KEY DATA

Term	Exam-ready meaning
Political	□ The political concerns what is public or common to the whole community, especially authoritative rule, collective decision and regulation (Gaubu, PDF pp.15-16).
Political theory	□ Systematic knowledge of political phenomena (Gaubu, PDF p.16).
Empirical statement	□ A statement based on observation through sense-experience alone (Gaubu, PDF p.16).
Logical statement	□ A statement based on reasoning, such as formal or inferential relations (Gaubu, PDF p.16).
Evaluative statement	□ A statement based on value-judgment about what is right, good or desirable (Gaubu, PDF p.16).
Political science	□ The component of theory concerned with facts, observation, explanation and generalized propositions about political behaviour (Gaubu, PDF pp.17-18).
Political philosophy	□ The component of theory concerned with justification, criticism, concept-clarification and the ends of political life (Gaubu, PDF pp.17-20).
Ideology	□ A set of ideas used to defend an existing or proposed distribution of power, accepted by adherents without testing validity (Gaubu, PDF p.20).

STATIC THEORY

- ☐ He then defines political theory as systematic knowledge and distinguishes empirical, logical and evaluative statements within that knowledge (Gauba, PDF p.16).
- ☐ Positivists and behaviouralists try to restrict valid knowledge to empirical and logical statements, but Gauba rejects the move to expel evaluative inquiry from theory (Gauba, PDF pp.16-17, 23).
- ☐ Political theory must therefore include both political science and political philosophy: science explains political reality, while philosophy asks what goals and principles should guide collective life (Gauba, PDF pp.17-18).
- ☐ Political science works through observation, generalization, explanation, prediction and prescription; behaviouralism focuses on actual behaviour rather than merely formal institutions (Gauba, PDF pp.18-19).
- ☐ Political philosophy is not only about ideal blueprints; it performs critical evaluation and concept-clarification, and seeks justification rather than explanation alone (Gauba, PDF pp.19-20).
- ☐ The significance of political theory lies in control of social life, social criticism and reconstruction, clarification of concepts, and encouragement to mutual respect and toleration (Gauba, PDF pp.21-23).

MUST-KNOW FACTS

1. Gauba begins by defining the political as the public sphere of rule-making, authoritative decision and regulation for the whole community (Gauba, PDF pp.15-16).
2. He then defines political theory as systematic knowledge and distinguishes empirical, logical and evaluative statements within that knowledge (Gauba, PDF p.16).
3. Positivists and behaviouralists try to restrict valid knowledge to empirical and logical statements, but Gauba rejects the move to expel evaluative inquiry from theory (Gauba, PDF pp.16-17, 23).
4. Political theory must therefore include both political science and political philosophy: science explains political reality, while philosophy asks what goals and principles should guide collective life (Gauba, PDF pp.17-18).
5. Political science works through observation, generalization, explanation, prediction and prescription; behaviouralism focuses on actual behaviour rather than merely formal institutions (Gauba, PDF pp.18-19).
6. Political philosophy is not only about ideal blueprints; it performs critical evaluation and concept-clarification, and seeks justification rather than explanation alone (Gauba, PDF pp.19-20).

HIGH

Foundation · Essential distinctions

GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Structured comparison from the foundation source layer.

KEY DATA

Distinction	What to say precisely
Public vs private	□ Politics concerns the public sphere; not every social or cultural activity is political unless regulation for public order or safety becomes necessary (Gaubu, PDF p.16).
Theory vs ideology	□ Theory is dispassionate and disinterested; ideology is interested and justificatory toward a particular distribution of power (Gaubu, PDF p.20).
Political science vs political philosophy	□ Science asks what the real situation is and which regularities govern behaviour; philosophy asks what is good, right or justified in political life (Gaubu, PDF pp.17-20).
Explanation vs justification	□ Raphael's distinction, endorsed by Gaubu, is that science seeks explanation whereas philosophy seeks justification (Gaubu, PDF p.19).
Empirical/logical vs evaluative	□ Empirical and logical claims are presented as verifiable; evaluative claims concern value-judgment, but Gaubu still treats them as rationally discussable rather than mere emotion (Gaubu, PDF pp.16-17, 20).
Behavioural vs post-behavioural	□ Behaviouralism privileges scientific study of actual behaviour; post-behaviouralism restores concern for values without discarding scientific work on facts (Gaubu, PDF pp.18-19, 23).

HIGH

Foundation · Thinkers and positions

GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Structured comparison from the foundation source layer.

KEY DATA

Thinker	Position in this chapter
Sheldon S. Wolin	□ The political is uniquely concerned with what is common to the whole community (Gauba, PDF p.15).
George Catlin	□ Political theory is divided into political science and political philosophy; science studies control and facts, philosophy studies ends and values (Gauba, PDF p.17).
Andrew Hacker	□ Every political scientist is part scientist and part philosopher; theory needs both factual understanding and a view of political goals (Gauba, PDF pp.17-18).
D.D. Raphael	□ Political philosophy should be recognized by its critical and justificatory function, plus concept-clarification (Gauba, PDF pp.19-20).
David Held	□ If political theory is not systematically pursued, politics may be left to ignorance, self-interest or mere will to power (Gauba, PDF p.23).
David Easton	□□ His decline/revival debate belongs mainly to the advanced companion, but even here he matters because later post-behaviouralism reopens the value-question rather than abolishing science.

STATIC THEORY

- ☐ A question such as "what is a good society?" belongs to political philosophy because it asks about ends, justification and value (Gauba, PDF p.17).
- ☐ Clarifying whether "freedom" means non-interference, self-development or something else is part of political philosophy's concept-clarifying role (Gauba, PDF pp.19, 22).
- ☐ Gauba warns that vague political language allows demagogues and autocrats to exploit words like liberty, equality and democracy for emotional manipulation or legitimation (Gauba, PDF p.22).
- ☐ A strong answer can therefore use data to explain unemployment, but it still needs a philosophical yardstick to judge whether a given policy is fair, free or humane.

MUST-KNOW FACTS

1. A question such as "why do riots occur?" belongs to political science when it seeks causal explanation through observation and generalization (Gauba, PDF pp.18-19, 21).
2. A question such as "what is a good society?" belongs to political philosophy because it asks about ends, justification and value (Gauba, PDF p.17).
3. Clarifying whether "freedom" means non-interference, self-development or something else is part of political philosophy's concept-clarifying role (Gauba, PDF pp.19, 22).
4. Gauba warns that vague political language allows demagogues and autocrats to exploit words like liberty, equality and democracy for emotional manipulation or legitimation (Gauba, PDF p.22).

HIGH

Foundation · Comparison table

GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Structured comparison from the foundation source layer.

KEY DATA

Axis	Political science	Political philosophy	Political theory as a whole
Basic concern	□ Facts of political life and actual behaviour (Gaub, PDF pp.17-18).	□ Values, justification and right conduct in political life (Gaub, PDF pp.18-20).	□ Systematic knowledge of political phenomena including both components (Gaub, PDF pp.16-18).
Main method	□ Observation, generalization, explanation, prediction and prescription (Gaub, PDF p.18).	□ Critical evaluation, concept analysis, synthesis and improvement (Gaub, PDF pp.19-20).	□□ Combines empirical discipline with normative reasoning.
Typical question	□ What happens, why, and with what regularities?	□ What ought to be done, and on what grounds?	□□ Which means fit which ends in public life?
Main function	□ Description (Gaub, PDF p.23).	□ Criticism and reconstruction (Gaub, PDF p.23).	□ Description + criticism + reconstruction together (Gaub, PDF p.23).
Key danger	□ If isolated, it may become value-blind or selectively descriptive (Gaub, PDF pp.20, 23).	□ If isolated from facts, it may become poorly grounded or merely rhetorical (Gaub, PDF p.18).	□□ The task is integration, not one-sidedness.

Foundation · UPSC traps and corrections

GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Exam-ready treatment of UPSC traps and corrections.

Foundation learning layer: concepts → constitutional detail → UPSC application.

UPSC TRAPS

WRONG: Political theory is merely normative.

CORRECT: □ Gauba explicitly includes political science as a part of theory, so theory includes factual explanation as well as value-judgment (Gauba, PDF pp.17-18).

WRONG: Political theory is identical with ideology.

CORRECT: □ Theory critically examines claims; ideology justifies or denounces a power arrangement from an interested standpoint (Gauba, PDF p.20).

WRONG: Political philosophy only designs ideal states.

CORRECT: □ Raphael's role, adopted here, is criticism, justification and concept-clarification, not fantasy alone (Gauba, PDF pp.19-20).

WRONG: Behaviouralism made political theory unnecessary.

CORRECT: □ Even Gauba's summary of post-behaviouralism restores values while preserving scientific method for facts (Gauba, PDF pp.18-19, 23).

WRONG: Evaluative statements are automatically irrational.

CORRECT: □ Gauba rejects that dismissal and argues that values can be debated through dialogue and reasoning (Gauba, PDF pp.16-17, 20).

STATIC THEORY

- □ Easton argued that there had been no outstanding political philosopher after Marx and J.S. Mill and that political scientists lacked research tools capable of explaining fascism, communism and policy relevance in wartime decision-making (Gaubu, PDF p.24).
- □ His remedy was behavioural political science: causal theory, closer integration with other social sciences, and suspension of the quest for values in favour of explaining political behaviour (Gaubu, PDF p.24).
- □ Gauba then notes Easton's own 1969 shift: the post-behavioural revolution asked political science to address contemporary crisis and restored concern with values while retaining scientific investigation (Gaubu, PDF pp.24-25).
- □ Alongside Easton, Cobban described decline under both capitalist and communist systems and still insisted that political science must evolve criteria of judgment beyond social-science methodology alone (Gaubu, PDF p.25).
- □ Lipset went further by claiming that in the United States the long search for the good society had effectively ended because liberal democracy itself approximated it in operation (Gaubu, PDF p.25).
- □ Against this, Strauss argued that positivist political science ignored normative issues and flattened qualitative distinctions among values; Germino identified revival with political philosophy; Marcuse warned that a natural-science style social science could become an instrument of social control (Gaubu, PDF pp.25-27).

MUST-KNOW FACTS

1. Gauba reports David Easton's 1953 complaint that traditional political theory relied on speculation, lacked acute observation of political reality, stayed tied to classics and history of ideas, and had little relevance for contemporary politics (Gaubu, PDF p.24).
2. Easton argued that there had been no outstanding political philosopher after Marx and J.S. Mill and that political scientists lacked research tools capable of explaining fascism, communism and policy relevance in wartime decision-making (Gaubu, PDF p.24).
3. His remedy was behavioural political science: causal theory, closer integration with other social sciences, and suspension of the quest for values in favour of explaining political behaviour (Gaubu, PDF p.24).
4. Gauba then notes Easton's own 1969 shift: the post-behavioural revolution asked political science to address contemporary crisis and restored concern with values while retaining scientific investigation (Gaubu, PDF pp.24-25).
5. Alongside Easton, Cobban described decline under both capitalist and communist systems and still insisted that political science must evolve criteria of judgment beyond social-science methodology alone (Gaubu, PDF p.25).
6. Lipset went further by claiming that in the United States the long search for the good society had effectively ended because liberal democracy itself approximated it in operation (Gaubu, PDF p.25).

INTRO & ORIGIN

Structured comparison from the advanced source layer.

KEY DATA

Concept	Advanced clarification
Causal theory	□ A theory explaining relations of cause and effect, central to Easton's behavioural ambition (Gauba, PDF p.24).
Behaviouralism	□ A scientific approach centred on actual political behaviour, causal explanation and methodological affinity with other social sciences (Gauba, PDF pp.18-19, 24-25).
Post-behaviouralism	□ Easton's 1969 turn toward applying science to crisis and reconnecting inquiry with values and public relevance (Gauba, PDF pp.24-25).
Positivism	□ The view that scientific method is the only source of true knowledge and that knowledge rests on sense-experience (Gauba, PDF p.26).
Political philosophy	□ Critical inquiry into right and wrong, right order, justification and perennial social questions, not reducible to behavioural metrics (Gauba, PDF pp.19-20, 26-27).
Detachment	□ Germino's point is that detachment is not the same as ethical neutrality; one may critically engage without becoming partisan ideology (Gauba, PDF p.26).

GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Structured comparison from the advanced source layer.

KEY DATA

Thinker	Position to retain
David Easton (1953)	□ Traditional theory was speculative, historically bound and methodologically weak; political science needed causal, behavioural, social-scientific foundations (Gaub, PDF p.24).
David Easton (1969)	□ Political science should become practically relevant to crisis-ridden society and revive concern with values without discarding scientific inquiry (Gaub, PDF pp.24-25).
Alfred Cobban	□ Political theory had declined under both capitalist and communist systems, yet politics still required criteria of judgment that narrow methodology alone could not supply (Gaub, PDF p.25).
Seymour Martin Lipset	□ In mid-twentieth-century United States, democracy was presented as the good society in operation, which implied reduced need for grand normative searching (Gaub, PDF p.25).
Leo Strauss	□ Positivist political science is itself a symptom of decline because it evades the hierarchy and seriousness of normative questions (Gaub, PDF pp.25-26).
Dante Germino	□ Revival means recovery of political philosophy as critical inquiry into right order, beyond reductionist behaviouralism and beyond ideology (Gaub, PDF pp.26-27).
Herbert Marcuse	□ Over-measured social science can normalize the status quo by converting critique into observable, administrative categories (Gaub, PDF p.27).
David Held	□ The systematic tasks of political theory remain necessary so politics is not abandoned to ignorance or naked will to power (Gaub, PDF p.23).

 GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Structured comparison from the advanced source layer.

KEY DATA

Perspective	Strongest claim	Gauba's treatment
Behaviouralist	□ Valid theory should explain political behaviour causally and scientifically (Gauba, PDF p.24).	□ Gauba takes the scientific demand seriously but does not let it exhaust theory (Gauba, PDF pp.18-19, 27).
Positivist/value-neutral	□ Values are subjective preferences or beyond reliable knowledge (Gauba, PDF pp.16-17, 26).	□ Rejected as too narrow because public policy needs value-judgment and justification (Gauba, PDF pp.17, 23).
Classical normative/traditionalist	□ Political inquiry must ask about right order, justice and the good society (Gauba, PDF pp.19-20, 26).	□ Preserved, but not as licence for ungrounded speculation.
Post-behavioural synthesis	□ Facts and methods matter, but relevance, values and crisis-response matter too (Gauba, PDF pp.24-25, 27).	□ This is the chapter's most balanced settlement.

STATIC THEORY

- □ Yet Easton's own post-behavioural turn is itself evidence that pure behavioural closure was insufficient for political inquiry in times of crisis (Gauba, PDF pp.24-25).
- □ Cobban and Lipset represent different decline narratives: one says modern systems marginalize theory; the other says liberal democracy has already solved the central normative search, at least in affluent Western context (Gauba, PDF p.25).
- □ Strauss rejects behavioural flattening of value-rankings; Germino rejects any reunion that strips theory of perennial moral concerns; Marcuse rejects metrics that convert critique into social control (Gauba, PDF pp.25-27).
- □□ The debate therefore has two levels: a methodological dispute over evidence, and a civilizational dispute over whether politics can ever avoid argument about ends.
- □□ Gauba's own synthesis is closer to "critical empiricism" than either crude positivism or free-floating moralism.

MUST-KNOW FACTS

1. Easton's early criticism bites hardest where traditional theory merely repeats classic texts without explaining contemporary political behaviour; Gauba does not deny that problem (Gauba, PDF p.24).
2. Yet Easton's own post-behavioural turn is itself evidence that pure behavioural closure was insufficient for political inquiry in times of crisis (Gauba, PDF pp.24-25).
3. Cobban and Lipset represent different decline narratives: one says modern systems marginalize theory; the other says liberal democracy has already solved the central normative search, at least in affluent Western context (Gauba, PDF p.25).
4. Strauss rejects behavioural flattening of value-rankings; Germino rejects any reunion that strips theory of perennial moral concerns; Marcuse rejects metrics that convert critique into social control (Gauba, PDF pp.25-27).

GS-II / Political
Theory Political
Theory

INTRO & ORIGIN

Structured comparison from the advanced source layer.

KEY DATA

Issue	Early behavioural critique	Normative revival critique	Gauba's settlement
Problem in old theory	❑ Too speculative, too historicist, too detached from causal analysis (Gauba, PDF p.24).	❑ Science-first inquiry neglects right and wrong, hierarchy of values and critical vision (Gauba, PDF pp.25-27).	❑❑ Both criticisms capture part of the truth.
Role of values	❑ Suspend or minimize them in science-first inquiry (Gauba, PDF p.24).	❑ Restore them as central to political philosophy (Gauba, PDF pp.25-27).	❑ Values are indispensable for ends and policy judgment (Gauba, PDF pp.23, 27).
Role of empirical method	❑ Central and foundational (Gauba, PDF p.24).	❑ Not rejected, but subordinated to broader critical purposes by many revivalists (Gauba, PDF pp.26-27).	❑ Essential for understanding facts and strengthening means (Gauba, PDF p.27).
Public relevance	❑ Behavioural science wanted policy relevance and decision-making status (Gauba, PDF p.24).	❑ Critics wanted relevance in the sense of speaking truth to power and resisting status quo legitimization (Gauba, PDF pp.26-27).	❑❑ Relevance requires both explanatory power and normative courage.
Final verdict	❑ Political theory is dead.	❑ Science is useless.	❑ Neither claim holds; theory survives as an integrated enterprise (Gauba, PDF p.27).

NEWS TRIGGER

❑❑ If asked to analyse a policy on preventive detention, a behavioural approach can study compliance, opposition and institutional effects, but a philosophical approach must still ask whether liberty is being unjustifiably restricted. ❑❑ If asked whether elections deepen democracy, science can measure turnout and participation, while philosophy must judge whether those patterns amount to meaningful freedom, equality and legitimacy. ❑❑ If a regime claims "efficiency" as its justification, behavioural data may show administrative output, but political philosophy asks whether efficiency without justice or consent is politically defensible.

STATIC THEORY

- Q1. Which statement correctly resolves this common misconception: "Political theory is merely normative."?
- A. ☐ Gauba explicitly includes political science as a part of theory, so theory includes factual explanation as well as value-judgment (Gauba, PDF pp.17-18).
- B. Political theory is merely normative.
- C. Political theory is identical with ideology.
- D. Political philosophy only designs ideal states.
- ANSWER: A - ☐ Gauba explicitly includes political science as a part of theory, so theory includes factual explanation as well as value-judgment (Gauba, PDF pp.17-18).
- Q2. Which statement correctly resolves this common misconception: "Political theory is identical with ideology."?
- A. Political theory is identical with ideology.
- B. ☐ Theory critically examines claims; ideology justifies or denounces a power arrangement from an interested standpoint (Gauba, PDF p.20).
- C. Political philosophy only designs ideal states.
- D. Behaviouralism made political theory unnecessary.
- ANSWER: B - ☐ Theory critically examines claims; ideology justifies or denounces a power arrangement from an interested standpoint (Gauba, PDF p.20).
- Q3. Which statement correctly resolves this common misconception: "Political philosophy only designs ideal states."?
- A. Political philosophy only designs ideal states.
- B. Behaviouralism made political theory unnecessary.
- C. ☐ Raphael's role, adopted here, is criticism, justification and concept-clarification, not fantasy alone (Gauba, PDF pp.19-20).
- D. Evaluative statements are automatically irrational.
- ANSWER: C - ☐ Raphael's role, adopted here, is criticism, justification and concept-clarification, not fantasy alone (Gauba, PDF pp.19-20).
- Q4. Which statement correctly resolves this common misconception: "Behaviouralism made political theory unnecessary."?
- A. Behaviouralism made political theory unnecessary.
- B. Evaluative statements are automatically irrational.
- C. Do not shift into constitutional Articles or institutional detail here.
- D. ☐ Even Gauba's summary of post-behaviouralism restores values while preserving scientific method for facts (Gauba, PDF pp.18-19, 23).
- ANSWER: D - ☐ Even Gauba's summary of post-behaviouralism restores values while preserving scientific method for facts (Gauba, PDF pp.18-19, 23).

STATIC THEORY

- □ This chapter gives the module's basic vocabulary: what counts as political, what a theory is, and why political theory includes both factual explanation and value-judgment (Gaubu, PDF pp.15-18).
- □ Gauba treats political science and political philosophy as complementary, not rival, components of political theory; this is the base for later files on ideology, approaches, power, rights and democracy (Gaubu, PDF pp.17-18, 23, 27).
- □□ In UPSC and PSIR answers, this topic prevents two common errors: reducing theory to moral sermon, or reducing it to data without a judgment on ends.
- □□ This file is foundational for questions on methods, values, legitimacy, liberty, equality, justice and public policy because all of them require a facts-plus-values frame.
- □ A question such as "why do riots occur?" belongs to political science when it seeks causal explanation through observation and generalization (Gaubu, PDF pp.18-19, 21).
- □ A question such as "what is a good society?" belongs to political philosophy because it asks about ends, justification and value (Gaubu, PDF p.17).
- □ Clarifying whether "freedom" means non-interference, self-development or something else is part of political philosophy's concept-clarifying role (Gaubu, PDF pp.19, 22).
- □ Gauba warns that vague political language allows demagogues and autocrats to exploit words like liberty, equality and democracy for emotional manipulation or legitimation (Gaubu, PDF p.22).
- □□ A strong answer can therefore use data to explain unemployment, but it still needs a philosophical yardstick to judge whether a given policy is fair, free or humane.
- □ For the full decline/revival debate, move to [Political-Theory/advanced/01_Nature-and-Significance-of-Political-Theory.md](#).
- □ For methods, behaviouralism and post-behaviouralism in a dedicated file, use [Political-Theory/basic/08_Approaches-Behaviouralism-and-Post-Behaviouralism.md](#) and [Political-Theory/advanced/08_Approaches-Behaviouralism-and-Post-Behaviouralism.md](#).
- □ For authority and power terms introduced here, later connect with [Political-Theory/basic/15_Power-Authority-and-Legitimacy.md](#).
- □ For thinker-specific optional depth on ideologies and state-individual relations, link outward rather than duplicating: [Philosophy/paper-2/socio-political/Political-Ideologies.md](#) and [Philosophy/paper-2/socio-political/Individual-and-State.md](#).
- □ Political means the public/common sphere of authoritative collective regulation (Gaubu, PDF pp.15-16).
- □ Political theory means systematic knowledge of political phenomena (Gaubu, PDF p.16).

- □□ This file is foundational for questions on methods, values, legitimacy, liberty, equality, justice and public policy because all of them require a facts-plus-values frame.
- □ A question such as "why do riots occur?" belongs to political science when it seeks causal explanation through observation and generalization (Gaubu, PDF pp.18-19, 21).
- □ A question such as "what is a good society?" belongs to political philosophy because it asks about ends, justification and value (Gaubu, PDF p.17).
- □ Clarifying whether "freedom" means non-interference, self-development or something else is part of political philosophy's concept-clarifying role (Gaubu, PDF pp.19, 22).
- □ Gauba warns that vague political language allows demagogues and autocrats to exploit words like liberty, equality and democracy for emotional manipulation or legitimation (Gaubu, PDF p.22).
- □□ A strong answer can therefore use data to explain unemployment, but it still needs a philosophical yardstick to judge whether a given policy is fair, free or humane.
- □ For the full decline/revival debate, move to [Political-Theory/advanced/01_Nature-and-Significance-of-Political-Theory.md](#).
- □ For methods, behaviouralism and post-behaviouralism in a dedicated file, use [Political-Theory/basic/08_Approaches-Behaviouralism-and-Post-Behaviouralism.md](#) and [Political-Theory/advanced/08_Approaches-Behaviouralism-and-Post-Behaviouralism.md](#).
- □ For authority and power terms introduced here, later connect with [Political-Theory/basic/15_Power-Authority-and-Legitimacy.md](#).
- □ For thinker-specific optional depth on ideologies and state-individual relations, link outward rather than duplicating: [Philosophy/paper-2/socio-political/Political-Ideologies.md](#) and [Philosophy/paper-2/socio-political/Individual-and-State.md](#).
- □ Political means the public/common sphere of authoritative collective regulation (Gaubu, PDF pp.15-16).
- □ Political theory means systematic knowledge of political phenomena (Gaubu, PDF p.16).

TOPIC RECALL MAP

Nature and Significance of Political Theory

V

Definition □ This chapter gives the module's basic vocabulary: what counts as political, what a theory is, and why political theory includes both factual explanation and value-judgment (Gauba, PDF pp.15-18).	Mechanism □ Gauba treats political science and political philosophy as complementary, not rival, components of political theory; this is the base for later files on ideology, approaches, power, rights and democracy (Gauba, PDF pp.17-18, 23, 27).
Application □□ In UPSC and PSIR answers, this topic prevents two common errors: reducing theory to moral sermon, or reducing it to data without a judgment on ends.	Evaluation □□ This file is foundational for questions on methods, values, legitimacy, liberty, equality, justice and public policy because all of them require a facts-plus-values frame.

STATIC THEORY

- □ This chapter gives the module's basic vocabulary: what counts as political, what a theory is, and why political theory includes both factual explanation and value-judgment (Gaubu, PDF pp.15-18).
- □ Gauba treats political science and political philosophy as complementary, not rival, components of political theory; this is the base for later files on ideology, approaches, power, rights and democracy (Gaubu, PDF pp.17-18, 23, 27).
- □□ In UPSC and PSIR answers, this topic prevents two common errors: reducing theory to moral sermon, or reducing it to data without a judgment on ends.
- □□ This file is foundational for questions on methods, values, legitimacy, liberty, equality, justice and public policy because all of them require a facts-plus-values frame.
- □ A question such as "why do riots occur?" belongs to political science when it seeks causal explanation through observation and generalization (Gaubu, PDF pp.18-19, 21).
- □ A question such as "what is a good society?" belongs to political philosophy because it asks about ends, justification and value (Gaubu, PDF p.17).
- □ Clarifying whether "freedom" means non-interference, self-development or something else is part of political philosophy's concept-clarifying role (Gaubu, PDF pp.19, 22).
- □ Gauba warns that vague political language allows demagogues and autocrats to exploit words like liberty, equality and democracy for emotional manipulation or legitimation (Gaubu, PDF p.22).

MEMORY HOOK

Meaning -> mechanism -> evidence -> limitation -> judgement

MUST-KNOW FACTS

1. □ For thinker-specific optional depth on ideologies and state-individual relations, link outward rather than duplicating: Philosophy/paper-2/socio-political/Political-Ideologies.md and Philosophy/paper-2/socio-political/Individual-and-State.md.
2. □ Political means the public/common sphere of authoritative collective regulation (Gauba, PDF pp.15-16).
3. □ Political theory means systematic knowledge of political phenomena (Gauba, PDF p.16).
4. □ The chapter's three statement-types are empirical, logical and evaluative (Gauba, PDF p.16).
5. □ Political science relies on observation, generalization and explanation; political philosophy seeks justification and concept-clarification (Gauba, PDF pp.18-20).
6. □ Theory must include both science and philosophy because public policy needs facts and values together (Gauba, PDF pp.17-18).

UPSC TRAPS

WRONG: Political theory is merely normative.

CORRECT: □ Gauba explicitly includes political science as a part of theory, so theory includes factual explanation as well as value-judgment (Gauba, PDF pp.17-18).

WRONG: Political theory is identical with ideology.

CORRECT: □ Theory critically examines claims; ideology justifies or denounces a power arrangement from an interested standpoint (Gauba, PDF p.20).

WRONG: Political philosophy only designs ideal states.

CORRECT: □ Raphael's role, adopted here, is criticism, justification and concept-clarification, not fantasy alone (Gauba, PDF pp.19-20).

WRONG: Behaviouralism made political theory unnecessary.

CORRECT: □ Even Gauba's summary of post-behaviouralism restores values while preserving scientific method for facts (Gauba, PDF pp.18-19, 23).

MAINS ANGLE

Use Nature and Significance of Political Theory as an argument, not as an unstructured list of facts.
