

01

Source-complete coverage ledger and learning labels

CONTEXT + EXACT CORE

[FACT] marks retained repository doctrine/question data. [INFERENCE] marks the learner-facing organisation and graded verdict.

MECHANISM / ARGUMENT

This ledger maps source units to the final location rather than merely asserting reconciliation.

CONSEQUENCE / CONTRAST

Proof structures, named proponents, school-specific arguments and core critiques are CORE PAPER II.

UPSC TRAP / ANSWER USE

This ledger maps source units to the final location rather than merely asserting reconciliation.

ANSWER LINE: [FACT] marks retained repository doctrine/question data. [INFERENCE] marks the learner-facing organisation and graded verdict.

02

Learning route — [CORE PAPER II]

CONTEXT + EXACT CORE

Evidence key used throughout: □ canonical doctrine directly grounded in the authored knowledge file or a local source text · □□ analytical synthesis / inference for exam use · □ contested or textually variable · □ dated contemporary anchor only, never authority.

MECHANISM / ARGUMENT

The retained source sequence moves from what counts as a proof, through Western and Indian argument families, to comparison and answer construction.

CONSEQUENCE / CONTRAST

Preference therefore depends on the criterion — evidential contact favours a posteriori, modal strength favours a priori, and religious adequacy is achieved by neither alone.

UPSC TRAP / ANSWER USE

Notions of God, evil, experience, faith and language appear only as bounded links or targets of a premise; they are not silently absorbed into this topic.

ANSWER LINE: The retained source sequence moves from what counts as a proof, through Western and Indian argument families, to comparison and answer construction.
