

SOLVED PRACTICE WORKBOOK

Crafts, Textiles, Folk and Tribal Traditions - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Crafts, Textiles, Folk and Tribal Traditions - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which statement correctly identifies Handicraft and material classes?	5
Q2. Which chronology card should be filed under Handicraft and material classes?	5
Q3. Which option preserves the source-bounded meaning of Handicraft and material classes?	5
Q4. Which statement avoids a close-option trap about Handicraft and material classes?	5
Q5. Which statement correctly identifies Craft ecology chain?	6
Q6. Which chronology card should be filed under Craft ecology chain?	6
Q7. Which option preserves the source-bounded meaning of Craft ecology chain?	6
Q8. Which statement avoids a close-option trap about Craft ecology chain?	6
Q9. Which statement correctly identifies GI as origin-linked IP?	7
Q10. Which chronology card should be filed under GI as origin-linked IP?	7
Q11. Which option preserves the source-bounded meaning of GI as origin-linked IP?	7
Q12. Which statement avoids a close-option trap about GI as origin-linked IP?	7
Q13. Which statement correctly identifies GI legal mechanics?	8
Q14. Which chronology card should be filed under GI legal mechanics?	8
Q15. Which option preserves the source-bounded meaning of GI legal mechanics?	8
Q16. Which statement avoids a close-option trap about GI legal mechanics?	8
Q17. Which statement correctly identifies First and cross-border GI examples?	9
Q18. Which chronology card should be filed under First and cross-border GI examples?	9
Q19. Which option preserves the source-bounded meaning of First and cross-border GI examples?	9
Q20. Which statement avoids a close-option trap about First and cross-border GI examples?	9
Q21. Which statement correctly identifies Continuity through market change?	10
Q22. Which chronology card should be filed under Continuity through market change?	10
Q23. Which option preserves the source-bounded meaning of Continuity through market change?	10
Q24. Which statement avoids a close-option trap about Continuity through market change?	10
Q25. Which statement correctly identifies Patola and Pochampally?	11
Q26. Which chronology card should be filed under Patola and Pochampally?	11
Q27. Which option preserves the source-bounded meaning of Patola and Pochampally?	11

Q28. Which statement avoids a close-option trap about Patola and Pochampally?	11
Q29. Which statement correctly identifies Kanchipuram and Banarasi?	12
Q30. Which chronology card should be filed under Kanchipuram and Banarasi?	12
Q31. Which option preserves the source-bounded meaning of Kanchipuram and Banarasi?	12
Q32. Which statement avoids a close-option trap about Kanchipuram and Banarasi?	12
Q33. Which statement correctly identifies Chikankari and Kantha?	13
Q34. Which chronology card should be filed under Chikankari and Kantha?	13
Q35. Which option preserves the source-bounded meaning of Chikankari and Kantha?	13
Q36. Which statement avoids a close-option trap about Chikankari and Kantha?	13
Q37. Which statement correctly identifies Kalamkari and Dhokra?	14
Q38. Which chronology card should be filed under Kalamkari and Dhokra?	14
Q39. Which option preserves the source-bounded meaning of Kalamkari and Dhokra?	14
Q40. Which statement avoids a close-option trap about Kalamkari and Dhokra?	14
Q41. Which statement correctly identifies Glass craft chronology?	15
Q42. Which chronology card should be filed under Glass craft chronology?	15
Q43. Which option preserves the source-bounded meaning of Glass craft chronology?	15
Q44. Which statement avoids a close-option trap about Glass craft chronology?	15
Q45. Which statement correctly identifies North-East handloom process?	16
Q46. Which chronology card should be filed under North-East handloom process?	16
Q47. Which option preserves the source-bounded meaning of North-East handloom process?	16
Q48. Which statement avoids a close-option trap about North-East handloom process?	16
Q49. Which statement correctly identifies Meghalaya Eri evidence?	17
Q50. Which chronology card should be filed under Meghalaya Eri evidence?	17
Q51. Which option preserves the source-bounded meaning of Meghalaya Eri evidence?	17
Q52. Which statement avoids a close-option trap about Meghalaya Eri evidence?	17
Q53. Which statement correctly identifies Assam Muga discriminator?	18
Q54. Which chronology card should be filed under Assam Muga discriminator?	18
Q55. Which option preserves the source-bounded meaning of Assam Muga discriminator?	18
Q56. Which statement avoids a close-option trap about Assam Muga discriminator?	18
Q57. Which statement correctly identifies Manipur and Nagaland textiles?	19
Q58. Which chronology card should be filed under Manipur and Nagaland textiles?	19
Q59. Which option preserves the source-bounded meaning of Manipur and Nagaland textiles?	19

Q60. Which statement avoids a close-option trap about Manipur and Nagaland textiles?	19
Q61. Which statement correctly identifies Arunachal, Mizoram and Tripura?	20
Q62. Which chronology card should be filed under Arunachal, Mizoram and Tripura?	20
Q63. Which option preserves the source-bounded meaning of Arunachal, Mizoram and Tripura?	20
Q64. Which statement avoids a close-option trap about Arunachal, Mizoram and Tripura?	21
Q65. Which statement correctly identifies GI is not safeguarding?	21
Q66. Which chronology card should be filed under GI is not safeguarding?	21
Q67. Which option preserves the source-bounded meaning of GI is not safeguarding?	21
Q68. Which statement avoids a close-option trap about GI is not safeguarding?	22
Q69. Which statement correctly identifies Certification versus GI boundary?	22
Q70. Which chronology card should be filed under Certification versus GI boundary?	22
Q71. Which option preserves the source-bounded meaning of Certification versus GI boundary?	23
Q72. Which statement avoids a close-option trap about Certification versus GI boundary?	23
Q73. Which statement correctly identifies Ecology, gender and appropriation?	23
Q74. Which chronology card should be filed under Ecology, gender and appropriation?	23
Q75. Which option preserves the source-bounded meaning of Ecology, gender and appropriation?	24
Q76. Which statement avoids a close-option trap about Ecology, gender and appropriation?	24
Q77. Which statement correctly identifies Verified craft routes and live boundary?	24
Q78. Which chronology card should be filed under Verified craft routes and live boundary?	25
Q79. Which option preserves the source-bounded meaning of Verified craft routes and live boundary?	25
Q80. Which statement avoids a close-option trap about Verified craft routes and live boundary?	25

Crafts, Textiles, Folk and Tribal Traditions - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Handicraft and material classes?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: A. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Handicraft and material classes?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: B. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Handicraft and material classes?

A. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. D. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

Answer: C. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Handicraft and material classes?

A. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: D. Explanation: Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Craft ecology chain?

A. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: A. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Craft ecology chain?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: B. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Craft ecology chain?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: C. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Craft ecology chain?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: D. Explanation: A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies GI as origin-linked IP?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: A. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under GI as origin-linked IP?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: B. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of GI as origin-linked IP?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: C. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about GI as origin-linked IP?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: D. Explanation: A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies GI legal mechanics?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: A. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under GI legal mechanics?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: B. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of GI legal mechanics?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: C. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about GI legal mechanics?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

Answer: D. Explanation: India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies First and cross-border GI examples?

A. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: A. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under First and cross-border GI examples?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: B. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of First and cross-border GI examples?

A. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: C. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about First and cross-border GI examples?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: D. Explanation: Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Continuity through market change?

A. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: A. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Continuity through market change?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Answer: B. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Continuity through market change?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. C. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: C. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Continuity through market change?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.

Answer: D. Explanation: Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Patola and Pochampally?

A. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. B. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: A. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Patola and Pochampally?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: B. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Patola and Pochampally?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: C. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Patola and Pochampally?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. D. Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.

Answer: D. Explanation: Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Kanchipuram and Banarasi?

A. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: A. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Kanchipuram and Banarasi?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Answer: B. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Kanchipuram and Banarasi?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: C. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Kanchipuram and Banarasi?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.

Answer: D. Explanation: Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Chikankari and Kantha?

A. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

Answer: A. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Chikankari and Kantha?

A. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. B. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: B. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Chikankari and Kantha?

A. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: C. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Chikankari and Kantha?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.

Answer: D. Explanation: Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Kalamkari and Dhokra?

A. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. D. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

Answer: A. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Kalamkari and Dhokra?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. C. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: B. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Kalamkari and Dhokra?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: C. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Kalamkari and Dhokra?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Answer: D. Explanation: Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. The remaining options belong to different chronology, actor or

Q41. Which statement correctly identifies Glass craft chronology?

A. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. B. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: A. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Glass craft chronology?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: B. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Glass craft chronology?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. C. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. D. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

Answer: C. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Glass craft chronology?

A. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.

Answer: D. Explanation: The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies North-East handloom process?

A. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: A. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under North-East handloom process?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: B. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of North-East handloom process?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. D. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

Answer: C. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about North-East handloom process?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.

Answer: D. Explanation: The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Meghalaya Eri evidence?

A. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. B. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: A. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Meghalaya Eri evidence?

A. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. B. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: B. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Meghalaya Eri evidence?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: C. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Meghalaya Eri evidence?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.

Answer: D. Explanation: Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Assam Muga discriminator?

A. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: A. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Assam Muga discriminator?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: B. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Assam Muga discriminator?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. C. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: C. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Assam Muga discriminator?

A. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. B. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.

Answer: D. Explanation: Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Manipur and Nagaland textiles?

A. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: A. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Manipur and Nagaland textiles?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. C. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: B. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Manipur and Nagaland textiles?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. D. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.

Answer: C. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Manipur and Nagaland textiles?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. D. Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.

Answer: D. Explanation: Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Arunachal, Mizoram and Tripura?

A. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. B. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: A. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Arunachal, Mizoram and Tripura?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: B. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Arunachal, Mizoram and Tripura?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: C. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Arunachal, Mizoram and Tripura?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Answer: D. Explanation: Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies GI is not safeguarding?

A. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: A. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under GI is not safeguarding?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: B. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of GI is not safeguarding?

A. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory,

silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: C. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about GI is not safeguarding?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. D. GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Answer: D. Explanation: GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Certification versus GI boundary?

A. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. B. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: A. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Certification versus GI boundary?

A. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. B. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

Answer: B. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Certification versus GI boundary?

A. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: C. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Certification versus GI boundary?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. C. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. D. The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.

Answer: D. Explanation: The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Ecology, gender and appropriation?

A. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: A. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Ecology, gender and appropriation?

A. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. B. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Answer: B. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or

analytical categories.

Q75. Which option preserves the source-bounded meaning of Ecology, gender and appropriation?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: C. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Ecology, gender and appropriation?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Answer: D. Explanation: Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified craft routes and live boundary?

A. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. B. Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs. C. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone. D. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.

Answer: A. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified craft routes and live boundary?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. C. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. D. A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Answer: B. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified craft routes and live boundary?

A. A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. B. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. C. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. D. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.

Answer: C. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified craft routes and live boundary?

A. India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. B. Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. C. Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. D. The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

Answer: D. Explanation: The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No direct GS-I Mains PYQ is routed to Topic 12. The audited direct objective routes are the two 2018 matching demands and the provisional 2026 Eri-Oeko-Tex demand; the 2024 handicraft-decline and diversity-marginality Mains questions remain adjacent routes owned by Modern History or Economy and Indian Society.

OWNER PYQ LEDGER EXTRACTS

7. Exact PYQ application

ANALYSIS: 2024 Q13 (adjacent-only), verbatim: "How far was the Industrial Revolution in England responsible for the decline of handicrafts and cottage industries in India? (Answer in 250 words)" (source spelling defects "Industrial" and "handicrafts" preserved exactly as supplied, UPSC Mains 2024 GS Paper I .txt :91-96). **ANALYSIS:** This question's primary ownership is **Modern History/Economy** (the deindustrialisation debate); this topic supports it only by supplying the material/craft-form vocabulary (glassware, cloth, metal crafts) whose colonial-era economic displacement is the question's actual subject.

ANALYSIS: 2024 Q20 (adjacent-only), verbatim: "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities. (Answer in 250 words)" (UPSC Mains 2024 GS Paper I .txt :138-143). **ANALYSIS:** This question's primary ownership is **Indian Society**; this topic supports it only insofar as tribal/rural craft-community livelihoods illustrate a specific instance of the diversity-marginality relationship, without this topic itself answering the sociological question.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule:** The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented:** 2026
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	29	Oeko-Tex certification for Eri silk and eco-conscious textile markets	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans - ■2026-■GS1-■Provisional); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Oeko-Tex certification for Eri silk and eco-conscious textile markets

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	22	Chapchar Kut Khongjom Parba Thang-Ta folk cultural traditions	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2018	Prelims GS-I	54	Regional textile craft heritage Puthukuli Sujni Uppada pairs	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Chapchar Kut Khongjom Parba Thang-Ta folk cultural traditions
- Regional textile craft heritage Puthukuli Sujni Uppada pairs

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

8. Exact PYQ application

ANALYSIS: 2024 Q13 (adjacent-only): this file's contribution is the explicit craft-ecology-chain boundary statement (Section 4) - naming which part of the deindustrialisation debate this topic supports (the object/material vocabulary) and which part it does not own (the causal economic argument), rather than attempting a full Modern History/Economy answer under this subject's label.

ANALYSIS: 2024 Q20 (adjacent-only): similarly, this topic's craft-community livelihood material can illustrate, but not itself resolve, the broader diversity-marginality correlation question owned by Indian Society.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish a craft tradition from a Geographical Indication. Answer in about 150 words.

Model thesis: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Claim -> named evidence -> analysis -> qualification:

- Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.
- A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.
- A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.
- India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration.

Qualified conclusion: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Demand decoding: The directive **answer** requires a direct position on "Distinguish a craft tradition from a Geographical Indication. Answer in about 150 words.", every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Analytical body:

1. **Claim and named evidence:** Handicraft joins hand skill, livelihood and cultural heritage; the owner's material classes include glass, cloth, ivory, silver, clay, bronze, other metals, leather, wood, toys, stone and floor designs.

Analysis: Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

2. **Claim and named evidence:** A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.

Analysis: Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

3. **Claim and named evidence:** A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

4. **Claim and named evidence:** India's sui generis GI Act of 1999 has operated since 2003, covers goods rather than services, is administered through the GI Registry at Chennai under DPIIT, and grants renewable ten-year registration. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Craft is a production ecology of material, skill, community and market, whereas GI is a narrow renewable right over an origin-linked name.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence definition and thesis; organise three named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For "Distinguish a craft tradition from a Geographical Indication. Answer in about 150 words.", replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 2 - 10 MARKS

Question: Compare ikat, brocade, embroidery and painted or printed textile processes with examples. Answer in about 150 words.

Model thesis: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Claim -> named evidence -> analysis -> qualification:

- Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together.
- Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery.
- Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions.
- Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities.

Qualified conclusion: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Demand decoding: The directive **compare** requires a direct position on "Compare ikat, brocade, embroidery and painted or printed textile processes with examples....", every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Analytical body:

1. **Claim and named evidence:** Patola from Patan uses double ikat, while Pochampally in Telangana uses resist-dyed yarn and may be single or double ikat; technique and centre must be stated together. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** Kanchipuram silk is distinguished by contrasting borders joined to the body, while Banarasi brocade uses supplementary-weft zari; neither is embroidery. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** Chikankari is Lucknow's white-on-white embroidery repertoire, while Kantha is Bengal running-stitch quilting or embroidery associated with reused cloth traditions. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** Kalamkari uses hand-drawn or block-printed cotton with mordant or resist processes in Andhra Pradesh and Telangana centres, while Dhokra is lost-wax non-ferrous casting across central and eastern artisan communities. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Process, region and product together distinguish textile traditions more reliably than a one-word state match.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence definition and thesis; organise three named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For "Compare ikat, brocade, embroidery and painted or printed textile processes with examples...", replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 3 - 15 MARKS

Question: Explain why GI recognition cannot by itself safeguard craft livelihoods. Answer in about 250 words.

Model thesis: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Claim -> named evidence -> analysis -> qualification:

- A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.
- GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.
- Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.

Qualified conclusion: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Demand decoding: The directive **explain** requires a direct position on "Explain why GI recognition cannot by itself safeguard craft livelihoods. Answer in about 250...", every clause and time boundary, common-axis organisation,

named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Analytical body:

1. **Claim and named evidence:** A craft survives through linked raw material, skill, producing community, market access, legal recognition and safeguarding; failure at any earlier link cannot be repaired by a label alone.
Analysis: Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Name protection acts at only one link of the craft ecology chain and leaves material access, income, labour conditions, transmission and market power unresolved.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence definition and thesis; organise five named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Explain why GI recognition cannot by itself safeguard craft livelihoods. Answer in about 250...”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess North-East handloom traditions through community, fibre, process and product. Answer in about 250 words.

Model thesis: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Claim -> named evidence -> analysis -> qualification:

- The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together.
- Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton.
- Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself.
- Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif.
- Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning.

Qualified conclusion: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Demand decoding: The directive **assess** requires a direct position on “Assess North-East handloom traditions through community, fibre, process and product. Answer...”, every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Analytical body:

1. **Claim and named evidence:** The owner's North-East handloom frame links community-held knowledge to ginning, spinning and weaving; region, community, fibre, process and product must be recorded together. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** Eri silk is commonly produced in Meghalaya, where Garo, Khasi and Jaintia communities are described as skilled weavers of shawls, sarongs and mekhela chadors using silk and cotton. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** Assam is identified with golden Muga silk, while mekhela chador occurs in both Assam and Meghalaya and therefore cannot identify a state by itself. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** Manipur is linked with Moirang Phee and the Phanek, while Nagaland traditions use tribe-specific patterns, vibrant colours and natural dyes; neither should be reduced to a single pan-state motif. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
5. **Claim and named evidence:** Adi, Apatani, Nyishi and Monpa weaving anchors Arunachal Pradesh; women are the primary weavers of Mizoram's Puan; Tripura is described through striped and dispersed-embroidery patterning. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Named community-held weaving systems reveal regional plurality, but close-option discipline is needed for Eri, Muga and shared garments.

Executable exam-length answer / compression plan: For a 15-mark answer, open with a two-sentence definition and thesis; organise five named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Assess North-East handloom traditions through community, fibre, process and product. Answer...”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 5 - 20 MARKS

Question: Trace continuity and change in Indian craft production from early material cultures to contemporary markets. Answer in about 300 words.

Model thesis: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Claim -> named evidence -> analysis -> qualification:

- Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production.
- The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads.
- GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission.

Qualified conclusion: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Demand decoding: The directive **trace** requires a direct position on “Trace continuity and change in Indian craft production from early material cultures to...”, every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Analytical body:

1. **Claim and named evidence:** Harappan, Sangam, medieval karkhana, merchant-export, colonial, tourism and GI markets changed patronage, scale, motif and labour, so continuity means selective adaptation rather than unchanged production. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** The owner links glass to Mahabharata reference, Painted Grey Ware evidence, the term kanch or kaca in the Shatapatha Brahmana, and a Brahmapuri-Kolhapur industry producing lenticular beads. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** GI intervenes at legal recognition but does not by itself secure raw material, fair price, labour conditions, design protection, market power or intergenerational skill transmission. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Technique can persist while patrons, intermediaries, designs and market institutions change, making adaptation rather than stasis the key historical argument.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence definition and thesis; organise six to eight named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Trace continuity and change in Indian craft production from early material cultures to...”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.

ORIGINAL MAINS 6 - 20 MARKS

Question: Discuss the institutional and ethical framework needed to conserve living craft traditions. Answer in about 300 words.

Model thesis: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Claim -> named evidence -> analysis -> qualification:

- A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee.
- Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad.
- The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half.
- Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI.
- The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025 handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners.

Qualified conclusion: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Demand decoding: The directive **discuss** requires a direct position on "Discuss the institutional and ethical framework needed to conserve living craft traditions....", every clause and time boundary, common-axis organisation, named evidence, a counter-position and a qualified verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Analytical body:

1. **Claim and named evidence:** A Geographical Indication protects an origin-linked product name for authorised users; it is not a quality certificate, UNESCO heritage status or community-welfare guarantee. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
2. **Claim and named evidence:** Darjeeling Tea was India's first GI-tagged product in 2004-05, while Kangra Tea obtained separate European Union protection; an Indian registration does not automatically extend abroad. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
3. **Claim and named evidence:** The routed Oeko-Tex demand combines a voluntary textile-testing standard with Eri production; the owner supports the Eri fact but holds no verified criteria or current producer-status evidence for the certification half. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
4. **Claim and named evidence:** Wildlife-law limits bar revivalist arguments for new ivory production; invisible preparatory labour and copying outside a protected name show why ecology, gender and design appropriation require analysis beyond GI. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.
5. **Claim and named evidence:** The routed demands cover 2018 folk-culture and textile matching plus provisional 2026 Eri-Oeko-Tex; deindustrialisation-as-context, not this topic's primary claim, means this topic supplies specific craft-material vocabulary while Modern History and Economy own the causal verdict. The official 2025

handloom-award document is used only as evidence of current institutional recognition, not as a source for unverified winners. **Analysis:** Link form, medium, technique, patronage or performance context to the directive instead of merely listing the example. **Qualification:** State its chronological, regional, attributional or status boundary.

Counter-position / limit: A shared motif, material, religious setting or institutional label does not by itself establish identical function, direct descent, homogeneous community meaning or complete safeguarding.

Qualified conclusion: Effective safeguarding combines legal recognition with ecology, fair market access, visible labour, transmission, documentation and carefully bounded certification claims.

Executable exam-length answer / compression plan: For a 20-mark answer, open with a two-sentence definition and thesis; organise six to eight named monuments, objects, forms, texts, practitioners, communities or institutions as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded close.

Why this earns marks: The answer obeys the directive, compares like with like, connects form and patronage to social meaning, and avoids list-making, essentialism, false continuity and unsupported attribution.

How to improve this answer: For “Discuss the institutional and ethical framework needed to conserve living craft traditions....”, replace the weakest generalisation with one additional named monument, object, text, technique, community or official record and state what that evidence cannot prove.
