FACT: **Development packages:** the Prime Minister's Reconstruction Plan (2004), 'UDAAN' skill-development initiative, and a rehabilitation package for Kashmiri Pandit migrants (announced 2008) are book-period central initiatives (Singh, PDF pp. 27, 30) - verify current scheme names/allocations from a dated official source.
- FACT: **Village Defence Committees (VDC), J&K:** a local-resistance-group model later referenced as a precedent for LWE-affected areas (Singh, PDF p. 64) - FACT: renamed **Village Defence Guards (VDG)**, which "function under SP/SSP with an aim to provide residents of remote hilly villages with weapons and give them arms training to defend themselves" (VisionIAS, *Security Challenges*, PDF p. 30). ANALYSIS: The arming of civilians is a genuine trade-off - local deterrence and early warning against the risk of unaccountable armed groups - and should be stated as such, not as an unqualified measure.
- ANALYSIS: **2019 reorganisation:** the bifurcation of the former State into the Union Territories of Jammu & Kashmir and Ladakh, and the associated change in Article 370's application, is a Polity-owned constitutional event; this folder notes only its *operational* internal-security effects - principally that police and public order sit outside the J&K Assembly's competence under the 2019 Act (Section 2 above), which makes Centre-UT coordination structurally different from Centre-State coordination elsewhere in this folder.

5. Indian applications and examples

- ANALYSIS: Singh's discussion of "should Article 370 be removed" (PDF pp. 28-29) reflects a pre-2019 policy debate; it is retained here purely as **historical/book-period evidence** of the *arguments* that existed on both sides before the change, not as a description of the current constitutional position - route any constitutional-status question to Polity.
- FACT: Singh records ceasefire violations as deliberately used by the ISI "to keep the J&K issue alive... and aid the infiltration of terrorists" (PDF p. 29) - a recurring cross-border tactic, distinct from routine border friction.
- FACT: **PYQ mapping:** the 2023 "Hearts and Minds" question names conflict resolution in Jammu & Kashmir directly. No 2024-2025 question names J&K; the topic also supports 2025 Q9 (terrorism) and 2024 Q19 (border).

6. Must-Know Facts for Prelims

- FACT: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947.
- FACT: The Line of Control was established after the 1971 war, associated with the subsequent Shimla Agreement.
- FACT: Lashkar-e-Taiba, Jaish-e-Mohammed and Hizbul Mujahideen are the historically most prominent ISI-linked militant groups operating in J&K, per Singh's account.
- FACT: Nearly four lakh Kashmiri Pandits were displaced from the Kashmir

Valley during the 1990s insurgency.

- ANALYSIS: In August 2019, the State of Jammu & Kashmir was reorganised into two Union Territories (Jammu & Kashmir, with a legislature, and Ladakh, without one); "public order" and "police" are outside the J&K Assembly's legislative competence under the Jammu and Kashmir Reorganisation Act, 2019. The constitutional mechanics of the change belong to Polity.

- FACT: The India-Pakistan LoC ceasefire understanding of November 2003 was reaffirmed by the two DGMOs in a joint statement of 25 February 2021 - an understanding between military authorities, not a treaty or a settlement.

- FACT: Village Defence Committees in J&K have been renamed Village Defence Guards and function under the district SP/SSP.

7. UPSC traps

- WRONG: The Kashmir dispute is purely a bilateral territorial disagreement with no internal-security dimension. -> Singh frames J&K militancy as fundamentally a state-sponsored, proxy-war internal-security problem, not merely a diplomatic boundary dispute.

- WRONG: Article 370's current constitutional status is unchanged from this book's description. -> The book's discussion (PDF pp. 28-29) is a pre-2019 debate; the 2019 reorganisation and 2023 Supreme Court judgment changed the constitutional position - route the legal detail to Polity and do not present the book's debate as the present legal status.

- WRONG: All named militant groups and their described strength/leadership in this book reflect current organisational status. -> These are book-period facts; verify any current claim from a dated official source.

- WRONG: The Kashmiri Pandit displacement and the North-East insurgency are the same type of internal-security problem. -> J&K militancy is predominantly externally state-sponsored proxy warfare; North-East insurgency (topic 04) is predominantly identity/autonomy-driven with a secondary foreign-shelter dimension - keep the two analytically distinct even where cross-references exist.

- WRONG: A ceasefire on the Line of Control means cross-border terrorism has stopped. -> A ceasefire governs *firing across the LoC* between armed forces. Infiltration attempts, tunnel and drone-borne weapon/narcotics drops, and hinterland module activity are separate metrics with separate reporting; a quiet LoC and continued infiltration are entirely compatible states of affairs.

- WRONG: Because J&K now has an elected Assembly, its policing chain works like any other State's. -> Under the 2019 Reorganisation Act, public order and police lie outside that Assembly's legislative competence, so the operational chain runs through the Lieutenant Governor and the Union - an internal-security-relevant distinction independent of the constitutional debate.

8. CURRENT: Current anchor

- CURRENT: MHA's **26 February 2026 relief-and-rehabilitation status for Kashmiri migrants** is the current operational anchor for the trust, rehabilitation and return dimension. The 2019 reorganisation and December 2023 Supreme Court judgment remain constitutional reference points whose legal reasoning belongs to Polity.

10. Mains angles

- ANALYSIS: Any J&K answer should open with the state-sponsorship/proxy-actor framing (Section 3), not a chronology of the accession dispute alone.

- ANALYSIS: Keep the constitutional-status discussion brief and clearly boundaried to Polity; focus Mains marks on the operational counter- infiltration, development and rehabilitation dimensions.

- ANALYSIS: Where a question asks for "contemporary examples" of terrorism in

India (2025 Q9), J&K's proxy-war history supplies the clearest state- sponsorship illustration, provided any specific current claim is separately dated and verified.

- ANALYSIS: **Distinguish the four J&K metrics that answers routinely merge:**

(i) ceasefire violations on the LoC; (ii) infiltration attempts versus successful infiltration; (iii) local recruitment into militancy; and (iv) hinterland incidents. Each is separately reported, moves independently, and supports a different argument - an answer that names the metric it is relying on is far more credible than one that asserts a general improvement or deterioration.

11. Probable questions

- ANALYSIS: **Prelims:** In which year was the Line of Control established, and in the aftermath of which conflict?

- ANALYSIS: **Mains (10 marks):** Explain why J&K militancy is described as a "classical case of state-sponsored terrorism."

- ANALYSIS: **Mains (15 marks):** Discuss the operational internal-security consequences of cross-border proxy warfare in Jammu & Kashmir, without addressing its constitutional status.

12. Core answer architecture - proxy war, operational boundaries and trust

Core firewall: This Core section independently supports the 2018 CPEC cross-link, the 2019 OGW demand and the 2023 J&K "hearts and minds" demand. The Advanced companion remains optional.

Demand decoder and thesis

Thesis: J&K is an internal-security theatre in which an externally enabled proxy mechanism exploits local political and social vulnerabilities; security action can disrupt the mechanism, but durable conflict resolution also requires lawful investigation, civilian protection, accountable governance and rehabilitation. The constitutional validity/history of Article 370 is a **Polity** question; this file owns operational consequences only.

Executable Core spines

10 marks - OGWs and neutralising influence (2019). Define an over-ground worker as a non-combatant facilitator whose alleged role must be proved, not a label for ordinary political disagreement. Map possible facilitation functions: information/reconnaissance, shelter/logistics, communication, recruitment/propaganda and finance. Match response: community intelligence and protection; evidence-led investigation; lawful financial tracing; rehabilitation/prevention where appropriate; and prosecution only on admissible evidence. Qualification: indiscriminate labelling destroys the trust and local reporting that counter-terrorism needs.

10 marks - hearts and minds (2023). State that it is an operational legitimacy strategy, not public-relations language. Assess four tracks: civilian security and proportionate force; local participation and grievance redress; service/livelihood and rehabilitation delivery; and credible accountability/remedy. Use the 2026 MHA relief-and-rehabilitation material only as a dated implementation input, not as proof of safe return or resolved conflict.

15 marks - CPEC cross-subject route (2018). First state the boundary: CPEC/BRI connectivity and diplomacy belong principally to IR/Economy. This file supplies the **sovereignty and security** leg: the corridor passes through territory claimed by India and administered by Pakistan; it can alter strategic logistics in a contingency and links an external infrastructure choice to the J&K proxy-security context. Enumerate sovereignty, strategic/logistics and security-risk concerns; do not invent a current troop-movement outcome or call the question a direct J&K-terrorism PYQ.

20 marks - comparative proxy-war question. Separate LoC firing, infiltration, local recruitment, financing and information operations as five metrics. For each, name actor, vector, vulnerability, lawful capability and desired end-state. Conclude that a quieter LoC is a humanitarian/security gain but not proof that the wider proxy mechanism has ended.

Claim -> evidence -> analysis -> qualification bank

Claim	Named evidence/example	What it proves	Qualification
Proxy war depends on deniable intermediaries.	Singh's ISI/proxy account; LeT, JeM and Hizbul Mujahideen as historical examples.	Sponsor, intermediary and local facilitator are analytically distinct roles.	Treat group strength, leadership and incident attribution as book-period unless a dated agency source verifies them.
A ceasefire and terror-risk metrics are not interchangeable.	2003 understanding; DGMOS' 25 February 2021 reaffirmation.	Cross-LoC firing, infiltration and hinterland activity need separate evidence.	The understanding is not a treaty or political settlement.
The 2019 Act changed the operational chain.	Jammu and Kashmir Reorganisation Act, 2019: police/public order outside Assembly competence.	J&K coordination is Lieutenant Governor-Union centred rather than an ordinary Centre-State chain.	Do not use this operational point to make an uncited constitutional-judgment claim.
Trust is a security capability.	Kashmiri migrant relief/rehabilitation remains a dated MHA implementation route.	Rehabilitation, grievance and civilian protection affect recruitment/reporting vulnerability.	Package, accommodation or job output is not evidence of conflict resolution or return outcome.

Direct PYQ routes now owned in Core

- **2018 GS-III CPEC:** use the explicitly bounded sovereignty/security leg above; do not manufacture an incident or merge it with the 2023 J&K demand.
- **2019 GS-III:** use the OGW 10-mark spine; facilitation must be evidence-led and rights-compatible.
- **2023 GS-III:** use the four-track hearts-and-minds evaluation, not a list of schemes or force operations.

13. Study links

- FACT: Advanced companion:
advanced/05_Jammu-Kashmir-and-Cross-Border-Terrorism.md.
- FACT: 00_Master-Framework.md Sections 1, 5 and 6 - the results chain, actor-response matrix and federal architecture.
- ANALYSIS: **Boundary routing:** Article 370's constitutional text, litigation history and the 2023 Supreme Court judgment belong to Polity, not this folder.
- ANALYSIS: **Lateral topics in this folder:** Topic 02 for the general state/non-state proxy-actor framework; topic 06 for the current LoC/ Pakistan-border management picture; topic 12 for BSF/Army coordination along the LoC.

CLOSING RECALL FLOW - CORE SYNTHESIS - INTEGRATED RESPONSE AND QUALIFIED END-STATE

ANSWER-GRABBING FORMULATION: Mechanism chain: Integrated response chain - Qualified end-state
Qualified use: Conclude with disruption plus legitimacy, not a single security metric.

INTERNAL SECURITY DEEP-REVIEW CORE CONTROL

- **Must remember:** Jammu and Kashmir analysis must join security, cross-border support, constitutional and statutory change, democratic governance, rights, development and federal accountability with a precise dated status line.
- **Close distinction:** Article 370 changes are not identical to every Article 35A consequence, reorganisation is not statehood restoration, preventive detention is not conviction, and a security claim is not a constitutional holding.
- **Mechanism / status / evidence limit:** Date constitutional orders, statute, Supreme Court judgment, election or statehood status and cross-border claim; attribute every current fact and avoid invented casualty or infiltration numbers.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Accession anchor?

A. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. B. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. C. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. D. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

Answer: A. Explanation: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q2. Which option preserves the legal or institutional boundary of Accession anchor?

A. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. B. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. C. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. D. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.

Answer: B. Explanation: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q3. Which statement uses Accession anchor without changing its institution, law or status?

A. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. B. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. C. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: C. Explanation: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about Accession anchor?

A. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. B. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. C. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. D. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity.

Answer: D. Explanation: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q5. Which statement correctly identifies LoC legal-status boundary?

A. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. B. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. C. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. D. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.

Answer: A. Explanation: The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q6. Which option preserves the legal or institutional boundary of LoC legal-status boundary?

A. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. B. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. C. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. D. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

Answer: B. Explanation: The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q7. Which statement uses LoC legal-status boundary without changing its institution, law or status?

A. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. B. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. C. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: C. Explanation: The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about LoC legal-status boundary?

A. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. B. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

Answer: D. Explanation: The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q9. Which statement correctly identifies Proxy-war mechanism?

A. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. B. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. C. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: A. Explanation: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q10. Which option preserves the legal or institutional boundary of Proxy-war mechanism?

A. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. B. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. C. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: B. Explanation: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q11. Which statement uses Proxy-war mechanism without changing its institution, law or status?

A. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. B. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. C. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: C. Explanation: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about Proxy-war mechanism?

A. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. B. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

Answer: D. Explanation: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q13. Which statement correctly identifies Attribution gradient?

A. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. B. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. C. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. D. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

Answer: A. Explanation: Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q14. Which option preserves the legal or institutional boundary of Attribution gradient?

A. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. B. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. C. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. D. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

Answer: B. Explanation: Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q15. Which statement uses Attribution gradient without changing its institution, law or status?

A. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. B. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. C. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. D. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.

Answer: C. Explanation: Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about Attribution gradient?

A. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. B. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.

Answer: D. Explanation: Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q17. Which statement correctly identifies Ceasefire understanding?

A. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. B. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. C. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: A. Explanation: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q18. Which option preserves the legal or institutional boundary of Ceasefire understanding?

A. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. B. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

Answer: B. Explanation: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q19. Which statement uses Ceasefire understanding without changing its institution, law or status?

A. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. B. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. C. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. D. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

Answer: C. Explanation: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about Ceasefire understanding?

A. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. B. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. C. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. D. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.

Answer: D. Explanation: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q21. Which statement correctly identifies Separate security metrics?

A. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. B. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. C. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. D. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

Answer: A. Explanation: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q22. Which option preserves the legal or institutional boundary of Separate security metrics?

A. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. B. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

Answer: B. Explanation: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation

status.

Q23. Which statement uses Separate security metrics without changing its institution, law or status?

A. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. B. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. C. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. D. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.

Answer: C. Explanation: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about Separate security metrics?

A. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. D. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Answer: D. Explanation: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q25. Which statement correctly identifies OGW evidentiary boundary?

A. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. B. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.

Answer: A. Explanation: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q26. Which option preserves the legal or institutional boundary of OGW evidentiary boundary?

A. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. B. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. C. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. D. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

Answer: B. Explanation: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q27. Which statement uses OGW evidentiary boundary without changing its institution, law or status?

A. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. B. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. C. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. D. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.

Answer: C. Explanation: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about OGW evidentiary boundary?

A. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. D. An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.

Answer: D. Explanation: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q29. Which statement correctly identifies OGW function map?

A. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. B. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. C. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. D. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

Answer: A. Explanation: Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q30. Which option preserves the legal or institutional boundary of OGW function map?

A. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. B. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. C. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. D. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences.

Answer: B. Explanation: Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q31. Which statement uses OGW function map without changing its institution, law or status?

A. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. B. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. C. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: C. Explanation: Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about OGW function map?

A. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. D. Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

Answer: D. Explanation: Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q33. Which statement correctly identifies OGW response chain?

A. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. D. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

Answer: A. Explanation: Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q34. Which option preserves the legal or institutional boundary of OGW response chain?

A. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. B. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. C. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: B. Explanation: Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. The other options change the threat category, institutional owner, legal instrument,

Q35. Which statement uses OGW response chain without changing its institution, law or status?

A. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. B. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. C. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: C. Explanation: Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about OGW response chain?

A. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. B. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. C. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. D. Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

Answer: D. Explanation: Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q37. Which statement correctly identifies Reorganisation structure?

A. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. D. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

Answer: A. Explanation: The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q38. Which option preserves the legal or institutional boundary of Reorganisation structure?

A. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. B. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. C. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. D. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences.

Answer: B. Explanation: The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q39. Which statement uses Reorganisation structure without changing its institution, law or status?

A. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. B. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. C. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: C. Explanation: The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about Reorganisation structure?

A. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. B. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. C. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. D. The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.

Answer: D. Explanation: The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q41. Which statement correctly identifies Police-public-order consequence?

A. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: A. Explanation: Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q42. Which option preserves the legal or institutional boundary of Police-public-order consequence?

A. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. B. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. C. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: B. Explanation: Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. The other options change the threat category, institutional owner, legal

Q43. Which statement uses Police-public-order consequence without changing its institution, law or status?

A. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. B. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. C. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. D. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks.

Answer: C. Explanation: Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about Police-public-order consequence?

A. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. B. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. C. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. D. Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

Answer: D. Explanation: Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q45. Which statement correctly identifies Constitutional-domain firewall?

A. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. B. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. C. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. D. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.

Answer: A. Explanation: Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q46. Which option preserves the legal or institutional boundary of Constitutional-domain firewall?

A. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. B. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. C. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. D. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.

Answer: B. Explanation: Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q47. Which statement uses Constitutional-domain firewall without changing its institution, law or status?

A. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. B. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. C. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. D. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.

Answer: C. Explanation: Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about Constitutional-domain firewall?

A. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. D. Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences.

Answer: D. Explanation: Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q49. Which statement correctly identifies J&K AFSPA distinction?

A. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. B. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. C. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. D. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.

Answer: A. Explanation: The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q50. Which option preserves the legal or institutional boundary of J&K AFSPA distinction?

A. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. B. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. C. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. D. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.

Answer: B. Explanation: The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q51. Which statement uses J&K AFSPA distinction without changing its institution, law or status?

A. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. B. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. C. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. D. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.

Answer: C. Explanation: The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about J&K AFSPA distinction?

A. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. B. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. C. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. D. The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.

Answer: D. Explanation: The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q53. Which statement correctly identifies Village Defence Guards boundary?

A. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. B. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. C. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. D. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.

Answer: A. Explanation: Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q54. Which option preserves the legal or institutional boundary of Village Defence Guards boundary?

A. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. B. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. C. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. D. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.

Answer: B. Explanation: Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q55. Which statement uses Village Defence Guards boundary without changing its institution, law or status?

A. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. D. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.

Answer: C. Explanation: Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about Village Defence Guards boundary?

A. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. D. Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks.

Answer: D. Explanation: Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q57. Which statement correctly identifies Hearts-and-minds meaning?

A. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. D. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.

Answer: A. Explanation: Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q58. Which option preserves the legal or institutional boundary of Hearts-and-minds meaning?

A. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. B. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. C. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. D. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.

Answer: B. Explanation: Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q59. Which statement uses Hearts-and-minds meaning without changing its institution, law or status?

A. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: C. Explanation: Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about Hearts-and-minds meaning?

A. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. B. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. C. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. D. Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.

Answer: D. Explanation: Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q61. Which statement correctly identifies Rehabilitation-evidence rung?

A. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. B. For CPEC, this owner supplies only the sovereignty and security leg; the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. C. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. D. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.

Answer: A. Explanation: A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q62. Which option preserves the legal or institutional boundary of Rehabilitation-evidence rung?

A. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. B. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. C. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. D. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.

Answer: B. Explanation: A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q63. Which statement uses Rehabilitation-evidence rung without changing its institution, law or status?

A. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. B. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. C. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. D. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.

Answer: C. Explanation: A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Rehabilitation-evidence rung?

A. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. B. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. C. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. D. A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.

Answer: D. Explanation: A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q65. Which statement correctly identifies CPEC bounded route?

A. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: A. Explanation: For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q66. Which option preserves the legal or institutional boundary of CPEC bounded route?

A. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. B. For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. C. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: B. Explanation: For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics;

wider connectivity and diplomacy belong to IR and Economy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q67. Which statement uses CPEC bounded route without changing its institution, law or status?

A. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. B. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. C. For CPEC, this owner supplies only the sovereignty and security leg; the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: C. Explanation: For CPEC, this owner supplies only the sovereignty and security leg; the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about CPEC bounded route?

A. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. B. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. C. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. D. For CPEC, this owner supplies only the sovereignty and security leg; the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.

Answer: D. Explanation: For CPEC, this owner supplies only the sovereignty and security leg; the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q69. Which statement correctly identifies Displacement-and-return boundary?

A. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. B. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. C. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: A. Explanation: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q70. Which option preserves the legal or institutional boundary of Displacement-and-return boundary?

A. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. B. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. C. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: B. Explanation: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q71. Which statement uses Displacement-and-return boundary without changing its institution, law or status?

A. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. B. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. C. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. D. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

Answer: C. Explanation: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Displacement-and-return boundary?

A. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. B. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. C. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. D. Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.

Answer: D. Explanation: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q73. Which statement correctly identifies Integrated response chain?

A. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. B. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. C. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: A. Explanation: Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q74. Which option preserves the legal or institutional boundary of Integrated response chain?

A. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. B. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. C. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. D. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

Answer: B. Explanation: Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q75. Which statement uses Integrated response chain without changing its institution, law or status?

A. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. B. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. C. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. D. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

Answer: C. Explanation: Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about Integrated response chain?

A. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. B. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. C. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. D. Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.

Answer: D. Explanation: Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q77. Which statement correctly identifies Qualified end-state?

A. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. B. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. C. Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. D. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

Answer: A. Explanation: Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The other options change the threat category, institutional owner, legal

Q78. Which option preserves the legal or institutional boundary of Qualified end-state?

A. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. B. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. C. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. D. The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.

Answer: B. Explanation: Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q79. Which statement uses Qualified end-state without changing its institution, law or status?

A. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. B. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. C. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. D. The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

Answer: C. Explanation: Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Qualified end-state?

A. Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. B. The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. C. LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. D. Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Answer: D. Explanation: Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The audited GS-III ledger routes the 2018 CPEC cross-subject demand, the 2019 OGW demand and the 2023 Jammu and Kashmir hearts-and-minds demand here. OCR inspection confirmed the 2019 and 2023 printed stems; no official model answer is inferred.

Demand decoding: The directive **answer** requires a direct position on 'AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the Internal Security demand in 'AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP'.

Analytical body:

1. **Claim:** Define the threat or governance problem and distinguish its actor, intent, capability, geography and harm. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Explain the recruitment, finance, logistics, vulnerability, attack or disruption mechanism before listing responses. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Use a named Indian constitutional provision, statute, notified rule, institution, force, judgment, accord or verified case-status example. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Separate prevention, preparedness, response, intelligence, investigation, prosecution, recovery and resilience. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Evaluate federal coordination, capacity, development legitimacy, rights, oversight and implementation constraints. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Test source, date, jurisdiction, legal character, notification/operational status, uncertainty, exception and residual risk. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: The answer must resolve the Internal Security demand in 'AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP'.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 1 - 2018 GS-III

Demand: CPEC as an OBOR subset and India's strategic objections.

Status: Audited routed demand; Enumerate · 10 marks · 150 words. The solution uses only the bounded sovereignty/security leg owned here.

Model solution: Accession anchor: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. **LoC legal-status boundary:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Proxy-war mechanism:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Attribution gradient:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **CPEC bounded route:** For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 1 - 2018 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Accession anchor: Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity. **LoC legal-status boundary:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Proxy-war mechanism:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Attribution gradient:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **CPEC bounded route:** For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: CPEC as an OBOR subset and India's strategic objections. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or

development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

2. **Claim:** Status: Audited routed demand; Enumerate · 10 marks · 150 words. The solution uses only the bounded sovereignty/security leg owned here. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 1 - 2018 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 2 - 2019 GS-III

Demand: The role of over-ground workers in assisting terrorist organisations in insurgency-affected areas and measures to neutralise their influence.

Status: Printed stem inspected in the OCR-searchable official paper; Examine/Discuss · 10 marks · 150 words.

Model solution: Proxy-war mechanism: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Attribution gradient:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **OGW evidentiary boundary:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **OGW function map:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **OGW response chain:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Hearts-and-minds meaning:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and

communication are complementary layers rather than substitutes. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 2 - 2019 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Proxy-war mechanism: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.

Attribution gradient: Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **OGW**

evidentiary boundary: An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **OGW function map:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **OGW response chain:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Hearts-and-minds meaning:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. Analytical body:

1. **Claim:** Demand: The role of over-ground workers in assisting terrorist organisations in insurgency-affected areas and measures to neutralise their influence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Printed stem inspected in the OCR-searchable official paper; Examine/Discuss · 10 marks · 150 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Proxy-war mechanism: The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Attribution gradient:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **OGW evidentiary boundary:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **OGW function map:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **OGW response chain:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Hearts-and-minds meaning:** Winning hearts and minds

is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 2 - 2019 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

PYQ DEMAND CARD 3 - 2023 GS-III

Demand: Winning hearts and minds in terrorism-affected areas and Government measures for conflict resolution in Jammu and Kashmir.

Status: Printed stem inspected in the OCR-searchable official paper; Discuss · 10 marks · 150 words.

Model solution: Separate security metrics: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Reorganisation structure: The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Police-public-order consequence:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

Hearts-and-minds meaning: Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Rehabilitation-evidence rung:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.

Displacement-and-return boundary: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Demand decoding: The directive **answer** requires a direct position on 'PYQ DEMAND CARD 3 - 2023 GS-III', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Separate security metrics: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Reorganisation structure:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Police-public-order consequence:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. **Hearts-and-minds meaning:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Rehabilitation-evidence rung:** A relief package, job, accommodation or registered

beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.

Displacement-and-return boundary: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Analytical body:

1. **Claim:** Demand: Winning hearts and minds in terrorism-affected areas and Government measures for conflict resolution in Jammu and Kashmir. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Status: Printed stem inspected in the OCR-searchable official paper; Discuss · 10 marks · 150 words. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Separate security metrics: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.

Reorganisation structure: The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Police-public-order consequence:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.

Hearts-and-minds meaning: Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Rehabilitation-evidence rung:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.

Displacement-and-return boundary: Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'PYQ DEMAND CARD 3 - 2023 GS-III', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain why a LoC ceasefire cannot by itself establish the end of cross-border terrorism. Answer in about 150 words.

Model thesis: Claim: Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics.

Named evidence/example: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.
- The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.
- LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.
- Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
- Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Qualified conclusion: Claim: Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics.

Named evidence/example: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy

implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **explain** requires a direct position on 'Explain why a LoC ceasefire cannot by itself establish the end of cross-border terrorism....', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal

character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

3. **Claim:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics.

Named evidence/example: LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Explain why a LoC ceasefire cannot by itself establish the end of cross-border terrorism....', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Examine the role attributed to over-ground workers and propose evidence-led measures to neutralise unlawful facilitation. Answer in about 150 words.

Model thesis: **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.
- Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.
- An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.
- Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.
- Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.

- Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.

Qualified conclusion: Claim: Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **examine** requires a direct position on 'Examine the role attributed to over-ground workers and propose evidence-led measures to...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and

verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Examine the role attributed to over-ground workers and propose evidence-led measures to...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Analyse the proxy-war mechanism in Jammu and Kashmir while preserving attribution and rights safeguards. Answer in about 250 words.

Model thesis: Claim: LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state

intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.
- The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.
- Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.
- LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.
- An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.
- Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.

- Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.
- Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
- Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Qualified conclusion: Claim: LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **analyse** requires a direct position on 'Analyse the proxy-war mechanism in Jammu and Kashmir while preserving attribution and rights...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

2. **Claim:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness,

deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW function map. **Named evidence/example:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Analyse the proxy-war mechanism in Jammu and Kashmir while preserving attribution and rights...', replace the weakest generic point with one exact statutory or institutional mechanism, named

India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Discuss the operational internal-security consequences of the 2019 reorganisation without entering the constitutional merits. Answer in about 250 words.

Model thesis: **Claim:** Reorganisation structure. **Named evidence/example:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Police-public-order consequence. **Named evidence/example:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Constitutional-domain firewall. **Named evidence/example:** Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** J&K AFSPA distinction. **Named evidence/example:** The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.
- Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.
- Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences.
- The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.
- Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
- Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Qualified conclusion: **Claim:** Reorganisation structure. **Named evidence/example:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified

evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Police-public-order consequence. **Named evidence/example:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Constitutional-domain firewall. **Named evidence/example:** Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** J&K AFSPA distinction. **Named evidence/example:** The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **discuss** requires a direct position on 'Discuss the operational internal-security consequences of the 2019 reorganisation without...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Reorganisation structure. **Named evidence/example:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Police-public-order consequence. **Named evidence/example:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Constitutional-domain firewall. **Named evidence/example:** Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** J&K AFSPA distinction. **Named evidence/example:** The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before

drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

4. **Claim:** The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: **Claim:** Reorganisation structure. **Named evidence/example:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory

of Ladakh without one. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Police-public-order consequence. **Named evidence/example:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Constitutional-domain firewall. **Named evidence/example:** Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** J&K AFSPA distinction. **Named evidence/example:** The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Discuss the operational internal-security consequences of the 2019 reorganisation without...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Critically evaluate the hearts-and-minds approach as part of conflict resolution in Jammu and Kashmir. Answer in about 300 words.

Model thesis: **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument,

institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Village Defence Guards boundary. **Named evidence/example:** Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Displacement-and-return boundary. **Named evidence/example:** Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.
- An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.
- Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.
- Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks.
- Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.
- A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.
- Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.
- Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
- Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Qualified conclusion: Claim: Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Village Defence Guards boundary. **Named evidence/example:** Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Displacement-and-return boundary. **Named evidence/example:** Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **evaluate** requires a direct position on 'Critically evaluate the hearts-and-minds approach as part of conflict resolution in Jammu and...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's

date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Village Defence Guards boundary. **Named evidence/example:** Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Displacement-and-return boundary. **Named evidence/example:** Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

3. **Claim:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
5. **Claim:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's

date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Village Defence Guards boundary. **Named evidence/example:** Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Displacement-and-return boundary. **Named evidence/example:** Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Critically evaluate the hearts-and-minds approach as part of conflict resolution in Jammu and...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess India's integrated response to cross-border proxy warfare across ceasefire, infiltration, facilitation, finance, governance and rehabilitation dimensions. Answer in about 300 words.

Model thesis: **Claim:** LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung

before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.
- The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.
- Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.
- The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.
- LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.
- An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.
- Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.
- Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.
- A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.
- Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
- Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Qualified conclusion: Claim: LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible

evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Demand decoding: The directive **assess** requires a direct position on 'Assess India's integrated response to cross-border proxy warfare across ceasefire,...', each clause, threat mechanism, named Indian law/institution, dated status, federal-rights boundary, outcome and qualification.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This

fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Analytical body:

1. **Claim:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
2. **Claim:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
3. **Claim:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
4. **Claim:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Named**

evidence/example: Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

5. **Claim:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
6. **Claim:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
7. **Claim:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
8. **Claim:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
9. **Claim:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
10. **Claim:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.
11. **Claim:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Named evidence/example:** Identify the exact Indian law, institution, accord, judgment, force, system or dated case-status anchor owned by the source. **Analysis:** Connect threat mechanism -> competent actor -> prevention/response route -> security or development consequence. **Qualification:** State jurisdiction, source/date/status, legal character, intelligence/evidence limit, rights safeguard, implementation gap or residual risk.

Counter-position / limit: Announcement, designation, alert, arrest, seizure, ceasefire, framework agreement, sanction, procurement or deployment cannot alone establish conviction, final settlement, operational readiness, deterrence, resilience or development outcome; test mandate, process, status and evidence.

Qualified conclusion: Claim: LoC legal-status boundary. **Named evidence/example:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Proxy-war mechanism. **Named evidence/example:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Attribution gradient. **Named evidence/example:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Ceasefire understanding. **Named evidence/example:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Separate security metrics. **Named evidence/example:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW evidentiary boundary. **Named evidence/example:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** OGW response chain. **Named evidence/example:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Hearts-and-minds meaning. **Named evidence/example:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rehabilitation-evidence rung. **Named evidence/example:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Integrated response chain. **Named evidence/example:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Qualified end-state. **Named evidence/example:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/threat -> mechanism -> law/institution -> prevention/response -> outcome/accountability; write four to seven claim -> named evidence/example -> analysis -> qualification points; reserve the final minute for source, date, status, jurisdiction and intelligence/evidence checks.

Why this earns marks: The answer obeys the directive, uses India-centric evidence, and preserves legal character, institutional mandate, process stage, federal boundary, rights safeguard and security-development distinctions.

How to improve this answer: For 'Assess India's integrated response to cross-border proxy warfare across ceasefire,...', replace the weakest generic point with one exact statutory or institutional mechanism, named India-centric example, dated status, implementation bottleneck, accountability safeguard and answer-specific qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Internal Security | **Tier:** Advanced | **GS Paper:** GS-III. **Core area:** The deniability logic of proxy war; ceasefire violations as an instrument, not incidental friction; the operational (not constitutional) consequences of the 2019 reorganisation; rehabilitation policy design; rights-security trade-offs in a proxy-war theatre. **Grounded in:** Ashok Kumar Singh, *Challenges to Internal Security of India*, PDF pp. 23-30; VisionIAS, *Security Challenges and Their Management in Border Areas*, PDF p. 30; 00_Master-Framework.md Sections 5-9; audited GS-III syllabus; Jammu and Kashmir Reorganisation Act 2019 as published in India Code; the DGMOS' joint statement of 25 February 2021. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. *Companion:* basic/05_Jammu-Kashmir-and-Cross-Border-Terrorism.md.

1. Answer thesis and syllabus boundary

Thesis: ANALYSIS: J&K's proxy-war pattern is best understood as a deliberate Pakistani strategic adaptation to conventional-war defeat, sustained through calibrated instruments (deniable non-state fronts, engineered ceasefire violations, and periodic strategy shifts such as the post-2008 "internationalisation via crowd mobilisation" tactic Singh records) - and India's operational response has correspondingly evolved from a purely military posture toward a combined security-development-rehabilitation approach, most visibly since the 2019 reorganisation. **Boundary:** WRONG: this topic does not adjudicate Article 370's constitutional validity or the 2023 Supreme Court judgment's reasoning - that is Polity's domain; this topic analyses only the operational internal-security consequences.

2. Conceptual distinctions

Concept	Precise meaning
FACT: Deniability as the proxy-war's core design feature	FACT: Applying Singh's general proxy-actor logic (topic 02) specifically to J&K: sponsoring "non-state" fronts (LeT, JeM, Hizbul Mujahideen) let Pakistan pursue its stated post-1971 objective - "bleed India through a thousand cuts" - while retaining formal deniability (Singh, PDF pp. 8, 25-26).
FACT: Ceasefire violations as instrument, not friction	FACT: Singh: ceasefire violations are "planned by the ISI mainly to keep the J&K issue alive, to try to internationalise it, keep the Indian forces engaged and to aid the infiltration of the terrorists" (PDF p. 29) - a deliberate tactic, analytically distinct from routine border-management friction (topic 06).
ANALYSIS: Strategy adaptation over time	Singh documents an explicit ISI strategy shift "in the last 4-5 years" (book-period, referring to the post-2008 period) toward "crowd mobilisation... to defame Indian security forces and to internationalise the Kashmir issue," with stone-pelting becoming "a routine feature of street protesters" (PDF p. 26) - evidence that the proxy-war toolkit evolves rather than remaining static; ANALYSIS: any claim about the <i>current</i> toolkit must be separately, currently verified.
ANALYSIS: Reorganisation as operational, not merely symbolic, change	The 2019 reorganisation altered the administrative/security command structure (Union Territory status, direct central administration) with operational effects on coordination and governance delivery - analytically separable from, though related to, the constitutional debate Polity owns. ANALYSIS: State it precisely: under the Jammu and Kashmir Reorganisation Act, 2019, public order and police lie outside the J&K Assembly's legislative competence , so even after Assembly elections the internal-security chain runs Lieutenant Governor -> Union, not Chief Minister -> State. Coordination in J&K is therefore <i>intra</i> -executive rather than Centre-State - a structurally different problem from the one in topics 03, 04 and 12.
ANALYSIS: Ceasefire as an instrument, settlement as an outcome	The November 2003 LoC ceasefire understanding, reaffirmed by both DGMOs on 25 February 2021 , is a military-to-military arrangement. ANALYSIS: It reduces one <i>category</i> of harm (cross-LoC firing and its civilian cost in border villages), which is a genuine gain in itself, but it is not a settlement, is not a treaty, and does not by itself alter infiltration, tunnelling, drone-borne delivery or hinterland module activity. Treating a quiet LoC as evidence of a resolved proxy war is the topic-specific form of the folder's ceasefire-versus-settlement discipline.
ANALYSIS: Attribution as a graded, not binary, judgement	Proxy-war attribution runs along a gradient: material recovered, communication intercepts, cadre origin, training-camp provenance, financing trail and state-institution linkage. ANALYSIS: An answer that says "Pakistan-sponsored" without naming which of these evidences the claim is asserting; one that names the evidentiary basis is analysing.

3. Detailed causal chain: from conventional defeat to proxy-war toolkit evolution

1. Conventional-war defeat forces strategic adaptation: FACT: After

losing "the two main wars in 1965 and 1971," Pakistan "resorted to the tactics of low intensity warfare" (Singh, PDF p. 25).

2. Punjab as the tested template: FACT: The Khalistan-movement playbook in

Punjab was, per Singh, later "replicated" in Kashmir with a similar ISI-support model (PDF pp. 8-9, 26).

3. 1987 election dispute as trigger, not root cause: FACT: A disputed 1987

state election catalysed insurgent group formation, but the deeper condition was ISI's readiness to exploit any legitimacy gap (Singh, PDF p. 25).

4. **Afghan-war spillover: FACT:** The end of the Soviet-Afghan war freed

mujahideen fighters who entered the Kashmir Valley, reinforcing the indigenous JKLF-led insurgency with externally trained cadres (Singh, PDF p. 25).

5. **Demographic engineering as a stated objective: FACT:** Singh's account

frames the forced exodus of Kashmiri Pandits not as incidental violence but as a strategic step toward "ethnic cleansing" that altered the Valley's demographic and political character (PDF p. 26).

6. **Tactical evolution toward information/legitimacy warfare (post-2008):**

FACT: The documented shift toward crowd mobilisation and stone-pelting reflects an adaptation from purely kinetic militancy toward a legitimacy/information contest - an early domestic instance of the information-warfare dynamics developed generally in topic 09.

7. **2019 reorganisation as the most recent structural response: ANALYSIS:**

Centralised administration and a changed security command structure are the internal-security-relevant operational features of this change; its constitutional validity is Polity's separate analytical question.

4. Institutional and reform architecture

- FACT: **BSF/Army/police coordination along the LoC:** developed fully in topic 12; this topic notes only that the LoC's "one border, one force" question (Master Framework Section 6) is complicated by the LoC's dual military-and-paramilitary character (Army in forward areas, BSF/ police in settled sectors).

- FACT: **Development-rehabilitation architecture:** the Prime Minister's Reconstruction Plan (2004), 'UDAAN' skilling initiative and the 2008 Kashmiri Pandit migrant-rehabilitation package are book-period central initiatives (Singh, PDF pp. 27, 30) illustrating the "development alongside security" principle also seen in LW (topic 03) and the North-East (topic 04) - but tailored here to a displaced-population rehabilitation problem specific to J&K.

- ANALYSIS: **Village Defence Committees (VDC)/Village Defence Guards:** a community self-defence model originating in J&K and later generalised nationally (Singh, PDF p. 64; VisionIAS, PDF p. 30, which records the renaming and the SP/SSP-supervised structure) - an institutional export from this topic to the broader border-management framework. ANALYSIS: Its design trade-off is the classic counter-insurgency one: arming and training civilian volunteers buys local presence and early warning at the cost of weakened command accountability over armed actors, which is why supervision (here, by the district police chief) is the variable that determines whether the model helps or harms.

- CURRENT: **Current-anchor institutional detail:** any claim about the present security command structure, force levels or the current administrative status of Jammu & Kashmir and Ladakh must be verified from a dated official (MHA/Army) source, not inferred from this book.

5. Indian applications and boundary cases

- ANALYSIS: **Kashmiri Pandit rehabilitation as an unresolved boundary case:**

Singh notes displaced Pandits "continue to live in temporary refugee camps," calling the government's inability to ensure safe return "one of the stark failures of successive governments" (PDF p. 26) - a durable policy problem that long preceded, and is analytically distinct from, the 2019 reorganisation.

- ANALYSIS: **Referendum demand as a closed, not open, policy question:** Singh argues a referendum is "meaningless" given the demographic change since 1947 and Pakistan's non-withdrawal from PoK (a precondition in UNSC Resolution 47 of 21 April 1948) (PDF p. 29) - this reasoning remains a useful analytical point independent of the 2019 constitutional change.

- ANALYSIS: **Boundary case - the LoC as international border:** Singh notes India's consistent objective has been "to maintain the status quo and convert the LoC into an international border" (PDF p. 25) - distinguish this operational/diplomatic objective (part-owned by IR) from the purely security dimension of LoC management (owned here and in topic 06).

6. Limitations and trade-offs

- ANALYSIS: **Deniable-proxy warfare is difficult to attribute conclusively in real time**, which constrains the speed and form of a proportionate state response - a structural limitation, not a policy failure.
- ANALYSIS: **Centralised administration (post-2019) can improve coordination speed but risks reducing local political buy-in** if not paired with meaningful local governance and development delivery - a trade-off this folder flags without adjudicating the constitutional merits, which are Polity's domain.
- ANALYSIS: **Rehabilitation packages address material loss but not political/emotional legitimacy concerns** of a displaced population - a durable policy gap independent of any particular government's tenure.
- WRONG: **Information/legitimacy-contest tactics (stone-pelting, crowd mobilisation) cannot be countered by security force alone** - Singh's own account implies a communication/perception-management response is also required, foreshadowing the information-warfare countermeasures developed in topic 09.

7. Must-Know Facts for Advanced Prelims

- FACT: Pakistan's shift to low-intensity/proxy warfare followed its conventional defeats in 1965 and 1971.
- FACT: The Khalistan-movement model in Punjab is described as a template later replicated in Kashmir.
- FACT: UNSC Resolution 47 (21 April 1948) envisaged Pakistan securing withdrawal of tribesmen and Pakistani nationals before later Indian force-reduction and plebiscite stages.
- FACT: Singh documents a post-2008 ISI tactical shift toward crowd mobilisation and stone-pelting as an information/legitimacy-contest instrument, alongside continued kinetic militancy.
- FACT: The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs in a joint statement of 25 February 2021 - a military-to-military understanding, not a treaty or settlement.
- FACT: Under the Jammu and Kashmir Reorganisation Act, 2019, public order and police are outside the legislative competence of the J&K Assembly; J&K is a Union Territory with a legislature and Ladakh one without.
- ANALYSIS: The 2019 reorganisation created the Union Territories of Jammu & Kashmir and Ladakh; its constitutional reasoning and the December 2023 Supreme Court judgment upholding it are Polity's domain.

8. Advanced Prelims traps

- WRONG: Ceasefire violations along the LoC are simply routine military friction. -> Singh frames them as a deliberate ISI instrument to sustain internationalisation efforts and enable infiltration, not incidental friction.
- WRONG: The 2019 reorganisation resolved all internal-security challenges in J&K. -> It changed the administrative/constitutional structure; ongoing operational challenges (infiltration risk, rehabilitation, development delivery) require separate, current verification rather than an assumption of closure.
- WRONG: Stone-pelting and crowd mobilisation are spontaneous, unconnected protest phenomena. -> Singh documents them as part of a deliberate ISI tactical shift toward an information/legitimacy contest.
- WRONG: A reaffirmed LoC ceasefire is evidence that the proxy war has ended.
-> It is a military-to-military understanding covering cross-LoC firing; infiltration, tunnelling, drone-borne delivery and hinterland module activity are separately measured and can move in the opposite direction.

- **WRONG:** After Assembly elections, J&K's internal-security chain reverted to the normal Centre-State model. -> Police and public order remain outside the Assembly's competence under the 2019 Act, so the chain remains Lieutenant-Governor-centred - a fact about the statute, independent of any political assessment of it.

9. CURRENT: Current-anchor note

- **CURRENT:** MHA's **26 February 2026 relief-and-rehabilitation status for Kashmiri migrants** is the current dated anchor for rehabilitation and trust restoration. The 2019 reorganisation and December 2023 judgment remain constitutional reference points; present incident/force claims still require a separately dated official source.

11. Mains-ready framework

Central thesis: J&K's internal-security trajectory reflects a continuously adapting Pakistani proxy-war strategy - from conventional defeat, through Punjab-style militancy replication, to a post-2008 information/legitimacy-contest tactic - met by an Indian response that has progressively combined security operations with development, rehabilitation and, since 2019, a centralised administrative structure, each carrying its own operational trade-off.

1. **State the deniable-proxy-war mechanism** precisely, distinguishing it from ordinary insurgency.
2. **Trace the causal chain** from 1965/1971 defeat through to the post-2008 tactical shift.
3. **Name ceasefire violations as a deliberate instrument**, not routine friction.
4. **Cite the development-rehabilitation response** (PMRP, UDAAN, Pandit rehabilitation) as the non-security half of the state's approach.
5. **Note the 2019 reorganisation's operational relevance**, explicitly routing its constitutional reasoning to Polity.
6. **Acknowledge the attribution and legitimacy-contest limitations** of a purely security-based response.
7. ****Close by relating the answer back to the master framework's actor-response matrix**** - state-sponsored proxy actor met by a combined security-development-rights response.

12. Probable questions

- **ANALYSIS: Prelims:** Under UNSC Resolution 47 of 21 April 1948, what precondition for a plebiscite has never been fulfilled?
- **ANALYSIS: Mains (15 marks):** "Pakistan's Kashmir strategy has continuously adapted, from conventional war to proxy militancy to information/ legitimacy contest." Trace this evolution.
- **ANALYSIS: Mains (15 marks):** Analyse the operational (not constitutional) internal-security consequences of the 2019 reorganisation of Jammu & Kashmir.
- **ANALYSIS: Mains (15 marks):** "A ceasefire on the Line of Control is a humanitarian gain for border populations, not a resolution of cross-border terrorism." Examine.

13. Study links

- **FACT:** Foundation companion:
basic/05_Jammu-Kashmir-and-Cross-Border-Terrorism.md.
- **FACT:** 00_Master-Framework.md Sections 5, 6 and 8 - the actor-response matrix, federal architecture and recurring analytical gaps.
- **ANALYSIS: Boundary routing:** Article 370's constitutional text, litigation history and the December 2023 Supreme Court judgment belong to Polity.

- ANALYSIS: **Lateral topics in this folder:** Topic 02 (advanced) for the general proxy-actor/federalism analysis; topic 06 for current LoC/Pakistan border management; topic 09 for the information-warfare dimension of the post-2008 tactical shift.

CONSOLIDATED REGISTER NOTES

Jammu & Kashmir and Cross-Border Terrorism: ACCESSION, LoC AND PROXY-WAR THREAT GRAMMAR

1. **Accession anchor:** Maharaja Hari Singh signed the Instrument of Accession on 26 October 1947 on Defence, External Affairs and Communications; detailed constitutional doctrine belongs to Polity.
2. **LoC legal-status boundary:** The Line of Control replaced the earlier ceasefire line after the 1971 war and the Shimla process; it is not described here as an internationally recognised boundary.
3. **Proxy-war mechanism:** The owner frames J&K militancy as externally enabled proxy warfare using deniable non-state intermediaries, infiltration, finance, weapons, propaganda and local facilitation.
4. **Attribution gradient:** Cross-border attribution must identify the evidentiary basis-material, communications, cadre origin, training provenance, financing trail or state-institution linkage-rather than rely on an unsupported label.
5. **Ceasefire understanding:** The November 2003 LoC ceasefire understanding was reaffirmed by the Indian and Pakistani DGMOs on 25 February 2021; it is a military-to-military arrangement, not a treaty or political settlement.
6. **Separate security metrics:** LoC firing, attempted and successful infiltration, local recruitment, financing, drone or tunnel delivery, and hinterland incidents are distinct metrics that can move independently.
7. **OGW evidentiary boundary:** An over-ground worker is an alleged non-combatant facilitator whose role must be established through admissible evidence; the label cannot lawfully substitute for proof.
8. **OGW function map:** Possible facilitation functions include reconnaissance or information, shelter and logistics, communications, recruitment or propaganda, and finance, but each alleged function requires case-specific proof.
9. **OGW response chain:** Neutralising facilitation requires protected community reporting, evidence-led investigation, lawful financial tracing, prevention or rehabilitation where appropriate, and prosecution on admissible evidence.
10. **Reorganisation structure:** The Jammu and Kashmir Reorganisation Act, 2019 created the Union Territory of Jammu and Kashmir with a legislature and the Union Territory of Ladakh without one.
11. **Police-public-order consequence:** Under the 2019 Act, public order and police are outside the J&K Assembly's legislative competence, making the operational chain Lieutenant-Governor and Union centred rather than an ordinary Centre-State chain.
12. **Constitutional-domain firewall:** Article 370's text, the 2019 constitutional measures and the December 2023 Supreme Court reasoning belong to Polity; this topic uses only clearly identified operational internal-security consequences.
13. **J&K AFSPA distinction:** The Armed Forces (Jammu and Kashmir) Special Powers Act, 1990 is distinct from the Armed Forces (Special Powers) Act, 1958 applicable in parts of the North-East.
14. **Village Defence Guards boundary:** Village Defence Committees were renamed Village Defence Guards and operate under district SP or SSP supervision; local presence and warning benefits must be balanced against training, command and accountability risks.
15. **Hearts-and-minds meaning:** Winning hearts and minds is an operational legitimacy strategy combining civilian protection, proportionate force, participation, grievance redress, service and livelihood delivery, rehabilitation and credible accountability.
16. **Rehabilitation-evidence rung:** A relief package, job, accommodation or registered beneficiary is an implementation input; none alone proves safe return, restored trust or conflict resolution.
17. **CPEC bounded route:** For CPEC, this owner supplies only the sovereignty and security leg: the corridor passes through territory claimed by India and administered by Pakistan and may affect strategic logistics; wider connectivity and diplomacy belong to IR and Economy.

18. **Displacement-and-return boundary:** Kashmiri Pandit displacement is a durable rehabilitation and justice issue; any present return, residence, employment or security outcome requires a dated official source.
19. **Integrated response chain:** Counter-infiltration, intelligence, policing, counter-finance, evidence-led investigation, prosecution, governance and communication are complementary layers rather than substitutes.
20. **Qualified end-state:** Durable security requires disruption of the proxy mechanism alongside civilian protection, lawful accountability, accountable local governance, rehabilitation and trust; a quieter LoC does not prove the wider conflict resolved.

Jammu & Kashmir and Cross-Border Terrorism: ATTRIBUTION, OGW AND OPERATIONAL-LEGAL FIREWALLS

- Do not turn the accession chronology into the whole internal-security answer.
- Do not describe the LoC as a settled international boundary.
- Do not merge sponsor, proxy group and alleged local facilitator into one legal actor.
- Do not assert cross-border attribution without naming the evidence status.
- Do not equate the 2021 ceasefire reaffirmation with a treaty or settlement.
- Do not merge LoC firing, infiltration, recruitment and hinterland violence into one trend.
- Do not use OGW as a label for political disagreement or as a substitute for proof.
- Do not publish operational routes, deployment patterns or tactical vulnerabilities.
- Do not treat the 2019 reorganisation as proof of a security outcome.
- Do not import Article 370 constitutional reasoning into an Internal Security answer.
- Do not equate a rehabilitation input with safe return or restored trust.
- Do not use an unverified current incident, casualty or force statistic.

Jammu & Kashmir and Cross-Border Terrorism: HEARTS-AND-MINDS, REHABILITATION AND PYQ SPINES

OPEN WITH THE EXTERNALLY ENABLED PROXY MECHANISM

- > BOUND ACCESSION ARTICLE 370 AND CONSTITUTIONAL DOCTRINE TO POLITY
- > SEPARATE SPONSOR PROXY FACILITATOR VECTOR AND END-STATE
- > STATE THE ATTRIBUTION AND EVIDENCE RUNG
- > DISTINGUISH CEASEFIRE INFILTRATION RECRUITMENT FINANCE AND INCIDENT METRICS
- > DEFINE OGW FUNCTIONS WITHOUT TREATING ALLEGATION AS PROOF
- > EVALUATE HEARTS AND MINDS THROUGH PROTECTION PARTICIPATION DELIVERY AND REMEDY
- > CONCLUDE WITH DISRUPTION ACCOUNTABILITY GOVERNANCE REHABILITATION AND TRUST

Jammu & Kashmir and Cross-Border Terrorism: SEPARATE METRICS AND QUALIFIED CONFLICT-RESOLUTION VERDICT

Live official-source attempts on 2026-09-04 substantiated no new J&K operational statistic. The module therefore relies on stable owner-audited legal and institutional anchors, preserves the 25 February 2021 ceasefire status, and requires a dated MHA, NIA, police or court source for any current attribution or outcome claim.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Accession-to-LoC boundary

26 OCT 1947 -> INSTRUMENT OF ACCESSION
1947-48 -> CONFLICT / CEASEFIRE-LINE CONTEXT
1971 + SHIMLA PROCESS -> LINE OF CONTROL
BOUNDARY -> constitutional doctrine routes to Polity

ASCII MASTER FLOW - PANEL 2/12: Proxy-war system

EXTERNAL SPONSOR -> DENIABLE PROXY
PROXY -> INFILTRATION / FINANCE / WEAPONS / PROPAGANDA
LOCAL FACILITATION -> only where evidence proves the role
END-STATE -> coercion, fear, legitimacy and strategic pressure

ASCII MASTER FLOW - PANEL 3/12: Attribution ladder

1 ALLEGATION / CLAIM
2 RECOVERED MATERIAL OR COMMUNICATION
3 FINANCING / TRAINING / CADRE LINK
4 INVESTIGATIVE OR JUDICIAL FINDING
RULE -> state the rung; do not jump to adjudicated certainty

ASCII MASTER FLOW - PANEL 4/12: Ceasefire-versus-conflict matrix

LoC FIRING -> governed by military understanding
INFILTRATION -> separate border-security metric
RECRUITMENT / FINANCE -> separate network metrics
HINTERLAND INCIDENT -> separate policing/investigation metric

ASCII MASTER FLOW - PANEL 5/12: Proxy-support chain

INFILTRATION / DELIVERY
-> LOGISTICS / SHELTER / COMMUNICATION
-> FINANCE / RECRUITMENT / PROPAGANDA
-> ATTACK OR COERCIVE INFLUENCE
SAFE RULE -> describe categories, not exploitable methods

ASCII MASTER FLOW - PANEL 6/12: OGW proof-and-response

ALLEGED FACILITATION?
-> PROTECT REPORTING + PRESERVE EVIDENCE
-> INVESTIGATE FUNCTION + FINANCIAL TRAIL
-> REHABILITATE / PREVENT OR PROSECUTE AS EVIDENCE WARRANTS
TRAP -> label is not proof

ASCII MASTER FLOW - PANEL 7/12: 2019 operational chain

J&K UT -> LEGISLATURE EXISTS
POLICE + PUBLIC ORDER -> OUTSIDE ASSEMBLY COMPETENCE
