

COMPLETE LEARNING SESSION

Crafts, Textiles, Folk and Tribal Traditions - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Crafts, Textiles, Folk and Tribal Traditions - Learner-v2 Complete Learning Session	6
SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT	6
BASIC LEARNING SESSION	6
DEEP-REVIEW LEARNING CONTRACT	6
EVIDENCE, PYQ AND CURRENT-STATUS CONTROL	7
SESSION 1 - FOUNDATION - Handicraft and its material classes	8
SESSION 2 - FOUNDATION - The craft ecology chain	9
SESSION 3 - FOUNDATION - What a GI legally protects	10
SESSION 4 - CORE - First GI and foreign protection	11
SESSION 5 - CORE - Continuity through changing markets	12
SESSION 6 - CORE - Ikat close options	13
SESSION 7 - CORE - Brocade, silk and embroidery	14
SESSION 8 - CORE - Kalamkari, Dhokra and material process	16
SESSION 9 - CORE - Glass craft chronology	17
SESSION 10 - CORE - North-East handloom method	18
SESSION 11 - CORE - Eri and Muga firewall	19
SESSION 12 - CORE - Manipur and Nagaland discriminators	20
SESSION 13 - CORE SYNTHESIS - Arunachal, Mizoram and Tripura	21
SESSION 14 - CORE SYNTHESIS - Beyond the GI label	22
SESSION 15 - CORE SYNTHESIS - Verified craft PYQs and live institutional link	24
INDIAN ART AND CULTURE DEEP-REVIEW CORE CONTROL	36
BASIC MCQS / REMEDIATION	36
Q1. Which statement correctly identifies Handicraft and material classes?	36
Q2. Which chronology card should be filed under Handicraft and material classes?	36
Q3. Which option preserves the source-bounded meaning of Handicraft and material classes?	36
Q4. Which statement avoids a close-option trap about Handicraft and material classes?	37
Q5. Which statement correctly identifies Craft ecology chain?	37
Q6. Which chronology card should be filed under Craft ecology chain?	37
Q7. Which option preserves the source-bounded meaning of Craft ecology chain?	37

Q8. Which statement avoids a close-option trap about Craft ecology chain?	38
Q9. Which statement correctly identifies GI as origin-linked IP?	38
Q10. Which chronology card should be filed under GI as origin-linked IP?	38
Q11. Which option preserves the source-bounded meaning of GI as origin-linked IP?	38
Q12. Which statement avoids a close-option trap about GI as origin-linked IP?	39
Q13. Which statement correctly identifies GI legal mechanics?	39
Q14. Which chronology card should be filed under GI legal mechanics?	39
Q15. Which option preserves the source-bounded meaning of GI legal mechanics?	39
Q16. Which statement avoids a close-option trap about GI legal mechanics?	40
Q17. Which statement correctly identifies First and cross-border GI examples?	40
Q18. Which chronology card should be filed under First and cross-border GI examples?	40
Q19. Which option preserves the source-bounded meaning of First and cross-border GI examples?	40
Q20. Which statement avoids a close-option trap about First and cross-border GI examples?	41
Q21. Which statement correctly identifies Continuity through market change?	41
Q22. Which chronology card should be filed under Continuity through market change?	41
Q23. Which option preserves the source-bounded meaning of Continuity through market change?	41
Q24. Which statement avoids a close-option trap about Continuity through market change?	42
Q25. Which statement correctly identifies Patola and Pochampally?	42
Q26. Which chronology card should be filed under Patola and Pochampally?	42
Q27. Which option preserves the source-bounded meaning of Patola and Pochampally?	42
Q28. Which statement avoids a close-option trap about Patola and Pochampally?	43
Q29. Which statement correctly identifies Kanchipuram and Banarasi?	43
Q30. Which chronology card should be filed under Kanchipuram and Banarasi?	43
Q31. Which option preserves the source-bounded meaning of Kanchipuram and Banarasi?	43
Q32. Which statement avoids a close-option trap about Kanchipuram and Banarasi?	44
Q33. Which statement correctly identifies Chikankari and Kantha?	44
Q34. Which chronology card should be filed under Chikankari and Kantha?	44
Q35. Which option preserves the source-bounded meaning of Chikankari and Kantha?	44
Q36. Which statement avoids a close-option trap about Chikankari and Kantha?	45
Q37. Which statement correctly identifies Kalamkari and Dhokra?	45
Q38. Which chronology card should be filed under Kalamkari and Dhokra?	45
Q39. Which option preserves the source-bounded meaning of Kalamkari and Dhokra?	45

Q40. Which statement avoids a close-option trap about Kalamkari and Dhokra?	46
Q41. Which statement correctly identifies Glass craft chronology?	46
Q42. Which chronology card should be filed under Glass craft chronology?	46
Q43. Which option preserves the source-bounded meaning of Glass craft chronology?	46
Q44. Which statement avoids a close-option trap about Glass craft chronology?	47
Q45. Which statement correctly identifies North-East handloom process?	47
Q46. Which chronology card should be filed under North-East handloom process?	47
Q47. Which option preserves the source-bounded meaning of North-East handloom process?	47
Q48. Which statement avoids a close-option trap about North-East handloom process?	48
Q49. Which statement correctly identifies Meghalaya Eri evidence?	48
Q50. Which chronology card should be filed under Meghalaya Eri evidence?	48
Q51. Which option preserves the source-bounded meaning of Meghalaya Eri evidence?	48
Q52. Which statement avoids a close-option trap about Meghalaya Eri evidence?	49
Q53. Which statement correctly identifies Assam Muga discriminator?	49
Q54. Which chronology card should be filed under Assam Muga discriminator?	49
Q55. Which option preserves the source-bounded meaning of Assam Muga discriminator?	49
Q56. Which statement avoids a close-option trap about Assam Muga discriminator?	50
Q57. Which statement correctly identifies Manipur and Nagaland textiles?	50
Q58. Which chronology card should be filed under Manipur and Nagaland textiles?	50
Q59. Which option preserves the source-bounded meaning of Manipur and Nagaland textiles?	50
Q60. Which statement avoids a close-option trap about Manipur and Nagaland textiles?	51

Crafts, Textiles, Folk and Tribal Traditions - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-01. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-01.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The available OCR-searchable Nitin Singhanian Indian Art and Culture PDF was retained as a supplementary source; no unsupported page precision, quotation or dynamic status was imported from it.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** No direct GS-I Mains PYQ is routed to Topic 12. The audited direct objective routes are the two 2018 matching demands and the provisional 2026 Eri-Oeko-Tex demand; the 2024 handicraft-decline and diversity-marginality Mains questions remain adjacent routes owned by Modern History or Economy and Indian Society.
- **Live-link boundary:** The Development Commissioner (Handlooms) official 2025 award-selection document was located and checked on 2026-09-01. It is used only to show that handloom skill receives current institutional recognition; no recipient, count, fibre attribution, GI status or certification claim is imported from the document.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Indian Art and Culture Core is taught by form, chronology, region, patronage and function before optional enrichment.
Evidence method	Claim -> named monument/object/text/form/institution/community -> analysis -> qualification.
Chronology	Origin, surviving evidence, patronage phase, later adaptation, recognition and present status remain distinct.
Classification	Architecture, sculpture, painting, music, dance, theatre, language, craft, religion, heritage and cinema terms are compared on common axes without collapsing categories.
Interpretation	Style labels, iconographic readings, continuity, synthesis and social representation remain evidence-bounded rather than essentialist.
Practice contract	Every solved item has directive/demand decoding, a detailed examiner-grade model, executable compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Indian-Art-and-Culture\basic\12_Crafts-Textiles-Folk-and-Tribal-Traditions.md **Canonical topic owner:** upsc-ai-kit\knowledge\Indian-Art-and-Culture\basic\12_Crafts-Textiles-Folk-and-Tribal-Traditions.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Indian-Art-and-Culture\advanced\12_Crafts-Textiles-Folk-and-Tribal-Traditions.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Indian-Art-and-Culture\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Material evidence:** plans, fabric, technique, iconography, performance grammar, inscriptions, manuscripts, films and institutional records are identified before interpretation.
- **Attribution discipline:** patron, date, school, region, author, performer, community and function are stated only to the precision supported by the owner.
- **Quantitative discipline:** dimensions, counts, inscription years, lists, awards and registrations retain source, date, status and uncertainty; no figure is invented.
- **Interpretive discipline:** civilisational ranking, communal essentialism, timeless continuity, single-origin claims and treating commissioned representation as a social census are rejected.
- **PYQ discipline:** repository routing ledgers and locally held papers control wording and metadata; neutral rendering, reconstruction and unavailable official keys remain explicitly labelled.
- **Current-status note, rechecked 2026-09-04:** Rechecked 2026-09-04: the Development Commissioner (Handlooms) official award page and 2025 selection document verify only current institutional recognition of named handloom work. They do not prove GI status, certification, fair livelihood, tribal attribution or unchanged community practice.

Live/official context sources recorded by the predecessor generation:

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - Handicraft and its material classes

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Handicraft and its material classes is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Handicraft and material classes fit into one examinable idea.

Technical definition: In art-historical analysis, Handicraft and its material classes denotes the source-bounded relationship among Handicraft and material classes, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Handicraft and its material classes should be analysed as a relation among Handicraft and material classes, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Handicraft
- material
- classes
- joins
- hand
- skill

How to use them: Define Handicraft, material, classes; cite joins as named evidence; then apply this qualification: A material list becomes analysis only when linked to skill and livelihood. Conclude by showing how the distinction supports this answer route: Define the scope before naming examples..

VISUAL FIRST

HANDICRAFT AND ITS MATERIAL CLASSES

01. Handicraft and material classes

BOUNDARY -> A material list becomes analysis only when linked to skill and livelihood.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

NAMED EVIDENCE AND MECHANISM

- Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

EXAMINER CAUTION

- A material list becomes analysis only when linked to skill and livelihood.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Handicraft and its material classes.
- **Mains:** Define the scope before naming examples.

MINI RECAP

- **Evidence chain:** Handicraft and material classes
- **Qualified use:** Define the scope before naming examples.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS Handicraft material classes joins hand skill	2. MECHANISM / ARGUMENT relate Handicraft and material classes through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that define the scope before naming examples.	4. UPSC TRAP / ANSWER-USE LIMIT: A material list becomes analysis only when linked to skill and livelihood.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Handicraft and its material classes converts named evidence into a qualified argument			

SESSION 2 - FOUNDATION - The craft ecology chain

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The craft ecology chain is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Craft ecology chain fit into one examinable idea.

Technical definition: In art-historical analysis, The craft ecology chain denotes the source-bounded relationship among Craft ecology chain, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The craft ecology chain should be analysed as a relation among Craft ecology chain, not as an isolated list of names.

MUST-WRITE KEYWORDS

- craft
- ecology
- chain
- survives
- linked
- material

How to use them: Define craft, ecology, chain; cite survives as named evidence; then apply this qualification: Legal recognition is one link, not the whole system. Conclude by showing how the distinction supports this answer route: Build the causal spine for every craft answer..

VISUAL FIRST

THE CRAFT ECOLOGY CHAIN

01. Craft ecology chain

BOUNDARY -> Legal recognition is one link, not the whole system.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

NAMED EVIDENCE AND MECHANISM

- A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

EXAMINER CAUTION

- Legal recognition is one link, not the whole system.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to The craft ecology chain.
- **Mains:** Build the causal spine for every craft answer.

MINI RECAP

- **Evidence chain:** Craft ecology chain
- **Qualified use:** Build the causal spine for every craft answer.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS

craft | ecology | chain | survives | linked | material

2. MECHANISM / ARGUMENT

relate Craft ecology chain through form, context and patronage

3. CONSEQUENCE / CONTRAST

This relation supports the answer route that build the causal spine for every craft answer.

4. UPSC TRAP / ANSWER-USE

LIMIT: Legal recognition is one link, not the whole system.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The craft ecology chain converts named evidence into a qualified argument

SESSION 3 - FOUNDATION - What a GI legally protects

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What a GI legally protects is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how GI as origin-linked IP and GI legal mechanics fit into one examinable idea.

Technical definition: In art-historical analysis, What a GI legally protects denotes the source-bounded relationship among GI as origin-linked IP and GI legal mechanics, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What a GI legally protects should be analysed as a relation among GI as origin-linked IP and GI legal mechanics, not as an isolated list of names.

MUST-WRITE KEYWORDS

- What
- legally
- protects
- origin-linked
- legal
- mechanics

How to use them: Define What, legally, protects; cite origin-linked as named evidence; then apply this qualification: Origin-linked name protection is not quality or welfare certification. Conclude by showing how the distinction supports this answer route: State the instrument and statutory limit precisely..

VISUAL FIRST

WHAT A GI LEGALLY PROTECTS

01. GI as origin-linked IP

|

v

02. GI legal mechanics

BOUNDARY -> Origin-linked name protection is not quality or welfare certification.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

NAMED EVIDENCE AND MECHANISM

- A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.
- India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

EXAMINER CAUTION

- Origin-linked name protection is not quality or welfare certification.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to What a GI legally protects.
- **Mains:** State the instrument and statutory limit precisely.

MINI RECAP

- **Evidence chain:** GI as origin-linked IP -> GI legal mechanics
- **Qualified use:** State the instrument and statutory limit precisely.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS What legally protects origin-linked legal mechanics	2. MECHANISM / ARGUMENT relate GI as origin-linked IP and GI legal mechanics through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that state the instrument and statutory limit precisely.	4. UPSC TRAP / ANSWER-USE LIMIT: Origin-linked name protection is not quality or welfare certification.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: What a GI legally protects converts named evidence into a qualified argument			

SESSION 4 - CORE - First GI and foreign protection

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: First GI and foreign protection is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how First and cross-border GI examples fit into one examinable idea.

Technical definition: In art-historical analysis, First GI and foreign protection denotes the source-bounded relationship among First and cross-border GI examples, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

First GI and foreign protection should be analysed as a relation among First and cross-border GI examples, not as an isolated list of names.

MUST-WRITE KEYWORDS

- **First**
- **foreign**
- **protection**
- **cross-border**
- **examples**
- **Darjeeling**

How to use them: Define First, foreign, protection; cite cross-border as named evidence; then apply this qualification: Cross-border protection requires a separate jurisdictional act. Conclude by showing how the distinction supports this answer route: Use dated examples without implying automatic extension..

VISUAL FIRST

FIRST GI AND FOREIGN PROTECTION

01. First and cross-border GI examples

BOUNDARY -> Cross-border protection requires a separate jurisdictional act.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

NAMED EVIDENCE AND MECHANISM

- Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

EXAMINER CAUTION

- Cross-border protection requires a separate jurisdictional act.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to First GI and foreign protection.
- **Mains:** Use dated examples without implying automatic extension.

MINI RECAP

- **Evidence chain:** First and cross-border GI examples
- **Qualified use:** Use dated examples without implying automatic extension.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS First foreign protection cross-border examples Darjeeling	2. MECHANISM / ARGUMENT relate First and cross-border GI examples through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that use dated examples without implying automatic extension.	4. UPSC TRAP / ANSWER-USE LIMIT: Cross-border protection requires a separate jurisdictional act.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: First GI and foreign protection converts named evidence into a qualified argument			

SESSION 5 - CORE - Continuity through changing markets

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Continuity through changing markets is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Continuity through market change fit into one examinable idea.

Technical definition: In art-historical analysis, Continuity through changing markets denotes the source-bounded relationship among Continuity through market change, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Continuity through changing markets should be analysed as a relation among Continuity through market change, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Continuity
- changing
- markets
- market
- change
- Harappan

How to use them: Define Continuity, changing, markets; cite market as named evidence; then apply this qualification: Continuity does not mean unchanged design, patronage or labour. Conclude by showing how the distinction supports this answer route: Trace adaptation across historical markets..

VISUAL FIRST

CONTINUITY THROUGH CHANGING MARKETS

01. Continuity through market change

BOUNDARY -> Continuity does not mean unchanged design, patronage or labour.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

NAMED EVIDENCE AND MECHANISM

- Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

EXAMINER CAUTION

- Continuity does not mean unchanged design, patronage or labour.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Continuity through changing markets.
- **Mains:** Trace adaptation across historical markets.

MINI RECAP

- **Evidence chain:** Continuity through market change
- **Qualified use:** Trace adaptation across historical markets.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Continuity changing markets market change Harappan	2. MECHANISM / ARGUMENT relate Continuity through market change through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that trace adaptation across historical markets.	4. UPSC TRAP / ANSWER-USE LIMIT: Continuity does not mean unchanged design, patronage or labour.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Continuity through changing markets converts named evidence into a qualified argument			

SESSION 6 - CORE - Ikat close options

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Ikat close options is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Patola and Pochampally fit into one examinable idea.

Technical definition: In art-historical analysis, Ikat close options denotes the source-bounded relationship among Patola and Pochampally, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Ikat close options should be analysed as a relation among Patola and Pochampally, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Ikat
- close
- options
- Patola

- Pochampally

- from

How to use them: Define Ikat, close, options; cite Patola as named evidence; then apply this qualification: State centre and resist-dye logic together. Conclude by showing how the distinction supports this answer route: Separate Patola from Pochampally..

VISUAL FIRST

IKAT CLOSE OPTIONS

01. Patola and Pochampally

BOUNDARY -> State centre and resist-dye logic together.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

NAMED EVIDENCE AND MECHANISM

- Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

EXAMINER CAUTION

- State centre and resist-dye logic together.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Ikat close options.
- **Mains:** Separate Patola from Pochampally.

MINI RECAP

- **Evidence chain:** Patola and Pochampally
- **Qualified use:** Separate Patola from Pochampally.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Ikat close options Patola Pochampally from	2. MECHANISM / ARGUMENT relate Patola and Pochampally through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that separate Patola from Pochampally.	4. UPSC TRAP / ANSWER-USE LIMIT: State centre and resist-dye logic together.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Ikat close options converts named evidence into a qualified argument			

SESSION 7 - CORE - Brocade, silk and embroidery

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Brocade, silk and embroidery is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Kanchipuram and Banarasi and Chikankari and Kantha fit into one examinable idea.

Technical definition: In art-historical analysis, Brocade, silk and embroidery denotes the source-bounded relationship among Kanchipuram and Banarasi and Chikankari and Kantha, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Brocade, silk and embroidery should be analysed as a relation among Kanchipuram and Banarasi and Chikankari and Kantha, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Brocade

- silk
- embroidery
- Kanchipuram
- Banarasi
- Chikankari

How to use them: Define Brocade, silk, embroidery; cite Kanchipuram as named evidence; then apply this qualification: A weave is not embroidery and reuse can be intrinsic to form. Conclude by showing how the distinction supports this answer route: Prepare four-tradition comparison..

VISUAL FIRST

BROCADE, SILK AND EMBROIDERY

01. Kanchipuram and Banarasi

|

v

02. Chikankari and Kantha

BOUNDARY -> A weave is not embroidery and reuse can be intrinsic to form.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

NAMED EVIDENCE AND MECHANISM

- Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.
- Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

EXAMINER CAUTION

- A weave is not embroidery and reuse can be intrinsic to form.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Brocade, silk and embroidery.
- **Mains:** Prepare four-tradition comparison.

MINI RECAP

- **Evidence chain:** Kanchipuram and Banarasi -> Chikankari and Kantha
- **Qualified use:** Prepare four-tradition comparison.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Brocade silk embroidery Kanchipuram Banarasi Chikankari	2. MECHANISM / ARGUMENT relate Kanchipuram and Banarasi and Chikankari and Kantha through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that prepare four-tradition comparison.	4. UPSC TRAP / ANSWER-USE LIMIT: A weave is not embroidery and reuse can be intrinsic to form.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Brocade, silk and embroidery converts named evidence into a qualified argument			

SESSION 8 - CORE - Kalamkari, Dhokra and material process

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Kalamkari, Dhokra and material process is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Kalamkari and Dhokra fit into one examinable idea.

Technical definition: In art-historical analysis, Kalamkari, Dhokra and material process denotes the source-bounded relationship among Kalamkari and Dhokra, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Kalamkari, Dhokra and material process should be analysed as a relation among Kalamkari and Dhokra, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Kalamkari
- Dhokra
- material
- process
- uses
- hand-drawn

How to use them: Define Kalamkari, Dhokra, material; cite process as named evidence; then apply this qualification: Surface design and lost-wax casting solve different material problems. Conclude by showing how the distinction supports this answer route: Link process to product..

VISUAL FIRST

KALAMKARI, DHOKRA AND MATERIAL PROCESS

01. Kalamkari and Dhokra

BOUNDARY -> Surface design and lost-wax casting solve different material problems.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

NAMED EVIDENCE AND MECHANISM

- Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

EXAMINER CAUTION

- Surface design and lost-wax casting solve different material problems.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Kalamkari, Dhokra and material process.
- **Mains:** Link process to product.

MINI RECAP

- **Evidence chain:** Kalamkari and Dhokra
- **Qualified use:** Link process to product.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS Kalamkari Dhokra material process uses hand-drawn	2. MECHANISM / ARGUMENT relate Kalamkari and Dhokra through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that link process to product.	4. UPSC TRAP / ANSWER-USE LIMIT: Surface design and lost-wax casting solve different material problems.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Kalamkari, Dhokra and material process converts named evidence into a qualified argument			

SESSION 9 - CORE - Glass craft chronology

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Glass craft chronology is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Glass craft chronology fit into one examinable idea.

Technical definition: In art-historical analysis, Glass craft chronology denotes the source-bounded relationship among Glass craft chronology, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Glass craft chronology should be analysed as a relation among Glass craft chronology, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Glass
- craft
- chronology
- owner
- links
- Mahabharata

How to use them: Define Glass, craft, chronology; cite owner as named evidence; then apply this qualification: Textual reference and archaeological evidence are different evidence classes. Conclude by showing how the distinction supports this answer route: Construct a cautious craft-history chain..

VISUAL FIRST

GLASS CRAFT CHRONOLOGY

01. Glass craft chronology

BOUNDARY -> Textual reference and archaeological evidence are different evidence classes.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

NAMED EVIDENCE AND MECHANISM

- The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

EXAMINER CAUTION

- Textual reference and archaeological evidence are different evidence classes.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Glass craft chronology.
- **Mains:** Construct a cautious craft-history chain.

MINI RECAP

- **Evidence chain:** Glass craft chronology
- **Qualified use:** Construct a cautious craft-history chain.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Glass craft chronology owner links Mahabharata	2. MECHANISM / ARGUMENT relate Glass craft chronology through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that construct a cautious craft-history chain.	4. UPSC TRAP / ANSWER-USE LIMIT: Textual reference and archaeological evidence are different evidence classes.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Glass craft chronology converts named evidence into a qualified argument			

SESSION 10 - CORE - North-East handloom method

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: North-East handloom method is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how North-East handloom process fit into one examinable idea.

Technical definition: In art-historical analysis, North-East handloom method denotes the source-bounded relationship among North-East handloom process, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

North-East handloom method should be analysed as a relation among North-East handloom process, not as an isolated list of names.

MUST-WRITE KEYWORDS

- North-East
- handloom
- process
- owner's
- frame
- links

How to use them: Define North-East, handloom, process; cite owner's as named evidence; then apply this qualification: Region must be joined to community, fibre, process and product. Conclude by showing how the distinction supports this answer route: Replace anonymous tribal labels with sourced specificity..

VISUAL FIRST

NORTH-EAST HANDLOOM METHOD

01. North-East handloom process

BOUNDARY -> Region must be joined to community, fibre, process and product.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

NAMED EVIDENCE AND MECHANISM

- The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

EXAMINER CAUTION

- Region must be joined to community, fibre, process and product.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to North-East handloom method.
- **Mains:** Replace anonymous tribal labels with sourced specificity.

MINI RECAP

- **Evidence chain:** North-East handloom process
- **Qualified use:** Replace anonymous tribal labels with sourced specificity.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS North-East handloom process owner's frame links	2. MECHANISM / ARGUMENT relate North-East handloom process through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that replace anonymous tribal labels with sourced specificity.	4. UPSC TRAP / ANSWER-USE LIMIT: Region must be joined to community, fibre, process and product.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: North-East handloom method converts named evidence into a qualified argument			

SESSION 11 - CORE - Eri and Muga firewall

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Eri and Muga firewall is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Meghalaya Eri evidence and Assam Muga discriminator fit into one examinable idea.

Technical definition: In art-historical analysis, Eri and Muga firewall denotes the source-bounded relationship among Meghalaya Eri evidence and Assam Muga discriminator, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Eri and Muga firewall should be analysed as a relation among Meghalaya Eri evidence and Assam Muga discriminator, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Muga
- firewall
- Meghalaya
- Assam
- discriminator
- silk

How to use them: Define Muga, firewall, Meghalaya; cite Assam as named evidence; then apply this qualification: A shared garment cannot identify the fibre or state alone. Conclude by showing how the distinction supports this answer route: Prepare the provisional 2026 route without solving it..

VISUAL FIRST

ERI AND MUGA FIREWALL

01. Meghalaya Eri evidence

|

v

02. Assam Muga discriminator

BOUNDARY -> A shared garment cannot identify the fibre or state alone.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

NAMED EVIDENCE AND MECHANISM

- Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.
- Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

EXAMINER CAUTION

- A shared garment cannot identify the fibre or state alone.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Eri and Muga firewall.
- **Mains:** Prepare the provisional 2026 route without solving it.

MINI RECAP

- **Evidence chain:** Meghalaya Eri evidence -> Assam Muga discriminator
- **Qualified use:** Prepare the provisional 2026 route without solving it.

1. KEY TERMS / DEFINITIONS Muga firewall Meghalaya Assam discriminator silk	2. MECHANISM / ARGUMENT relate Meghalaya Eri evidence and Assam Muga discriminator through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that prepare the provisional 2026 route without solving it.	4. UPSC TRAP / ANSWER-USE LIMIT: A shared garment cannot identify the fibre or state alone.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Eri and Muga firewall converts named evidence into a qualified argument			

SESSION 12 - CORE - Manipur and Nagaland discriminators

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Manipur and Nagaland discriminators is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Manipur and Nagaland textiles fit into one examinable idea.

Technical definition: In art-historical analysis, Manipur and Nagaland discriminators denotes the source-bounded relationship among Manipur and Nagaland textiles, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Manipur and Nagaland discriminators should be analysed as a relation among Manipur and Nagaland textiles, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Manipur
- Nagaland

- **discriminators**
- **textiles**
- **linked**
- **with**

How to use them: Define Manipur, Nagaland, discriminators; cite textiles as named evidence; then apply this qualification: Named fabrics and motif systems must remain distinct. Conclude by showing how the distinction supports this answer route: Build close-option confidence..

VISUAL FIRST

MANIPUR AND NAGALAND DISCRIMINATORS

01. Manipur and Nagaland textiles

BOUNDARY -> Named fabrics and motif systems must remain distinct.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

NAMED EVIDENCE AND MECHANISM

- Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

EXAMINER CAUTION

- Named fabrics and motif systems must remain distinct.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Manipur and Nagaland discriminators.
- **Mains:** Build close-option confidence.

MINI RECAP

- **Evidence chain:** Manipur and Nagaland textiles
- **Qualified use:** Build close-option confidence.

CLOSING RECALL FLOW

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Manipur and Nagaland discriminators converts named evidence into a qualified argument			

SESSION 13 - CORE SYNTHESIS - Arunachal, Mizoram and Tripura

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Arunachal, Mizoram and Tripura is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Arunachal, Mizoram and Tripura fit into one examinable idea.

Technical definition: In art-historical analysis, Arunachal, Mizoram and Tripura denotes the source-bounded relationship among Arunachal, Mizoram and Tripura, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Arunachal, Mizoram and Tripura should be analysed as a relation among Arunachal, Mizoram and Tripura, not as an isolated list of names.

MUST-WRITE KEYWORDS

- Arunachal
- Mizoram
- Tripura
- Apatani
- Nyishi
- Monpa

How to use them: Define Arunachal, Mizoram, Tripura; cite Apatani as named evidence; then apply this qualification: Do not flatten several communities into a single North-East style. Conclude by showing how the distinction supports this answer route: Add gendered labour and pattern evidence..

VISUAL FIRST

ARUNACHAL, MIZORAM AND TRIPURA

01. Arunachal, Mizoram and Tripura

BOUNDARY -> Do not flatten several communities into a single North-East style.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

NAMED EVIDENCE AND MECHANISM

- Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

EXAMINER CAUTION

- Do not flatten several communities into a single North-East style.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Arunachal, Mizoram and Tripura.
- **Mains:** Add gendered labour and pattern evidence.

MINI RECAP

- **Evidence chain:** Arunachal, Mizoram and Tripura
- **Qualified use:** Add gendered labour and pattern evidence.

CLOSING RECALL FLOW

1. KEY TERMS / DEFINITIONS Arunachal Mizoram Tripura Apatani Nyishi Monpa	2. MECHANISM / ARGUMENT relate Arunachal, Mizoram and Tripura through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that add gendered labour and pattern evidence.	4. UPSC TRAP / ANSWER-USE LIMIT: Do not flatten several communities into a single North-East style.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Arunachal, Mizoram and Tripura converts named evidence into a qualified argument			

SESSION 14 - CORE SYNTHESIS - Beyond the GI label

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Beyond the GI label is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how GI is not safeguarding, Certification versus GI boundary and Ecology, gender and appropriation fit into one examinable idea.

Technical definition: In art-historical analysis, Beyond the GI label denotes the source-bounded relationship among GI is not safeguarding, Certification versus GI boundary and Ecology, gender and appropriation, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Beyond the GI label should be analysed as a relation among GI is not safeguarding, Certification versus GI boundary and Ecology, gender and appropriation, not as an isolated list of names.

MUST-WRITE KEYWORDS

- **Beyond**
- **label**
- **safeguarding**
- **Certification**
- **versus**
- **Ecology**

How to use them: Define Beyond, label, safeguarding; cite Certification as named evidence; then apply this qualification: Unsupported certification detail must remain a disclosed gap. Conclude by showing how the distinction supports this answer route: Evaluate livelihood, ecology, labour and appropriation..

VISUAL FIRST

BEYOND THE GI LABEL

01. GI is not safeguarding

|

v

02. Certification versus GI boundary

|

v

03. Ecology, gender and appropriation

BOUNDARY -> Unsupported certification detail must remain a disclosed gap.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

NAMED EVIDENCE AND MECHANISM

- GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.
- The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.
- Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

EXAMINER CAUTION

- Unsupported certification detail must remain a disclosed gap.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Beyond the GI label.
- **Mains:** Evaluate livelihood, ecology, labour and appropriation.

MINI RECAP

- **Evidence chain:** GI is not safeguarding -> Certification versus GI boundary -> Ecology, gender and appropriation
- **Qualified use:** Evaluate livelihood, ecology, labour and appropriation.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS

Beyond | label | safeguarding |
Certification | versus | Ecology

2. MECHANISM / ARGUMENT

relate GI is not safeguarding,
Certification versus GI boundary and
Ecology, gender and appropriation
through form, context and patronage

3. CONSEQUENCE / CONTRAST

This relation supports the answer route
that evaluate livelihood, ecology,
labour and appropriation.

4. UPSC TRAP / ANSWER-USE

LIMIT: Unsupported certification detail
must remain a disclosed gap.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Beyond the GI label converts named evidence into a qualified argument

SESSION 15 - CORE SYNTHESIS - Verified craft PYQs and live institutional link

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Verified craft PYQs and live institutional link is the part of Crafts, Textiles, Folk and Tribal Traditions that explains how Verified craft routes and live boundary fit into one examinable idea.

Technical definition: In art-historical analysis, Verified craft PYQs and live institutional link denotes the source-bounded relationship among Verified craft routes and live boundary, classified by form, medium, patronage, performance context and evidentiary limit.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Verified craft PYQs and live institutional link should be analysed as a relation among Verified craft routes and live boundary, not as an isolated list of names.

MUST-WRITE KEYWORDS

- craft
- PYQs
- live
- institutional
- routes
- routed

How to use them: Define craft, PYQs, live; cite institutional as named evidence; then apply this qualification: Current awards cannot prove technique or tribal attribution. Conclude by showing how the distinction supports this answer route: Close with evidence, boundary and dated-source discipline..

VISUAL FIRST

VERIFIED CRAFT PYQS AND LIVE INSTITUTIONAL LINK

01. Verified craft routes and live boundary

BOUNDARY -> Current awards cannot prove technique or tribal attribution.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

NAMED EVIDENCE AND MECHANISM

- The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

EXAMINER CAUTION

- Current awards cannot prove technique or tribal attribution.

EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Verified craft PYQs and live institutional link.
- **Mains:** Close with evidence, boundary and dated-source discipline.

MINI RECAP

- **Evidence chain:** Verified craft routes and live boundary
- **Qualified use:** Close with evidence, boundary and dated-source discipline.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS craft PYQs live institutional routes routed	2. MECHANISM / ARGUMENT relate Verified craft routes and live boundary through form, context and patronage	3. CONSEQUENCE / CONTRAST This relation supports the answer route that close with evidence, boundary and dated-source discipline.	4. UPSC TRAP / ANSWER-USE LIMIT: Current awards cannot prove technique or tribal attribution.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Verified craft PYQs and live institutional link converts named evidence into a qualified argument			

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Indian Art & Culture | **Tier:** Must-Do (foundation) | **GS Paper:** GS-I. **Core area:** Handicrafts (glassware, textiles, ivory, silver, pottery, bronze, wood, stoneware); Geographical Indications (GI) as origin-linked intellectual property; craft-community livelihoods. **Grounded in:** Nitin Singhania, *Indian Art and Culture*, PDF pp. 378-410; R.S. Sharma, *India's Ancient Past*, PDF pp. 97-103, 250-260, 347-355; Satish Chandra, *History of Medieval India*, PDF pp. 118-149, 317-327; Satish Chandra, *Medieval History, 1526-1748, Part 2*, PDF pp. 358-401; 00_Master-Framework.md Section 3; audited UPSC Mains 2024 GS Paper I (adjacent only). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor | **WRONG:** = trap. *Companion:* advanced/12_Crafts-Textiles-Folk-and-Tribal-Traditions.md.

1. Snapshot and syllabus fit

FACT: This topic covers Indian handicrafts (material-wise) and the GI registration system. **ANALYSIS:** It has **adjacent-only** PYQ relevance: the 2024 Industrial Revolution/handicrafts-decline question and the 2024 cultural-diversity/marginality question both touch this topic's subject matter but are **primarily owned by Modern History/Economy and Indian Society** respectively (see Section 7).

2. Essential vocabulary

Term	Exam-ready meaning
FACT: Handicraft	An "amalgamation of all things crafted by hand," serving as both livelihood and cultural heritage, especially for tribal and rural communities (<i>Nitin...pdf</i> , PDF p. 378).
FACT: Geographical Indication (GI)	"A sign that a particular item has originated from a particular region only," ensuring only registered authorised users may use the product name (<i>Nitin...pdf</i> , PDF p. 406).
FACT: GI Registry	The Government of India office (Chennai) issuing GI certification, functioning under DPIIT, Ministry of Commerce and Industry (<i>Nitin...pdf</i> , PDF p. 407).
FACT: GI validity	GI registration is valid for 10 years, renewable every 10 years; certification covers 34 classes; application fee is Rs. 5,000 (<i>Nitin...pdf</i> , PDF p. 407).
FACT: Sui generis method	Per WIPO, one of three GI-protection methods - a law exclusively and specifically designed for GIs (the other two being certification/collective marks, and general business-practice/consumer-protection law) (<i>Nitin...pdf</i> , PDF p. 408).

3. Core classification

FACT: The book classifies Indian handicrafts by material: glassware, cloth handicrafts, ivory carving, silver crafts, clay and pottery work, bronze crafts, other metal crafts, leather products, wooden work, toys, stoneware, and floor designs (*Nitin...pdf*, PDF p. 378). FACT: GI protection under Indian law operates through the **Geographical Indications of Goods (Registration & Protection) Act, 1999** (in force since 2003), covering only goods (not services) (*Nitin...pdf*, PDF p. 407).

4. Foundation narrative

FACT: Glassmaking's earliest Indian reference is in the Mahabharata, with archaeological evidence from the Painted Grey Ware culture (Ganges Valley, 1000 BC) and a documented glass industry at Brahmmapuri/Kolhapur (Maharashtra, 2nd century BC-2nd century AD, producing lenticular beads); the Vedic *Shatapatha Brahmana* uses the term "kanch/kaca" for glass (*Nitin...pdf*, PDF p. 379). FACT: **Darjeeling Tea was India's first GI-tagged product**, registered in 2004-05 (*Nitin...pdf*, PDF p. 407). FACT: As of July 2025 (per the book's own count), **658 goods** held GI status in India; as of April 2025, **Uttar Pradesh held the highest number of GI tags (77 registered products)**, surpassing Tamil Nadu's previous lead (*Nitin...pdf*, PDF pp. 406-407). FACT: Kerala's Nilambur Teak received a GI tag (Nilambur also has a prominent teak museum and historic plantation landscape); Kangra Tea (Himachal Pradesh) additionally secured protected GI status in the **European Union** (*Nitin...pdf*, PDF pp. 407-408).

FACT: **Regional craft-textile distinctions:**

Tradition	Region/community	Technique/product trap
Patola	Patan, Gujarat	Double ikat; not Pochampally/Kanchipuram
Pochampally ikat	Telangana	Resist-dyed yarn; may be single/double ikat
Kanchipuram silk	Tamil Nadu	Contrasting borders joined to body; silk weaving
Banarasi brocade	Varanasi, Uttar Pradesh	Supplementary-weft zari/brocade traditions
Chikankari	Lucknow, Uttar Pradesh	White-on-white embroidery repertoire
Kantha	Bengal	Running-stitch quilting/embroidery from reused cloth traditions
Kalamkari	Andhra Pradesh/Telangana centres	Hand-drawn/printed cotton textile with mordant/resist processes
Dhokra	Central/eastern Indian artisan communities	Lost-wax non-ferrous metal casting; not a single-state monopoly

FACT: Continuity does not mean unchanged production. R.S. Sharma records Harappan bead, shell, pottery, metal and textile skills and Sangam-era cotton/silk trade; Satish Chandra records karkhanas, weavers, dyers and export textiles under medieval markets. Court, temple, guild, merchant, colonial and contemporary GI/tourism markets successively reshaped design and labour.

ANALYSIS: Ivory carving belongs to historical craft study, but contemporary answers must acknowledge wildlife-protection and trade restrictions; do not present new ivory production as a safeguarding objective.

5. Visual map or comparison table

GI fact	Detail
FACT: First GI-tagged product	Darjeeling Tea (2004-05)
FACT: Total GI count (book, July 2025)	658 goods
FACT: Top GI state (book, April 2025)	Uttar Pradesh (77 products), surpassing Tamil Nadu
FACT: Governing Act	GI of Goods (Registration & Protection) Act, 1999 (in force 2003)
FACT: International frameworks	Paris Convention; WTO TRIPS Agreement

6. Source spine

FACT: *Nitin...pdf*, PDF pp. 378-410 (Chapter 8, "Indian Handicrafts," and Chapter 9, "Geographical Indications" - full chapters), the direct spine for Sections 2-4. FACT: §13.5A draws specifically on PDF pp. 390-391 (the "Textile Industry in North East India" section, including the Eri silk and Meghalaya weaver-community fact).

7. Exact PYQ application

ANALYSIS: **2024 Q13 (adjacent-only), verbatim:** "How far was the Industrial Revolution in England responsible for the decline of handicrafts and cottage industries in India? (Answer in 250 words)" (source spelling defects "Industrial" and "handicrafts" preserved exactly as supplied, UPSC Mains 2024 GS Paper I.txt:91-96). ANALYSIS: This question's primary ownership is **Modern History/Economy** (the deindustrialisation debate); this topic supports it only by supplying the material/craft-form vocabulary (glassware, cloth, metal crafts) whose colonial-era economic displacement is the question's actual subject.

ANALYSIS: **2024 Q20 (adjacent-only), verbatim:** "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities. (Answer in 250 words)" (UPSC Mains 2024 GS Paper I.txt:138-143). ANALYSIS: This question's primary ownership is **Indian Society**; this topic supports it only insofar as tribal/rural craft-community livelihoods illustrate a specific instance of the diversity-marginality relationship, without this topic itself answering the sociological question.

8. CURRENT: Current anchor

- CURRENT: The book reports **658 registered goods as of July 2025**. A later exact total should be cited only from a dated GI Registry registered- status extract or an identified DPIIT parliamentary reply; do not derive it from the Registry's all-applications display or repeat an unsupported web-search total.

9. WRONG: Traps and corrections

- WRONG: A GI tag is a quality certificate or a cultural-heritage designation.

-> It is specifically **origin-linked intellectual property** under the GI Act, 1999 - protecting the exclusive right to use a place-linked product name, not certifying quality or granting heritage status.

- WRONG: GI registration is permanent once granted. -> It is valid for 10 years and must be renewed every 10 years.

- WRONG: GI protection covers services as well as goods. -> The book is explicit that "only goods can be given GI certification (not services)."

- WRONG: Tamil Nadu currently holds the most GI tags in India. -> As of April 2025 (per the book), Uttar Pradesh (77 products) had surpassed Tamil Nadu's previous lead - verify the current leading state against the GI Registry before citing.

- WRONG: One textile name identifies one technique everywhere. -> Ikat, brocade, embroidery, painted/printed cloth and appliqué use different production logics; map name + region + technique.

- WRONG: A GI protects an entire community or guarantees authenticity by itself. -> It protects an origin-linked name for authorised users; labour conditions, raw materials, design copying and benefit-sharing require separate institutions.

- FACT: **Local PYQ trap**: CSE 2015 defines Kalamkari as hand-painted cotton textile in South India; CSE 2018's craft-state matching tests precise regional attribution.

10. Mains framework

1. Distinguish handicraft (material/community-based livelihood and heritage) from GI (a specific legal/IP status) as two related but distinct concepts.

2. Cite Darjeeling Tea's 2004-05 first-GI status as the concrete opening fact for any GI-related answer.

3. Use the sui generis/certification-mark/business-practice three-method WIPO framework where a question invites comparative IP-protection analysis.

4. For the 2024 Q13/Q20 adjacent PYQs, explicitly acknowledge their primary ownership elsewhere while supplying this topic's specific craft/material vocabulary as support.

5. Close with a dated, current GI-total figure rather than an undated round number.

11. Boundaries with other subjects

- WRONG: **Modern History/Economy owns** the Industrial Revolution-and-deindustrialisation debate (2024 Q13) as its primary subject.

- WRONG: **Indian Society owns** the diversity-marginality correlation (2024 Q20) as its primary subject.

- WRONG: **Economy owns** tourism and craft-market economics as a sectoral economic question.

- FACT: Cross-links: Topic 07 (GI-tagged folk/tribal painting forms overlap with craft traditions), Topic 14 (GI Registry as an institutional ledger entry, distinct from WHS/ICH/Memory of the World).

12. Companion links

- FACT: Advanced companion:
advanced/12_Crafts-Textiles-Folk-and-Tribal-Traditions.md.

- FACT: 00_Master-Framework.md Section 3 - the WHS/ICH/Memory of the World/GI category-distinction table, reused here for the GI-specific detail.

- ANALYSIS: **Cross-links:** Topic 07 (folk/tribal painting-craft overlap), Topic 14 (GI Registry within the institutional ledger).

13. Answer architecture (10/15/20-mark support)

Core-sufficiency note. This topic owns craft/textile identification, the GI instrument and craft-livelihood analysis, and it **supports** two adjacent 2024 questions owned elsewhere. This section makes basic/12 sufficient for those roles without advanced/12.

13.1 Directive and demand map

If the question says	It is really testing	Do NOT write
<i>Discuss GI as an instrument for safeguarding craft</i>	What GI legally does - and the four things it does not do	"GI protects our traditional crafts"
<i>Craft as livelihood and heritage</i>	The material -> skill -> community -> market -> recognition chain	"Handicrafts are our cultural heritage"
<i>Identify a named craft/textile</i>	Region + community + process + product, discriminated from the nearest look-alike	A one-word state match
<i>Decline of Indian handicrafts under colonialism</i>	This file's material vocabulary, handed to the primary owner	Answering a deindustrialisation question from craft description
<i>Cultural diversity and socio-economic marginality</i>	A specific craft-community instance, handed to the primary owner	A sociological argument this folder does not own
<i>Ecology and craft</i>	Raw material dependence, resource regulation, sustainability	Romanticised "eco-friendly traditional art"
<i>Gender and craft</i>	Where women's labour sits in the production chain and where it is invisible	Unsupported generalisation

13.2 Qualified thesis options

- ANALYSIS: **Narrow-instrument thesis (the highest-value point here):** "A

Geographical Indication is origin-linked intellectual property, not a safeguarding programme: it protects the exclusive right to use a place-linked product **name** by authorised users, for goods only, for a renewable ten-year term - it does not by itself secure income, working conditions, raw-material access or skill transmission."

- ANALYSIS: **Chain thesis:** "Craft survives only if every link holds - material, skill, producing community, market access, legal recognition and safeguarding - and public policy typically intervenes at the legal link while the material and market links fail."

- ANALYSIS: **Continuity-with-change thesis:** "Craft continuity does not mean unchanged production: court, temple, guild, merchant, colonial and contemporary GI/tourism markets each reshaped design, scale and labour."

- ANALYSIS: **Boundary thesis (for the adjacent PYQs):** "This topic supplies the material and craft-form vocabulary; the deindustrialisation verdict belongs to Modern History/Economy and the diversity-marginality proposition to Indian Society, and an answer should say so rather than improvise those disciplines."

13.3 Mark-scaled structures

Marks	Structure
10	Thesis -> the instrument or craft defined precisely -> two named cases with region and process -> one limitation -> verdict
15	Thesis -> the craft-ecology chain -> three or four named craft/textile cases -> GI mechanism with its statutory detail -> livelihood/market limitation -> verdict
20	All of the above -> plus the historical production layer (Harappan to medieval karkhana to colonial) -> ecology, gender and appropriation dimensions -> international protection with a named case -> institutional route -> verdict answering the exact wording

13.4 Evidence bank A - the GI instrument, stated precisely

Element	FACT: Evidence	Analytical use	Limitation
Definition	FACT: "A sign that a particular item has originated from a particular region only," ensuring only registered authorised users may use the product name (<i>Nitin...pdf</i> , PDF p. 406)	Fixes the answer on name protection , not quality certification	WRONG: Not a quality mark, not a heritage designation
Statute	FACT: Geographical Indications of Goods (Registration & Protection) Act, 1999, in force since 2003, covering only goods , not services (<i>Nitin...pdf</i> , PDF p. 407)	Domestic IP law - explicitly not a UNESCO category	WRONG: Never list GI beside WHS/ICH as a UNESCO tag
Administration	FACT: GI Registry, Chennai, under DPIIT, Ministry of Commerce and Industry (<i>Nitin...pdf</i> , PDF p. 407)	Names the institution instead of "the government"	-
Term and scope	FACT: Valid 10 years, renewable every 10 years; covers 34 classes; application fee Rs. 5,000 (<i>Nitin...pdf</i> , PDF p. 407)	Renewability is the point most often missed	WRONG: Registration is not permanent
International frameworks	FACT: Paris Convention; WTO TRIPS Agreement; WIPO's three protection methods, of which <i>sui generis</i> is a law designed exclusively for GIs (the others being certification/collective marks and general business-practice/consumer-protection law) (<i>Nitin...pdf</i> , PDF p. 408)	Supplies a comparative IP frame for a 20-mark demand	ANALYSIS: India's route is the <i>sui generis</i> Act
First and cross-border cases	FACT: Darjeeling Tea was India's first GI-tagged product, registered 2004-05; Kangra Tea (Himachal Pradesh) additionally secured protected GI status in the European Union ; Kerala's Nilambur Teak holds a GI (<i>Nitin...pdf</i> , PDF pp. 407-408)	Kangra Tea is the concrete answer to "is a domestic GI valid abroad?" - only through separate registration	WRONG: Domestic GI does not travel automatically

13.5 Evidence bank B - craft and textile identification (region · community · process · product)

Tradition	FACT: Region	Process/product	Close-option discriminator
Patola	Patan, Gujarat	Double ikat, resist-dyed in both warp and weft	Not Pochampally, not Kanchipuram
Pochampally ikat	Telangana	Resist-dyed yarn; may be single or double ikat	Ikat family, different centre and pattern logic
Kanchipuram silk	Tamil Nadu	Contrasting borders joined to the body; silk weaving	Border-joining technique is the marker
Banarasi brocade	Varanasi, Uttar Pradesh	Supplementary-weft zari/brocade	A <i>weave</i> tradition, not embroidery
Chikankari	Lucknow, Uttar Pradesh	White-on-white embroidery repertoire	Embroidery, not weave
Kantha	Bengal	Running-stitch quilting/embroidery from reused cloth	Reuse is intrinsic to the form
Kalamkari	Andhra Pradesh/Telangana centres	Hand-drawn or block-printed cotton with mordant/resist dyeing	A <i>surface</i> process; overlaps topic 07
Dhokra	Central and eastern Indian artisan communities	Lost-wax non-ferrous metal casting	WRONG: Not a single-state monopoly
Glassware	Ganges valley and Deccan antecedents	FACT: Earliest Indian reference in the Mahabharata; Painted Grey Ware evidence (Ganges valley, 1000 BC); documented glass industry at Brahmapuri/Kolhapur, Maharashtra, 2nd century BC-2nd century AD, producing lenticular beads; the Vedic <i>Shatapatha Brahmana</i> uses "kanch/kaca" for glass (<i>Nitin...pdf</i> , PDF p. 379)	The one craft in this file with a full antiquity chain
Material-wise classes	Pan-Indian	FACT: Glassware, cloth handicrafts, ivory carving, silver crafts, clay and pottery, bronze crafts, other metal crafts, leather products, wooden work, toys, stoneware, floor designs (<i>Nitin...pdf</i> , PDF p. 378)	The book's own classification - use it as an answer spine

13.5A Evidence bank B+ - North-East handloom, and the Eri silk fact stated exactly

Why this section exists. A hostile review found that the routed 2026 Prelims demand naming **Eri silk** had no supporting fact in Core - the file recorded only the **Oeko-Tex** half of it as a bounded gap. The Eri-silk production fact **is** locally sourced and is now written; the certification half remains bounded, and the two are deliberately kept apart below.

State	FACT: Community / weavers	FACT: Fibre and product	Discriminator
Meghalaya	FACT: "The Garos, Khasi and Jaintia tribes of Meghalaya are skilled weavers , known for their handwoven fabrics" (<i>Nitin...pdf</i> , PDF p. 391)	FACT: " Eri silk is commonly produced in this region . The tribes weave a variety of garments like shawls, sarongs and mekhela chadors by using both silk and cotton fabrics " (PDF p. 391)	FACT: This is the answerable Eri-silk fact : fibre + state + three named communities + product range. WRONG: Do not attribute Eri silk exclusively to Assam, and do not confuse Eri with Muga
Assam	-	FACT: Famous for silk production, "particularly the golden Muga silk ," used for sarees, mekhela chadors and other garments (PDF p. 390)	FACT: Muga = Assam, golden . The mekhela chador is woven in both Assam and Meghalaya, so it cannot by itself identify a state
Manipur	-	FACT: Moirang Phee (a silk fabric combining silk and cotton) and the Phanek , a wraparound skirt worn by Manipuri women, usually woven in vibrant colours with traditional motifs (PDF p. 390)	Named fabric plus named garment
Nagaland	FACT: "Each tribe of Nagaland has its unique patterns and motifs which reflect their cultural identity"	FACT: Vibrant colours, intricate designs, natural dyes (PDF pp. 390-391)	Motif-as-identity is the point, not a single state style
Arunachal Pradesh	FACT: Adi, Apatani and Nyishi tribes for intricate weaves; the Monpa tribe for vibrant colours	FACT: Handwoven jackets, skirts, shawls and traditional dresses (PDF p. 391)	Four named communities
Mizoram	FACT: Women are primarily responsible for weaving	FACT: The Puan - in Mizo, cloth decorated with exclusive needlework in the shape of a stripe or an arrow, worn by both men and women (PDF p. 391)	ANALYSIS: The gendered division of labour is stated by the source and is directly usable in a craft-livelihood answer
Tripura	-	FACT: Vertical and horizontal stripes with dispersed embroidery in various colours (PDF p. 391)	Pattern grammar, not a named fabric

ANALYSIS: **Answer use**: North-East handloom is the folder's clearest case of **community-held technique** - the fibre, the weaver group and the garment are named together, which is exactly the "region · community · process · product" structure §13.5 demands. FACT: The source's own frame: "Each tribe in the Northeast Indian states has an expertise in weaving," using the traditional sequence of **ginning, spinning and weaving** (PDF p. 390).

WRONG: **The firewall that must not be crossed**. The **production** fact (Eri silk, Meghalaya, Garo/Khasi/Jaintia weavers) is **source-supported and writable**. The **Oeko-Tex certification** half of the same routed demand is **not**: no local source carries its criteria, its scope, its issuing body's standards or the current certification status of any Indian producer. ANALYSIS: Answer the production half from this table, answer the certification half only at the level of the **certification-versus-GI distinction** in §13.9, and **write nothing else**. Conflating a voluntary private textile-testing standard with a statutory GI is the error the question is built to catch.

ANALYSIS: **Identification rule**: name + region alone is a matching exercise; name + region + **process** is an answer. Ikat, brocade, embroidery, painted/printed cloth and applique use different production logics.

13.6 Evidence bank C - the craft-ecology chain and where it breaks

- ANALYSIS: **The analytical payoff:** a GI tag intervenes at the legal-recognition

link only. It does not by itself guarantee raw-material supply, fair price, working conditions, design protection against copying by authorised users, or intergenerational skill transmission - which is why GI-tagged crafts can still decline.

- FACT: **Historical production layer:** R.S. Sharma records Harappan bead,

shell, pottery, metal and textile skills and Sangam-era cotton and silk trade; Satish Chandra records artisans, master-craftsmen, karkhanas, putting-out/*dadni* relations and export textiles under medieval markets. ANALYSIS: Use this to show that craft production has always been organised through markets and intermediaries, not only through households.

- ANALYSIS: **Ecology and regulation:** ivory carving belongs to historical craft

study; contemporary answers must acknowledge wildlife-protection and trade restrictions and must not present new ivory production as a safeguarding objective. The same logic applies to any craft dependent on a regulated species or a depleting material.

- ANALYSIS: **Gender and community:** where a craft's preparatory labour

(spinning, sorting, finishing) is domestic and its marketed stage is not, recognition and income attach to the visible stage. State this as a structural observation; WRONG: do not attach unsupported statistics.

- ANALYSIS: **Appropriation:** a GI protects a *name*, so design motifs can be

copied by non-registered producers outside the protected name - the gap through which cultural appropriation claims usually run.

13.7 Boundary hand-offs for the two adjacent 2024 PYQs

PYQ	Primary owner	FACT: What this file supplies	WRONG: What it must not attempt
2024 Q13 - Industrial Revolution and the decline of handicrafts/cottage industries	Modern History / Economy	The craft classes and processes that were displaced (glassware, cloth handicrafts, metal crafts), and the medieval production organisation that preceded them	Tariff policy, revenue systems, the deindustrialisation debate's verdict
2024 Q20 - cultural diversities and socio-economic marginalities	Indian Society	One concrete instance: tribal and rural craft communities whose livelihood depends on a culturally specific skill with weak market power	The sociological proposition itself, or any correlation claim

13.8 Reasoned verdict scaffolds

- **GI demand:** "GI is a necessary but strikingly narrow instrument: it

secures a name against misuse and leaves every other condition of a craft's survival to institutions that the GI Act does not create."

- **Livelihood demand:** "Craft policy fails when it treats a craft as a

product to be certified rather than as a production system to be sustained."

- **Continuity demand:** "Indian craft traditions have survived by changing

patron and market repeatedly; the contemporary question is whether the tourism-and-certification market can reproduce skill as effectively as the court, temple and export markets once did."

13.9 Factual-risk and dynamic-status controls

- ANALYSIS: **Dynamic figures, dated and bounded:** the book reports **658 registered goods as of July 2025, and Uttar Pradesh with 77 registered products as of April 2025**, having surpassed Tamil Nadu. **WRONG:** Do not present either as today's figure. A later total may be cited only from a dated GI Registry registered-status extract or an identified DPIIT parliamentary reply - never from the Registry's all-applications display and never from an unsupported web total.

- **WRONG:** Do not state a GI registration year for a craft unless it is recorded here or taken from a dated Registry source.

- **WRONG:** Do not claim that a domestic GI is automatically protected abroad.

- **WRONG:** Do not present GI as a UNESCO category or as equivalent to ICH.

- **WRONG:** Do not invent artisan numbers, export values or employment figures.

- ANALYSIS: The 2026 routed Prelims demand on **Oeko-Tex certification for Eri

silk **has** two separable halves, and **only one is answerable. FACT:** Answerable: **the production fact** - Eri silk is commonly produced in Meghalaya, **where the** Garo, Khasi and Jaintia **tribes are skilled weavers producing shawls, sarongs and mekhela chadors from silk and cotton (Nitin...pdf, PDF p. 391; §13.5A). WRONG:** Bounded gap, unchanged: Oeko-Tex **is a private/voluntary textile-testing standard, a different instrument from a statutory GI;** this folder holds no dated source on its criteria, scope, issuing standards or any Indian producer's current certification status**, so answer that half only at the level of the certification-versus-GI distinction and invent no standard details, numbers or dates.

- **WRONG:** Do not attribute Eri silk exclusively to Assam; **Muga** is the golden

Assam silk, and the **mekhela chador** is woven in both states, so it cannot identify a state on its own.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule:** The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented:** 2026

- **Paper(s):** Prelims GS-I

- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	29	Oeko-Tex certification for Eri silk and eco-conscious textile markets	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans - ■2026-■GS1-■Provisi onal); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Oeko-Tex certification for Eri silk and eco-conscious textile markets

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	22	Chapchar Kut Khongjom Parba Thang-Ta folk cultural traditions	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2018	Prelims GS-I	54	Regional textile craft heritage Puthukuli Sujni Uppada pairs	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Chapchar Kut Khongjom Parba Thang-Ta folk cultural traditions
- Regional textile craft heritage Puthukuli Sujni Uppada pairs

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

Semantic-completeness ownership and PYQ control

- **Owned core:** craft ecology from raw material through skill, producing community, market, legal recognition and safeguarding; material classes; ikat, brocade, embroidery, painted cloth, metal casting and region-specific handloom traditions; GI mechanics and limits.
- **Source/inference control:** fibre, material, tool, process, motif, product, producing community, region and dated registration are evidence. A marketed label cannot establish tribal authorship, unchanged continuity, fair remuneration or community consent.
- **Date control:** archaeological evidence, textual reference, workshop history, colonial market change, GI registration, foreign protection and current award or certification status are separate chronologies.
- **Geography control:** Patola-Patan, Pochampally-Telangana, Banarasi brocade, Lucknow Chikankari, Bengal Kantha and North-East community-fibre pairings remain specific; mekhela chador alone cannot identify a state.
- **Terminology/style control:** double and single ikat, supplementary-weft brocade, embroidery, mordant or resist Kalamkari, lost-wax Dhokra, GI and voluntary certification are not synonyms.
- **Boundary:** Topic 06 owns sculpture and pottery typology, Topic 07 painting, Topic 10 performance, Topic 14 heritage policy, Modern History and Economy deindustrialisation, and Indian Society marginality.
- **Community control:** living traditions are described through named communities, labour, gender, ecology and appropriation limits without freezing communities as timeless or treating state labels as ownership.
- **Verified PYQ ownership, 2018-2026:** two 2018 objective matching routes

and the provisional 2026 Eri-Oeko-Tex route are direct. The 2024 handicraft-decline and diversity-marginality Mains demands remain cross-owned; no unsupported certification rule or answer letter is added.

INDIAN ART AND CULTURE DEEP-REVIEW CORE CONTROL

- **Must remember:** Craft survival depends on raw material, skill, community, market, legal recognition and safeguarding, while textiles must pair technique and centre: Patola double ikat, Pochampally resist dye, Banarasi brocade and Chikankari embroidery.
- **Close distinction:** A Geographical Indication protects an origin-linked goods name for authorised users under the 1999 Act, operational since 2003 with renewable ten-year registration; it is neither UNESCO status nor a quality certificate.
- **Evidence / interpretation limit:** GI does not guarantee fair price, ecology, labour conditions or transmission, Indian protection does not automatically extend abroad, and folk or tribal production must retain community, gender and appropriation limits.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Handicraft and material classes?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: A. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Handicraft and material classes?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: B. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Handicraft and material classes?

A. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. D. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

Answer: C. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Handicraft and material classes?

A. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: D. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Craft ecology chain?

A. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: A. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Craft ecology chain?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: B. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Craft ecology chain?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: C. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Craft ecology chain?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: D. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies GI as origin-linked IP?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: A. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under GI as origin-linked IP?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: B. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of GI as origin-linked IP?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: C. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about GI as origin-linked IP?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: D. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies GI legal mechanics?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: A. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under GI legal mechanics?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: B. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of GI legal mechanics?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: C. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about GI legal mechanics?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

Answer: D. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies First and cross-border GI examples?

A. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: A. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under First and cross-border GI examples?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: B. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of First and cross-border GI examples?

A. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: C. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about First and cross-border GI examples?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: D. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Continuity through market change?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: A. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Continuity through market change?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Answer: B. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Continuity through market change?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. C. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: C. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Continuity through market change?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: D. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Patola and Pochampally?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: A. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Patola and Pochampally?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: B. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Patola and Pochampally?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: C. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Patola and Pochampally?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: D. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Kanchipuram and Banarasi?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: A. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Kanchipuram and Banarasi?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Answer: B. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Kanchipuram and Banarasi?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: C. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Kanchipuram and Banarasi?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: D. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Chikankari and Kantha?

A. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

Answer: A. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Chikankari and Kantha?

A. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. B. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: B. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Chikankari and Kantha?

A. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: C. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Chikankari and Kantha?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: D. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Kalamkari and Dhokra?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. D. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

Answer: A. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Kalamkari and Dhokra?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: B. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Kalamkari and Dhokra?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: C. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Kalamkari and Dhokra?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Answer: D. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Glass craft chronology?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: A. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Glass craft chronology?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: B. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Glass craft chronology?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. C. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. D. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

Answer: C. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Glass craft chronology?

A. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: D. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies North-East handloom process?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: A. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under North-East handloom process?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: B. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of North-East handloom process?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

Answer: C. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about North-East handloom process?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

Answer: D. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Meghalaya Eri evidence?

A. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. B. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: A. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Meghalaya Eri evidence?

A. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: B. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Meghalaya Eri evidence?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: C. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Meghalaya Eri evidence?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: D. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Assam Muga discriminator?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: A. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Assam Muga discriminator?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: B. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Assam Muga discriminator?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. C. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: C. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Assam Muga discriminator?

A. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. B. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: D. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Manipur and Nagaland textiles?

A. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: A. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Manipur and Nagaland textiles?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: B. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Manipur and Nagaland textiles?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.

Answer: C. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Manipur and Nagaland textiles?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. D. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

Answer: D. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Arunachal, Mizoram and Tripura?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: A. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Arunachal, Mizoram and Tripura?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: B. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Arunachal, Mizoram and Tripura?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: C. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Arunachal, Mizoram and Tripura?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: D. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies GI is not safeguarding?

A. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: A. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under GI is not safeguarding?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: B. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of GI is not safeguarding?

A. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: C. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about GI is not safeguarding?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: D. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Certification versus GI boundary?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: A. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Certification versus GI boundary?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

Answer: B. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Certification versus GI boundary?

A. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: C. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Certification versus GI boundary?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.

Answer: D. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Ecology, gender and appropriation?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. A craft survives through linked raw material, skill, producing

community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: A. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Ecology, gender and appropriation?

A. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. B. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: B. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Ecology, gender and appropriation?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: C. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Ecology, gender and appropriation?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: D. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified craft routes and live boundary?

A. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: A. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified craft routes and live boundary?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: B. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified craft routes and live boundary?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: C. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified craft routes and live boundary?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

Answer: D. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No direct GS-I Mains PYQ is routed to Topic 12. The audited direct objective routes are the two 2018 matching demands and the provisional 2026 Eri-Oeko-Tex demand; the 2024 handicraft-decline and diversity-marginality Mains questions remain adjacent routes owned by Modern History or Economy and Indian Society.

OWNER PYQ LEDGER EXTRACTS

7. Exact PYQ application

ANALYSIS: 2024 Q13 (adjacent-only), verbatim: "How far was the Industrial Revolution in England responsible for the decline of handicrafts and cottage industries in India? (Answer in 250 words)" (source spelling defects "Industrial" and "handicrafts" preserved exactly as supplied, UPSC Mains 2024 GS Paper I.txt:91-96). **ANALYSIS:** This question's primary ownership is **Modern History/Economy** (the deindustrialisation debate); this topic supports it only by supplying the material/craft-form vocabulary (glassware, cloth, metal crafts) whose colonial-era economic displacement is the question's actual subject.

ANALYSIS: 2024 Q20 (adjacent-only), verbatim: "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities. (Answer in 250 words)" (UPSC Mains 2024 GS Paper I.txt:138-143). **ANALYSIS:** This question's primary ownership is **Indian Society**; this topic supports it only insofar as tribal/rural craft-community livelihoods illustrate a specific instance of the diversity-marginality relationship, without this topic itself answering the sociological question.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule:** The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented:** 2026
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	29	Oeko-Tex certification for Eri silk and eco-conscious textile markets	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans - ■2026-■GS1-■Provis ional); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Oeko-Tex certification for Eri silk and eco-conscious textile markets

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	22	Chapchar Kut Khongjom Parba Thang-Ta folk cultural traditions	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2018	Prelims GS-I	54	Regional textile craft heritage Puthukuli Sujni Uppada pairs	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Chapchar Kut Khongjom Parba Thang-Ta folk cultural traditions
- Regional textile craft heritage Puthukuli Sujni Uppada pairs

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

8. Exact PYQ application

ANALYSIS: 2024 Q13 (adjacent-only): this file's contribution is the explicit craft-ecology-chain boundary statement (Section 4) - naming which part of the deindustrialisation debate this topic supports (the object/material vocabulary) and which part it does not own (the causal economic argument), rather than attempting a full Modern History/Economy answer under this subject's label.

ANALYSIS: 2024 Q20 (adjacent-only): similarly, this topic's craft-community livelihood material can illustrate, but not itself resolve, the broader diversity-marginality correlation question owned by Indian Society.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish a craft tradition from a Geographical Indication. Answer in about 150 words.

Model thesis: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Claim -> named evidence -> analysis -> qualification:

- Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.
- A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.
- A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.
- India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

Qualified conclusion: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Demand decoding: The directive **answer** requires a direct position on "Distinguish a craft tradition from a Geographical Indication. Answer in about 150 words.", every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Analytical body:

1. **Claim and named evidence:** Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence definition and thesis; organise three named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Distinguish a craft tradition from a Geographical Indication. Answer in about 150 words.”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 2 - 10 MARKS

Question: Compare ikat, brocade, embroidery and painted or printed textile processes with examples. Answer in about 150 words.

Model thesis: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Claim -> named evidence -> analysis -> qualification:

- Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.
- Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.
- Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.
- Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Qualified conclusion: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Demand decoding: The directive **compare** requires a direct position on “Compare ikat, brocade, embroidery and painted or printed textile processes with examples....”, every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Analytical body:

1. **Claim and named evidence:** Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence definition and thesis; organise three named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Compare ikat, brocade, embroidery and painted or printed textile processes with examples...”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 3 - 15 MARKS

Question: Explain why GI recognition cannot by itself safeguard craft livelihoods. Answer in about 250 words.

Model thesis: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Claim -> named evidence -> analysis -> qualification:

- A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.
- GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.
- Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Qualified conclusion: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Demand decoding: The directive **explain** requires a direct position on “Explain why GI recognition cannot by itself safeguard craft livelihoods. Answer in about 250...”, every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Analytical body:

1. **Claim and named evidence:** A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence definition and thesis; organise five named monuments, objects, forms, texts, practitioners, communities or institutions as claim

-> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Explain why GI recognition cannot by itself safeguard craft livelihoods. Answer in about 250...”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess North-East handloom traditions through community, fibre, process and product. Answer in about 250 words.

Model thesis: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Claim -> named evidence -> analysis -> qualification:

- The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.
- Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.
- Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.
- Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.
- Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Qualified conclusion: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Demand decoding: The directive **assess** requires a direct position on “Assess North-East handloom traditions through community, fibre, process and product. Answer...”, every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Analytical body:

1. **Claim and named evidence:** The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

5. **Claim and named evidence:** Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence definition and thesis; organise five named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For "Assess North-East handloom traditions through community, fibre, process and product. Answer...", replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 5 - 20 MARKS

Question: Trace continuity and change in Indian craft production from early material cultures to contemporary markets. Answer in about 300 words.

Model thesis: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Claim -> named evidence -> analysis -> qualification:

- Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.
- The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.
- GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Qualified conclusion: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Demand decoding: The directive **trace** requires a direct position on "Trace continuity and change in Indian craft production from early material cultures to...", every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Analytical body:

1. **Claim and named evidence:** Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

3. **Claim and named evidence:** GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence definition and thesis; organise six to eight named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Trace continuity and change in Indian craft production from early material cultures to...”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 6 - 20 MARKS

Question: Discuss the institutional and ethical framework needed to conserve living craft traditions. Answer in about 300 words.

Model thesis: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Claim -> named evidence -> analysis -> qualification:

- A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.
- Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.
- The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.
- Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.
- The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

Qualified conclusion: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Demand decoding: The directive **discuss** requires a direct position on “Discuss the institutional and ethical framework needed to conserve living craft traditions....”, every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Analytical body:

1. **Claim and named evidence:** A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

2. **Claim and named evidence:** Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
5. **Claim and named evidence:** The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence definition and thesis; organise six to eight named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For "Discuss the institutional and ethical framework needed to conserve living craft traditions...", replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Indian Art & Culture | **Tier:** Advanced | **GS Paper:** GS-I. **Core area:** Craft ecology (material-skill-community-market-GI- safeguarding chain); colonial deindustrialisation as a contextual bridge; GI as a contested/limited safeguarding tool. **Grounded in:** Nitin Singhania, *Indian Art and Culture*, PDF pp. 378-410; R.S. Sharma, *India's Ancient Past*, PDF pp. 97-103, 250-260; Satish Chandra, *History of Medieval India*, PDF pp. 317-327; Satish Chandra, *Medieval History, 1526-1748, Part 2*, PDF pp. 358-401; 00_Master-Framework.md Sections 4-5; audited UPSC Mains 2024 GS Paper I (adjacent only). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor | **WRONG:** = trap. *Companion:* basic/12_Crafts-Textiles-Folk-and-Tribal-Traditions.md.

1. Analytical question and thesis

Question: Does a GI tag actually safeguard a craft tradition and its producing community, or does it protect only the product's market name - and how should this topic engage the adjacent Industrial Revolution question without overstepping into Modern History/Economy's primary territory? **Thesis:** ANALYSIS: A GI tag is a narrow, market-facing intellectual-property instrument (protecting a product name's exclusive regional association) and should not be conflated with comprehensive craft-community safeguarding (which requires skill transmission, fair market access and livelihood security) - this distinction is the necessary analytical bridge between the legal instrument (Section 3-4 here) and the deindustrialisation question (2024 Q13), which asks about the historical economic *decline* of the very handicraft base that GI protection today only partially addresses.

2. Advanced vocabulary

Term	Precise meaning
ANALYSIS: Craft ecology chain	Material -> skill/technique -> producing community -> market access -> legal recognition (GI) -> safeguarding - a GI tag intervenes only at the "legal recognition" link; it does not by itself guarantee skill transmission or fair market access at the earlier links.
FACT: GI as narrow IP instrument, not livelihood guarantee	The book's own description of GI as protecting only the <i>product name's</i> exclusive regional use (<i>Nitin...pdf</i> , PDF p. 406) - not the producing community's income, working conditions or skill transmission - is the precise legal boundary an advanced answer must not overstate.
ANALYSIS: Deindustrialisation-as-context, not this topic's primary claim	The 2024 Q13 PYQ's actual analytical content (whether English industrial goods displaced Indian handicrafts/cottage industries) belongs to Modern History/Economy; this file's role is to supply the specific craft-material vocabulary (glassware, metal crafts, cloth handicrafts) that gives that debate concrete content, not to adjudicate the deindustrialisation thesis itself.
ANALYSIS: Continuity through market change	A craft may retain a technique while changing patron, motif, scale or product: temple/court/guild demand can become merchant-export, colonial exhibition, tourist or GI market demand. Continuity is therefore selective adaptation, not fossilisation.

3. Comparative framework

Instrument/mechanism	What it protects	What it does NOT guarantee
FACT: GI tag	Exclusive regional-name use for a specific good, for a renewable 10-year term	Producer income, skill transmission to the next generation, fair-trade market access
ANALYSIS: EU cross-registration (e.g. Kangra Tea)	Additional export-market legal protection	Domestic-market fair pricing or producer welfare
ANALYSIS: SNA/LKA/Sahitya Akademi-type recognition (topic 14, for comparison)	Individual/institutional prestige recognition	Community-wide livelihood security

4. Evidence, form and interpretation

FACT: The book's GI chapter is explicit that certification protects "goods" only (not services) and lapses without renewal every 10 years (*Nitin...pdf*, PDF p. 407) - this is direct textual evidence that GI status is a bounded, renewable legal instrument, not a permanent heritage designation or a livelihood guarantee. ANALYSIS: Applying the craft-ecology chain (Section 2) to the 2024 Q13 adjacent PYQ: a fully responsible advanced answer should state plainly that this topic's material (glassware, cloth handicrafts, metal crafts) supplies the *object* of the Industrial Revolution's alleged displacement effect, while the *causal economic argument itself* (mechanised English textiles/goods undercutting Indian handicraft producers, tariff and trade-policy effects, deindustrialisation debates among historians) is Modern History/Economy's analytical territory - an advanced answer from this file should explicitly flag this boundary rather than attempting the full economic- historical argument itself. FACT: Kangra Tea's EU GI registration (*Nitin...pdf*, PDF p. 408) is a rare, concrete example of an Indian GI achieving cross-border legal recognition - useful evidence for any question on GI's international dimension, distinct from purely domestic GI registration.

FACT: Medieval evidence adds the missing production layer: Satish Chandra describes artisans, master-craftsmen, karkhanas, putting-out/dadni relations and export textiles. An advanced craft answer should therefore track who controls raw material, tools, credit and market access - not only the finished object's motif.

5. Visual synthesis table

CRAFT ECOLOGY CHAIN

6. Direct-book source spine

FACT: *Nitin...pdf*, PDF pp. 378, 406-408 - the handicrafts chapter's opening framing (livelihood + cultural heritage) and the GI chapter's legal mechanics (validity period, goods-only scope, Darjeeling Tea's first-GI status, Kangra Tea's EU registration).

7. CURRENT: Dated official anchor

- CURRENT: The book reports **658 registered goods as of July 2025**. For a later exact total, cite a dated GI Registry registered-status extract or an identified DPIIT parliamentary reply; the Registry's all-applications display is not itself a count of registered Indian GIs.

8. Exact PYQ application

ANALYSIS: **2024 Q13 (adjacent-only)**: this file's contribution is the explicit craft-ecology-chain boundary statement (Section 4) - naming which part of the deindustrialisation debate this topic supports (the object/material vocabulary) and which part it does not own (the causal economic argument), rather than attempting a full Modern History/Economy answer under this subject's label.

ANALYSIS: **2024 Q20 (adjacent-only)**: similarly, this topic's craft-community livelihood material can illustrate, but not itself resolve, the broader diversity-marginality correlation question owned by Indian Society.

9. WRONG: Attribution, chronology and numeric traps

- WRONG: Presenting a GI tag as equivalent to comprehensive craft-community safeguarding. -> It protects only the product name's regional exclusivity for a renewable term; it does not itself secure skill transmission or livelihood.

- WRONG: Attempting to fully resolve the Industrial-Revolution-and-handicrafts-decline debate (2024 Q13) as if it were this topic's primary content. -> This file supports that debate's material vocabulary only; the causal economic-historical argument belongs to Modern History/Economy.

- WRONG: Treating all GI registrations as domestically valid internationally.
-> Only specific, separately registered cases (e.g. Kangra Tea in the EU) carry cross-border legal protection; a domestic Indian GI tag does not automatically extend abroad.

- WRONG: Treating "tribal craft" as anonymous timeless community expression. ->
Name the producing community where the source supports it, recognise individual makers/design change, and avoid freezing living people into an ahistorical label.

- WRONG: Proposing ivory production as heritage revival. -> Historical documentation and museum conservation are distinct from contemporary wildlife-law compliance.

10. Mains answer frameworks

Central thesis: GI protection should be argued as a narrow, bounded legal instrument within a much longer craft-ecology chain, and any adjacent question on colonial-era deindustrialisation should be answered by explicitly naming this topic's boundary with Modern History/Economy rather than overreaching into that subject's causal-argument territory.

1. **Name the specific craft/material** before discussing any GI or safeguarding mechanism.

2. **State explicitly what a GI tag does and does not protect** (Section 4. wherever a question risks conflating legal recognition with comprehensive safeguarding.

3. **For 2024 Q13/Q20**, state the boundary explicitly: this topic supplies material vocabulary; the causal/sociological argument belongs to Modern History/Economy and Indian Society respectively.

4. **Cite Darjeeling Tea (2004-05) and Kangra Tea (EU registration)** as concrete, dated GI examples.

5. ****Close with a GI total only when a dated registered-status extract or identified parliamentary reply supports it****; otherwise omit the count.

11. Subject boundaries

- WRONG: **Modern History/Economy owns** the Industrial Revolution-and-deindustrialisation causal debate (2024 Q13) in full analytical depth.

- WRONG: **Indian Society owns** the diversity-marginality correlation (2024 Q20) in full analytical depth.

- FACT: This file's craft-ecology-chain method is directly reusable for topic 07's folk/tribal painting-market questions and topic 14's institutional ledger.

12. Companion links

- FACT: Foundation companion:
`basic/12_Crafts-Textiles-Folk-and-Tribal-Traditions.md`.

- FACT: `00_Master-Framework.md` Section 5 - the current-claim verification protocol, applied here to the GI total.

- ANALYSIS: **Cross-links:** Topic 07 (folk/tribal painting-craft market overlap), Topic 14 (GI within the institutional/heritage-category ledger).

13. Verification ledger and open cautions

- FACT: Verified against *Nitin...pdf*, PDF pp. 378, 406-408 directly.

- ANALYSIS: Open caution: the book's 658 figure is explicitly dated July 2025.

Any later total requires a dated registered-status extract or identified DPIIT parliamentary reply; the all-applications display cannot substitute for that evidence.

CONSOLIDATED REGISTER NOTES

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Craft ecology root

RAW MATERIAL -> ecological access
SKILL -> technique and apprenticeship
COMMUNITY -> labour and transmission
MARKET / LAW -> access, GI and safeguarding
MUST REMEMBER: Craft survival depends on raw material, skill, community, market, legal recognition and safeguarding, while textiles must pair technique and centre: Patola double ikat, Pochampally resist dye, Banarasi brocade and Chikankari embroidery.

ASCII MASTER FLOW - PANEL 2/12: GI legal boundary

GI -> origin-linked product name
TERM -> ten years, renewable
SCOPE -> goods, not services
LIMIT -> no automatic livelihood guarantee

ASCII MASTER FLOW - PANEL 3/12: Cross-border protection

DARJEELING TEA -> first Indian GI
INDIAN GI -> domestic protection
KANGRA TEA -> separate EU protection
RULE -> rights do not travel automatically

ASCII MASTER FLOW - PANEL 4/12: Ikat matrix

PATOLA -> Patan, double ikat
POCHAMPALLY -> Telangana, single or double ikat
COMMON -> resist-dyed yarn
TRAP -> centre plus process must match

ASCII MASTER FLOW - PANEL 5/12: Textile process ladder

KANCHIPURAM -> joined silk border
BANARASI -> supplementary-weft brocade
CHIKANKARI -> white embroidery
KANTHA -> running stitch and reused cloth

ASCII MASTER FLOW - PANEL 6/12: Surface and metal process

KALAMKARI -> mordant or resist cotton surface
DHOKRA -> lost-wax metal casting
PROCESS -> determines tools and labour
RULE -> shared craft label proves nothing
CLOSE DISTINCTION: A Geographical Indication protects an origin-linked goods name for authorised users under the 1999 Act, operational since 2003 with renewable ten-year registration; it is neither UNESCO status nor a quality certificate.

ASCII MASTER FLOW - PANEL 7/12: Glass evidence chain

TEXT -> Mahabharata and Shatapatha Brahmana
PGW -> archaeological glass evidence
BRAHMAPURI / KOLHAPUR -> bead industry
LIMIT -> evidence classes must remain separate

ASCII MASTER FLOW - PANEL 8/12: North-East method

COMMUNITY -> identify the weavers
FIBRE -> Eri, Muga, silk or cotton
PROCESS -> ginning, spinning and weaving
PRODUCT -> garment and motif

ASCII MASTER FLOW - PANEL 9/12: Eri-Muga firewall

MEGHALAYA -> Eri, Garo-Khasi-Jaintia
ASSAM -> golden Muga
MEKHELA CHADOR -> shared garment
TRAP -> garment alone cannot identify state

ASCII MASTER FLOW - PANEL 10/12: Regional handloom map

MANIPUR -> Moirang Phee and Phanek
NAGALAND -> tribe-specific motifs and natural dyes
ARUNACHAL -> Adi, Apatani, Nyishi and Monpa
MIZORAM / TRIPURA -> Puan, stripes and embroidery

ASCII MASTER FLOW - PANEL 11/12: Certification gap test

PRODUCTION FACT VERIFIED? -> write Eri evidence
CERTIFICATION CRITERIA VERIFIED? -> no
GI COMPARISON -> legal instrument only
VERDICT -> disclose the bounded gap

ASCII MASTER FLOW - PANEL 12/12: Craft answer spine

DEFINE -> material, skill and community
IDENTIFY -> region, process and product
ANALYSE -> market, law, ecology and labour
QUALIFY -> status, ownership and source limits
EVIDENCE LIMIT: GI does not guarantee fair price, ecology, labour conditions or transmission, Indian protection does not automatically extend abroad, and folk or tribal production must retain community, gender and appropriation limits.
