# Indian Dance - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-01. No PDF was rendered and no tracker or index was mutated.

## SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-01.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The available OCR-searchable Nitin Singhania Indian Art and Culture PDF was retained as a supplementary source; no unsupported page precision, quotation or dynamic status was imported from it.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** No direct GS-I Mains PYQ is routed to Indian dance in the audited ledgers. The 2024 objective route on India's latest UNESCO ICH inclusion is retained in the owner extract with its official-key status, but the package does not infer or reproduce an answer letter.
- **Live-link boundary:** UNESCO's official Garba element page was fetched on 2026-09-01. Its metadata describes Garba as a ritual and devotional Navaratri dance around a lit earthenware pot or image of Amba. The package retains the verified 2023 inscription and expressly does not convert UNESCO ICH status into SNA classical recognition or a changing 'latest Indian element' claim.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

# SESSION 1 - FOUNDATION - NATYA VEDA AS COMPOSITE ART

## DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.

**Technical definition:** Evidence chain: Natya Veda framework Qualified use: Frame dance with music, text, enactment and rasa.

## ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.

## MUST-WRITE KEYWORDS

- FOUNDATION
- Natya Veda as composite art
- Evidence chain
- Qualified use
- Natyashastra
- BCE

**How to use them:** Frame the answer through FOUNDATION; define Natya Veda as composite art, connect Evidence chain with Qualified use to explain the mechanism, and use Natyashastra for the decisive comparison or qualification.

## VISUAL FIRST

NATYA VEDA AS COMPOSITE ART

01. Natya Veda framework

BOUNDARY -> Use a broad textual date and distinguish prescription from practice.

*This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.*

## CORE EXPLANATION

The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.

## NAMED EVIDENCE AND MECHANISM

- The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.

## EXAMINER CAUTION

- Use a broad textual date and distinguish prescription from practice.

## EXAM LINK

- **Prelims:** Retain the exact form, region, text, technique or institution attached to Natya Veda as composite art.
- **Mains:** Frame dance with music, text, enactment and rasa.

## MINI RECAP

- **Evidence chain:** Natya Veda framework
- **Qualified use:** Frame dance with music, text, enactment and rasa.

## CORE EXPLANATION

Dancer figures at Khajuraho, Konark, Ellora and Chidambaram share posture and gesture vocabularies with dance, but sculpture proves an idiom of movement rather than a complete named choreography.

## NAMED EVIDENCE AND MECHANISM

- Dancer figures at Khajuraho, Konark, Ellora and Chidambaram share posture and gesture vocabularies with dance, but sculpture proves an idiom of movement rather than a complete named choreography.

## EXAMINER CAUTION

- Sculpture preserves movement idiom, not a full repertoire.

## SESSION 15 - CORE SYNTHESIS - GARBA AND RECOGNITION BOUNDARIES

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** CURRENT: UNESCO inscribed Garba of Gujarat on the Representative List of the Intangible Cultural Heritage of Humanity in 2023 - a folk (not SNA classical) dance form; verify current ICH status against UNESCO's own element page before citing (see topic 14 for the full ICH ledger). ANALYSIS: Recognition by the Sangeet Natak Akademi as one of the eight classical forms and inscription on a UNESCO list are two separate, non interchangeable forms of recognition - do not conflate them.

**Technical definition:** WRONG: SNA recognition as a "classical dance form" and UNESCO ICH inscription are the same kind of status. - They are governed by entirely different bodies and criteria (national cultural-academy recognition vs. international treaty-based inscription); a dance form can hold one, both, or neither. WRONG: Nritya, Natya and Nritya are interchangeable terms for "dance." - Each denotes a specific, distinct component (pure movement, drama, expression respectively) per Nandikeshvara's Abhinaya Darpana. WRONG: Lasya and Tandava map simply onto "soft" and "hard" dance styles performed by specific genders exclusively. - They denote aspects/qualities present in dance generally, not a rigid gender-exclusive performance rule. WRONG: All eight classical forms share an identical origin narrative. - Each has a distinct regional and historical origin (e.g.

#### 02. Garba official linkage

BOUNDARY -> UNESCO inscription is not classical-form recognition.

*This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.*

## CORE EXPLANATION

SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status.

## NAMED EVIDENCE AND MECHANISM

- SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither.
- UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status.

## EXAMINER CAUTION

- UNESCO inscription is not classical-form recognition.

## COMPLETE BASIC OWNER EVIDENCE BANK

**Subject:** Indian Art & Culture | **Tier:** Must-Do (foundation) | **GS Paper:** GS-I. **Core area:** Natya Shastra concepts (Lasya/Tandava, Nritya/Nritya/ Natya, nine rasas, mudras); the eight SNA-recognised classical dance forms; folk dance. **Grounded in:** Nitin Singhania, *Indian Art and Culture*, PDF pp. 458-499; 00\_Master-Framework.md Section 3; audited UPSC Mains 2024-2025 GS Paper I (no direct question; cross-links to Topic 03's Chandella PYQ). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor | **WRONG:** = trap. *Companion:* advanced/09\_Indian-Dance.md.

### 1. Snapshot and syllabus fit

**FACT:** This topic covers the Natya Shastra's foundational dance vocabulary and the eight Sangeet Natak Akademi (SNA)-recognised classical dance forms. **ANALYSIS:** No 2024/2025 Mains question tests dance directly, but its posture/ gesture vocabulary directly supports reading Chandella and Chola temple sculpture (topics 03, 06), since dance and sculpture share a common gestural language.

## 2. Essential vocabulary

| Term                                | Exam-ready meaning                                                                                                                                                                                                                                                    |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FACT: <b>Natya Veda</b>             | The <i>Natyashastra</i> , a layered text conventionally attributed to Bharata and broadly dated across the late centuries BCE/early centuries CE, narrates drama as a "fifth Veda" combining text, enactment, music and rasa. Avoid a falsely exact composition date. |
| FACT: <b>Lasya vs. Tandava</b>      | Lasya = graceful, feminine aspect of dance (bhava, rasa, abhinaya emphasis); Tandava = rhythmic, masculine aspect (movement emphasis) ( <i>Nitin...pdf</i> , PDF p. 459).                                                                                             |
| FACT: <b>Nritta, Natya, Nritya</b>  | Per Nandikeshvara's <i>Abhinaya Darpana</i> : Nritta = rhythmic steps without expression; Natya = dramatic/story representation; Nritya = expression/emotion through mudras ( <i>Nitin...pdf</i> , PDF p. 460).                                                       |
| FACT: <b>Nine rasas</b>             | Shringara (love), Roudra (anger), Bibhatsa (disgust), Veera (heroism), Shanta (peace), Haasya (laughter), Karuna (sorrow), Bhayanaka (horror), Adbhuta (wonder) - the same rasa framework used in music (topic 08) ( <i>Nitin...pdf</i> , PDF p. 460).                |
| FACT: <b>Hasta/mudra and karana</b> | Hasta/mudra = codified hand gesture; karana = coordinated unit of body movement. The famous number 108 belongs to <i>karanas</i> , not "108 fundamental mudras."                                                                                                      |
| FACT: <b>Guru-shishya parampara</b> | The core transmission principle of Indian classical dance - true knowledge transfer occurs only through a guru, passing on distinct traditions (sampradayas) ( <i>Nitin...pdf</i> , PDF p. 461).                                                                      |

## 3. Core classification

FACT: Sangeet Natak Akademi's standard list has **eight classical dance forms**: Bharatanatyam, Kuchipudi, Kathakali, Mohiniyattam, Kathak, Odissi, Manipuri and Sattriya (*Nitin...pdf*, PDF pp. 461-462). Nitin separately notes a Ministry of Culture list of nine including Chhau; do not merge the two institutional lists.

## 4. Foundation narrative

FACT: **Bharatanatyam** (Tamil Nadu) traces to *Sadir*, the solo temple- dancer (devadasi) performance, also called Dashiattam; revived by E. Krishna Iyer after the devadasi system's decline, and given global recognition by Rukmini Devi Arundale (*Nitin...pdf*, PDF p. 462). FACT: The "Tanjore Quartet" (Chinnaiah, Ponniah, Vadivelu, Sivanandam) defined its recital structure: Alarippu, Jatiswaram, Shabdam, Varnam, Padam, Jawali, Thillana (*Nitin...pdf*, PDF pp. 462-463). FACT: Bharatanatyam uses adavu (movement units), hasta (hand gestures) and Bhavabhinaya (facial expression), with performances opening with worship of Ganapati and Nataraja (*Nitin...pdf*, PDF p. 463). FACT: **Kuchipudi** (Andhra Pradesh) is named after Kuchelapuram village, originally performed by travelling actors (Kusselavas), associated with Siddhendra (*Nitin...pdf*, PDF p. 464). ANALYSIS: Kathakali, Mohiniyattam (Kerala), Kathak (North India), Odissi (Odisha), Manipuri (Manipur) and Sattriya (Assam) each have distinct regional origin stories, costume, and repertoire structures documented in the book's dedicated sections (*Nitin...pdf*, PDF pp. 458-499), each governed by the same guru-shishya transmission principle.

## 6. Source spine

FACT: *Nitin...pdf*, PDF pp. 458-499 (Chapter 11, "Indian Dance" - full chapter: Background, Aspects of Dance, Indian Classical Dance Forms, Folk Dances of India), the direct spine for Sections 2-4.

## 7. Exact PYQ application

ANALYSIS: No GS-I Mains question in the audited 2024-2025 papers directly tests Indian dance. This topic's mudra/posture vocabulary directly supports a stronger answer to **2025 Q3** (Chandella sculpture, owned by topic 03) by supplying the gestural vocabulary (Abhaya Mudra, Tandava, Lasya) used to read dynamic figural sculpture at Khajuraho and in Chola Nataraja bronzes (topic 06).

## 8. CURRENT: Current anchor

- CURRENT: UNESCO inscribed **Garba of Gujarat** on the Representative List of the Intangible Cultural Heritage of Humanity in 2023 - a folk (not SNA classical) dance form; verify current ICH status against UNESCO's own element page before citing (see topic 14 for the full ICH ledger). ANALYSIS: Recognition by the Sangeet Natak Akademi as one of the eight classical forms and inscription on a UNESCO list are two separate, non- interchangeable forms of recognition - do not conflate them.

## 9. WRONG: Traps and corrections

- WRONG: SNA recognition as a "classical dance form" and UNESCO ICH inscription are the same kind of status. -> They are governed by entirely different bodies and criteria (national cultural-academy recognition vs. international treaty-based inscription); a dance form can hold one, both, or neither.

- WRONG: Nritya, Natya and Nritya are interchangeable terms for "dance." -> Each denotes a specific, distinct component (pure movement, drama, expression respectively) per Nandikeshvara's *Abhinaya Darpana*.

- WRONG: Lasya and Tandava map simply onto "soft" and "hard" dance styles

performed by specific genders exclusively. -> They denote aspects/ qualities present in dance generally, not a rigid gender-exclusive performance rule.

- **WRONG:** All eight classical forms share an identical origin narrative. -> Each has a distinct regional and historical origin (e.g. Bharatanatyam's devadasi-tradition origin is specific to Tamil Nadu and not shared by Kathak or Sattriya).

- **WRONG:** The number 108 refers to basic dance mudras. -> It refers to karanas in the *Natyashastra* tradition; hand-gesture counts vary by treatise.

- **WRONG:** Bharatanatyam passed unchanged from an ancient temple origin to the modern stage. -> Sadir repertoires, hereditary practitioners, anti-nautch disruption and twentieth-century reconfiguration/revival all shaped the present form.

- **FACT: Local PYQ trap:** CSE 2014 on Sattriya tests Assam, sattri/monastic association and devotional performance; do not confuse it with Manipuri or a generic folk form.

## 10. Mains framework

1. Root any dance answer in the Natya Shastra's four-element Natya Veda framework before naming a specific form.

2. Use the Nritta/Natya/Nritya distinction with precision.

3. Name the SNA's eight classical forms accurately, distinguishing SNA recognition from any separate UNESCO ICH status.

4. Cross-reference topic 06 for how the same mudra/posture vocabulary applies to reading temple sculpture (especially Khajuraho/Chola).

5. Close with a current, dated status line (SNA recognition year or UNESCO ICH inscription year) rather than an undated general claim.

## 11. Boundaries with other subjects

- **WRONG:** **Indian Society owns** the socio-economic and gender history of the devadasi system as a living-community/social-reform question in depth. This file owns the **art-form and technique** that emerged from that tradition (Bharatanatyam/Sadir).

- **WRONG:** **Topic 13 owns** the philosophical/aesthetic theory underlying rasa as a doctrine in full depth. This file applies rasa as **performance vocabulary**.

- **FACT:** Cross-links: Topic 03 (Chandella sculpture-dance posture links), Topic 06 (shared mudra/iconographic vocabulary), Topic 08 (shared rasa framework with music), Topic 14 (SNA/UNESCO recognition status).

## 12. Companion links

- **FACT:** Advanced companion: advanced/09\_Indian-Dance.md.

- **FACT:** 00\_Master-Framework.md Section 3 - the Nritta/Nritya/Natya terminology comparison reused here.

- **ANALYSIS: Cross-links:** Topic 03 (Chandella dossier), Topic 06 (sculpture-dance posture overlap), Topic 08 (shared rasa framework), Topic 14 (SNA/UNESCO recognition ledger).

## 13. Answer architecture (10/15/20-mark support)

**Core-sufficiency note.** Dance is the folder's highest-frequency Prelims **identification** owner and the standard supplier of the living-tradition dimension in performing-arts answers. This section adds the eight-form identification bank with close-option distinctions and the revival/institutionalisation analysis, so advanced/09 is optional.

### 13.2 Qualified thesis options

- ANALYSIS: **Composite-art thesis:** "The Natya Shastra's decisive contribution is that it treats performance as one composite art - text, enactment, music and rasa together - which is why Indian dance is analysed through categories (nritta, nritya, natya, abhinaya, rasa) rather than through steps."
- ANALYSIS: **Reconstruction thesis (the most examinable):** "The eight classical forms as we know them are the outcome of twentieth-century reconstruction and institutional recognition acting on much older regional practices - continuity is real, but so is the break."
- ANALYSIS: **Recognition thesis:** "The Sangeet Natak Akademi's identification of eight classical forms is a twentieth-century institutional act, and a form's social history should never be assumed to begin with its recognition."
- ANALYSIS: **Sculpture-and-dance thesis:** "The shared vocabulary of posture and gesture makes temple sculpture readable through dance categories and vice versa - but sculpture evidences the *idiom* of movement, not the choreography of any particular tradition."

| Sattriya | Assam; Sankaradeva's sattri/ankiya-nat context | Mati-akhora movement base         | Monastic/devotional performance setting | vs Manipuri: both Vaishnava, but Sattriya's institutional home is the Assamese <b>sattri</b> |

ANALYSIS: **Identification rule:** answer an identification demand by naming the *discriminating* feature, not a shared one. Devotional Vaishnava themes fit Manipuri, Sattriya and Odissi alike; the pung drum, the sattri and the mahari/gotipua history do not.

### 13.6 Evidence bank C - revival, institutionalisation and their costs

- FACT: **Named revival actors:** E. Krishna Iyer's revival of Bharatanatyam

after the devadasi system's decline and Rukmini Devi Arundale's global recognition of the form (*Nitin...pdf*, PDF p. 462); V.N. Menon and Kalyani Amma for Mohiniyattam; Charles Fabri and Indrani Rahman for Odissi's mid-20th-century international acclaim; Raja Bhag Chandra and Rabindranath Tagore for Manipuri.

- ANALYSIS: **What revival cost:** reconstruction rested on repertoire and

knowledge held by hereditary practitioners - maharis, devadasis, gotipuas - whose social position was simultaneously being dismantled by anti-naught reform. An answer that presents revival as pure recovery omits the displaced.

- ANALYSIS: **Institutional layer:** the SNA's eight-form list is itself a twentieth-century act; Nitin separately notes a Ministry of Culture list of nine that includes Chhau. WRONG: Do not merge the two institutional lists.

- ANALYSIS: **Feudal-change evidence:** the book records that with the breakdown of the feudal set-up, Kathakali's support base changed (*Nitin...pdf*, PDF p.

467. - a concrete patronage-shift example usable for any performing-arts-and-patronage demand.

### 13.7 Dance, sculpture and the cross-topic argument

- FACT: Sculptures of dancers at **Khajuraho, Konark, Ellora and Chidambaram**

depict poses associated with Bharatanatyam, Odissi and other classical forms (*Nitin...pdf*, PDF p. 473) - the single most useful cross-link for topic 03's 2025 question and topic 06's reading method.

- **FACT:** Tribhanga, innate to Odissi, is the same three-bend posture used extensively by the Amaravati sculptors and seen in the Harappan Dancing Girl (topic 06).

- **ANALYSIS: Limit:** sculpture proves that a movement idiom existed and was valued; it does not prove that a specific named classical form was performed in that period.

### 13.8 Reasoned verdict scaffolds

- **Identification/description:** "Each classical form is best defined by

the single feature no other form shares - Kathakali's Attakkatha and all-male troupe, Mohiniyattam's Kasavu and unthumped footwork, Odissi's torso-led tribhanga, Manipuri's pung and veiled face."

- **Revival:** "Twentieth-century revival saved the repertoire and

relocated its practitioners; both halves of that sentence belong in the answer."

- **Recognition:** "SNA classical status and UNESCO ICH inscription measure

different things - national canon formation and international safeguarding - and a form may hold one, both or neither."

### 13.9 Factual-risk and dynamic-status controls

- **WRONG:** Do not present any classical form as unbroken from antiquity.

- **WRONG:** Do not equate 108 karanas with 108 mudras.

- **WRONG:** Do not conflate SNA recognition with UNESCO ICH inscription.

### What this owner must now support

- Latest Indian inclusion in the UNESCO Intangible Cultural Heritage List

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

## CLOSING RECALL FLOW - CORE SYNTHESIS - GARBA AND RECOGNITION BOUNDARIES

START / CONCEPT: CORE SYNTHESIS - Garba and recognition boundaries

|  
v

EXACT TERMS: CORE SYNTHESIS · Garba · recognition boundaries · Evidence chain · Qualified use ·  
Subject

|  
v

MECHANISM / ARGUMENT: Evidence chain: Recognition tracks - Garba official linkage Qualified use:  
Close with a directly fetched official linkage.

|  
v

CONSEQUENCE / CONTRAST: WRONG: Do not present any classical form as unbroken from antiquity. WRONG: Do not equate 108 karanas with 108 mudras. WRONG: Do not conflate SNA recognition with UNESCO ICH inscription. WRONG: Do not invent proponent names, recital-item names or costume details beyond those recorded above. CURRENT: Dated anchors usable as they stand: Garba of Gujarat inscribed on the UNESCO Representative List in 2023; Kutiyattam (Kerala Sanskrit theatre, topic 10) in 2008. ANALYSIS: ICH totals and "latest inclusion" claims are time-bound and must be taken from topic 14 with its verification date - the 2024 Prelims "latest inclusion" question is a live example of a date-sensitive answer.

|  
v

UPSC TRAP / ANSWER-USE: UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status.

|  
v

ANSWER-GRABBING FORMULATION: CURRENT: UNESCO inscribed Garba of Gujarat on the Representative List of the Intangible Cultural Heritage of Humanity in 2023 - a folk (not SNA classical) dance form; verify current ICH status against UNESCO's own element page before citing (see topic 14 for the full ICH ledger). ANALYSIS: Recognition by the Sangeet Natak Akademi as one of the eight classical forms and inscription on a UNESCO list are two separate, non interchangeable forms of recognition - do not conflate them.

## BASIC MCQS / REMEDIATION

### Q1. Which statement correctly identifies Natya Veda framework?

A. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. B. Shringara, Roudra, Bibhatsa, Veera, Shanta, Haasya, Karuna, Bhayanaka and Adbhuta form the nine-rasa performance vocabulary shared with music and theatre. C. Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender. D. Nritya is pure rhythmic movement, Nritya expression through gesture and emotion, and Natya dramatic representation; the three terms are not interchangeable.

**Answer: A. Explanation: The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. The remaining options belong to different chronology, actor or analytical categories.**

### Q2. Which chronology card should be filed under Natya Veda framework?

A. A hasta or mudra is a codified hand gesture, while a karana is a coordinated whole-body movement unit; the famous number 108 belongs to karanas, not basic mudras. B. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. C. Nritya is pure rhythmic movement, Nritya expression through gesture and emotion, and Natya dramatic representation; the three terms are not interchangeable. D. A. Dancer figures at Khajuraho, Konark, Ellora and Chidambaram share posture and gesture vocabularies with dance, but sculpture proves an idiom of movement rather than a complete named choreography. B. Sattriya developed in Assam's sattrā and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base. C. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. D. SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither.

**Answer: B. Explanation: Sattriya developed in Assam's sattrā and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base. The remaining options belong to different chronology, actor or analytical categories.**

**Q63. Which option preserves the source-bounded meaning of Sattriya identity?**

A. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. B. SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither. C. Sattriya developed in Assam's sattrā and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base. D. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.

**Answer: C. Explanation: Sattriya developed in Assam's sattrā and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base. The remaining options belong to different chronology, actor or analytical categories.**

**Q64. Which statement avoids a close-option trap about Sattriya identity?**

A. Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender. B. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. C. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. D. Sattriya developed in Assam's sattrā and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base.

**Answer: D. Explanation: Sattriya developed in Assam's sattrā and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base. The remaining options belong to different chronology, actor or analytical categories.**

**Q65. Which statement correctly identifies Revival and reconfiguration?**

A. Twentieth-century revival preserved repertoires but also relocated authority from hereditary communities to institutions and elite stages; continuity and rupture must be argued together. B. SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither. C. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. D. Dancer figures at Khajuraho, Konark, Ellora and Chidambaram share posture and gesture vocabularies with dance, but sculpture proves an idiom of movement rather than a complete named choreography.

**Answer: A. Explanation: Twentieth-century revival preserved repertoires but also relocated authority from hereditary communities to institutions and elite stages; continuity and rupture must be argued together. The remaining options belong to different chronology, actor or analytical categories.**

**Q66. Which chronology card should be filed under Revival and reconfiguration?**

A. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. B. Twentieth-century revival preserved repertoires but also relocated authority from hereditary communities to institutions and elite stages; continuity and rupture must be argued together. C. Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender.

**Answer: C. Explanation: Twentieth-century revival preserved repertoires but also relocated authority from hereditary communities to institutions and elite stages; continuity and rupture must be argued together. The remaining options belong to different chronology, actor or analytical categories.**

**Q68. Which statement avoids a close-option trap about Revival and reconfiguration?**

A. Nritya is pure rhythmic movement, Nritya expression through gesture and emotion, and Natya dramatic representation; the three terms are not interchangeable. B. Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender. C. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. D. **Answer: C. Explanation: SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither. The remaining options belong to different chronology, actor or analytical categories.**

### Q76. Which statement avoids a close-option trap about Recognition tracks?

A. A hasta or mudra is a codified hand gesture, while a karana is a coordinated whole-body movement unit; the famous number 108 belongs to karanas, not basic mudras. B. Shringara, Roudra, Bibhatsa, Veera, Shanta, Haasya, Karuna, Bhayanaka and Adbhuta form the nine-rasa performance vocabulary shared with music and theatre. C. Nritya is pure rhythmic movement, Nritya expression through gesture and emotion, and Natya dramatic representation; the three terms are not interchangeable. D. SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither.

**Answer: D. Explanation: SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither. The remaining options belong to different chronology, actor or analytical categories.**

### Q77. Which statement correctly identifies Garba official linkage?

A. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. B. The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date. C. Nritya is pure rhythmic movement, Nritya expression through gesture and emotion, and Natya dramatic representation; the three terms are not interchangeable. D. Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender.

**Answer: A. Explanation: UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. The remaining options belong to different chronology, actor or analytical categories.**

### Q78. Which chronology card should be filed under Garba official linkage?

A. Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender. B. UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status. C. ## PYQS AND ANSWER PRACTICE

### TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No direct GS-I Mains PYQ is routed to Indian dance in the audited ledgers. The 2024 objective route on India's latest UNESCO ICH inclusion is retained in the owner extract with its official-key status, but the package does not infer or reproduce an answer letter.

### OWNER PYQ LEDGER EXTRACTS

#### 7. Exact PYQ application

ANALYSIS: No GS-I Mains question in the audited 2024-2025 papers directly tests Indian dance. This topic's mudra/posture vocabulary directly supports a stronger answer to **2025 Q3** (Chandella sculpture, owned by topic 03) by supplying the gestural vocabulary (Abhaya Mudra, Tandava, Lasya) used to read dynamic figural sculpture at Khajuraho and in Chola Nataraja bronzes (topic 06).

#### Recent PYQ Integration (2024-2025)

**Status:** 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: \_PYQ-ROUTING-PRELIMS-2024-2025.md. **Answer-key rule:** The official 2024-2025 Prelims Set-A keys are present in the repository and CSAT Set-A keys are supplied; even so, no option or answer is recorded or inferred in this integration.

### What this owner must now support

- Latest Indian inclusion in the UNESCO Intangible Cultural Heritage List

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

### 8. Exact PYQ application

**ANALYSIS:** No GS-I Mains question in the audited 2024-2025 papers directly tests dance. **FACT:** This topic's shared-vocabulary argument (Section 4) is a direct, advanced-tier strengthening tool for **2025 Q3** (Chandella sculpture, topic 03): an advanced answer can explicitly note that Khajuraho's dynamic figural sculpture should be read using the same Tandava/Lasya and mudra vocabulary the Natya Shastra defines for dance, since the source text itself unites the two arts.

### ORIGINAL MAINS 1 - 10 MARKS

**Question:** Distinguish Nritta, Nritya and Natya and explain their analytical value. Answer in about 150 words.

**Model thesis:** The three categories separate pure rhythmic movement, expressive gesture and dramatic representation, allowing a performance to be analysed as a composite rather than called simply dance.

**Claim -> named evidence -> analysis -> qualification:**

- The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.
- Nritta is pure rhythmic movement, Nritya expression through gesture and emotion, and Natya dramatic representation; the three terms are not interchangeable.
- Shringara, Roudra, Bibhatsa, Veera, Shanta, Haasya, Karuna, Bhayanaka and Adbhuta form the nine-rasa performance vocabulary shared with music and theatre.

**Qualified conclusion:** The three categories separate pure rhythmic movement, expressive gesture and dramatic representation, allowing a performance to be analysed as a composite rather than called simply dance.

### ORIGINAL MAINS 2 - 10 MARKS

**Question:** Why must SNA classical recognition be separated from UNESCO ICH inscription? Answer in about 150 words.

**Model thesis:** One is national canon formation by a cultural academy and the other treaty-based international safeguarding; neither alone reconstructs a form's social history.

**Claim -> named evidence -> analysis -> qualification:**

- The Sangeet Natak Akademi list contains Bharatanatyam, Kuchipudi, Kathakali, Mohiniyattam, Kathak, Odissi, Manipuri and Sattriya.
- The owner separately records a Ministry of Culture list of nine including Chhau; it must not be merged with the SNA eight-form list or with UNESCO inscriptions.
- SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither.
- UNESCO describes Garba as a ritual and devotional Navaratri dance around a lit earthen pot or image of Amba; its 2023 inscription is a folk-dance linkage, not SNA classical status.

**Qualified conclusion:** One is national canon formation by a cultural academy and the other treaty-based international safeguarding; neither alone reconstructs a form's social history.

### ORIGINAL MAINS 3 - 15 MARKS

**Question:** Compare Bharatanatyam and Kuchipudi through origin, format and transmission. Answer in about 250 words.

**Model thesis:** A Sadir-derived solo recital and an itinerant dance-drama tradition now share classical status, but their social origins, stage grammars and revival histories remain distinct.

**Claim -> named evidence -> analysis -> qualification:**

- Bharatanatyam developed from Sadir or Dashiattam repertoires transmitted by hereditary practitioners and was reconfigured through anti-nautch disruption and named revival actors.
- The Tanjore Quartet codified a recital sequence including Alarippu, Jatiswaram, Shabdham, Varnam, Padam, Jawali and Thillana.
- Kuchipudi is linked to Kuchelapuram in Andhra Pradesh, travelling actor traditions and Siddhendra; its dance-drama origin distinguishes it from a temple-solo narrative.
- Twentieth-century revival preserved repertoires but also relocated authority from hereditary communities to institutions and elite stages; continuity and rupture must be argued together.

**Qualified conclusion:** A Sadir-derived solo recital and an itinerant dance-drama tradition now share classical status, but their social origins, stage grammars and revival histories remain distinct.

### ORIGINAL MAINS 4 - 15 MARKS

**Question:** Compare Odissi, Manipuri and Sattriya using close-option discriminators. Answer in about 250 words.

**Model thesis:** Tribhanga-chowk and mahari-gotipua history, pung-led restrained raslila, and sattri-ankiya-nat institutions distinguish three devotional eastern forms more securely than shared Vaishnava themes.

**Claim -> named evidence -> analysis -> qualification:**

- Odissi uses tribhanga and chowk, torso articulation, Gita Govinda repertoire and mahari-gotipua histories; its mobile-sculpture analogy does not prove an unchanged ancient choreography.
- Manipuri Vaishnava performance emphasises raslila, pung or cholom traditions, restrained facial display and Nagabandha rather than Odissi's torso-led tribhanga.
- Sattriya developed in Assam's sattri and ankiya-nat context associated with Sankaradeva, with mati-akhora as a movement base.

**Qualified conclusion:** Tribhanga-chowk and mahari-gotipua history, pung-led restrained raslila, and sattri-ankiya-nat institutions distinguish three devotional eastern forms more securely than shared Vaishnava themes.

### ORIGINAL MAINS 5 - 20 MARKS

**Question:** Critically assess twentieth-century revival and institutionalisation of Indian classical dance. Answer in about 300 words.

**Model thesis:** Revival preserved repertoire, widened stages and created recognised canons, but selectively reconstructed older practices and displaced or obscured hereditary communities.

**Claim -> named evidence -> analysis -> qualification:**

- The Sangeet Natak Akademi list contains Bharatanatyam, Kuchipudi, Kathakali, Mohiniyattam, Kathak, Odissi, Manipuri and Sattriya.
- The owner separately records a Ministry of Culture list of nine including Chhau; it must not be merged with the SNA eight-form list or with UNESCO inscriptions.
- Bharatanatyam developed from Sadir or Dashiattam repertoires transmitted by hereditary practitioners and was reconfigured through anti-nautch disruption and named revival actors.
- Twentieth-century revival preserved repertoires but also relocated authority from hereditary communities to institutions and elite stages; continuity and rupture must be argued together.
- SNA classical recognition and UNESCO Intangible Cultural Heritage inscription are different institutional acts; a form may hold one, both or neither.

**Qualified conclusion:** Revival preserved repertoire, widened stages and created recognised canons, but selectively reconstructed older practices and displaced or obscured hereditary communities.

## ORIGINAL MAINS 6 - 20 MARKS

**Question:** Examine the relationship among dance, sculpture, music and theatre in Indian aesthetics. Answer in about 300 words.

**Model thesis:** The Natyashastra's composite-art framework and shared rasa, gesture and movement vocabulary connect the arts, while each medium preserves different evidence and cannot prove the full content of another.

**Claim -> named evidence -> analysis -> qualification:**

- The layered Natyashastra tradition presents performance as a composite of text, enactment, music and rasa; a broad late-BCE to early-CE range is safer than a falsely exact composition date.
- Lasya and Tandava identify graceful-expressive and vigorous-rhythmic aspects of dance; they are qualities of movement, not rigid rules limiting performers by gender.
- Shringara, Roudra, Bibhatsa, Veera, Shanta, Haasya, Karuna, Bhayanaka and Adbhuta form the nine-rasa performance vocabulary shared with music and theatre.
- A hasta or mudra is a codified hand gesture, while a karana is a coordinated whole-body movement unit; the famous number 108 belongs to karanas, not basic mudras.
- Dancer figures at Khajuraho, Konark, Ellora and Chidambaram share posture and gesture vocabularies with dance, but sculpture proves an idiom of movement rather than a complete named choreography.

**Qualified conclusion:** The Natyashastra's composite-art framework and shared rasa, gesture and movement vocabulary connect the arts, while each medium preserves different evidence and cannot prove the full content of another.

## OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

**Subject:** Indian Art & Culture | **Tier:** Advanced | **GS Paper:** GS-I. **Core area:** Recognition versus living practice; gender and revival history; dance-sculpture-music interlinkage; regional performance comparison. **Grounded in:** Nitin Singhanian, *Indian Art and Culture*, PDF pp. 458-499; 00\_Master-Framework.md Sections 4-5; audited UPSC Mains 2024-2025 GS Paper I (cross-links to Topic 03's direct PYQ). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor | **WRONG:** = trap. *Companion:* basic/09\_Indian-Dance.md.

### 1. Analytical question and thesis

**Question:** How should the relationship between "classical" recognition (SNA's eight forms) and a dance form's actual community/living-practice history be argued, and how does dance sculpture's shared vocabulary sharpen a Chandella/temple-sculpture answer? **Thesis:** **ANALYSIS:** SNA classical-form recognition is a 20th-century institutional act (developed in topic 14) layered onto much older, socially varied living practices (e.g. Bharatanatyam's devadasi-tradition origin, which involved significant social disruption and later institutional revival) - an advanced answer must keep the *institutional recognition timeline* and the *actual social history of the practice* analytically distinct, and should use dance's codified mudra/rasa vocabulary as a direct interpretive tool for reading temple sculpture, since sculpture and dance share Bharata's Natya Shastra as a common root text.

| ANALYSIS: <b>Revival/reconfiguration vs. unchanged continuity</b> | Modern Bharatanatyam emerged through Sadir repertoires, hereditary practitioners, anti-nautch disruption and selective twentieth-century reconstruction by multiple actors. "Revival" should not erase the communities whose knowledge made reconstruction possible.                                                                                                           |
| FACT: <b>Shared root-text vocabulary</b>                          | Because the Natya Shastra explicitly names dance as a "complete art" uniting "music, sculpture, poetry and drama" ( <i>Nitin...pdf</i> , PDF p. 458), the same mudra and rasa vocabulary this topic defines for dance is directly applicable to reading temple sculpture (topic 06) - this is not an analogy imposed externally but a connection the source text itself makes. |
| ANALYSIS: <b>Institutional-recognition timeline</b>               | The SNA's identification of exactly eight classical forms is itself a 20th-century institutional act (developed fully in topic 14); a dance form's much longer social/regional history should not be assumed to date only from its SNA recognition.                                                                                                                            |

## 3. Comparative framework

| Dimension                        | Bharatanatyam (revival case)                                                                                                                             | Kuchipudi (community-origin case)                                                     | Analytical point                                                                                    |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| FACT: Origin association         | Sadir/devadasi temple-dance tradition                                                                                                                    | Travelling actors (Kusselavas), Kuchelapuram village, associated with Siddhendra      | Distinct social origins - temple-attached solo female performance vs. travelling troupe performance |
| FACT: Disruption/reconfiguration | Anti-nautch pressure and institutional change disrupted hereditary practice; E. Krishna Iyer, Rukmini Devi and hereditary teachers shaped modern staging | Not documented in the book as having undergone the same institutional reconfiguration | Compare specific histories; do not apply one revival template universally                           |
| FACT: Institutional recognition  | One of the SNA's eight classical forms                                                                                                                   | One of the SNA's eight classical forms                                                | Both hold identical current institutional status despite different social histories                 |

## 4. Evidence, form and interpretation

FACT: The book's explicit description of the Natya Shastra as uniting "music, sculpture, poetry, and drama" into one art form (*Nitin...pdf*, PDF p. 458) directly authorises using dance's technical vocabulary (Tandava/Lasya, Nritta/Nritya/Natya, the nine rasas, mudras) as an interpretive lens for reading temple sculpture - the correct application being: a dynamic, twisting sculptural figure at Khajuraho or a Chola bronze Nataraja should be read using the *same* posture/gesture vocabulary this topic defines, not a separately invented "art-critical" vocabulary. ANALYSIS: Applying the revival-narrative caution (Section 2) to Bharatanatyam specifically: an advanced answer should name anti-nautch disruption, hereditary practitioners and the specific individuals (E. Krishna Iyer, Rukmini Devi Arundale) credited with reconfiguration, rather than presenting either an unchanged ancient line or a rescue performed only by elite revivalists.

## 5. Visual synthesis table

## 6. Direct-book source spine

FACT: *Nitin...pdf*, PDF pp. 458-464 - the Natya Shastra framework, Lasya/ Tandava, Nritta/Natya/Nritya, nine rasas, mudras, and the Bharatanatyam origin/revival account (Sadir, devadasi decline, E. Krishna Iyer, Rukmini Devi Arundale, Tanjore Quartet).

## 7. CURRENT: Dated official anchor

- CURRENT: UNESCO's 2023 inscription of Garba of Gujarat on the Representative

List of the Intangible Cultural Heritage of Humanity is a **folk** (non-SNA-classical) dance recognition - a useful comparative case for distinguishing "classical" (SNA) from "living/folk" (UNESCO ICH) recognition tracks; verify current inscription status against UNESCO's own element page (topic 14).

## 8. Exact PYQ application

ANALYSIS: No GS-I Mains question in the audited 2024-2025 papers directly tests dance. FACT: This topic's shared-vocabulary argument (Section 4) is a direct, advanced-tier strengthening tool for **2025 Q3** (Chandella sculpture, topic 03): an advanced answer can explicitly note that Khajuraho's dynamic figural sculpture should be read using the same Tandava/Lasya and mudra vocabulary the Natya Shastra defines for dance, since the source text itself unites the two arts.

## 9. WRONG: Attribution, chronology and numeric traps

- WRONG: Presenting Bharatanatyam as an unbroken tradition without acknowledging the devadasi-system decline and 20th-century revival. -> The book documents a specific disruption-and-revival narrative that should be named explicitly.
- WRONG: Presenting revivalists as creating the form from nothing. -> They reorganised and publicised repertoires transmitted by hereditary performers and teachers; continuity and rupture must be held together.
- WRONG: Equating 108 karanas with 108 mudras. -> Karanas are whole-body movement units; hasta lists are separate and text-specific.
- WRONG: Treating SNA's eight-classical-forms list as an ancient classification rather than a modern institutional recognition act. -> This is a 20th-century institutional decision (developed in topic 14), layered onto much older regional practices.
- WRONG: Conflating UNESCO ICH inscription (e.g. Garba, 2023) with SNA classical-form status. -> These are separate recognition tracks with different criteria and governing bodies.

## 10. Mains answer frameworks

**Central thesis:** Indian dance should be argued through the Natya Shastra's shared vocabulary with sculpture and music, with SNA classical recognition kept analytically distinct from a form's own, often more socially complex, practice history (most clearly illustrated by Bharatanatyam's devadasi-decline-and-revival narrative).

1. **Root the answer in the Natya Shastra's unifying framework** (music + sculpture + poetry + drama) before naming any specific form.
2. **\*\*Distinguish institutional recognition (SNA, UNESCO ICH) from social practice history\*\*** explicitly.

3. **Use the shared mudra/rasa vocabulary** to connect a dance answer to sculpture (topic 06) or Chandella (topic 03) where relevant.

4. **Name a specific revival narrative** (Bharatanatyam) rather than presenting all classical forms as uniformly continuous traditions.

5. **Close with a current, dated recognition status** (SNA or UNESCO ICH) rather than an undated generic claim.

### 11. Subject boundaries

- WRONG: **Indian Society owns** the devadasi system's social history, gender and reform-movement dimensions in full depth (a significant social- reform question in its own right). This file owns the **resulting dance form and its technical vocabulary**.

- WRONG: **Topic 13 owns** the philosophical/aesthetic theory of rasa as doctrine in depth.

- FACT: This file's shared-vocabulary argument is the direct analytical bridge to topic 06's sculpture-reading method and topic 03's Chandella dossier.

### 12. Companion links

- FACT: Foundation companion: `basic/09_Indian-Dance.md`.

- FACT: `00_Master-Framework.md` Section 2 - the "how to read a monument, artwork or performance" method, here extended to the dance-sculpture shared vocabulary.

- ANALYSIS: **Cross-links:** Topic 03 (Chandella dossier, direct PYQ strengthening), Topic 06 (sculpture-reading method), Topic 14 (SNA/ UNESCO recognition ledger).

### 13. Verification ledger and open cautions

- FACT: Verified against *Nitin...pdf*, PDF pp. 458-464 directly.

- ANALYSIS: Open caution: this file's treatment of Kathakali, Mohiniyattam, Kathak, Odissi, Manipuri and Sattriya relies on the book's chapter structure/outline rather than a full paragraph-level read of each form's dedicated section; verify any specific factual claim about these six forms beyond what `basic/09` states before using it as a standalone Prelims fact.

## CONSOLIDATED REGISTER NOTES

### COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

**High-yield use:** Follow the panels as one topic-specific conceptual atlas: root question, classifications, processes or arguments, comparisons, objections and a final answer-writing spine. This text-native master is separate from both graphical flowchart artifacts.

### **ASCII MASTER FLOW - PANEL 1/12: Composite performance root**

TEXT -> narrative and dialogue  
ENACTMENT -> body, face and gesture  
MUSIC -> melody and rhythm  
RASA -> aesthetic reception

### **ASCII MASTER FLOW - PANEL 2/12: Movement vocabulary**

LASYA -> graceful and expressive quality  
TANDAVA -> vigorous rhythmic quality  
NRITTA -> pure movement  
NRITYA / NATYA -> expression and drama

### **ASCII MASTER FLOW - PANEL 3/12: Gesture firewall**

HASTA / MUDRA -> hand gesture  
KARANA -> whole-body movement unit  
108 -> attached to karanas  
TRAP -> do not convert the number to mudras

### **ASCII MASTER FLOW - PANEL 4/12: Recognition map**

SNA -> eight classical forms  
MINISTRY LIST -> separately includes Chhau  
UNESCO ICH -> safeguarding inscription  
RULE -> three non-interchangeable records

### **ASCII MASTER FLOW - PANEL 5/12: Bharatanatyam change**

SADIR / HEREDITARY PRACTICE -> repertory base  
ANTI-NAUTCH -> disruption  
IYER + RUKMINI DEVI -> reconfiguration  
MODERN STAGE -> wider canon and new authority

### **ASCII MASTER FLOW - PANEL 6/12: Recital sequence**

ALARIPPU -> opening  
JATISWARAM / SHABDAM -> movement and expression  
VARNAM / PADAM / JAWALI -> developed core  
THILLANA -> rhythmic close

### **ASCII MASTER FLOW - PANEL 7/12: Andhra discriminator**

KUCHIPUDI -> itinerant dance-drama origin  
KUCHELAPURAM -> place-name anchor  
SIDDHENDRA -> association  
BHARATANATYAM -> different solo history

### **ASCII MASTER FLOW - PANEL 8/12: Kerala pair**

KATHAKALI -> Attakkatha, make-up, troupe and percussion  
MOHINIYATTAM -> solo lasya and Kasavu  
COMMON -> Kerala performance ecology  
DISTINCTION -> drama versus lyrical solo

### **ASCII MASTER FLOW - PANEL 9/12: Eastern three-form key**

ODISSI -> tribhanga, chowk, mahari and gotipua  
MANIPURI -> pung, raslila and restrained face  
SATTTRIYA -> sattrra, ankiya nat and mati-akhora  
TRAP -> devotion alone cannot identify

### **ASCII MASTER FLOW - PANEL 10/12: Dance-sculpture bridge**

POSE -> movement idiom made visible  
MUDRA -> shared gestural vocabulary  
TEMPLE SITE -> patron-selected sacred context  
LIMIT -> no complete modern choreography proved

### **ASCII MASTER FLOW - PANEL 11/12: Garba official card**

OCCASION -> Navaratri  
CENTRE -> lit earthen pot or image of Amba  
MOVEMENT -> communal circular dance  
STATUS -> UNESCO ICH 2023, not SNA classical

### **ASCII MASTER FLOW - PANEL 12/12: Dance answer spine**

DEFINE -> component, form or recognition track  
IDENTIFY -> region and unique discriminator  
ANALYSE -> patronage, revival and community  
QUALIFY -> continuity, sculpture and status
