

COMPLETE LEARNING SESSION

World Economy and Population since 1900 - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

World Economy and Population since 1900 - Learner-v2 Complete Learning Session	6
SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT	6
BASIC LEARNING SESSION	6
DEEP-REVIEW LEARNING CONTRACT	6
EVIDENCE, PYQ AND CURRENT-STATUS CONTROL	7
SESSION 1 - FOUNDATION - WORLD ECONOMY FROM EUROPE TO AMERICA	8
SESSION 2 - FOUNDATION - DESIGNED POSTWAR ORDER	9

WORLD HISTORY DEEP-REVIEW CORE CONTROL	47
BASIC MCQS / REMEDIATION	47
Q1. Which statement correctly identifies World economy before 1945?	47
Q2. Which chronology card should be filed under World economy before 1945?	47
Q3. Which option preserves the source-bounded meaning of World economy before 1945?	47
Q4. Which statement avoids a close-option trap about World economy before 1945?	48
Q5. Which statement correctly identifies Bretton Woods, 1944?	48
Q6. Which chronology card should be filed under Bretton Woods, 1944?	48
Q7. Which option preserves the source-bounded meaning of Bretton Woods, 1944?	48

Q8. Which statement avoids a close-option trap about Bretton Woods, 1944?	48
Q9. Which statement correctly identifies Postwar economic blocs?	49
Q10. Which chronology card should be filed under Postwar economic blocs?	49
Q11. Which option preserves the source-bounded meaning of Postwar economic blocs?	49
Q12. Which statement avoids a close-option trap about Postwar economic blocs?	49
Q13. Which statement correctly identifies Oil shocks and debt?	50
Q14. Which chronology card should be filed under Oil shocks and debt?	50
Q15. Which option preserves the source-bounded meaning of Oil shocks and debt?	50
Q16. Which statement avoids a close-option trap about Oil shocks and debt?	50
Q17. Which statement correctly identifies Globalisation after 1990?	50
Q18. Which chronology card should be filed under Globalisation after 1990?	51
Q19. Which option preserves the source-bounded meaning of Globalisation after 1990?	51
Q20. Which statement avoids a close-option trap about Globalisation after 1990?	51
Q21. Which statement correctly identifies Financial crisis of 2008?	51
Q22. Which chronology card should be filed under Financial crisis of 2008?	51
Q23. Which option preserves the source-bounded meaning of Financial crisis of 2008?	52
Q24. Which statement avoids a close-option trap about Financial crisis of 2008?	52
Q25. Which statement correctly identifies North-South divergence?	52
Q26. Which chronology card should be filed under North-South divergence?	52
Q27. Which option preserves the source-bounded meaning of North-South divergence?	52
Q28. Which statement avoids a close-option trap about North-South divergence?	53
Q29. Which statement correctly identifies Environmental cost of growth?	53
Q30. Which chronology card should be filed under Environmental cost of growth?	53
Q31. Which option preserves the source-bounded meaning of Environmental cost of growth?	53
Q32. Which statement avoids a close-option trap about Environmental cost of growth?	53
Q33. Which statement correctly identifies Population explosion mechanism?	54
Q34. Which chronology card should be filed under Population explosion mechanism?	54
Q35. Which option preserves the source-bounded meaning of Population explosion mechanism?	54
Q36. Which statement avoids a close-option trap about Population explosion mechanism?	54
Q37. Which statement correctly identifies Demographic transition?	54
Q38. Which chronology card should be filed under Demographic transition?	55
Q39. Which option preserves the source-bounded meaning of Demographic transition?	55

Q40. Which statement avoids a close-option trap about Demographic transition?	55
Q41. Which statement correctly identifies Population pressures and ageing?	55
Q42. Which chronology card should be filed under Population pressures and ageing?	55
Q43. Which option preserves the source-bounded meaning of Population pressures and ageing?	56
Q44. Which statement avoids a close-option trap about Population pressures and ageing?	56
Q45. Which statement correctly identifies Population policy?	56
Q46. Which chronology card should be filed under Population policy?	56
Q47. Which option preserves the source-bounded meaning of Population policy?	56
Q48. Which statement avoids a close-option trap about Population policy?	57
Q49. Which statement correctly identifies HIV/AIDS as development shock?	57
Q50. Which chronology card should be filed under HIV/AIDS as development shock?	57
Q51. Which option preserves the source-bounded meaning of HIV/AIDS as development shock?	57
Q52. Which statement avoids a close-option trap about HIV/AIDS as development shock?	57
Q53. Which statement correctly identifies Crash as symptom, October 1929?	58
Q54. Which chronology card should be filed under Crash as symptom, October 1929?	58
Q55. Which option preserves the source-bounded meaning of Crash as symptom, October 1929?	58
Q56. Which statement avoids a close-option trap about Crash as symptom, October 1929?	58
Q57. Which statement correctly identifies Depression transmission?	59
Q58. Which chronology card should be filed under Depression transmission?	59
Q59. Which option preserves the source-bounded meaning of Depression transmission?	59
Q60. Which statement avoids a close-option trap about Depression transmission?	59

World Economy and Population since 1900 - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-01. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-01.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was used first. The available OCR-searchable Norman Lowe World History PDF was retained as supplementary local context, but no unsupported page number, quotation or precision was imported from it.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** The owner records one pre-2018 GS-I demand in neutral rendering only: the policy instruments deployed to contain the Great Economic Depression. No verbatim 2013 wording or question number is held locally.
- **Live-link boundary:** The UN World Economic Situation and Prospects 2026 describes slower and uneven world growth, trade and investment headwinds, and a need for stronger policy coordination. The UN World Population Prospects portal supplies the official current demographic-data anchor. Together they provide a bounded link to unequal globalisation and population analysis; no 2026 population estimate or unfetched economic figure is invented.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete World History Core is taught chronologically, spatially and causally before optional enrichment.
Evidence method	Claim -> named event/;treaty/;institution/;actor/;region or attributed scholarship -> analysis -> qualification.
Chronology	Structural cause, trigger, event, settlement, implementation and long-/term process remain distinct.
Geography	Europe, Africa, Asia, West Asia and the Americas retain their own actors, routes and unequal connections; Europe is never the default universal viewpoint.
Historiography	Liberal, conservative, Marxist, social, feminist, postcolonial and other relevant interpretations are tied to evidence and bounded claims.
Practice contract	Every solved item has directive/;demand decoding, an examiner-/grade model, an executable timed-/compression plan, marks rationale and answer-/specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\World-History\basic\20_World-Economy-and-Population-since-1900.md **Canonical topic owner:** upsc-ai-kit\knowledge\World-History\basic\20_World-Economy-and-Population-since-1900.md **Optional Advanced owner:** upsc-ai-kit\knowledge\World-History\advanced\20_World-Economy-and-Population-since-1900.md **Official syllabus mapping:** upsc-ai-kit\knowledge\World-History\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Primary/official evidence:** treaties, declarations, laws, institutional records, speeches and contemporary testimony are dated and read for authorship, audience and purpose.
- **Spatial and social evidence:** maps, trade and migration routes, battlefield geography, class, race, gender and colonial position qualify state-centred narrative.
- **Quantitative evidence:** population, debt, inflation, output, casualties and territorial claims retain unit, place, period, source and uncertainty; no statistic is invented.
- **Interpretive discipline:** teleology, civilisational ranking, single-cause verdicts and present-day nation-state projection are rejected.
- **PYQ discipline:** repository routing ledgers and locally held papers control wording and metadata; neutral rendering, reconstruction and unavailable official keys remain explicitly labelled.
- **Current-status note, rechecked 2026-09-04:** The UN World Economic Situation and Prospects 2026 describes slower and uneven world growth, trade and investment headwinds, and a need for stronger policy coordination. The UN World Population Prospects portal supplies the official current demographic-data anchor. Together they provide a bounded link to unequal globalisation and population analysis; no 2026 population estimate or unfetched economic figure is invented.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - WORLD ECONOMY FROM EUROPE TO AMERICA

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: World economy from Europe to America is the source-bounded relationship among and World economy before 1945 within World Economy and Population since 1900.

Technical definition: Evidence chain: World economy before 1945 Qualified use: Open with the pre-1945 rupture.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: World economy from Europe to America is the source-bounded relationship among and World economy before 1945 within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- **FOUNDATION**
- **World economy from Europe to America**
- **Precise definition**
- **Evidence chain**
- **Qualified use**
- **Precise definition: World economy from Europe to America**

How to use them: Frame the answer through FOUNDATION; define World economy from Europe to America, connect Precise definition with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

WORLD ECONOMY FROM EUROPE TO AMERICA

01. World economy before 1945

BOUNDARY -> War and Depression changed relative economic power.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** World economy from Europe to America is the source-bounded relationship among and World economy before 1945 within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

NAMED EVIDENCE AND MECHANISM

- Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

EXAMINER CAUTION

- War and Depression changed relative economic power.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in World economy from Europe to America.
- **Mains:** Open with the pre-1945 rupture.

MINI RECAP

- **Evidence chain:** World economy before 1945
- **Qualified use:** Open with the pre-1945 rupture.

CLOSING RECALL FLOW - FOUNDATION - WORLD ECONOMY FROM EUROPE TO AMERICA

START / CONCEPT: FOUNDATION - World economy from Europe to America

|

v

EXACT TERMS: FOUNDATION · World economy from Europe to America · Precise definition · Evidence chain · Qualified use · Precise definition: World economy from Europe to America

UPSC TRAP / ANSWER-USE: Do not miss this limiting distinction: world economy from Europe to America is the source-bounded relationship among and World economy...

|

v

ANSWER-GRABBING FORMULATION: Precise definition: World economy from Europe to America is the source-bounded relationship among and World economy before 1945 within World Economy and Population since 1900.

SESSION 2 - FOUNDATION - DESIGNED POSTWAR ORDER

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Designed postwar order is the source-bounded relationship among Bretton Woods, 1944 and Postwar economic blocs within World Economy and Population since 1900.

Technical definition: Evidence chain: Bretton Woods, 1944 - Postwar economic blocs Qualified use: Explain Bretton Woods and Cold War systems.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Designed postwar order is the source-bounded relationship among Bretton Woods, 1944 and Postwar economic blocs within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- FOUNDATION
- Designed postwar order
- Precise definition
- Evidence chain
- Qualified use
- Precise definition: Designed postwar order

How to use them: Frame the answer through FOUNDATION; define Designed postwar order, connect Precise definition with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

DESIGNED POSTWAR ORDER

01. Bretton Woods, 1944

|
v

02. Postwar economic blocs

BOUNDARY -> Institutional architecture and bloc competition are distinct.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Designed postwar order is the source-bounded relationship among Bretton Woods, 1944 and Postwar economic blocs within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

NAMED EVIDENCE AND MECHANISM

- The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development.
- The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

EXAMINER CAUTION

- Institutional architecture and bloc competition are distinct.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Designed postwar order.
- **Mains:** Explain Bretton Woods and Cold War systems.

MINI RECAP

- **Evidence chain:** Bretton Woods, 1944 -> Postwar economic blocs
- **Qualified use:** Explain Bretton Woods and Cold War systems.

CLOSING RECALL FLOW - FOUNDATION - DESIGNED POSTWAR ORDER

START / CONCEPT: FOUNDATION - Designed postwar order

|
v

EXACT TERMS: FOUNDATION • Designed postwar order • Precise definition • Evidence chain • Qualified use • Precise definition: Designed postwar order

|
v

MECHANISM / ARGUMENT: The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

|
v

CONSEQUENCE / CONTRAST: Evidence chain: Bretton Woods, 1944 - Postwar economic blocs Qualified use: Explain Bretton Woods and Cold War systems.

|
v

UPSC TRAP / ANSWER-USE: Do not miss this limiting distinction: causal weight and evaluative verdicts are analytical synthesis.

|
v

ANSWER-GRABBING FORMULATION: Precise definition: Designed postwar order is the source-bounded relationship among Bretton Woods, 1944 and Postwar economic blocs within World Economy and Population since 1900.

SESSION 3 - FOUNDATION - OIL SHOCKS, DEBT AND NORTH-SOUTH CONFLICT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Oil shocks, debt and North-South conflict is the source-bounded relationship among and Oil shocks and debt within World Economy and Population since 1900.

Technical definition: Evidence chain: Oil shocks and debt Qualified use: Connect energy and development.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Oil shocks, debt and North-South conflict is the source-bounded relationship among and Oil shocks and debt within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- FOUNDATION
- Oil shocks
- debt
- North-South conflict
- Precise definition
- Evidence chain

How to use them: Frame the answer through FOUNDATION; define Oil shocks, connect debt with North-South conflict to explain the mechanism, and use Precise definition for the decisive comparison or qualification.

VISUAL FIRST

OIL SHOCKS, DEBT AND NORTH-SOUTH CONFLICT

01. Oil shocks and debt

BOUNDARY -> Use the sourced oil-to-vulnerability chain cautiously.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Oil shocks, debt and North-South conflict is the source-bounded relationship among and Oil shocks and debt within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

NAMED EVIDENCE AND MECHANISM

- Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

EXAMINER CAUTION

- Use the sourced oil-to-vulnerability chain cautiously.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Oil shocks, debt and North-South conflict.
- **Mains:** Connect energy and development.

MINI RECAP

- **Evidence chain:** Oil shocks and debt
- **Qualified use:** Connect energy and development.

CLOSING RECALL FLOW - FOUNDATION - OIL SHOCKS, DEBT AND NORTH-SOUTH CONFLICT

START / CONCEPT: FOUNDATION - Oil shocks, debt and North-South conflict

|

v

EXACT TERMS: FOUNDATION • Oil shocks • debt • North-South conflict • Precise definition • Evidence chain

|

v

MECHANISM / ARGUMENT: Evidence chain: Oil shocks and debt Qualified use: Connect energy and development.

|

v

CONSEQUENCE / CONTRAST: Classification: Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

|

v

UPSC TRAP / ANSWER-USE: Do not miss this limiting distinction: use the sourced oil-to-vulnerability chain cautiously.

|

v

ANSWER-GRABBING FORMULATION: Precise definition: Oil shocks, debt and North-South conflict is the source-bounded relationship among and Oil shocks and debt within World Economy and Population since 1900.

SESSION 4 - CORE - GLOBALISATION AND FINANCIAL CONTAGION

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Globalisation and financial contagion is the source-bounded relationship among Globalisation after 1990 and Financial crisis of 2008 within World Economy and Population since 1900.

Technical definition: Evidence chain: Globalisation after 1990 - Financial crisis of 2008 Qualified use: Evaluate integration after 1990.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Globalisation and financial contagion is the source-bounded relationship among Globalisation after 1990 and Financial crisis of 2008 within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- Globalisation
- financial contagion
- Precise definition
- Evidence chain
- Qualified use
- Precise definition: Globalisation and financial contagion

How to use them: Frame the answer through Globalisation; define financial contagion, connect Precise definition with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

GLOBALISATION AND FINANCIAL CONTAGION

01. Globalisation after 1990

02. Financial crisis of 2008

BOUNDARY -> The same channels transmit growth and crisis.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Globalisation and financial contagion is the source-bounded relationship among Globalisation after 1990 and Financial crisis of 2008 within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

NAMED EVIDENCE AND MECHANISM

- Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly.
- The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

EXAMINER CAUTION

- The same channels transmit growth and crisis.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Globalisation and financial contagion.
- **Mains:** Evaluate integration after 1990.

MINI RECAP

- **Evidence chain:** Globalisation after 1990 -> Financial crisis of 2008
- **Qualified use:** Evaluate integration after 1990.

CLOSING RECALL FLOW - CORE - GLOBALISATION AND FINANCIAL CONTAGION

START / CONCEPT: CORE - Globalisation and financial contagion

EXACT TERMS: Globalisation • financial contagion • Precise definition • Evidence chain • Qualified use • Precise definition: Globalisation and financial contagion

MECHANISM / ARGUMENT: Evidence chain: Globalisation after 1990 - Financial crisis of 2008 Qualified use: Evaluate integration after 1990.

CONSEQUENCE / CONTRAST: Classification: Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

UPSC TRAP / ANSWER-USE: Do not miss this limiting distinction: globalisation and financial contagion is the source-bounded relationship among Globalisation after 1990 and Financial...

ANSWER-GRABBING FORMULATION: Precise definition: Globalisation and financial contagion is the source-bounded relationship among Globalisation after 1990 and Financial crisis of 2008 within World Economy and Population since 1900.

SESSION 5 - CORE - WHY THE SOUTH DIVERGED INTERNALLY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Why the South diverged internally is the source-bounded relationship among and North-South divergence within World Economy and Population since 1900.

Technical definition: Evidence chain: North-South divergence Qualified use: Explain unequal capability.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Why the South diverged internally is the source-bounded relationship among and North-South divergence within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- Why the South diverged internally
- Precise definition
- Evidence chain
- Qualified use
- Precise definition: Why the South diverged internally
- Precise

How to use them: Frame the answer through Why the South diverged internally; define Precise definition, connect Evidence chain with Qualified use to explain the mechanism, and use Precise definition: Why the South diverged internally for the decisive comparison or qualification.

VISUAL FIRST

WHY THE SOUTH DIVERGED INTERNALLY

01. North-South divergence

BOUNDARY -> Reject one Third World trajectory.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Why the South diverged internally is the source-bounded relationship among and North-South divergence within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category.

NAMED EVIDENCE AND MECHANISM

- Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category.

EXAMINER CAUTION

- Reject one Third World trajectory.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Why the South diverged internally.
- **Mains:** Explain unequal capability.

MINI RECAP

- **Evidence chain:** North-South divergence
- **Qualified use:** Explain unequal capability.

CLOSING RECALL FLOW - CORE - WHY THE SOUTH DIVERGED INTERNALLY

|

v

ANSWER-GRABBING FORMULATION: Precise definition: Why the South diverged internally is the source-bounded relationship among and North-South divergence within World Economy and Population since 1900.

SESSION 6 - CORE - GROWTH AND ENVIRONMENTAL LIMITS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Growth and environmental limits is the source-bounded relationship among and Environmental cost of growth within World Economy and Population since 1900.

Technical definition: Evidence chain: Environmental cost of growth Qualified use: Add the physical cost of the growth model.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Growth and environmental limits is the source-bounded relationship among and Environmental cost of growth within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- Growth
- environmental limits
- Precise definition
- Evidence chain
- Qualified use
- Precise definition: Growth and environmental limits

How to use them: Frame the answer through Growth; define environmental limits, connect Precise definition with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

GROWTH AND ENVIRONMENTAL LIMITS

01. Environmental cost of growth

BOUNDARY -> Keep evidence qualitative and historical.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Growth and environmental limits is the source-bounded relationship among and Environmental cost of growth within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming.

NAMED EVIDENCE AND MECHANISM

- Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming.

EXAMINER CAUTION

- Keep evidence qualitative and historical.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Growth and environmental limits.
- **Mains:** Add the physical cost of the growth model.

MINI RECAP

|

v

ANSWER-GRABBING FORMULATION: Precise definition: Growth and environmental limits is the source-bounded relationship among and Environmental cost of growth within World Economy and Population since 1900.

SESSION 7 - CORE - POPULATION EXPLOSION AND TRANSITION

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Population explosion and transition is the source-bounded relationship among Population explosion mechanism and Demographic transition within World Economy and Population since 1900.

Technical definition: Evidence chain: Population explosion mechanism - Demographic transition Qualified use: Use the demographic mechanism correctly.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Population explosion and transition is the source-bounded relationship among Population explosion mechanism and Demographic transition within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- Population explosion
- transition
- Precise definition
- Evidence chain
- Qualified use
- Precise definition: Population explosion and transition

How to use them: Frame the answer through Population explosion; define transition, connect Precise definition with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

POPULATION EXPLOSION AND TRANSITION

01. Population explosion mechanism

|

v

02. Demographic transition

BOUNDARY -> Falling mortality precedes fertility decline.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Population explosion and transition is the source-bounded relationship among Population explosion mechanism and Demographic transition within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility.

NAMED EVIDENCE AND MECHANISM

- Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.
- High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility.

EXAMINER CAUTION

- Falling mortality precedes fertility decline.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Population explosion and transition.

- **Mains:** Use the demographic mechanism correctly.

MINI RECAP

- **Evidence chain:** Population explosion mechanism -> Demographic transition
- **Qualified use:** Use the demographic mechanism correctly.

CLOSING RECALL FLOW - CORE - POPULATION EXPLOSION AND TRANSITION

START / CONCEPT: CORE - Population explosion and transition
 |
 v
 EXACT TERMS: Population explosion · transition · Precise definition · Evidence chain · Qualified use · Precise definition: Population explosion and transition
 |
 v
 MECHANISM / ARGUMENT: Evidence chain: Population explosion mechanism - Demographic transition
 Qualified use: Use the demographic mechanism correctly.
 |
 v
 CONSEQUENCE / CONTRAST: Classification: Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.
 |
 v
 UPSC TRAP / ANSWER-USE: Do not miss this limiting distinction: high births and falling deaths create rapid growth.
 |
 v
 ANSWER-GRABBING FORMULATION: Precise definition: Population explosion and transition is the source-bounded relationship among Population explosion mechanism and Demographic transition within World Economy and Population since 1900.

SESSION 8 - CORE - POPULATION PRESSURE, AGEING AND POLICY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Population pressure, ageing and policy is the source-bounded relationship among Population pressures and ageing and Population policy within World Economy and Population since 1900.

Technical definition: Evidence chain: Population pressures and ageing - Population policy
 Qualified use: Compare welfare and coercive routes.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Population pressure, ageing and policy is the source-bounded relationship among Population pressures and ageing and Population policy within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- **Population pressure**
- **ageing**
- **policy**
- **Precise definition**
- **Evidence chain**
- **Qualified use**

How to use them: Frame the answer through Population pressure; define ageing, connect policy with Precise definition to explain the mechanism, and use Evidence chain for the decisive comparison or qualification.

VISUAL FIRST

POPULATION PRESSURE, AGEING AND POLICY

01. Population pressures and ageing

|

v

02. Population policy

BOUNDARY -> Different regions face opposite age structures.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Population pressure, ageing and policy is the source-bounded relationship among Population pressures and ageing and Population policy within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

NAMED EVIDENCE AND MECHANISM

- Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing.
- States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

EXAMINER CAUTION

- Different regions face opposite age structures.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Population pressure, ageing and policy.
- **Mains:** Compare welfare and coercive routes.

MINI RECAP

- **Evidence chain:** Population pressures and ageing -> Population policy
- **Qualified use:** Compare welfare and coercive routes.

|

v

ANSWER-GRABBING FORMULATION: Precise definition: Public works, welfare and labour is the source-bounded relationship among and Public works and social reform within World Economy and Population since 1900.

SESSION 15 - CORE SYNTHESIS - LIMITS AND COMPARATIVE VERDICT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Precise definition: Limits and comparative verdict is the source-bounded relationship among New Deal limits and Democratic and authoritarian responses within World Economy and Population since 1900.

Technical definition: The verdict therefore runs: decisive for the survival of democratic capitalism, insufficient for recovery." "Democratic versus authoritarian response?" -> "Both discovered that only large-scale state spending could absorb mass unemployment; the difference is that the American programme was constrained by courts, states and elections and produced partial recovery with liberty intact, while the German programme achieved full employment through rearmament, the abolition of trade unions and the purging of Jews and opponents from employment - an outcome that cannot be scored as policy success."

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Precise definition: Limits and comparative verdict is the source-bounded relationship among New Deal limits and Democratic and authoritarian responses within World Economy and Population since 1900.

MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Limits
- comparative verdict
- Precise definition
- Evidence chain
- Qualified use

How to use them: Frame the answer through CORE SYNTHESIS; define Limits, connect comparative verdict with Precise definition to explain the mechanism, and use Evidence chain for the decisive comparison or qualification.

VISUAL FIRST

LIMITS AND COMPARATIVE VERDICT

01. New Deal limits

|
v

02. Democratic and authoritarian responses

BOUNDARY -> Economic recovery and democratic survival are different tests.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CONCEPT DEFINITIONS

- **Precise definition:** Limits and comparative verdict is the source-bounded relationship among New Deal limits and Democratic and authoritarian responses within World Economy and Population since 1900.
- **Classification:** Historical facts below are source-backed; causal weight and evaluative verdicts are analytical synthesis.

CORE EXPLANATION

The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

NAMED EVIDENCE AND MECHANISM

- The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.
- Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

EXAMINER CAUTION

- Economic recovery and democratic survival are different tests.

EXAM LINK

- **Prelims:** Retain the exact actor, date, document and category in Limits and comparative verdict.
- **Mains:** Conclude without binary judgement.

MINI RECAP

- **Evidence chain:** New Deal limits -> Democratic and authoritarian responses
- **Qualified use:** Conclude without binary judgement.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: History (World History) · **Tier:** Basic (foundation) · **GS Paper:** GS-I **Grounded in:** Norman Lowe, *Mastering Modern World History* (5th ed.), Chapters 27-28, and Chapter 22 §§22.6-22.7 for the Great Depression and the New Deal + official UPSC GS-I syllabus line. **FACT:** = from Lowe / official syllabus · **ANALYSIS:** = synthesis / analytical linkage · **CURRENT:** = current affairs. *Companion:* advanced/20_World-Economy-and-Population-since-1900.md.

Mini-timeline

Date /​ phase	Event
FACT: 1900s-​1945	Shift from old European economic dominance through wars and depression
FACT: Oct 1929	Wall Street Crash; the boom turns into the Great Depression /​ world economic crisis
FACT: 1929-​33	Credit withdrawal, banking failure, trade contraction and tariff retaliation spread the slump worldwide
FACT: 1933-​40	Roosevelt's New Deal: relief, recovery and reform in the USA
FACT: 1945 onwards	US-​led capitalist order expands; communist bloc remains separate
FACT: 1970s-​1980s	Oil shocks, North-​South debate and debt pressures intensify
FACT: 1990s	Globalization deepens after Cold War shifts
FACT: 2008	World financial crisis exposes fragility of integrated capitalism
FACT: 20th century	Population grows rapidly as death rates fall
FACT: Late 20th century	HIV/​AIDS becomes a major global population-​health crisis

1. Snapshot and syllabus anchor

- **FACT:** Official UPSC GS-I syllabus includes world-history themes and political philosophies such as capitalism and socialism and their effect on society.
- **FACT:** Lowe's economy chapter is ideal for this because it tracks the changing balance between **capitalist**, **communist** and **developing-world** economies.
- **ANALYSIS:** The population chapter matters because economic change cannot be separated from mortality decline, urbanization, fertility change and health shocks.

2. The changing world economy in four exam-ready phases

Phase	Main pattern	What to remember
FACT: Early 20th century to 1945	Wars and depression shattered the older liberal world economy	Europe weakened; the USA emerged far stronger
FACT: 1945-1970s	Capitalist West and communist bloc developed separately	Cold War economics was also ideological competition
FACT: 1970s-1990s	Oil shocks, debt, uneven development and North-South conflict	"Third World" unity weakened as some states industrialized faster than others
FACT: 1990s-2008	Globalization accelerated after the Cold War	Trade, finance and production chains deepened integration but also vulnerability
FACT: 2008 aftermath	Crisis spread across an interconnected world economy	Globalization linked prosperity and contagion alike

3. North-South divide and uneven development

- FACT: Lowe stresses that the developing world did not move together: some states industrialized far more successfully than others.
- FACT: The gap between rich and poor countries remained central even when globalization expanded.
- FACT: Debt, commodity dependence and weak industrial bases constrained many poorer states.
- ANALYSIS: A strong UPSC answer should therefore avoid treating the "Third World" as a single economic category.

4. Why did world population grow so fast?

better medicine + cleaner water + lower death rates
 +
 slower fall in fertility in many regions
 ->
 rapid population growth
 ->
 pressure on food, jobs, housing and services

Driver / Issue	Lowe's emphasis
FACT: Falling death rates	Medical advances and public-health gains reduced mortality
FACT: Continued high fertility in many regions	Population surged before fertility declined sufficiently
FACT: Pressure on resources	Food supply, housing, employment and urban services came under strain
FACT: Population control attempts	States tried varied measures; some were voluntary, some coercive
FACT: China example	One-child control policy became a major state intervention case

5. Population, health and HIV/AIDS

- FACT: Lowe includes HIV/AIDS as a major late-twentieth-century population issue, especially destructive in parts of Africa.
- FACT: The epidemic was not only a medical problem; it affected labour, family structure, life expectancy and development.
- FACT: International organizations and campaigns mattered, but the burden remained highly unequal.

6. Must-Know Facts (Prelims) and UPSC traps

- FACT: The **USA** emerged as the leading capitalist power in the twentieth century.
- FACT: The **communist bloc** and the **capitalist West** followed different economic systems during the Cold War.

- FACT: The **North-South divide** remained a key world-economic issue even after decolonization.
- FACT: The **2008 crisis** showed that global integration spreads shocks quickly.
- FACT: Rapid population growth was closely linked to **falling death rates**, not simply to "more births".
- FACT: **HIV/AIDS** must be remembered as a world population and development issue, not only a medical one.

MEMORY: Trap: **Population explosion is about the gap between falling mortality and slower fertility decline.**

- WRONG: Globalization benefited all regions equally -> Lowe repeatedly shows uneven gains.
- WRONG: The Third World moved as one bloc -> internal divergence was large.
- WRONG: Population growth proves economic failure everywhere -> some fast-growing populations coexisted with development, while some low-growth societies faced ageing problems.
- WRONG: HIV/AIDS belongs outside population history -> Lowe treats it inside the population chapter.

7. Exam linkage, Mains angles and probable questions

- ANALYSIS: **Recurring UPSC theme:** link economic systems with their social outcomes.
- Trace the major changes in the world economy since 1900.
- Explain the causes and consequences of rapid population growth in the twentieth century.
- Discuss why globalization did not remove the North-South divide.

8. Answer architecture (10/15/20-mark support)

Core-sufficiency note: this file must independently support world-economy, globalisation, demographic-transition and inequality demands. advanced/20 adds the globalisation debate and population-control ethics only.

8.1 Directive and demand map

If the question says	It is really testing	Do NOT write
<i>Trace the major changes in the world economy since 1900</i>	Phase logic and what drives each transition	A century- $\&\#8203$ long chronicle
<i>Why did globalisation not remove the North-$\&\#8203$South divide?</i>	Mechanisms of uneven gain	"Globalisation was unfair"
<i>Explain rapid population growth</i>	The gap between mortality decline and fertility decline	"More births"
<i>Consequences of population growth</i>	Resource, employment, urban and health pressure, plus divergence	Malthusian alarm
<i>Capitalism versus socialism in practice</i>	Comparative economic performance and social outcome	Ideological assertion
<i>HIV/$\&\#8203$AIDS as a development issue</i>	Labour, family, life expectancy and unequal burden	A medical account
<i>What caused the Great Depression /$\&\#8203$how was it contained?</i>	See the dedicated $\\$9$ demand family	Treating the Crash as the cause
<i>Effects of the oil shocks</i>	The supply- $\&\#8203$ shock -> surplus -> borrowing -> debt- $\&\#8203$ vulnerability chain ($\$8.5A$)	"Oil got expensive"
<i>Economic growth and the environment</i>	Growth model, resource exhaustion, pollution, global warming ($\$8.5B$)	An Environment- $\&\#8203$ paper answer with no history in it

8.2 Qualified thesis templates

- ANALYSIS: **World economy:** "The twentieth-century world economy moved from European-centred liberal integration, through war-and-depression fragmentation, to a US-led rules-based order, and finally to a globalised system that spread growth and contagion by the same channels."

- ANALYSIS: **Divergence**: "Globalisation did not fail to reduce the North-South gap; it reduced it for some countries and widened it for others, which is why 'the South' ceased to be an analytically useful single category."
- ANALYSIS: **Population**: "The population explosion was a mortality event before it was a fertility event: death rates fell faster than birth rates adjusted, and the gap between the two curves is the explosion."
- ANALYSIS: **Inequality**: "Integration raised aggregate output and did not by itself determine distribution - which is why the same decades produced both mass poverty reduction and rising inequality within countries."

8.3 Mark-scaled structures

Marks	Structure
10	Thesis -> two phases or two drivers with named evidence -> one qualification -> verdict
15	Thesis -> the phase sequence -> the divergence mechanism -> one social consequence -> verdict
20	All of the above -> plus the institutional architecture, the population dimension and genuine regional variation -> verdict

8.4 Evidence bank A - the phase sequence, with the transition driver named

Phase	FACT: Pattern	ANALYSIS: What ended the phase
Early 20th c. to 1945	FACT: Wars and depression shattered the older liberal world economy; Europe weakened and the USA emerged far stronger	Total war and the 1930s collapse of trade and credit
1945-1970s	FACT: Capitalist West and communist bloc developed separately; Cold War economics was also ideological competition	The oil shocks and the strains of the 1970s
1970s-1990s	FACT: Oil shocks, debt, uneven development and North-South conflict; FACT: "Third World" unity weakened as some states industrialised faster than others	The end of the Cold War and the opening of the former communist economies
1990s-2008	FACT: Globalisation accelerated after the Cold War; trade, finance and production chains deepened integration but also vulnerability	The financial crisis
2008 aftermath	FACT: Crisis spread across an interconnected world economy; globalisation linked prosperity and contagion alike	-

The post-1945 institutional architecture (ANALYSIS: standard, cross-verifiable chronology, consistent with the folder's convention in 00_Master-Chronology.md):

- ANALYSIS: The **Bretton Woods** conference of **1944** created the framework of the post-war economic order - a fixed-exchange-rate system with the **IMF** to manage balance-of-payments adjustment and the **World Bank (IBRD)** to finance reconstruction and development. FACT: Both are UN specialized agencies (basic/16 §9.5).
- ANALYSIS: Trade liberalisation proceeded through **GATT** and, from 1995, the **WTO**. FACT: The WTO belongs to the wider multilateral trade system but is **not** a UN specialized agency.
- ANALYSIS: The fixed-rate element of the Bretton Woods system broke down in the early **1970s**, after which floating exchange rates and freer capital movement became the norm - the institutional precondition for the financial globalisation of the 1990s.
- ANALYSIS: **Bound this section deliberately**: name the institutions and their functions; do not supply quota shares, voting weights, lending figures or specific programme names, none of which is sourced in this folder.

ANALYSIS: Why this matters analytically: the post-1945 order was the first attempt to design the world economy rather than let it emerge - and the North-South debate of the 1970s was, at its core, an argument about who had designed it.

8.5 Evidence bank B - why globalisation produced divergence, not convergence

Mechanism	FACT:/​ANALYSIS: Evidence	Significance
Unequal starting structures	FACT: Debt, commodity dependence and weak industrial bases constrained many poorer states	Integration rewards those already able to supply manufactures
Internal divergence in the South	FACT: Lowe stresses the developing world did not move together: some states industrialised far more successfully than others	Destroys "the Third World" as a single economic category
Persisting gap	FACT: The gap between rich and poor countries remained central even when globalisation expanded	Growth and convergence are different things
Oil shocks and debt	FACT: 1970s-80s oil shocks, debt pressures and North-​South conflict	An external price shock became a decade-​long development reversal (see §8.5A below and basic/​19 §7.6)
Contagion	FACT: The 2008 crisis showed that global integration spreads shocks quickly	Integration transmits losses as efficiently as gains
ANALYSIS: Distribution within countries	ANALYSIS: Openness altered the distribution of gains between sectors, regions and skill groups inside countries as well as between them	Explains why globalisation became politically contested in rich countries too

8.5A Evidence bank B2 - the oil shock, stated as a mechanism (bounded to what Lowe supports)

ANALYSIS: Why a separate bank. "Oil shock" is the folder's most-used shorthand and its least-explained mechanism. The chain below is written **only** to the extent this folder's source supports each link; the two weakest links are marked and bounded rather than asserted.

supply action by producers (1973 OPEC price rise, partly to conserve supplies)

- > sharp rise in the price of imported energy
- > importing economies face higher costs AND weaker demand at once
- > producer states accumulate large surpluses
- > those surpluses are recycled as lending to developing countries
- > borrowing looks cheap while commodity prices hold
- > commodity prices fall / interest costs rise
- => sovereign-debt crisis

Link	FACT:/​ANALYSIS: Status in this folder	Evidence	Caution
Supply action -> price shock	FACT: Sourced	FACT: In 1973 the members of OPEC , "partly in an attempt to conserve oil supplies, began to charge more for their oil"; FACT: Lowe records the same 1973-4 rise in his Japan chapter	FACT: Note the stated motive is conservation as well as revenue; do not reduce it to a single political motive
Price shock -> producer surpluses	FACT: Sourced	FACT: "The Middle East oil-​producing states made huge profits, as did Nigeria and Libya"; FACT: Libya used oil profits for agricultural and industrial development and to set up a welfare state	FACT: Lowe adds the qualification himself: this "did not necessarily mean that their governments spent the money wisely"

Link	FACT:/​ANALYSIS: Status in this folder	Evidence	Caution
Price shock -> importer strain	FACT: Sourced	FACT: Rising oil prices worsened America's balance-​of-​payments deficit; FACT: Ghana's military governments struggled with problems "exacerbated by sharp rises in the price of oil and other imports"; FACT: Zimbabwe "suffered from the high world price of oil"; FACT: Tanzania's rising oil prices "used up almost half her earnings from exports"	The importer side of the shock is best evidenced from the African cases in basic/​18 §7.6A - use them rather than an abstract claim
"Stagflation"	ANALYSIS: Not sourced - do not use as a folder fact	The folder's sources do not use or define the term, and supply no inflation or unemployment series	ANALYSIS: If you use the word at all, define it in your own words as an ANALYSIS: analytical label for simultaneous stagnation and price rises, and attach no figures
Recycled surpluses -> borrowing	ANALYSIS: Partly sourced, bounded	FACT: Lowe records the outcome, not the plumbing: debt and finance "had reached crisis proportions"; many debtor nations "could not even pay the interest, let alone repay the debts", and unpaid interest was added to the existing debt, forcing them "to borrow from new sources merely to keep up the payments"	ANALYSIS: Do not assert that oil surpluses were the specific source of the loans; the folder does not establish that link. Write the sequence as: high borrowing preceded the crisis, and the debt then became self-​compounding
Debt -> sovereign vulnerability	FACT: Sourced	FACT: The compounding-​interest trap above; FACT: Ghana's debt service was using about 40 per cent of export profits under Busia; FACT: debtor states had to reschedule debts; FACT: Mexico's president spoke openly of the possibility of repudiation	ANALYSIS: Do not give aggregate regional debt totals; only the case figures above are sourced
Commodity price reversal	FACT: Sourced	FACT: Oil-​dependent economies suffered whenever prices fell - Nigeria, Venezuela and Mexico are all recorded as hit by later oil-​price falls; FACT: Ghana's cocoa and Zambia's copper show the same logic for non-​oil commodities	The symmetrical point examiners reward: a commodity boom and a commodity bust are the same structural vulnerability

ANALYSIS: **The one-line examinable formulation:** "The oil shock did not simply make energy expensive; it redistributed world purchasing power towards producers, financed a decade of borrowing by importers, and left commodity-dependent states exposed to the moment the terms of trade turned - which is why an energy event of 1973 is read as the origin of a debt crisis of the 1980s."

8.5B Evidence bank B3 - the world economy and the environment (historical dimension)

FACT: Lowe treats the environment as an economic-history subject in the same chapter as the world economy (§§27.4-27.5), which is what makes this a legitimate GS-I world-history dimension rather than an imported Environment-paper section.

Theme	FACT: Lowe's evidence	ANALYSIS: Analytical significance	Caution
Growth without accounting for side effects	FACT: "As the twentieth century wore on, and the North became more and more obsessed with industrialization, new methods and techniques were invented to help increase production and efficiency. The main motive was the creation of wealth and profit, and very little attention was paid to the side effects"	Locates environmental damage as a <i>structural feature</i> of the post-war growth model, not an accident	ANALYSIS: The claim is about the industrialised North's model; do not extend it to a blanket verdict on all industrialisation
When awareness arrived	FACT: "During the 1970s people became increasingly aware that all was not well with their environment"	Dates the emergence of environment as a <i>political</i> subject to the same decade as the oil shocks and the North-South debate - the three belong in one paragraph	ANALYSIS: Awareness is not the same as policy; do not claim policy outcomes here
Resource exhaustion	FACT: Fossil fuels "cannot be replaced, and are rapidly being used up"; FACT: oil production increased enormously across the century; FACT: this was one of the reasons why OPEC tried to conserve oil during the 1970s ; FACT: Britain responded by drilling in the North Sea , and another response was to develop nuclear power	Directly connects the environmental dimension back to §8.5A - scarcity is part of the oil story, not a separate topic	ANALYSIS: Do not give reserve, production or price figures beyond "increased enormously"
Pollution and the ecosystem	FACT: "Massive pollution of the environment"; scientists realised continuation "was likely to severely damage the ecosystem"; FACT: Lowe defines the ecosystem as the interconnected system of living creatures, trees and plants within the environment, and ecology as its study	Supplies usable terminology without needing the Environment folder	ANALYSIS: Keep qualitative
Global warming	FACT: Lowe defines it as "the uncontrollable warming of the Earth's atmosphere caused by the large quantities of gases emitted from industry", and devotes a section to it (§27.5)	Lets a 20-mark world-economy answer close on the longest-run consequence of industrial growth - the strongest available "effect on society" ending	ANALYSIS: Bounded: do not supply temperature, emission, concentration or target figures, and do not describe any treaty, conference or current climate-policy status from this file. Those belong to Environment and Ecology, dated and sourced separately

ANALYSIS: **Answer use:** the environmental section converts the world-economy topic from "growth and inequality" into "growth, inequality **and** the physical limits of the growth model" - which is the difference between a competent 15-mark answer and a 20-mark one.

8.6 Evidence bank C - population: the demographic transition, stated properly

Stage 1: high births, high deaths -> slow growth
Stage 2: DEATHS FALL (medicine, clean water, public health), births stay high -> RAPID GROWTH <-- the "explosion"
Stage 3: births begin to fall (education, urbanisation, women's employment, child survival, family planning) -> growth slows
Stage 4: low births, low deaths -> stabilisation, then ageing

- ANALYSIS: This is the **demographic transition** framework; the "population explosion" is simply the widening of the gap in Stage 2. Use the model - it converts description into analysis.
- ANALYSIS: **Model ownership (verified cross-link)**. The demographic transition model itself - its stages, assumptions, criticisms and population-resource debates - is owned and taught by

Geography/basic/26_World-Population-and-Demographic-Transition.md §2, with population composition, pyramids and population-resource ideas in its §§3-4. **World History's role is different and is retained here:** this file owns the *historical* population question - why the mortality decline of the twentieth century happened when it did, what its social and economic effects were, how states responded, and how the epidemic shock of HIV/AIDS interacted with development. Use Geography for the model, this file for the history; do not duplicate either.

- FACT: **Falling death rates:** medical advances and public-health gains reduced mortality.
- FACT: **Continued high fertility in many regions:** population surged before fertility declined sufficiently.
- FACT: **Pressure on resources:** food supply, housing, employment and urban services came under strain.
- FACT: **Policy response varied:** states tried varied measures, some voluntary and some coercive; FACT: China's one-child control policy became a major state intervention case.
- ANALYSIS: **Regional variation is mandatory:** different regions entered Stage 2 and Stage 3 decades apart, which is why some societies faced youth-employment pressure while others faced ageing in the same years.

8.7 Evidence bank D - health as development: HIV/AIDS

- FACT: Lowe includes HIV/AIDS as a major late-twentieth-century population issue, especially destructive in parts of Africa.
- FACT: It was not only a medical problem: it affected **labour, family structure, life expectancy** and **development**.
- FACT: International organisations and campaigns mattered, but the burden remained highly unequal.
- ANALYSIS: **Answer use:** HIV/AIDS is the clearest single case that health and economic development are the same subject - a working-age mortality shock removes exactly the cohort that produces output and raises children.
- ANALYSIS: Do not supply prevalence, mortality or funding figures; none is sourced here.

8.8 Verdict scaffolds

- **"Changes since 1900?"** -> "The century moved the world economy's centre out of Europe, replaced an emergent liberal order with a designed one after 1944, and ended by integrating production and finance so completely that the same channels carried growth and crisis."
- **"Why did the divide persist?"** -> "Because integration rewards existing capability: countries that could supply manufactures converged, and countries that could supply only commodities and debt service did not."
- **"Population growth?"** -> "Not a failure of restraint but a success of public health arriving decades before the social changes that reduce fertility - which is why the policy answer was education, child survival and women's employment rather than coercion."
- **"Capitalism versus socialism?"** -> "The comparison cannot be settled on output alone; the capitalist West produced higher consumption and the communist bloc produced faster early industrialisation at far higher social cost - and both left inequality unresolved in different forms."

8.9 Factual-risk controls

- WRONG: Do not say globalisation benefited all regions equally. FACT: Lowe repeatedly shows uneven gains.
- WRONG: Do not treat "the Third World" as one bloc. FACT: Internal divergence was large.
- WRONG: Do not say population growth proves economic failure. FACT: Some fast-growing populations coexisted with development, while some low-growth societies faced ageing problems.
- WRONG: Do not give GDP, trade-share, population, fertility, life-expectancy, debt or HIV figures; **none** is sourced in this folder.
- WRONG: Do not date Bretton Woods other than FACT:/ANALYSIS: **1944**, or the WTO's start other than **1995**; and do not describe current IMF/World Bank governance, quotas or programmes in a history answer.
- WRONG: Do not attribute the demographic transition model to a named demographer here. FACT: The model's own owner is Geography/basic/26_World-Population-and-Demographic-Transition.md §2; cite that file rather than inventing an attribution.

- WRONG: Do not write a stagflation, gold-standard or monetary-regime mechanism in this file (see §8.5A and §9.9).
- WRONG: Do not supply climate figures, targets, treaties or conference outcomes from §8.5B. FACT: Lowe supplies the definition and the industrial cause only; live climate policy belongs to Environment -and- Ecology, dated separately.
- WRONG: Do not supply India's population-policy or 1991-reform detail. FACT: Cross-link to Economy.

9. Answer architecture - the Great Depression and the New Deal (Core demand family)

Why this is a separate Core demand family. The interwar slump is the single most frequently examined world-economic episode in GS-I, and it is demanded in three distinct forms: **causes, international transmission, and the policy instruments used to contain it.** It is also the hinge between basic/11 (why collective security collapsed) and basic/12 (why parliamentary democracy lost legitimacy), both of which use the Depression as a **causal variable** and now cross-link here for the mechanism. This section is grounded in FACT: Lowe §§22.6-22.7, with the German, Japanese and Italian transmission evidence taken from FACT: Lowe's Chapters 13-15 and 3-4. **PYQ provenance note.** A GS-I question on the **policy instruments deployed to contain the Great Economic Depression** is a recorded recurring demand from the pre-2018 period. The local ledgers (. . ./_PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md and . . .-2024-2025.md) begin at 2018, so **no verbatim 2013 text is held in this repository.** The demand is therefore rendered neutrally here and answered in full; no question number or verbatim wording is invented.

9.1 Directive and demand map

If the question says	It is really testing	Do NOT write
<i>What caused the Great Depression?</i>	Structural imbalance in the American economy; the Crash as symptom , not cause	"The Wall Street Crash caused the Depression"
<i>How did it become a world crisis?</i>	The transmission channels - credit, banking, trade, tariffs	"It spread because economies are connected"
<i>What policy instruments were deployed to contain it?</i>	An instrument-&#8203;by-&#8203;instrument account with what each was meant to do and whether it worked	A New Deal narrative, or a list of Acts
<i>Did the New Deal save capitalism?</i>	Confidence, legitimacy and regime-​survival versus economic recovery - two different tests	Yes/​no without separating the two
<i>Effects on society</i>	Savings, employment, farming, migration, and the political consequences abroad	An American-​only account
<i>Compare democratic and authoritarian responses</i>	The New Deal against rearmament-​led recovery, with the political price named	Treating full employment as proof of a better policy

9.2 Qualified thesis templates

- ANALYSIS: **Causes:** "The Crash of October 1929 was the moment the American economy's structural imbalance became visible, not the cause of it: overproduction, an income distribution too narrow to absorb that output, contracting export demand and a speculative boom had already exhausted the conditions for growth."
- ANALYSIS: **Transmission:** "The Depression became a world crisis through American credit rather than American trade alone - because the 1920s recovery of Europe had been financed by short-term American lending, calling those loans in transmitted the slump faster than any fall in demand could have."
- ANALYSIS: **Policy instruments:** "The instruments deployed against the Depression were of four kinds - stabilising the financial system, supporting incomes, coordinating production, and building institutional protection against recurrence - and it is their *combination*, not any single measure, that arrested the collapse without ending it."

- ANALYSIS: **New Deal verdict:** "The New Deal succeeded politically and failed economically on its own terms: it restored confidence in banks, government and the constitutional order, but did not restore full employment, which came only with war production."

9.3 Mark-scaled structures

Marks	Structure
10	Thesis -> two causes -> one transmission channel -> two named instruments with their purpose -> verdict
15	Thesis -> the four causes -> the transmission chain -> instruments grouped by function (financial /​ income /​ production /​ institutional) -> limits -> verdict
20	All of the above -> plus the social effects, the international political consequences, the authoritarian counter-​case and the "did it save capitalism?" evaluation -> graded verdict

9.4 Evidence bank E - causes of the 1929 crisis (the Crash was a symptom)

Cause	FACT: Lowe's evidence	ANALYSIS: Mechanism to state	Caution
Domestic overproduction	FACT: Industrialists, helped by increased mechanisation, produced more than the home market could absorb; unsold stocks built up, manufacturers produced less, men were laid off, and with no unemployment benefit those families bought less	A self-​reinforcing contraction: falling output <i>causes</i> the falling demand that justifies the next cut	ANALYSIS: Lowe applies the same logic to farmers; do not present it as an industry-​only problem
Unequal distribution of income	FACT: Average industrial wages rose about 8 per cent between 1923 and 1929 while industrial profits rose about 72 per cent ; the 8 per cent was only about 1.4 per cent in real terms	Purchasing power could not sustain the boom; credit postponed the limit rather than removing it	ANALYSIS: FACT: Lowe explicitly says a slump was <i>still not inevitable</i> if exports had held up - quote the conditionality, it is a mark-​winner
Falling demand for exports	FACT: American tariff barriers - FACT: the Fordney-&#8203;McCumber tariff (1922) - kept foreign goods out and so denied Europeans the dollar earnings needed to buy American goods or service war debts; FACT: many states retaliated with tariffs of their own	Protection is self-​defeating when you are the world's creditor: you cannot be paid in goods you refuse to admit	ANALYSIS: This is the causal bridge from the <i>domestic</i> to the <i>world</i> crisis
Speculation	FACT: Momentum from about 1926 ; average share value rose from \$9 (1924) to \$26 (1929) ; FACT: RCA stock rose from \$85 (early 1928) to \$505 (September 1929) though it paid no dividends; FACT: shares bought on credit, brokers selling on credit, banks speculating with deposits	ANALYSIS: Lowe names the mechanism: self-&#8203;fulfilling expectation - investors' own selling produced the collapse they feared	ANALYSIS: Do not moralise about greed; name the expectation mechanism instead
The Crash itself	FACT: 24 October 1929, "Black Thursday" - nearly 13 million shares dumped at very low prices; by mid-​1930 prices averaged about 25 per cent of the previous year's peak; rock bottom in 1932	FACT: Lowe is explicit: "The Wall Street Crash did not cause the depression; it was just a symptom of a problem whose real causes lay much deeper"	ANALYSIS: The single most examined discrimination in this topic - make it your opening move

9.5 Evidence bank F - how a national slump became a world crisis (transmission)

US structural imbalance

- > Wall Street Crash (Oct 1929) destroys confidence
- > US banks fail; US lending abroad stops and short-term loans are CALLED IN
- > European (esp. German) banking crisis, runs on banks, currency panic
- > world demand collapses; exports fall everywhere
- > tariffs raised in self-defence -> trade contracts further
- > mass unemployment
- => political radicalisation: extreme right takes power in Germany and Japan

Channel	FACT: Named evidence	Significance	Limit /​ caution
Credit withdrawal	FACT: After the Crash the USA "stopped any further loans and began to call in many of the short-​term loans already made to Germany" - the Dawes-​era recovery had been built on exactly this lending	The fastest channel: it required no fall in trade at all	ANALYSIS: FACT: Lowe notes Germany's dependence was already recognised as a danger <i>before</i> 1929
Banking failure and financial contagion	FACT: USA: over 25,000 banks in 1929, fewer than 15,000 by 1933; FACT: Germany: "a crisis of confidence in the currency and... a run on the banks, many of which had to close"	Banking collapse destroys savings and credit simultaneously, so the shock hits consumption and investment together	ANALYSIS: Do not give German bank counts; none is sourced
Trade contraction	FACT: "The industrial boom had led to worldwide over-​production, and German exports, along with those of other countries, were severely reduced"; FACT: Japan: "Exports shrank disastrously"; FACT: Italy: "Exports fell further"	Export-​dependent economies imported the depression whether or not their own banks failed	ANALYSIS: Effects differed by what a country exported
Tariff retaliation /&#8203; protectionism	FACT: Fordney-​McCumber (1922) and retaliation against American goods; FACT: "other countries introduced or raised tariffs against Japanese goods to safeguard their own industries"	Each country's rational defence made the aggregate contraction worse - the classic collective-​action failure	ANALYSIS: Lowe treats tariffs as both a <i>cause</i> and an <i>amplifier</i> ; say which you mean
Commodity and specialised-&#8203;export collapse	FACT: Japanese raw silk , sold mostly to the USA, fell by 1932 to less than one-&#8203;fifth of its 1923 price, and about half of Japan's farmers depended on silk as well as rice	Shows the transmission reaching the <i>village</i> , not just the stock exchange	ANALYSIS: A single-​commodity case; do not generalise the ratio
Currency policy as a constraint	FACT: Mussolini "refused to devalue the lira until 1936"; instead "wages and salaries were cut", and because wages fell faster than prices, workers suffered a real loss	Refusing external devaluation forces internal devaluation - wage cuts - which deepens the demand collapse	ANALYSIS: Bounded : this folder's sources do not discuss the gold standard. State the lira case as evidence of the <i>choice</i> ; do not write a gold-​standard mechanism (see §9.9)
Political transmission	FACT: The crisis "caused extreme right-​wing governments to come to power in Japan and Germany"; FACT: over six million unemployed in Germany by 1932; FACT: Italy's unemployment rose to 1.1 million ; FACT: without the crisis "Hitler would probably never have been able to come to power"	The Depression's largest world-​historical output was not economic but constitutional	ANALYSIS: Necessary condition, not sufficient - basic/​12 §10.4 owns the fuller argument

9.6 Evidence bank G - the policy instruments (the direct answer to the "instruments" demand)

ANALYSIS: Structure the answer by function, not chronologically. Examiners reward a candidate who can say *what each instrument was designed to do*. **FACT:** Lowe supplies Roosevelt's own three aims - **relief** (direct help to the destitute), **recovery** (reduce unemployment, stimulate demand, restart the economy) and **reform** (prevent recurrence) - which is itself a ready-made classification. **FACT:** The measures ran from **1933 to 1940**; **FACT:** Roosevelt drew on a group of economists and academics he called the **Brain Trust**, and his willingness to intervene and to spend was "a complete change from those of the laissez-faire Republicans".

Count discipline. The table below has **eleven rows**, which group into the **four functional families** used by the thesis in §9.2 and the verdict in §9.8: (i) financial stabilisation - rows 1-2; (ii) income and agricultural support - rows 3, 6, 7, 8; (iii) coordinated production - rows 4, 5; (iv) institutional capacity and doctrine - rows 9, 10. Row 11 is the **authoritarian counter-case**, not a New Deal instrument. Cite four families and illustrate with two or three rows each; do not list eleven items in an answer.

Instrument family	FACT: Named measures	Purpose (what it was meant to fix)	ANALYSIS: Result /​ limitation
Banking and financial stabilisation	FACT: Government took over the banks temporarily and guaranteed depositors against loss in a future crisis; FACT: Securities Exchange Commission (1934) reformed the stock exchange, requiring a down payment of at least 50 per cent instead of 10 per cent on shares bought on credit	Stop the runs, restore confidence, and remove the credit-​fuelled speculation that produced the bubble	FACT: "This restored confidence, and money began to flow into the banks again" - the clearest single success
Emergency lending to institutions	ANALYSIS: The Reconstruction Finance Corporation , created under Hoover, lent money to banks and railways and supported public works	Shows the pre-​New-​Deal turn to intervention had already begun	ANALYSIS: The institution is standard historical context but is not named in the locally extracted Lowe text. Lowe's sourced judgement is that Hoover's efforts failed to make a significant impression; use this row to date the <i>change of doctrine</i> , not to credit Hoover with recovery
Agricultural support	FACT: Farmers' Relief Act (1933) and the Agricultural Adjustment Administration (AAA) - government compensation to farmers who reduced output , thereby raising prices	Farm distress was overproduction in another form; raising prices restores rural purchasing power	ANALYSIS: FACT: It "certainly helped farmers, but it threw many farm labourers out of work", and did little for the drought-​and-​erosion "dustbowl" areas of Kansas, Oklahoma and Texas
Industrial coordination and regulation	FACT: The NRA among the codes and agencies of the first phase; ANALYSIS: expand it as the National Recovery Administration , since the local Lowe extract supplies the acronym rather than the full name	Coordinate prices, output and labour conditions instead of letting deflation set them	ANALYSIS: FACT: The Supreme Court ruled several measures, including the NRA, unconstitutional , holding up their operation - an instrument defeated by the constitutional order it was meant to save
Public works and relief	FACT: Public works schemes ; FACT: the Tennessee Valley Authority (1933) , which built dams for cheap electricity and organised conservation, irrigation and afforestation across a region ruined by soil erosion; FACT: slum clearance and house/​flat building; FACT: loans for householders facing mortgage default	Create employment directly, and leave durable assets behind	FACT: "The public works schemes and the Tennessee Valley Authority provided services of lasting value"

Instrument family	FACT: Named measures	Purpose (what it was meant to fix)	ANALYSIS: Result / limitation
Labour standards and collective bargaining	FACT: Fair Labour Standards Act (1938) - maximum working week, minimum wage in certain low-paid trades, most child labour made illegal; FACT: collective bargaining between workers and management "became accepted"; FACT: General Motors and US Steel were forced to recognise unions	Raise the floor under wages so that recovery is not bought by cutting incomes	ANALYSIS: Precisely what made business the New Deal's most determined opponent
Social insurance	FACT: Social Security Act (1935) - welfare benefits described by Lowe as "an important step towards a welfare state"	Reform, not recovery: protect households against the <i>next</i> downturn	ANALYSIS: FACT: "Rugged individualism" remained a vital ingredient; this was a step, not a completed welfare state
Taxation and trade policy	FACT: Increased taxes on the incomes of the wealthy ; FACT: trade agreements that "at last reduced American tariffs in return for tariff reductions by the other party", in the hope of increasing American exports	Redistribute demand downward; reverse the export-strangling protectionism of the 1920s	ANALYSIS: A partial reversal of the Fordney-McCumber logic in §9.4, not its abolition
Fiscal expansion (state as spender)	FACT: Roosevelt "was prepared to intervene in economic and social affairs as much as possible and to spend government cash to pull the country out of depression"	The decisive doctrinal break: government spending as an instrument of recovery	ANALYSIS: Careful historical wording required. FACT: Lowe's verdict is that Roosevelt "was too cautious in the amounts of money he was prepared to spend to stimulate industry", and that when he reduced government spending in 1938 the result was another recession , pushing unemployment up to 10.5 million . Write this as evidence that the instrument worked in proportion to its size - do not attribute it to a named economist or theory (see §9.9)
Institutional centralisation	FACT: National direction of resources; FACT: increased federal-government authority over the state governments; FACT: Roosevelt "had put in place the structures to enable Washington to manage the economy and social policy"	The most durable output: a permanent capacity to manage demand	ANALYSIS: FACT: Some state governments resented federal interference in what they saw as internal state affairs
ANALYSIS: The authoritarian counter-case: rearmament-led recovery	FACT: Nazi Germany combined "vast schemes of public works - slum clearance, land drainage and autobahn building" with rearmament from 1934 and conscription from 1935 ; FACT: unemployment fell from over 6 million at Hitler's accession to just over 2 million by the end of 1935 and to negligible levels by 1939; FACT: by 1938-9 the military budget was 52 per cent of government spending	Proves that mass unemployment was solvable by public spending - and that the scale required was politically available only to a regime that did not have to win a re-election	ANALYSIS: Mandatory qualification: the same programme rested on FACT: the abolition of trade unions and FACT: purges of Jews and anti-Nazis from the civil service, law, education, journalism, broadcasting, theatre and music, "leaving large numbers of vacancies". Full employment achieved by exclusion and rearmament is not a policy model; ANALYSIS: never present it as the "successful" alternative without this sentence

9.7 Evidence bank H - social effects, and the New Deal's achievements and limits

Social effects (FACT: all from Lowe §22.6(c) unless marked):

Group	FACT: Effect	ANALYSIS: Why it matters analytically
Investors and their creditors	FACT: Millions ruined; those who had lent to buy shares lost too, having no hope of repayment	The loss cascaded beyond the speculators to those who financed them
Ordinary depositors	FACT: Banks collapsed, so "millions of ordinary people who had had nothing to do with the speculation were ruined as their life savings disappeared"	The decisive fact for legitimacy: the innocent were punished with the guilty
Industrial workers	FACT: Industrial production in 1933 was only half the 1929 total; unemployment stood at around 14 million - about a quarter of the total labour force	Converts an abstraction into the scale of the social emergency
Farmers	FACT: One in eight farmers lost all their property; ANALYSIS: mid-1930s drought and soil erosion turned parts of Kansas, Oklahoma and Texas into a "dustbowl"	Ecological and economic disaster compounding each other - a usable environment-history link
Households	FACT: Falling living standards, bread queues, charity soup kitchens, evictions	The imagery examiners expect a candidate to earn, not assert
Abroad	FACT: Germany over 6 million unemployed by 1932; FACT: Japan's north suffered "desperate poverty", for which factory workers and peasants blamed the government and big business; FACT: Italian workers lost over 10 per cent in real terms	The Depression's social effects were the raw material of interwar political extremism

Achievements (FACT: Lowe §22.7(d)):

- FACT: Relief for the destitute and jobless, and "the creation of millions of extra jobs" - the chief early success.
- FACT: Confidence restored in the financial system **and in government**; FACT: "some historians think it may even have prevented a violent revolution".
- FACT: Public works and the TVA left services of lasting value.
- FACT: The 1935 Social Security Act was "an important step towards a welfare state": FACT: "the American government had accepted that it had a duty to help those in need".
- FACT: National direction of resources, accepted collective bargaining and greater federal authority became permanent.
- ANALYSIS: **The strongest single formulation:** the New Deal changed what an American government was *for*, and that change outlived the Depression.

Limits and opposition (FACT: Lowe §22.7(c)-(d)):

Source of limit /opposition	FACT: Evidence	ANALYSIS: Analytical use
Business and the right	FACT: Businessmen objected to trade-union growth, regulation of hours and wages, and higher taxation, arguing that intervention would stifle private enterprise and encourage socialism	The New Deal was attacked as socialism precisely because it was saving capitalism - the paradox to build a 20-mark answer on
The states	FACT: Some state governments resented federal interference in internal state affairs	Federalism as a real constraint on crisis management
The Supreme Court	FACT: It held that the president was taking too much power and ruled several measures, including the NRA, unconstitutional; FACT: the Court became more amenable in the second term after Roosevelt appointed five more co-operative judges	Constitutional limits bind emergency economics - and shift over time
The left	FACT: Socialists felt it "was not drastic enough and still left too much power in the hands of big business"; FACT: Huey Long , governor of Louisiana and US senator, launched Share Our Wealth in 1934, to be financed by taxing the rich; FACT: he was assassinated in September 1935	Prevents the lazy framing of the New Deal as "the radical option"
Economic outcome	FACT: Unemployment fell to under 8 million by 1937 but remained "a serious problem"; FACT: the 1938 spending cut caused another recession and 10.5 million unemployed; FACT: "The New Deal therefore did not rescue the USA from the depression; it was only the war effort which brought unemployment below the million mark in 1943"	The decisive concession any honest answer must make
What war did	FACT: US GNP almost doubled between 1939 and 1945; FACT: in June 1940 8 million were still out of work but by the end of 1942 there was almost full employment; FACT: the war effort had created about 7 million extra jobs by 1945	Establishes the scale of spending that the Depression actually required

9.8 Verdict scaffolds

- **"What caused the Depression?"** -> "A structural failure of demand inside the world's largest economy, made visible by a speculative collapse: the Crash destroyed confidence, but overproduction, an income distribution too narrow to absorb it, and a tariff regime that strangled the export escape route had already made a slump likely."
- **"How did it become global?"** -> "Through American credit before American trade: the 1920s European recovery had been financed by short-term American lending, so when the loans were called in, banking crises and unemployment arrived in Europe faster than the fall in exports alone could have delivered them."
- **"What instruments were deployed?"** -> "Four families of instrument - financial stabilisation, income and agricultural support, coordinated public works and industrial regulation, and permanent social insurance - backed by an unprecedented expansion of federal spending and authority; together they arrested the collapse, and separately none of them ended it."
- **"Did the New Deal save capitalism?"** -> **Graded verdict:** "It saved the *political legitimacy* of capitalism without restoring its *output*. Confidence in banks, government and the constitutional order returned, and - unlike Germany, Japan and Italy - the American constitutional system survived the Depression intact. But unemployment remained in the millions until war production began, and by Lowe's own account the New Deal did not rescue the USA from the depression. The verdict therefore runs: **decisive for the survival of democratic capitalism, insufficient for recovery.**"

- **"Democratic versus authoritarian response?"** -> "Both discovered that only large-scale state spending could absorb mass unemployment; the difference is that the American programme was constrained by courts, states and elections and produced partial recovery with liberty intact, while the German programme achieved full employment through rearmament, the abolition of trade unions and the purging of Jews and opponents from employment - an outcome that cannot be scored as policy success."

9.9 Factual-risk controls for this demand family

- WRONG: Do not write that the **Wall Street Crash caused** the Depression. FACT: Lowe: it "was just a symptom of a problem whose real causes lay much deeper".
- FACT: The **only** figures permitted here are those sourced above: 8 per cent wage rise / 72 per cent profit rise / 1.4 per cent real, 1923-29; share average \$9 (1924) -> \$26 (1929); RCA \$85 -> \$505; 13 million shares on 24 October 1929; ~25 per cent of peak by mid-1930; over 25,000 banks (1929) -> fewer than 15,000 (1933); industrial production in 1933 half the 1929 total; ~14 million US unemployed and about a quarter of the labour force; one in eight farmers; under 8 million (1937); 10.5 million (1938); below 1 million in 1943; US GNP nearly doubled 1939-45 and ~7 million extra war jobs; SEC 50 per cent versus 10 per cent down payment; Germany over 6 million unemployed (1932) falling to just over 2 million (end-1935); German military budget 52 per cent of government spending in 1938-9; Italian unemployment 1.1 million; Japanese raw silk below one-fifth of its 1923 price by 1932.
- WRONG: Do not add GDP, national-income, money-supply, world-trade-volume, price-index or relief-expenditure figures. **None** is sourced in this folder.
- WRONG: **Do not construct a gold-standard argument.** This folder's sources do not discuss the gold standard, gold reserves, convertibility or the sequence of departures from it. The sourced currency-policy evidence is Mussolini's refusal to devalue the lira until 1936 and the resulting wage cuts - use that, and say explicitly that the wider monetary regime is outside the evidence you hold.
- WRONG: Do not attribute the New Deal's fiscal expansion to Keynes or to "Keynesian economics". FACT: Lowe names only Roosevelt's **Brain Trust** of economists and academics. Describe the practice, not a doctrine, unless a separately verified source is cited.
- WRONG: Do not date New Deal measures other than as sourced: FACT: measures introduced **1933-1940**; Farmers' Relief Act and TVA **1933**; SEC **1934**; Social Security Act **1935**; Fair Labour Standards Act **1938**.
- WRONG: Do not present the "First/Second/Third New Deal" periodisation as established. ANALYSIS: Lowe records that **Michael Heale** regards it as an oversimplification and that the administration "was never governed by a single political ideology"; cite the caution, do not adopt the scheme.
- WRONG: Do not claim the New Deal ended the Depression, and do not claim it achieved nothing. Both fail the directive.
- WRONG: Do not present Nazi rearmament recovery as a policy success without the trade-union abolition and racial/political purge qualification in §9.6.
- WRONG: Do not invent a 2013 question number or verbatim wording. FACT: The demand is rendered neutrally; no pre-2018 paper is held locally.

10. Study link

Study link: advanced/20_World-Economy-and-Population-since-1900.md for the globalisation debate and population-control ethics (optional). **Study link:** World-History -> basic/11_International-Relations-1919-39.md §8.5 and basic/12_Rise-of-Fascism-Italy-Germany-Japan.md §10.4 use the Depression as a causal variable; §9 of this file is their mechanism owner. **Study link:** World-History -> basic/19_Latin-America-20th-Century.md §7.6 for the debt crisis as a regional case of these forces. **Study link:** World-History -> basic/18_Decolonization-of-Africa-and-Asia.md §7.6A for the African commodity-and-debt cases that evidence §8.5A. **Study link:** World-History -> basic/01_Enlightenment-and-Age-of-Revolutions-Overview.md §9 owns the political-philosophies clause (capitalism, socialism, communism, social democracy, the welfare state); this file supplies their *economic* record and outcomes. **Study link:** World-History -> basic/16_United-Nations-and-Global-Governance.md §9.5 for the legal status of the IMF, World Bank, UNCTAD and WTO. **Study link:** World-History -> basic/21_Cold-War-End-and-New-World-Order.md for the post-1991 political framing of globalisation. **Study link:** Demographic transition model owner -> Geography/basic/26_World-Population-and-Demographic-Transition.md §2 (stages, criticisms, population-resource ideas). This file keeps the historical population-effects role. **Study link:** India's 1991 reform overlap -> Economy/basic/16_Industrial-Policy-1991-Reforms-PSUs-and-Disinvestment.md and its advanced companion.

CLOSING RECALL FLOW - CORE SYNTHESIS - LIMITS AND COMPARATIVE VERDICT

START / CONCEPT: CORE SYNTHESIS - Limits and comparative verdict

|

v

EXACT TERMS: CORE SYNTHESIS · Limits · comparative verdict · Precise definition · Evidence chain · Qualified use

|

v

MECHANISM / ARGUMENT: ANALYSIS: Answer use: the environmental section converts the world-economy topic from "growth and inequality" into "growth, inequality and the physical limits of the growth model" - which is the difference between a competent 15-mark answer and a 20-mark one.

|

v

CONSEQUENCE / CONTRAST: ANALYSIS: Causes: "The Crash of October 1929 was the moment the American economy's structural imbalance became visible, not the cause of it: overproduction, an income distribution too narrow to absorb that output, contracting export demand and a speculative boom had already exhausted the conditions for growth." ANALYSIS: Transmission: "The Depression became a world crisis through American credit rather than American trade alone - because the 1920s recovery of Europe had been financed by short-term American lending, calling those loans in transmitted the slump faster than any fall in demand could have." ANALYSIS: Policy instruments: "The instruments deployed against the Depression were of four kinds - stabilising the financial system, supporting incomes, coordinating production, and building institutional protection against recurrence - and it is their combination, not any single measure, that arrested the collapse without ending it." ANALYSIS: New Deal verdict: "The New Deal succeeded politically and failed economically on its own terms: it restored confidence in banks, government and the constitutional order, but did not restore full employment, which came only with war production."

|

v

UPSC TRAP / ANSWER-USE: "What caused the Depression?" -> "A structural failure of demand inside the world's largest economy, made visible by a speculative collapse: the Crash destroyed confidence, but overproduction, an income distribution too narrow to absorb it, and a tariff regime that strangled the export escape route had already made a slump likely." "How did it become global?" -> "Through American credit before American trade: the 1920s European recovery had been financed by short-term American lending, so when the loans were called in, banking crises and unemployment arrived in Europe faster than the fall in exports alone could have delivered them." "What instruments were deployed?" -> "Four families of instrument - financial stabilisation, income and agricultural support, coordinated public works and industrial regulation, and permanent social insurance - backed by an unprecedented expansion of federal spending and authority; together they arrested the collapse, and separately none of them ended it." "Did the New Deal save capitalism?" -> Graded verdict: "It saved the political legitimacy of capitalism without restoring its output."

|

v

ANSWER-GRABBING FORMULATION: Precise definition: Limits and comparative verdict is the source-bounded relationship among New Deal limits and Democratic and authoritarian responses within World Economy and Population since 1900.

WORLD HISTORY DEEP-REVIEW CORE CONTROL

- **Must remember:** War and Depression, Bretton Woods (1944), Cold War blocs, oil shocks and debt, post-1990 globalisation and the 2008 crisis form the economic chronology; integration transmitted gains and contagion unevenly.
- **Close distinction:** Rapid population growth followed falling mortality before fertility transition, while younger and ageing societies face different pressures; coercive and welfare-based population policies are not one category.
- **Evidence / interpretation limit:** The New Deal stabilised finance, relief, labour and social protection without ending mass unemployment; comparison with Nazi rearmament must retain dictatorship, racial exclusion and militarisation.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies World economy before 1945?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. C. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. D. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

Answer: A. Explanation: Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under World economy before 1945?

A. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. B. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

Answer: B. Explanation: Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of World economy before 1945?

A. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. B. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. C. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: C. Explanation: Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about World economy before 1945?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

Answer: D. Explanation: Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Bretton Woods, 1944?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

Answer: A. Explanation: The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Bretton Woods, 1944?

A. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. B. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: B. Explanation: The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Bretton Woods, 1944?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. C. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: C. Explanation: The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Bretton Woods, 1944?

A. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. B. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. C. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. D. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development.

Answer: D. Explanation: The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. The remaining

options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Postwar economic blocs?

A. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. B. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

Answer: A. Explanation: The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Postwar economic blocs?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: B. Explanation: The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Postwar economic blocs?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. C. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. D. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming.

Answer: C. Explanation: The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Postwar economic blocs?

A. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. B. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. C. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. D. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

Answer: D. Explanation: The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Oil shocks and debt?

A. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. B. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. C. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. D. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly.

Answer: A. Explanation: Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Oil shocks and debt?

A. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. B. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. C. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: B. Explanation: Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Oil shocks and debt?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. C. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. D. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.

Answer: C. Explanation: Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Oil shocks and debt?

A. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. D. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

Answer: D. Explanation: Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Globalisation after 1990?

A. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. B. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. C. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: A. Explanation: Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Globalisation after 1990?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. C. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. D. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming.

Answer: B. Explanation: Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Globalisation after 1990?

A. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. D. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.

Answer: C. Explanation: Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Globalisation after 1990?

A. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly.

Answer: D. Explanation: Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Financial crisis of 2008?

A. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. B. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. C. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. D. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming.

Answer: A. Explanation: The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Financial crisis of 2008?

A. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. B. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. C. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. D. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.

Answer: B. Explanation: The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Financial crisis of 2008?

A. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. B. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. C. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. D. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility.

Answer: C. Explanation: The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Financial crisis of 2008?

A. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Answer: D. Explanation: The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies North-South divergence?

A. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. B. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. C. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. D. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility.

Answer: A. Explanation: Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under North-South divergence?

A. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. B. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. C. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. D. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.

Answer: B. Explanation: Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of North-South divergence?

A. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: C. Explanation: Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about North-South divergence?

A. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category.

Answer: D. Explanation: Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Environmental cost of growth?

A. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. B. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. C. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. D. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing.

Answer: A. Explanation: Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Environmental cost of growth?

A. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. B. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: B. Explanation: Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Environmental cost of growth?

A. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. B. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. C. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. D. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies.

Answer: C. Explanation: Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Environmental cost of growth?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. D. Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming.

Answer: D. Explanation: Twentieth-century production pursued wealth with little attention to resource exhaustion, pollution, ecosystem damage and global warming. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Population explosion mechanism?

A. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: A. Explanation: Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Population explosion mechanism?

A. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. B. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: B. Explanation: Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Population explosion mechanism?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: C. Explanation: Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Population explosion mechanism?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. D. Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.

Answer: D. Explanation: Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Demographic transition?

A. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. D. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing.

Answer: A. Explanation: High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Demographic transition?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. C. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: B. Explanation: High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Demographic transition?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. D. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Answer: C. Explanation: High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Demographic transition?

A. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. B. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. C. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. D. High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility.

Answer: D. Explanation: High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Population pressures and ageing?

A. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. B. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. C. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. D. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation.

Answer: A. Explanation: Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Population pressures and ageing?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. C. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. D. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Answer: B. Explanation: Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Population pressures and ageing?

A. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. B. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. C. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. D. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation.

Answer: C. Explanation: Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Population pressures and ageing?

A. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. D. Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing.

Answer: D. Explanation: Food, employment, housing and services faced pressure in younger societies while low-fertility societies increasingly faced ageing. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Population policy?

A. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. B. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. C. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. D. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Answer: A. Explanation: States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Population policy?

A. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. B. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. C. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. D. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation.

Answer: B. Explanation: States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Population policy?

A. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. D. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Answer: C. Explanation: States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Population policy?

A. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. D. States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case.

Answer: D. Explanation: States used voluntary welfare and development routes as well as coercive controls, with China's one-child policy as a major direct-intervention case. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies HIV/AIDS as development shock?

A. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. B. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. C. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. D. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence.

Answer: A. Explanation: HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under HIV/AIDS as development shock?

A. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. B. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. C. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. D. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers.

Answer: B. Explanation: HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of HIV/AIDS as development shock?

A. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. B. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. C. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. D. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers.

Answer: C. Explanation: HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about HIV/AIDS as development shock?

A. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. B. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. C. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. D. HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies.

Answer: D. Explanation: HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Crash as symptom, October 1929?

A. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. D. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Answer: A. Explanation: Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Crash as symptom, October 1929?

A. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. B. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. C. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. D. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers.

Answer: B. Explanation: Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Crash as symptom, October 1929?

A. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. B. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. C. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. D. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers.

Answer: C. Explanation: Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Crash as symptom, October 1929?

A. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. B. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. C. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. D. Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation.

Answer: D. Explanation: Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Depression transmission?

A. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. D. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility.

Answer: A. Explanation: American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Depression transmission?

A. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. B. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. C. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. D. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility.

Answer: B. Explanation: American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Depression transmission?

A. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. B. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. C. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: C. Explanation: American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Depression transmission?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. C. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. D. American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Answer: D. Explanation: American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies New Deal aims?

A. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: A. Explanation: Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under New Deal aims?

A. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. B. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. C. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: B. Explanation: Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of New Deal aims?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. C. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: C. Explanation: Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about New Deal aims?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. C. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. D. Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence.

Answer: D. Explanation: Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Financial and agricultural instruments?

A. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. B. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. C. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: A. Explanation: Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Financial and agricultural instruments?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. C. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: B. Explanation: Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Financial and agricultural instruments?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. C. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. D. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

Answer: C. Explanation: Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Financial and agricultural instruments?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. C. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. D. Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers.

Answer: D. Explanation: Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Public works and social reform?

A. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. B. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. C. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. D. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

Answer: A. Explanation: The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Public works and social reform?

A. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. B. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. C. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. D. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

Answer: B. Explanation: The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Public works and social reform?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. C. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. D. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

Answer: C. Explanation: The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Public works and social reform?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. C. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. D. The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility.

Answer: D. Explanation: The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies New Deal limits?

A. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. B. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. C. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. D. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

Answer: A. Explanation: The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under New Deal limits?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. C. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. D. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

Answer: B. Explanation: The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of New Deal limits?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. C. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. D. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

Answer: C. Explanation: The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about New Deal limits?

A. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. B. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. C. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. D. The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.

Answer: D. Explanation: The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Democratic and authoritarian responses?

A. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. B. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. C. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. D. Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.

Answer: A. Explanation: Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Democratic and authoritarian responses?

A. The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. B. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. C. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. D. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.

Answer: B. Explanation: Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Democratic and authoritarian responses?

A. The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. B. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. C. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. D. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.

Answer: C. Explanation: Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Democratic and authoritarian responses?

A. Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. B. Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. C. The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. D. Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

Answer: D. Explanation: Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

The owner records one pre-2018 GS-I demand in neutral rendering only: the policy instruments deployed to contain the Great Economic Depression. No verbatim 2013 wording or question number is held locally.

PYQ DEMAND CARD 1 - 2013 GS-I · legacy demand · marks and verbatim wording not locally held

Demand: Discuss the policy instruments deployed to contain the Great Economic Depression.

Status: Owner-verified neutral rendering; not claimed as verbatim.

Model solution: The response combined four instrument families. Financial stabilisation temporarily controlled banks, guaranteed depositors and used the Securities Exchange Commission to constrain credit-fuelled speculation. Income and agricultural support compensated lower output and provided relief, though farm labourers could lose work. Public works, especially the Tennessee Valley Authority, created employment and durable infrastructure. Social Security, labour standards and collective bargaining created protection against recurrence, while federal spending and authority expanded. These measures restored confidence and helped preserve democratic capitalism, but did not end unemployment; war production completed the recovery. Containment was therefore institutionally decisive but economically incomplete.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 1 - 2013 GS-I · legacy demand · marks and verbatim wording not locally held”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise five named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “PYQ DEMAND CARD 1 - 2013 GS-I · legacy demand · marks and verbatim wording not locally held”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: The response combined four instrument families. Financial stabilisation temporarily controlled banks, guaranteed depositors and used the Securities Exchange Commission to constrain credit-fuelled speculation. Income and agricultural support compensated lower output and provided relief, though farm labourers could lose work. Public works, especially the Tennessee Valley Authority, created employment and durable infrastructure. Social Security, labour standards and collective bargaining created protection against recurrence, while federal spending and authority expanded. These measures restored confidence and helped preserve democratic capitalism, but did not end unemployment; war production completed the recovery. Containment was therefore institutionally decisive but economically incomplete.

Qualification: Treat the stated causal weight as bounded by the question's period, geography and evidence status; do not convert it into inevitability or a universal civilisational claim.

ORIGINAL MAINS 1 - 10 MARKS

Question: Why did globalisation not eliminate the North-South divide? Answer in about 150 words.

Model thesis: Integration rewards prior industrial and institutional capacity, so some states converged while commodity-dependent and indebted states remained vulnerable.

Claim -> named evidence -> analysis -> qualification:

- Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly.
- The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.
- Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category.

Qualified conclusion: Integration rewards prior industrial and institutional capacity, so some states converged while commodity-dependent and indebted states remained vulnerable.

Demand decoding: The directive **answer** requires a direct position on “Why did globalisation not eliminate the North-South divide? Answer in about 150 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise three named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “Why did globalisation not eliminate the North-South divide? Answer in about 150 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Integration rewards prior industrial and institutional capacity, so some states converged while commodity-dependent and indebted states remained vulnerable.

Analytical body:

1. **Claim and named evidence:** Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
2. **Claim and named evidence:** The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
3. **Claim and named evidence:** Debt, commodity dependence and weak industrial capacity held back many states, while others industrialised enough to make the Third World an invalid single category. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: Integration rewards prior industrial and institutional capacity, so some states converged while commodity-dependent and indebted states remained vulnerable.

ORIGINAL MAINS 2 - 10 MARKS

Question: Why was twentieth-century population growth primarily a mortality event? Answer in about 150 words.

Model thesis: Medicine and public health reduced deaths before fertility fell, temporarily widening the gap between births and deaths.

Claim -> named evidence -> analysis -> qualification:

- Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward.
- High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility.

Qualified conclusion: Medicine and public health reduced deaths before fertility fell, temporarily widening the gap between births and deaths.

Demand decoding: The directive **answer** requires a direct position on “Why was twentieth-century population growth primarily a mortality event? Answer in about 150...”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise three named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “Why was twentieth-century population growth primarily a mortality event? Answer in about 150...”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Medicine and public health reduced deaths before fertility fell, temporarily widening the gap between births and deaths.

Analytical body:

1. **Claim and named evidence:** Population grew rapidly when death rates fell through medicine, clean water and public health before fertility adjusted downward. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
2. **Claim and named evidence:** High births and falling deaths create rapid growth; later education, urbanisation, child survival, women's employment and family planning reduce fertility. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: Medicine and public health reduced deaths before fertility fell, temporarily widening the gap between births and deaths.

ORIGINAL MAINS 3 - 15 MARKS

Question: Trace the main phases of the world economy since 1900. Answer in about 250 words.

Model thesis: War and depression weakened Europe; Bretton Woods designed a US-led order; oil and debt fractured the South; globalisation widened integration and contagion.

Claim -> named evidence -> analysis -> qualification:

- Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States.
- The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development.
- The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure.
- Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s.
- Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly.
- The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity.

Qualified conclusion: War and depression weakened Europe; Bretton Woods designed a US-led order; oil and debt fractured the South; globalisation widened integration and contagion.

Demand decoding: The directive **trace** requires a direct position on “Trace the main phases of the world economy since 1900. Answer in about 250 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise five named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “Trace the main phases of the world economy since 1900. Answer in about 250 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: War and depression weakened Europe; Bretton Woods designed a US-led order; oil and debt fractured the South; globalisation widened integration and contagion.

Analytical body:

1. **Claim and named evidence:** Wars and Depression shattered the older Europe-centred liberal economy and strengthened the relative position of the United States. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
2. **Claim and named evidence:** The 1944 Bretton Woods framework created the International Monetary Fund (IMF) for balance-of-payments adjustment and the World Bank for reconstruction and development. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
3. **Claim and named evidence:** The capitalist West and communist bloc developed through different systems while decolonised economies entered an unequal North-South structure. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional

and interpretive boundary explicit.

4. **Claim and named evidence:** Oil-price shocks, commodity vulnerability and borrowing intensified North-South conflict and debt pressure during the 1970s and 1980s. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
5. **Claim and named evidence:** Trade, finance and production chains deepened integration after the Cold War while distributing gains unevenly. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
6. **Claim and named evidence:** The 2008 crisis demonstrated that integration transmits financial contagion as efficiently as prosperity. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: War and depression weakened Europe; Bretton Woods designed a US-led order; oil and debt fractured the South; globalisation widened integration and contagion.

ORIGINAL MAINS 4 - 15 MARKS

Question: Explain HIV/AIDS as an economic and demographic shock. Answer in about 250 words.

Model thesis: Working-age mortality reduced labour, disrupted households raising children, lowered life expectancy and deepened unequal development burdens.

Claim -> named evidence -> analysis -> qualification:

- HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies.

Qualified conclusion: Working-age mortality reduced labour, disrupted households raising children, lowered life expectancy and deepened unequal development burdens.

Demand decoding: The directive **explain** requires a direct position on “Explain HIV/AIDS as an economic and demographic shock. Answer in about 250 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise five named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “Explain HIV/AIDS as an economic and demographic shock. Answer in about 250 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Working-age mortality reduced labour, disrupted households raising children, lowered life expectancy and deepened unequal development burdens.

Analytical body:

1. **Claim and named evidence:** HIV/AIDS affected labour, family structure, life expectancy and development, especially in poorer African societies. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: Working-age mortality reduced labour, disrupted households raising children, lowered life expectancy and deepened unequal development burdens.

ORIGINAL MAINS 5 - 20 MARKS

Question: What caused and transmitted the Great Depression? Answer in about 300 words.

Model thesis: Structural demand imbalance, export barriers and speculation preceded the Crash; credit withdrawal, bank failure, trade contraction and tariffs globalised it.

Claim -> named evidence -> analysis -> qualification:

- Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation.
- American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis.

Qualified conclusion: Structural demand imbalance, export barriers and speculation preceded the Crash; credit withdrawal, bank failure, trade contraction and tariffs globalised it.

Demand decoding: The directive **answer** requires a direct position on “What caused and transmitted the Great Depression? Answer in about 300 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise six to eight named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “What caused and transmitted the Great Depression? Answer in about 300 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: Structural demand imbalance, export barriers and speculation preceded the Crash; credit withdrawal, bank failure, trade contraction and tariffs globalised it.

Analytical body:

1. **Claim and named evidence:** Lowe treats the Wall Street Crash as a symptom rather than the cause of deeper overproduction, unequal income, export contraction and speculation. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
2. **Claim and named evidence:** American credit withdrawal, bank failures, falling trade, tariffs and commodity collapse transformed a US slump into a global crisis. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: Structural demand imbalance, export barriers and speculation preceded the Crash; credit withdrawal, bank failure, trade contraction and tariffs globalised it.

ORIGINAL MAINS 6 - 20 MARKS

Question: Did the New Deal save capitalism? Answer in about 300 words.

Model thesis: It stabilised finance, created relief, enlarged social protection and preserved democratic legitimacy, but full economic recovery arrived only with war production.

Claim -> named evidence -> analysis -> qualification:

- Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence.
- Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers.
- The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility.
- The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession.
- Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion.

Qualified conclusion: It stabilised finance, created relief, enlarged social protection and preserved democratic legitimacy, but full economic recovery arrived only with war production.

Demand decoding: The directive **answer** requires a direct position on "Did the New Deal save capitalism? Answer in about 300 words.", every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise six to eight named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For "Did the New Deal save capitalism? Answer in about 300 words.", replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.

Detailed examiner-grade model answer:

Introduction and thesis: It stabilised finance, created relief, enlarged social protection and preserved democratic legitimacy, but full economic recovery arrived only with war production.

Analytical body:

1. **Claim and named evidence:** Roosevelt's relief, recovery and reform framework sought immediate support, restored demand and protection against recurrence. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
2. **Claim and named evidence:** Bank guarantees and the SEC restored confidence, while the 1933 agricultural programme compensated lower output but displaced farm labourers. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.
3. **Claim and named evidence:** The TVA and public works created jobs and assets, while Social Security, labour standards and collective bargaining expanded federal social responsibility. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its

chronological, regional and interpretive boundary explicit.

4. **Claim and named evidence:** The programme restored confidence and democratic legitimacy but did not end mass unemployment; reduced spending in 1938 produced another recession. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

5. **Claim and named evidence:** Both the New Deal and Nazi rearmament used state spending, but Germany's employment recovery rested on militarisation, union destruction and racial-political exclusion. **Analysis:** Use this evidence to establish the mechanism asked in the directive, not merely to narrate the event. **Qualification:** Keep its chronological, regional and interpretive boundary explicit.

Counter-position / limit: No single actor, battle, treaty, ideology or economic pressure should be made sufficient where the evidence shows interaction among structures, triggers, agency and uneven regional outcomes.

Qualified conclusion: It stabilised finance, created relief, enlarged social protection and preserved democratic legitimacy, but full economic recovery arrived only with war production.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: History (World History) · **Tier:** Advanced (analysis + answer writing) · **GS Paper:** GS-I with GS-III overlap
Grounded in: Norman Lowe, *Mastering Modern World History* (5th ed.), Chapters 27-28 + IMF *World Economic Outlook Update* (July 2026) + UN *World Population Prospects 2024*. **FACT:** = from Lowe · **ANALYSIS:** = synthesis / analytical judgement · **CURRENT:** = post-2013 current affairs. *Companion:* basic/20_World-Economy-and-Population-since-1900.md.

1. The big debate: globalization or unequal globalization?

View	How to use it
FACT: Integration view	Trade, technology and capital flows increased output and accelerated growth in some regions
FACT: Critical view	Gains were uneven; crises, debt and dependency also spread more quickly
ANALYSIS: Best UPSC answer	Globalization should be judged as uneven integration , not as pure success or pure failure

2. Why the developing world diverged internally

Factor	Why some advanced faster
FACT: Industrial capacity	States with stronger manufacturing bases gained more from world trade
FACT: State policy	Education, infrastructure and strategy mattered alongside markets
FACT: Commodity dependence	Reliance on raw- $\&\#203$ material exports made many economies fragile
FACT: Debt burden	High external debt narrowed policy choice
ANALYSIS: Conclusion	"Third World" is too broad unless internally differentiated

3. Capitalism, socialism and the social question

- FACT: Lowe's economy chapter is valuable because it does not discuss capitalism only as production; it links systems to employment, inequality and development.
- ANALYSIS: In UPSC terms, this topic is where world history touches the syllabus phrase "**political philosophies like communism, capitalism, socialism etc.- their forms and effect on the society.**"
- ANALYSIS: Use the Cold War contrast carefully: capitalist dynamism, socialist planning and mixed-economy experiments all produced gains and distortions.

4. Population control: welfare route versus coercive route

Approach	Meaning
FACT: Welfare /​ development route	Education, health, urbanization and women's empowerment gradually reduce fertility
FACT: Direct state control	Strong interventions try to lower births more quickly
ANALYSIS: China case	Effective in reducing births but raises major ethical and social questions

MEMORY: Trap: do not discuss population policy only numerically; UPSC expects the **human consequences** too.

5. HIV/AIDS as a development issue

- FACT: Lowe treats HIV/AIDS as a major shock to world population patterns, especially in poorer societies.
- FACT: It reduced life expectancy and hit labour, households and public services.
- ANALYSIS: This is a good Mains bridge between demography and development: health crises can reverse gains even without war.

6. India linkage without duplication

- ANALYSIS: India's **1991 liberalization** belongs to the Economy folder, but in world-history terms it can be used as an example of how post-Cold-War globalization pulled states more deeply into world markets.
- ANALYSIS: Do not retell LPG reforms here; cross-link them.

Study link: Economy/basic/16_Industrial-Policy-1991-Reforms-PSUs-and-Disinvestment.md and Economy/advanced/16_Industrial-Policy-1991-Reforms-PSUs-and-Disinvestment.md.

7. CURRENT: Current link

- CURRENT: **IMF World Economic Outlook Update, July 2026:** global growth was projected at **3.0% for 2026** and **3.4% for 2027**. Keep the forecast vintage attached; later updates are not interchangeable with this baseline.
- CURRENT: **UN World Population Prospects, 2024:** world population was estimated at about **8.2 billion**, with a projected peak of about **10.3 billion** in the mid-2080s.
- CURRENT: Exam use: both updates reinforce Lowe's long-run themes - world integration remains fragile, while population growth is slowing but still historically large.

8. Must-Know Facts (Prelims) and UPSC Traps

- FACT: Lowe frames the "North-South divide" as the core twentieth-century fault line between industrialized and developing economies, distinct from the earlier East-West Cold War divide.
- FACT: The 2008 global financial crisis is Lowe's standard example of a shock exposing the fragility of an integrated world economy, not a reversal of integration itself.
- FACT: China's population-control policy is Lowe's key illustration of the "direct state control" route to fertility reduction, contrasted with the gradual welfare/development route.
- FACT: The HIV/AIDS epidemic is treated by Lowe as a demographic and developmental shock, especially in poorer societies, distinct from war or famine-driven population change.
- FACT: IMF/UN-style current data (IMF July 2026 forecast: **3.0% for 2026, 3.4% for 2027**; UN 2024 world population: ~8.2 billion) should always be cited with their own source and date, not merged into Lowe's pre-2013 narrative.
- WRONG: 2008 disproved globalization completely -> it exposed vulnerability, not the end of integration.
- WRONG: Population growth is only a poor-country problem -> ageing and low fertility are the reverse side in other regions.
- WRONG: Population policy is separate from social policy -> education, health and gender change are central.
- WRONG: Development can be inferred from GDP alone -> Lowe repeatedly links economy to distribution and social outcomes.

9. Mains answer framework and probable questions

Question type	Suggested flow
Change in world economy	phases -> system contrast -> North-South divide -> crisis / globalization
Population explosion	mortality decline -> fertility lag -> consequences -> policy response
Assess globalization	gains -> unevenness -> crises -> balanced conclusion

- "Globalization widened both opportunity and vulnerability." Discuss.
- Why did the North-South divide persist despite the growth of the world economy?
- Examine the causes and implications of the population explosion in the twentieth century.

Study link: revise the phase-wise narrative in `basic/20_World-Economy-and-Population-since-1900.md`, then use this file for evaluative language and answer structure.

CONSOLIDATED REGISTER NOTES

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: World economy phase map

1900-45 -> war and Depression weaken Europe

1944-70s -> designed US-led order and bloc systems

1970s-90s -> oil, debt and North-South divergence

1990s-2008 -> globalisation then contagious crisis

MUST REMEMBER: War and Depression, Bretton Woods (1944), Cold War blocs, oil shocks and debt, post-1990 globalisation and the 2008 crisis form the economic chronology; integration transmitted gains and contagion unevenly.

MUST REMEMBER: War and Depression, Bretton Woods (1944), Cold War blocs, oil shocks and debt, post-1990 globalisation and the 2008 crisis form the economic chronology; integration transmitted gains and contagion unevenly.

MUST REMEMBER: War and Depression, Bretton Woods (1944), Cold War blocs, oil shocks and debt, post-1990 globalisation and the 2008 crisis form the economic chronology; integration transmitted gains and contagion unevenly.

ASCII MASTER FLOW - PANEL 2/12: Bretton Woods architecture

1944 -> designed postwar framework

IMF -> balance-of-payments adjustment

WORLD BANK -> reconstruction and development

GATT/WTO -> trade system outside UN agency status

ASCII MASTER FLOW - PANEL 3/12: Divergence mechanism

UNEQUAL START -> different industrial capability
COMMODITY DEPENDENCE -> price vulnerability
DEBT -> policy autonomy contracts
RESULT -> integration produces varied convergence

ASCII MASTER FLOW - PANEL 4/12: Oil and debt chain

1973 PRICE RISE -> importer costs grow
PRODUCER PROFITS -> world balances shift
BORROWING -> vulnerable economies accumulate debt
PRICE/INTEREST REVERSAL -> crisis becomes self-compounding

ASCII MASTER FLOW - PANEL 5/12: Population transition

STAGE 1 -> high births and deaths
STAGE 2 -> deaths fall; rapid growth
STAGE 3 -> fertility begins to fall
STAGE 4 -> low growth and ageing

ASCII MASTER FLOW - PANEL 6/12: Why deaths fall first

MEDICINE -> survival improves
CLEAN WATER -> disease exposure falls
PUBLIC HEALTH -> mortality drops
FERTILITY LAG -> population grows rapidly

ASCII MASTER FLOW - PANEL 7/12: Population policy comparison

WELFARE ROUTE -> health, education and child survival
SOCIAL ROUTE -> urbanisation and women's employment
DIRECT CONTROL -> coercive fertility restrictions
VERDICT -> demographic results carry rights questions

ASCII MASTER FLOW - PANEL 8/12: Health as development

HIV/AIDS -> working-age mortality
LABOUR -> productive capacity falls
FAMILY -> care and dependency burdens rise
DEVELOPMENT -> unequal burden deepens

ASCII MASTER FLOW - PANEL 9/12: Depression cause map

OVERPRODUCTION -> unsold stocks and layoffs
UNEQUAL INCOME -> demand cannot absorb output
TARIFFS -> export route contracts
SPECULATION -> Crash reveals deeper imbalance

ASCII MASTER FLOW - PANEL 10/12: Global transmission chain

US LOANS CALLED IN -> European finance contracts
BANK FAILURES -> savings and credit disappear
TRADE FALLS -> export economies weaken
TARIFFS -> national defence worsens global slump
CLOSE DISTINCTION: Rapid population growth followed falling mortality before fertility transition, while younger and ageing societies face different pressures; coercive and welfare-based population policies are not one category.
CLOSE DISTINCTION: Rapid population growth followed falling mortality before fertility transition, while younger and ageing societies face different pressures; coercive and welfare-based population policies are not one category.
CLOSE DISTINCTION: Rapid population growth followed falling mortality before fertility transition, while younger and ageing societies face different pressures; coercive and welfare-based population policies are not one category.

ASCII MASTER FLOW - PANEL 11/12: New Deal instrument families

FINANCE -> guarantees and SEC
INCOME -> agriculture, relief and labour standards
PRODUCTION -> TVA and public works
REFORM -> Social Security and federal capacity
EVIDENCE LIMIT: The New Deal stabilised finance, relief, labour and social protection without ending mass unemployment; comparison with Nazi rearmament must retain dictatorship, racial exclusion and militarisation.
EVIDENCE LIMIT: The New Deal stabilised finance, relief, labour and social protection without ending mass unemployment; comparison with Nazi rearmament must retain dictatorship, racial exclusion and militarisation.
EVIDENCE LIMIT: The New Deal stabilised finance, relief, labour and social protection without ending mass unemployment; comparison with Nazi rearmament must retain dictatorship, racial exclusion and militarisation.

ASCII MASTER FLOW - PANEL 12/12: World economy answer spine

PHASES -> war, design, oil-debt and globalisation
INEQUALITY -> North-South divergence
POPULATION -> mortality-fertility gap
DEPRESSION -> structural causes, instruments and limits
