

ECONOMY TOPIC 11 – PANEL 1/12

AGRARIAN REFORM CHAIN

=====

1. Rights -> records -> workable holdings -> inputs -> markets.
2. Land reform changes institutions; Green Revolution changes technology.
3. Productivity needs both incentives and complementary services.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 2/12

COLONIAL TENURE LEGACY

=====

1. Zamindari: intermediary between State and cultivator.
2. Ryotwari: direct assessment of recorded cultivator.
3. Mahalwari: village estate or co-sharer revenue unit.
4. Use labels only for causal relevance and regional variation.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 3/12

LAND-REFORM TOOLKIT

=====

1. Abolition removes specified intermediaries.
2. Tenancy reform covers rent, security, recording and ownership routes.
3. Ceilings identify surplus; consolidation reorganises parcels.
4. Cooperation pools functions; Bhoodan/Gramdan were voluntary.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 4/12

CONSTITUTIONAL MAP

=====

1. State List Entry 18: land and land tenures.
2. Article 31A: specified category shield.
3. Article 31B: listed Ninth-Schedule laws.
4. Article 31C: Article 39(b)/(c) boundary.
5. I.R. Coelho 2007: post-24 April 1973 basic-structure review.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 5/12

IMPLEMENTATION TEST

=====

1. Law -> declaration -> verification -> adjudication.
2. Then possession -> allotment -> mutation -> productive support.
3. Evasion, exemptions, litigation and stale records break the chain.
4. Operation Barga and Kerala show politics plus administration.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 6/12

INCLUSIVE LAND RIGHTS

=====

1. Women: legal share -> mutation -> possession -> control.
2. Tribal/customary: map private, community and common rights.
3. Leasing: owner security plus cultivator security.
4. Model Agricultural Land Leasing Act 2016 is advisory to States.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 7/12

DIGITAL LAND GOVERNANCE

=====

1. DILRMP 3.0 guidelines: 2026-2031.
2. ULPIN: 14-digit georeferenced parcel identifier.
3. SVAMITVA: rural abadi mapping and State property cards.
4. 29 Jan 2026: 3.06 crore cards in 1.86 lakh villages.
5. Digitised record != conclusive title.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 8/12

GREEN REVOLUTION PACKAGE

=====

1. Mid-1960s HYV expansion.
2. Semi-dwarf seed + irrigation + fertiliser + credit.
3. Research + extension + procurement support.
4. Technology worked through complementarity, not seed alone.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 9/12

ACHIEVEMENT AND LIMIT

=====

1. Higher cereal yields, output and marketed surplus.
2. Lower chronic import dependence and stronger rural linkages.
3. Concentration in wheat-rice and irrigated north-west.
4. Groundwater, nutrient, monoculture and distributional stress.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 10/12

CROPPING SYSTEMS

=====

1. Pattern = area distribution among crops.
2. Intensity = $\text{gross cropped area} / \text{net area sown} \times 100$.
3. Rotation is temporal; multiple cropping counts cycles.
4. Mixed has no fixed rows; intercropping uses planned geometry.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 11/12

INDIA CROP MAP

=====

1. North-west: irrigated wheat-rice and cotton.
2. Humid east: rice, jute and tea belts.
3. Dry Deccan: millets, pulses, oilseeds and cotton.
4. Coasts/hills: rice, coconut, spices and plantation crops.
5. Regional fit, not universal crop substitution.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.

ECONOMY TOPIC 11 – PANEL 12/12

MAINS REFORM ARCHITECTURE

=====

1. State land law -> enforceable rights and records.
2. Workable operations -> research, water, credit and extension.
3. Region-specific crop mix -> value chains and risk management.
4. Topic 12 owns MSP/procurement; Topic 14 owns deeper sustainability tools.
5. Judge rights, productivity, income, inclusion and resilience together.

ANSWER ROUTE

Claim -> named evidence -> mechanism -> qualification -> reform.

CORE BOUNDARY

State land law remains distinct from technology, procurement and sustainable-input policy.
