

## ASCII MASTER FLOW – PANEL 1/12: Land-reform instrument map

INTERMEDIARY ABOLITION -> cultivator-state link

TENANCY -> rent + security + recorded cultivator

CEILINGS -> permissible holding + surplus land

CONSOLIDATION / RECORDS -> workable parcels + enforceable rights

MUST REMEMBER: Land reform, tenancy, ceilings, consolidation, irrigation, seeds,...

## ASCII MASTER FLOW – PANEL 2/12: Law-to-outcome rail

STATE LAW

- > ACCURATE RECORDS
- > LOCAL ADMINISTRATION + MOBILISATION
- > ACTUAL TENURE / REDISTRIBUTION OUTCOME

## ASCII MASTER FLOW – PANEL 3/12: State reform comparison

OPERATION BARGA -> sharecropper recording

KERALA -> tenancy abolition + ceiling depth

J&K 1950 -> early estate restructuring

COMPARE context; do not copy outcomes mechanically

## ASCII MASTER FLOW – PANEL 4/12: Green-Revolution package

HYV SEED + ASSURED WATER

+ FERTILISER + CREDIT + EXTENSION

+ PROCUREMENT + PRICE SUPPORT

PACKAGE EFFECT -> yield + marketed surplus

## ASCII MASTER FLOW – PANEL 5/12: Concentration legacy

IRRIGATED NORTHWEST

-> WHEAT / RICE SPECIALISATION

-> FOODGRAIN SURPLUS

-> GROUNDWATER + SOIL + REGIONAL STRESS

## ASCII MASTER FLOW – PANEL 6/12: Cropping metrics fork

PATTERN -> crop-area distribution

INTENSITY -> gross cropped / net sown area

DIVERSIFICATION -> crop / allied shift

EACH needs stated time + geography

## ASCII MASTER FLOW – PANEL 7/12: Diversification decision board

AGRO-CLIMATE + WATER

EXPECTED RETURN + VOLATILITY

CREDIT + INSURANCE + EXTENSION

STORAGE + PROCESSING + BUYER ACCESS

## ASCII MASTER FLOW – PANEL 8/12: Millet transition rail

DRYLAND SUITABILITY

- > LOWER WATER EXPOSURE
- > NUTRITION / RESILIENCE VALUE
- > NEED processing + procurement + demand

## ASCII MASTER FLOW – PANEL 9/12: Water-crop lock-in

PROCUREMENT + CHEAP PUMPING

-> WATER-INTENSIVE CROP CHOICE

-> AQUIFER / SOIL STRESS

-> DIVERSIFICATION BECOMES HARDER

## ASCII MASTER FLOW – PANEL 10/12: Scientist-engineer distinction

VISVESVARAYA -> sluice gates + block irrigation

SWAMINATHAN -> semi-dwarf crop adaptation

ENGINEERING -> assured water systems

CROP SCIENCE -> yield response

CLOSE DISTINCTION: Land record is not title guarantee, abolition is not complete...

## ASCII MASTER FLOW – PANEL 11/12: Agrarian trade-offs

SECURE TENURE -> investment / owner concerns

CONSOLIDATION -> scale / vulnerable-user safeguards

HIGH YIELD -> food security / ecological cost

DIVERSIFICATION -> resilience / market risk

EVIDENCE LIMIT: FORMULA / STATUS / CAUSATION: Use state-specific law and period,...

## ASCII MASTER FLOW – PANEL 12/12: Agrarian answer spine

DEFINE rights, records and holding structure

TRACE technology + water + market package

COMPARE regional outcomes and trade-offs

CONCLUDE with viable diversification
