Administrative Reforms and the Second ARC - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which statement correctly identifies Administrative reform as a routing discipline rather than a quotation bank?	6
Q2. Which chronology card should be filed under Administrative reform as a routing discipline rather than a quotation bank?	6
Q3. Which option preserves the source-bounded meaning of Administrative reform as a routing discipline rather than a quotation bank?	7
Q4. Which statement avoids a close-option trap about Administrative reform as a routing discipline rather than a quotation bank?	7
Q5. Which statement correctly identifies The First Administrative Reforms Commission, 1966 to 1970?	8
Q6. Which chronology card should be filed under The First Administrative Reforms Commission, 1966 to 1970?	8
Q7. Which option preserves the source-bounded meaning of The First Administrative Reforms Commission, 1966 to 1970?	9
Q8. Which statement avoids a close-option trap about The First Administrative Reforms Commission, 1966 to 1970?	9
Q9. Which statement correctly identifies The Second Administrative Reforms Commission, constituted 2005?	10
Q10. Which chronology card should be filed under The Second Administrative Reforms Commission, constituted 2005?	10
Q11. Which option preserves the source-bounded meaning of The Second Administrative Reforms Commission, constituted 2005?	11
Q12. Which statement avoids a close-option trap about The Second Administrative Reforms Commission, constituted 2005?	11
Q13. Which statement correctly identifies The era contrast that answers a comparison stem?	12
Q14. Which chronology card should be filed under The era contrast that answers a comparison stem?	12
Q15. Which option preserves the source-bounded meaning of The era contrast that answers a comparison stem?	13
Q16. Which statement avoids a close-option trap about The era contrast that answers a comparison stem?	13
Q17. Which statement correctly identifies The nodal department and the limits of a coordinating role?	14
Q18. Which chronology card should be filed under The nodal department and the limits of a coordinating role?	14
Q19. Which option preserves the source-bounded meaning of The nodal department and the limits of a coordinating role?	15
Q20. Which statement avoids a close-option trap about The nodal department and the limits of a coordinating role?	15
Q21. Which statement correctly identifies Recommendation against enacted reform?	16
Q22. Which chronology card should be filed under Recommendation against enacted reform?	16
Q23. Which option preserves the source-bounded meaning of Recommendation against enacted reform?	17
Q24. Which statement avoids a close-option trap about Recommendation against enacted reform?	17

Q25. Which statement correctly identifies The five-status ladder?	18
Q26. Which chronology card should be filed under The five-status ladder?	18
Q27. Which option preserves the source-bounded meaning of The five-status ladder?	19
Q28. Which statement avoids a close-option trap about The five-status ladder?	19
Q29. Which statement correctly identifies Using the ladder as a sentence rather than a table?	20
Q30. Which chronology card should be filed under Using the ladder as a sentence rather than a table?	20
Q31. Which option preserves the source-bounded meaning of Using the ladder as a sentence rather than a table?	21
Q32. Which statement avoids a close-option trap about Using the ladder as a sentence rather than a table?	21
Q33. Which statement correctly identifies The fifteen reports as a routing table?	22
Q34. Which chronology card should be filed under The fifteen reports as a routing table?	22
Q35. Which option preserves the source-bounded meaning of The fifteen reports as a routing table?	23
Q36. Which statement avoids a close-option trap about The fifteen reports as a routing table?	23
Q37. Which statement correctly identifies The four reports that sit mainly outside General Studies Paper-II?	24
Q38. Which chronology card should be filed under The four reports that sit mainly outside General Studies Paper-II?	24
Q39. Which option preserves the source-bounded meaning of The four reports that sit mainly outside General Studies Paper-II?	25
Q40. Which statement avoids a close-option trap about The four reports that sit mainly outside General Studies Paper-II?	25
Q41. Which statement correctly identifies Report ten and the personnel-administration route?	26
Q42. Which chronology card should be filed under Report ten and the personnel-administration route?	26
Q43. Which option preserves the source-bounded meaning of Report ten and the personnel-administration route?	27
Q44. Which statement avoids a close-option trap about Report ten and the personnel-administration route?	27
Q45. Which statement correctly identifies Reports six and fifteen and the local-governance route?	28
Q46. Which chronology card should be filed under Reports six and fifteen and the local-governance route?	28
Q47. Which option preserves the source-bounded meaning of Reports six and fifteen and the local-governance route?	29
Q48. Which statement avoids a close-option trap about Reports six and fifteen and the local-governance route?	30
Q49. Which statement correctly identifies Reports eleven and twelve and the service-delivery route?	30
Q50. Which chronology card should be filed under Reports eleven and twelve and the service-delivery route?	31
Q51. Which option preserves the source-bounded meaning of Reports eleven and twelve and the service-delivery route?	31
Q52. Which statement avoids a close-option trap about Reports eleven and twelve and the service-delivery route?	32
Q53. Which statement correctly identifies The remaining high-weight reports and their destinations?	32
Q54. Which chronology card should be filed under The remaining high-weight reports and their destinations?	33
Q55. Which option preserves the source-bounded meaning of The remaining high-weight reports and their destinations?	33
Q56. Which statement avoids a close-option trap about The remaining high-weight reports and their destinations?	34

Q57. Which statement correctly identifies The acceptance-to-outcome causal chain?	35
Q58. Which chronology card should be filed under The acceptance-to-outcome causal chain?	35
Q59. Which option preserves the source-bounded meaning of The acceptance-to-outcome causal chain?	36
Q60. Which statement avoids a close-option trap about The acceptance-to-outcome causal chain?	36
Q61. Which statement correctly identifies The federal step as the most under-used explanation?	37
Q62. Which chronology card should be filed under The federal step as the most under-used explanation?	37
Q63. Which option preserves the source-bounded meaning of The federal step as the most under-used explanation?	38
Q64. Which statement avoids a close-option trap about The federal step as the most under-used explanation?	39
Q65. Which statement correctly identifies The attribution problem and the most common fabricated claim?	39
Q66. Which chronology card should be filed under The attribution problem and the most common fabricated claim?	40
Q67. Which option preserves the source-bounded meaning of The attribution problem and the most common fabricated claim?	40
Q68. Which statement avoids a close-option trap about The attribution problem and the most common fabricated claim?	41
Q69. Which statement correctly identifies The datedness objection and its reply?	41
Q70. Which chronology card should be filed under The datedness objection and its reply?	42
Q71. Which option preserves the source-bounded meaning of The datedness objection and its reply?	42
Q72. Which statement avoids a close-option trap about The datedness objection and its reply?	43
Q73. Which statement correctly identifies Comprehensiveness against implementability, and commission fatigue?	43
Q74. Which chronology card should be filed under Comprehensiveness against implementability, and commission fatigue?	44
Q75. Which option preserves the source-bounded meaning of Comprehensiveness against implementability, and commission fatigue?	44
Q76. Which statement avoids a close-option trap about Comprehensiveness against implementability, and commission fatigue?	45
Q77. Which statement correctly identifies Stakeholder variation and honest question ownership?	45
Q78. Which chronology card should be filed under Stakeholder variation and honest question ownership?	46
Q79. Which option preserves the source-bounded meaning of Stakeholder variation and honest question ownership?	46
Q80. Which statement avoids a close-option trap about Stakeholder variation and honest question ownership?	47

Administrative Reforms and the Second ARC - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Administrative reform as a routing discipline rather than a quotation bank?

A. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. B. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. C. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: A. Explanation: This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Administrative reform as a routing discipline rather than a quotation bank?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. C. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. D. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

Answer: B. Explanation: This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Administrative reform as a routing discipline rather than a quotation bank?

A. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. B. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. C. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. D. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

Answer: C. Explanation: This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Administrative reform as a routing discipline rather than a quotation bank?

A. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. B. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. C. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. D. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority.

Answer: D. Explanation: This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies The First Administrative Reforms Commission, 1966 to 1970?

A. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. B. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. C. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. D. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second.

Answer: A. Explanation: The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under The First Administrative Reforms Commission, 1966 to 1970?

A. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. B. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. C. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. D. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies.

Answer: B. Explanation: The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of The First Administrative Reforms Commission, 1966 to 1970?

A. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. B. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. C. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. D. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

Answer: C. Explanation: The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about The First Administrative Reforms Commission, 1966 to 1970?

A. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. B. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. C. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: D. Explanation: The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies The Second Administrative Reforms Commission, constituted 2005?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. C. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. D. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second.

Answer: A. Explanation: The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under The Second Administrative Reforms Commission, constituted 2005?

A. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. B. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. C. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. D. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome.

Answer: B. Explanation: The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of The Second Administrative Reforms Commission, constituted 2005?

A. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. B. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. C. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. D. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together.

Answer: C. Explanation: The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about The Second Administrative Reforms Commission, constituted 2005?

A. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. B. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. C. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. D. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation.

Answer: D. Explanation: The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies The era contrast that answers a comparison stem?

A. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. B. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. C. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. D. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies.

Answer: A. Explanation: The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under The era contrast that answers a comparison stem?

A. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. B. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. C. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. D. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies.

Answer: B. Explanation: The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of The era contrast that answers a comparison stem?

A. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. B. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. C. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. D. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome.

Answer: C. Explanation: The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about The era contrast that answers a comparison stem?

A. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. B. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. C. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. D. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second.

Answer: D. Explanation: The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies The nodal department and the limits of a coordinating role?

A. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. B. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. C. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. D. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome.

Answer: A. Explanation: The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under The nodal department and the limits of a coordinating role?

A. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. B. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. C. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. D. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration.

Answer: B. Explanation: The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of The nodal department and the limits of a coordinating role?

A. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. B. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. C. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. D. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration.

Answer: C. Explanation: The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about The nodal department and the limits of a coordinating role?

A. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. B. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. C. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. D. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

Answer: D. Explanation: The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Recommendation against enacted reform?

A. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. B. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. C. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. D. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together.

Answer: A. Explanation: A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Recommendation against enacted reform?

A. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. B. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. C. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. D. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together.

Answer: B. Explanation: A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Recommendation against enacted reform?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. C. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. D. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration.

Answer: C. Explanation: A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Recommendation against enacted reform?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. C. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. D. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies.

Answer: D. Explanation: A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies The five-status ladder?

A. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. B. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. C. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. D. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error.

Answer: A. Explanation: Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under The five-status ladder?

A. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. B. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. C. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. D. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error.

Answer: B. Explanation: Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of The five-status ladder?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. C. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. D. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.

Answer: C. Explanation: Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about The five-status ladder?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. C. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. D. Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome.

Answer: D. Explanation: Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Using the ladder as a sentence rather than a table?

A. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. B. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. C. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. D. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial.

Answer: A. Explanation: The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Using the ladder as a sentence rather than a table?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. C. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. D. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.

Answer: B. Explanation: The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Using the ladder as a sentence rather than a table?

A. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. B. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. C. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. D. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here.

Answer: C. Explanation: The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Using the ladder as a sentence rather than a table?

A. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. B. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. C. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. D. The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together.

Answer: D. Explanation: The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies The fifteen reports as a routing table?

A. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. B. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. C. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. D. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.

Answer: A. Explanation: The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under The fifteen reports as a routing table?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. C. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. D. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here.

Answer: B. Explanation: The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of The fifteen reports as a routing table?

A. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. B. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. C. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. D. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control.

Answer: C. Explanation: The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about The fifteen reports as a routing table?

A. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. B. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. C. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. D. The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration.

Answer: D. Explanation: The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies The four reports that sit mainly outside General Studies Paper-II?

A. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. B. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. C. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. D. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.

Answer: A. Explanation: Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under The four reports that sit mainly outside General Studies Paper-II?

A. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. B. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. C. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. D. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.

Answer: B. Explanation: Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III

internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of The four reports that sit mainly outside General Studies Paper-II?

A. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. B. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. C. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: C. Explanation: Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about The four reports that sit mainly outside General Studies Paper-II?

A. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. B. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. C. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. D. Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error.

Answer: D. Explanation: Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Report ten and the personnel-administration route?

A. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. B. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. C. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. D. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control.

Answer: A. Explanation: Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Report ten and the personnel-administration route?

A. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. B. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. C. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal

outcome.

Answer: B. Explanation: Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Report ten and the personnel-administration route?

A. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. B. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. C. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: C. Explanation: Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Report ten and the personnel-administration route?

A. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. B. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. C. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in

staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. D. Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial.

Answer: D. Explanation: Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Reports six and fifteen and the local-governance route?

A. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. B. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. C. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: A. Explanation: Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Reports six and fifteen and the local-governance route?

A. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. B. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State

action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. C. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: B. Explanation: Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Reports six and fifteen and the local-governance route?

A. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. B. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. C. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. D. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference.

Answer: C. Explanation: Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Reports six and fifteen and the local-governance route?

A. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. B. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. C. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. D. Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.

Answer: D. Explanation: Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Reports eleven and twelve and the service-delivery route?

A. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. B. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. C. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. D. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference.

Answer: A. Explanation: Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the

service-standard, grievance and capability architecture are developed in their own owners rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Reports eleven and twelve and the service-delivery route?

A. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. B. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. C. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: B. Explanation: Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Reports eleven and twelve and the service-delivery route?

A. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. B. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. C. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. D. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence.

Answer: C. Explanation: Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the

service-standard, grievance and capability architecture are developed in their own owners rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Reports eleven and twelve and the service-delivery route?

A. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. B. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. C. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. D. Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here.

Answer: D. Explanation: Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies The remaining high-weight reports and their destinations?

A. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. B. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. C. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: A. Explanation: Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital

routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under The remaining high-weight reports and their destinations?

A. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. B. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. C. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. D. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using.

Answer: B. Explanation: Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of The remaining high-weight reports and their destinations?

A. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. B. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. C. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding,

bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. D. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Answer: C. Explanation: Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about The remaining high-weight reports and their destinations?

A. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. B. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. C. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. D. Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control.

Answer: D. Explanation: Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies The acceptance-to-outcome causal chain?

A. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. B. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. C. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. D. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence.

Answer: A. Explanation: Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under The acceptance-to-outcome causal chain?

A. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. B. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. C. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. D. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Answer: B. Explanation: Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action,

capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of The acceptance-to-outcome causal chain?

A. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. B. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. C. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. D. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Answer: C. Explanation: Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about The acceptance-to-outcome causal chain?

A. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. B. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. C. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are

routed to their destination owners. D. Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.

Answer: D. Explanation: Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies The federal step as the most under-used explanation?

A. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. B. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. C. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. D. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence.

Answer: A. Explanation: The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under The federal step as the most under-used explanation?

A. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. B. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot

deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. C. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. D. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Answer: B. Explanation: The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of The federal step as the most under-used explanation?

A. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. B. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. C. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. D. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners.

Answer: C. Explanation: The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about The federal step as the most under-used explanation?

A. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. B. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. C. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. D. The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference.

Answer: D. Explanation: The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies The attribution problem and the most common fabricated claim?

A. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. B. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. C. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. D. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners.

Answer: A. Explanation: Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under The attribution problem and the most common fabricated claim?

A. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. B. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. C. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. D. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Answer: B. Explanation: Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of The attribution problem and the most common fabricated claim?

A. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. B. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. C. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail,

and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: C. Explanation: Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about The attribution problem and the most common fabricated claim?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. C. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. D. Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence.

Answer: D. Explanation: Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies The datedness objection and its reply?

A. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. B. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. C. A

fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. D. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority.

Answer: A. Explanation: The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under The datedness objection and its reply?

A. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. B. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. C. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. D. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners.

Answer: B. Explanation: The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of The datedness objection and its reply?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. C. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection

framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: C. Explanation: The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about The datedness objection and its reply?

A. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. B. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. C. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. D. The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using.

Answer: D. Explanation: The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Comprehensiveness against implementability, and commission fatigue?

A. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. B. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. C. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when

it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: A. Explanation: A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Comprehensiveness against implementability, and commission fatigue?

A. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. B. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. C. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. D. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority.

Answer: B. Explanation: A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Comprehensiveness against implementability, and commission fatigue?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. C. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State

relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: C. Explanation: A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Comprehensiveness against implementability, and commission fatigue?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. C. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. D. A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Answer: D. Explanation: A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Stakeholder variation and honest question ownership?

A. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. B. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. C. This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority. D. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.

Answer: A. Explanation: Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Stakeholder variation and honest question ownership?

A. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. B. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. C. The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state. D. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation.

Answer: B. Explanation: Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Stakeholder variation and honest question ownership?

A. The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation. B. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. C. Adoption varies by actor, since a Union ministry accepts what

fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. D. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

Answer: C. Explanation: Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Stakeholder variation and honest question ownership?

A. The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second. B. The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. C. A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. D. Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners.

Answer: D. Explanation: Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

One applied objective demand is routed to this topic across the audited ledgers and no direct Mains demand is routed here, which is stated openly rather than disguised. The audited 2018-2023 Prelims ledger routes the 2021 objective demand on the Administrative Reforms Commission and the creation of a personnel department to this Basic owner; the official 2018-2023 Preliminary Examination key is not held locally, so no option, answer letter or distractor is recorded or inferred for it, and no year of departmental creation and no recommendation number is asserted, because no official source for that step is held locally. The audited Mains ledgers route the commission-grounded Mains demands to their destination owners rather than to this file, since local-body functionality and grassroots decentralisation are routed to the local-governance owner, the Citizens' Charter and public-perception demands are routed to the citizen-centric-administration owner, the civil-service reform and ethos demands are routed to the civil-services owner, and the competition-regulator demand is routed to the regulatory-governance owner, so this owner supplies the routing, status and political-economy discipline that each of those answers uses rather than claiming their ownership. No official answer key or marking scheme is held locally for any routed demand, so the model solution below is an authored answer route rather than an official key.

Demand decoding: The directive **answer** requires a direct position on “VERIFIED PYQ OWNERSHIP AUDIT”, every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the governance demand in “VERIFIED PYQ OWNERSHIP AUDIT”.

Analytical body:

1. **Claim and named evidence:** Define the governance concept and separate it from the nearest legal, institutional or measured category. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** Identify the constitutional, statutory, delegated or executive authority and the competent level of government. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
3. **Claim and named evidence:** Map state, market, civil-society, frontline and citizen stakeholders with power, duty and vulnerability. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
4. **Claim and named evidence:** Trace finance, information, implementation, monitoring, grievance, appeal and correction through the delivery chain. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
5. **Claim and named evidence:** Use a named Indian law, institution, scheme, audit, reform or local example with source, date and operative status. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
6. **Claim and named evidence:** Test exclusion, digital divide, privacy, capture, capacity, indicator gaming, trade-off and residual-risk limits. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline

implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: The answer must resolve the governance demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- ANALYSIS: No GS-II Mains question in the audited 2024-2025 papers names "Second ARC" directly by number, but several PYQs (local bodies, e-governance, Citizens' Charter, civil services) are conceptually grounded in specific ARC reports per the routing table above - use this file to correctly attribute a question's underlying source report, then answer using the relevant topic file's full depth.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	Prelims GS-I	78	Administrative Reforms Commission personnel department creation	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Administrative Reforms Commission personnel department creation

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- ANALYSIS: Where a GS-II question implicitly draws on Second ARC material (local bodies, e-governance, Citizens' Charter, civil services - see the routing table in the basic file), a top-scoring answer names the specific report *and* notes whether its recommendation has been substantially adopted, partially adopted, or remains aspirational - adding this precision distinguishes an advanced answer from a merely descriptive one.

PYQ DEMAND CARD 1 - 2021 Preliminary Examination General Studies Paper-I

Demand: Objective demand on the Administrative Reforms Commission and the creation of a personnel department, routed to this owner by the audited 2018-2023 Prelims ledger.

Status: The official 2018-2023 Preliminary Examination key is not held locally, so no option, answer letter or distractor is recorded or inferred, and no year of departmental creation and no recommendation number is asserted because no official source for that step is held locally.

Model solution: The examinable content is the First Commission's place in India's administrative history and the institutional lineage of the personnel function, so the safe method is to answer from remit and period rather than from a remembered recommendation. State what is held: the First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the machinery of government, personnel administration and Centre-State relations, so its work belongs to the period in which the Union's personnel function was institutionally consolidated. Then apply the discipline that makes an unfamiliar statement testable. First, distinguish the two Commissions by era and question, since the First addressed the structure-building problems of a newly independent planning-era state while the Second, constituted in 2005 under M. Veerappa Moily, produced fifteen reports between 2006 and 2009 on accountability, citizen-centricity, technology and capacity, so any statement that treats the two as covering identical subject matter is an era error. Second, apply the recommendation-against-implementation distinction, because a statement asserting that a Commission created, established or mandated a department confuses a recommendation with an instrument; a Commission recommends, and creation requires a separate executive, legislative or rule-making act. Third, apply the coordination limit, since the Department of Administrative Reforms and Public Grievances tracks and coordinates follow-up and holds institutional memory but cannot compel a ministry or a State to act, so a statement giving it directive power is a design error. Fourth, apply the five-status ladder, because a statement claiming that a recommendation is in force needs evidence of an operative instrument and not merely of acceptance in principle. Finally, note the federal boundary, since recommendations touching State cadres and State administration require State action, so a statement asserting uniform national implementation of a personnel recommendation is unsafe on its face. No option is selected, no answer letter is recorded, no year of departmental creation is asserted, and no recommendation number or percentage of accepted recommendations is inferred.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2021 Preliminary Examination General Studies Paper-I", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

No option is selected, no answer letter is recorded, no year of departmental creation is asserted, and no recommendation number or percentage of accepted recommendations is inferred.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2021 Preliminary Examination General Studies Paper-I", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish the focus areas of the First and Second Administrative Reforms Commissions. Answer in about 150 words.

Model thesis: The distinction is one of era and of question rather than of subject list, because the First Commission asked how to build an administrative structure for a newly independent planning-era state while the Second asked how to make an existing structure accountable, participatory and technology-enabled, and the reasons for incomplete implementation differ correspondingly.

Claim -> named evidence -> analysis -> qualification:

- The First Administrative Reforms Commission ran from 1966 to 1970, was chaired initially by Morarji Desai and later by K. Hanumanthaiah, and examined the post-Independence public administration structure across the machinery of government, personnel administration and Centre-State relations, addressing the basic structure-building questions of a newly independent, planning-era state.
- The Second Administrative Reforms Commission was constituted in 2005, was chaired by M. Veerappa Moily and produced fifteen reports between 2006 and 2009 addressing the governance challenges of a liberalised, technology-enabled and rights-based India, which makes it the dominant commission reference for current General Studies Paper-II preparation.
- The two commissions differ by era and by question rather than by subject alone, because the First Commission asked how to build an administrative structure while the Second asked how to make an existing structure accountable, participatory and technology-enabled, so the shift in the question is itself the answer a comparison demand is looking for, and neither was fully implemented for different reasons, capacity in the first case and incentives and federal structure in the second.
- The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using.

Qualified conclusion: The distinction is one of era and of question rather than of subject list, because the First Commission asked how to build an administrative structure for a newly independent planning-era state while the Second asked how to make an existing structure accountable, participatory and technology-enabled, and the reasons for incomplete implementation differ correspondingly.

Demand decoding: The directive **answer** requires a direct position on "Distinguish the focus areas of the First and Second Administrative Reforms Commissions....", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The distinction is one of era and of question rather than of subject list, because the First Commission asked how to build an administrative structure for a newly independent planning-era state while the Second asked how to make an existing structure accountable, participatory and technology-enabled, and the reasons for incomplete implementation differ correspondingly.

Qualified conclusion: The distinction is one of era and of question rather than of subject list, because the First Commission asked how to build an administrative structure for a newly independent planning-era state while the Second asked how to make an existing structure accountable, participatory and technology-enabled, and the reasons for incomplete implementation differ correspondingly.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Distinguish the focus areas of the First and Second Administrative Reforms Commissions....", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain why the implementation status of an administrative-reform recommendation must be stated before the recommendation is used in an answer. Answer in about 150 words.

Model thesis: Status discipline is the whole examinable skill in this area, because a proposal presented as practice converts a dated analytical recommendation into a false statement of current law, and the five-status ladder written as a single sentence demonstrates source discipline and evaluative honesty in the same breath.

Claim -> named evidence -> analysis -> qualification:

- A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies.

- Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome.
- The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together.
- Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence.

Qualified conclusion: Status discipline is the whole examinable skill in this area, because a proposal presented as practice converts a dated analytical recommendation into a false statement of current law, and the five-status ladder written as a single sentence demonstrates source discipline and evaluative honesty in the same breath.

Demand decoding: The directive **explain** requires a direct position on “Explain why the implementation status of an administrative-reform recommendation must be...”, every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Status discipline is the whole examinable skill in this area, because a proposal presented as practice converts a dated analytical recommendation into a false statement of current law, and the five-status ladder written as a single sentence demonstrates source discipline and evaluative honesty in the same breath.

Analytical body:

1. **Claim and named evidence:** A commission recommendation is a dated analytical reform proposal and becomes binding only when separately enacted as law, notified as a rule or order, or adopted as administrative practice, so any specific recommendation must be described as proposed, partially implemented or adopted rather than assumed to be current law, and the status language itself is where the mark lies. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** Every commission citation should carry one of five statuses with the evidence each requires, namely proposed on the report text alone, accepted in principle on a recorded government decision with no operative instrument, notified or enacted where an Act, rule, order or scheme instrument exists, operational where institutions, staff, budget and procedure actually function, and evaluated where independent evidence exists on quality and outcome. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
3. **Claim and named evidence:** The ladder earns its marks when it is written as a single sentence inside the answer, of the form that the commission recommended a measure, that the government accepted it in principle, that the operative instrument is a named later Act or rule, and that whether it functions as intended has not been independently evaluated, because that one sentence demonstrates source discipline and evaluative honesty together. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

4. **Claim and named evidence:** Where a later reform resembles a commission proposal the causal link is usually unprovable, so no answer should claim that a named current programme implements a named report without a sourced acceptance or decision trail, and asserting that a capacity-building programme implements the personnel-administration report or that State service-guarantee statutes implement the citizen-centric-administration report is the single most common fabricated claim in this area, because thematic similarity is not implementation evidence. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: Status discipline is the whole examinable skill in this area, because a proposal presented as practice converts a dated analytical recommendation into a false statement of current law, and the five-status ladder written as a single sentence demonstrates source discipline and evaluative honesty in the same breath.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For “Explain why the implementation status of an administrative-reform recommendation must be...”, replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Examine why the recommendations of the Second Administrative Reforms Commission have been implemented selectively rather than uniformly. Answer in about 250 words.

Model thesis: Selective implementation is a structural outcome of the acceptance, instrument, federal, capacity and incentive stages of the reform chain rather than a verdict on the quality of the diagnosis, and the federal step in particular explains why the highest-value reports on local governance, district administration and personnel administration remain the least implemented.

Claim -> named evidence -> analysis -> qualification:

- Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.
- The most under-used and most rewarded explanation of partial implementation is federal rather than political, because several of the highest-value reports, including Local Governance, State and District Administration and much of Refurbishing of Personnel Administration, address subjects requiring State legislative or administrative action, so a Union acceptance cannot deliver them and uneven national adoption is a structural consequence of the federal division rather than evidence of Union indifference.
- The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

- A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

Qualified conclusion: Selective implementation is a structural outcome of the acceptance, instrument, federal, capacity and incentive stages of the reform chain rather than a verdict on the quality of the diagnosis, and the federal step in particular explains why the highest-value reports on local governance, district administration and personnel administration remain the least implemented.

Demand decoding: The directive **examine** requires a direct position on “Examine why the recommendations of the Second Administrative Reforms Commission have been...”, every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Selective implementation is a structural outcome of the acceptance, instrument, federal, capacity and incentive stages of the reform chain rather than a verdict on the quality of the diagnosis, and the federal step in particular explains why the highest-value reports on local governance, district administration and personnel administration remain the least implemented.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For “Examine why the recommendations of the Second Administrative Reforms Commission have been...”, replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine the continuing relevance of the Second Administrative Reforms Commission for current Indian governance reform. Answer in about 250 words.

Model thesis: The reports remain indispensable as a diagnostic map and unsafe as a statement of current practice, because their analytical categories have aged far better than their specific prescriptions, so the honest use cites the report for the problem and the current instrument for the answer while conceding what has changed since 2009.

Claim -> named evidence -> analysis -> qualification:

- The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using.
- This topic is designed as a routing index with reform-analysis capability, which means an administrative-reform recommendation earns marks only when it is routed to a specific report, matched to a specific governance problem and qualified by its implementation status, and the single most damaging habit in this area is the decontextualised commission quotation offered as authority.
- The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration.
- Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here.

Qualified conclusion: The reports remain indispensable as a diagnostic map and unsafe as a statement of current practice, because their analytical categories have aged far better than their specific prescriptions, so the honest use cites the report for the problem and the current instrument for the answer while conceding what has changed since 2009.

Demand decoding: The directive **examine** requires a direct position on “Examine the continuing relevance of the Second Administrative Reforms Commission for current...”, every clause, exact authority and institutional boundary,

an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The reports remain indispensable as a diagnostic map and unsafe as a statement of current practice, because their analytical categories have aged far better than their specific prescriptions, so the honest use cites the report for the problem and the current instrument for the answer while conceding what has changed since 2009.

Analytical body:

1. **Claim and named evidence:** The datedness objection is that a diagnosis produced between 2006 and 2009 predates population-scale digital public infrastructure, the current data-protection framework, statutory service guarantees at scale and post-goods-and-services-tax fiscal federalism, and the correct reply is that the commission's analytical categories of capacity, accountability, citizen-centricity and decentralisation have aged far better than its specific prescriptions, so the answer must say which of the two it is using. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

4. **Claim and named evidence:** Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: The reports remain indispensable as a diagnostic map and unsafe as a statement of current practice, because their analytical categories have aged far better than their specific prescriptions, so the honest use cites the report for the problem and the current instrument for the answer while conceding what has changed since 2009.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy,

federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For “Examine the continuing relevance of the Second Administrative Reforms Commission for current...”, replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess the fifteen reports of the Second Administrative Reforms Commission as a diagnostic architecture rather than as a list of recommendations. Answer in about 300 words.

Model thesis: Read as an architecture, the reports map a complete governance problem set from information rights and entitlements through ethics, local governance, social capital, personnel, technology, citizen-centricity, organisational structure and financial management, which is why routing each report to its destination owner and attaching an honest status label produces a stronger answer than reproducing report content.

Claim -> named evidence -> analysis -> qualification:

- The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration.
- Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error.
- Report ten, Refurbishing of Personnel Administration and titled Scaling New Heights, is the personnel-administration route and its analytical depth belongs to the civil-services owner, where neutrality, capacity and performance are developed; its recommendations touching performance-linked promotion and cadre restructuring illustrate the politically contested end of the implementation spectrum where adoption has been much more partial.
- Report six on Local Governance and report fifteen on State and District Administration jointly ground the local-governance and district-delivery route, where the three functional legs of devolution, activity mapping and parastatal encroachment are developed, and both address subjects requiring State action, which is why their non-implementation is frequently a federal-capacity fact rather than a Union-indifference fact.
- Report eleven, Promoting e-Governance and titled The Smart Way Forward, and report twelve, Citizen-Centric Administration and titled The Heart of Governance, ground the e-governance and citizen-centric service-delivery routes, where process re-engineering before digitisation and the service-standard, grievance and capability architecture are developed in their own owners rather than restated here.
- Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control.

Qualified conclusion: Read as an architecture, the reports map a complete governance problem set from information rights and entitlements through ethics, local governance, social capital, personnel, technology, citizen-centricity, organisational structure and financial management, which is why routing each report to its destination owner and attaching an honest status label produces a stronger answer than reproducing report content.

Demand decoding: The directive **assess** requires a direct position on “Assess the fifteen reports of the Second Administrative Reforms Commission as a diagnostic...”, every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Read as an architecture, the reports map a complete governance problem set from information rights and entitlements through ethics, local governance, social capital, personnel, technology, citizen-centricity, organisational structure and financial management, which is why routing each report to its destination owner and attaching an honest status label produces a stronger answer than reproducing report content.

Analytical body:

- 1. Claim and named evidence:** The fifteen reports of the Second Commission are, in order, Right to Information as the master key to good governance, Unlocking Human Capital on entitlements and governance, Crisis Management, Ethics in Governance, Public Order, Local Governance, Capacity Building for Conflict Resolution, Combating Terrorism, Social Capital as a shared destiny, Refurbishing of Personnel Administration, Promoting e-Governance, Citizen-Centric Administration, the Organisational Structure of the Government of India, Strengthening Financial Management Systems, and State and District Administration. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
- 2. Claim and named evidence:** Reports three, five, seven and eight, on crisis management, public order, capacity building for conflict resolution and combating terrorism, sit mainly in the General Studies Paper-III internal-security and disaster-management space, so they should be cross-referenced rather than forced into a Paper-II governance answer, and treating all fifteen reports as equally central to Paper-II is a standard error. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

- 6. Claim and named evidence:** Report one on the Right to Information routes to the transparency and accountability owner for proactive disclosure and the accountability ecosystem, report two on Unlocking Human

Capital routes to policy design and implementation for entitlement design, report four on Ethics in Governance routes to institutional accountability owners while personal probity is owned by Ethics, report nine on Social Capital routes to the civil-society owner for bonding, bridging and linking, report thirteen on the Organisational Structure of the Government of India routes to machinery and coordination with a Polity cross-link, and report fourteen on Strengthening Financial Management Systems routes to public finance and expenditure control. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: Read as an architecture, the reports map a complete governance problem set from information rights and entitlements through ethics, local governance, social capital, personnel, technology, citizen-centricity, organisational structure and financial management, which is why routing each report to its destination owner and attaching an honest status label produces a stronger answer than reproducing report content.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For “Assess the fifteen reports of the Second Administrative Reforms Commission as a diagnostic...”, replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess why expert-commission-driven administrative reform in India delivers rigorous diagnosis and uneven adoption. Answer in about 300 words.

Model thesis: The commission model supplies evidence-based diagnosis without enforcement power, so its impact is contingent on acceptance, instrument creation, federal action, capacity and above all on the distribution of costs, since recommendations that reduce discretion or reallocate authority face concentrated resistance and diffuse benefit while a coordinating department cannot compel anyone.

Claim -> named evidence -> analysis -> qualification:

- Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners.
- Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome.
- A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a

documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit.

- The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything.

Qualified conclusion: The commission model supplies evidence-based diagnosis without enforcement power, so its impact is contingent on acceptance, instrument creation, federal action, capacity and above all on the distribution of costs, since recommendations that reduce discretion or reallocate authority face concentrated resistance and diffuse benefit while a coordinating department cannot compel anyone.

Demand decoding: The directive **assess** requires a direct position on “Assess why expert-commission-driven administrative reform in India delivers rigorous...”, every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The commission model supplies evidence-based diagnosis without enforcement power, so its impact is contingent on acceptance, instrument creation, federal action, capacity and above all on the distribution of costs, since recommendations that reduce discretion or reallocate authority face concentrated resistance and diffuse benefit while a coordinating department cannot compel anyone.

Analytical body:

1. **Claim and named evidence:** Adoption varies by actor, since a Union ministry accepts what fits its existing mandate and resists what reallocates it, a State government must act on the local-governance, personnel and district-administration reports and has its own political economy, the nodal department tracks and coordinates without power to compel, civil-service associations hold an organised interest in tenure, cadre and promotion rules, and the citizen is a diffuse beneficiary of accountability reform with weak organisation relative to the concentrated interests reform touches; on ownership, the audited 2018-2023 Prelims ledger routes one objective demand on the Administrative Reforms Commission and the creation of a personnel department to this owner, no direct Mains demand is routed here, and the commission-grounded Mains demands are routed to their destination owners.
Analysis: Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** Reform recommendations move through a chain in which diagnosis identifies a structural problem, acceptance occurs report by report and recommendation by recommendation with the failure mode of acceptance in principle without an instrument, an instrument in the form of an Act, rule, order or scheme must then be separately created, a federal step is required where the subject needs State action, capacity in staff, money, systems and skills must exist to operate the instrument, and incentives finally determine adoption, so partial and often unattributed adoption is the normal outcome. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
3. **Claim and named evidence:** A fifteen-report programme is analytically complete and politically indigestible while incremental reform is implementable and incoherent, and repeated commissions can substitute for action by converting reform into a documented intention, which is why the political-economy explanation of failure is that recommendations reducing discretion or reallocating authority face concentrated resistance against diffuse benefit rather than that they fail on merit. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

4. **Claim and named evidence:** The Department of Administrative Reforms and Public Grievances is the nodal Union department that tracks and coordinates follow-up on commission recommendations across ministries and departments and serves as their continuing institutional memory, but its role is coordinative and advisory rather than directive, so it cannot compel a line ministry or a State government to implement anything. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: The commission model supplies evidence-based diagnosis without enforcement power, so its impact is contingent on acceptance, instrument creation, federal action, capacity and above all on the distribution of costs, since recommendations that reduce discretion or reallocate authority face concentrated resistance and diffuse benefit while a coordinating department cannot compel anyone.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For “Assess why expert-commission-driven administrative reform in India delivers rigorous...”, replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.
