

LAND REFORMS, GREEN REVOLUTION AND CROPPING SYSTEMS

Economy Topic 11 | complete twelve-panel revision master

01. AGRARIAN REFORM CHAIN

- Rights -> records -> workable holdings -> inputs -> markets.
- Land reform changes institutions; Green Revolution changes technology.
- Productivity needs both incentives and complementary services.

Claim -> named evidence -> analysis -> qualification

02. COLONIAL TENURE LEGACY

- Zamindari: intermediary between State and cultivator.
- Ryotwari: direct assessment of recorded cultivator.
- Mahalwari: village estate or co-sharer revenue unit.
- Use labels only for causal relevance and regional variation.

Claim -> named evidence -> analysis -> qualification

03. LAND-REFORM TOOLKIT

- Abolition removes specified intermediaries.
- Tenancy reform covers rent, security, recording and ownership routes.
- Ceilings identify surplus; consolidation reorganises parcels.
- Cooperation pools functions; Bhoodan/Gramdan were voluntary.

Claim -> named evidence -> analysis -> qualification

Claim -> named evidence -> analysis -> qualification

04. CONSTITUTIONAL MAP

- State List Entry 18: land and land tenures.
- Article 31A: specified category shield.
- Article 31B: listed Ninth-Schedule laws.
- Article 31C: Article 39(b)/(c) boundary.
- I.R. Coelho 2007: post-24 April 1973 basic-structure review.

Claim -> named evidence -> analysis -> qualification

05. IMPLEMENTATION TEST

- Law -> declaration -> verification -> adjudication.
- Then possession -> allotment -> mutation -> productive support.
- Evasion, exemptions, litigation and stale records break the chain.
- Operation Barga and Kerala show politics plus administration.

Claim -> named evidence -> analysis -> qualification

06. INCLUSIVE LAND RIGHTS

- Women: legal share -> mutation -> possession -> control.
- Tribal/customary: map private, community and common rights.
- Leasing: owner security plus cultivator security.
- Model Agricultural Land Leasing Act 2016 is advisory to States.

Claim -> named evidence -> analysis -> qualification

07. DIGITAL LAND GOVERNANCE

Claim -> named evidence -> analysis -> qualification

07. DIGITAL LAND GOVERNANCE

- DILRMP 3.0 guidelines: 2026-2031.
- ULPIN: 14-digit georeferenced parcel identifier.
- SVAMITVA: rural abadi mapping and State property cards.
- 29 Jan 2026: 3.06 crore cards in 1.86 lakh villages.
- Digitised record != conclusive title.

Claim -> named evidence -> analysis -> qualification

08. GREEN REVOLUTION PACKAGE

- Mid-1960s HYV expansion.
- Semi-dwarf seed + irrigation + fertiliser + credit.
- Research + extension + procurement support.
- Technology worked through complementarity, not seed alone.

Claim -> named evidence -> analysis -> qualification

09. ACHIEVEMENT AND LIMIT

- Higher cereal yields, output and marketed surplus.
- Lower chronic import dependence and stronger rural linkages.
- Concentration in wheat-rice and irrigated north-west.
- Groundwater, nutrient, monoculture and distributional stress.

Claim -> named evidence -> analysis -> qualification

10. CROPPING SYSTEMS

- Pattern = area distribution among crops.
- Intensity = gross cropped area / net area sown x 100.

10. CROPPING SYSTEMS

- Pattern = area distribution among crops.
- Intensity = gross cropped area / net area sown x 100.
- Rotation is temporal; multiple cropping counts cycles.
- Mixed has no fixed rows; intercropping uses planned geometry.

Claim -> named evidence -> analysis -> qualification

11. INDIA CROP MAP

- North-west: irrigated wheat-rice and cotton.
- Humid east: rice, jute and tea belts.
- Dry Deccan: millets, pulses, oilseeds and cotton.
- Coasts/hills: rice, coconut, spices and plantation crops.
- Regional fit, not universal crop substitution.

Claim -> named evidence -> analysis -> qualification

12. MAINS REFORM ARCHITECTURE

- State land law -> enforceable rights and records.
- Workable operations -> research, water, credit and extension.
- Region-specific crop mix -> value chains and risk management.
- Topic 12 owns MSP/procurement; Topic 14 owns deeper sustainability tools.
- Judge rights, productivity, income, inclusion and resilience together.

Claim -> named evidence -> analysis -> qualification
