

## COMPLETE LEARNING SESSION

# Maritime and Coastal Security - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

# CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

|                                                                                                        |           |

| <b>SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT</b>                                                   | <b>6</b>  |
| LIVE OFFICIAL-SOURCE ATTEMPT LOG                                                                       | 6         |
| <b>BASIC LEARNING SESSION</b>                                                                          | <b>6</b>  |
| SESSION 1 - FOUNDATION - MARITIME AND COASTAL SECURITY DISTINCTION                                     | 7         |
| SESSION 2 - FOUNDATION - TERRITORIAL SEA CONTIGUOUS ZONE EEZ AND HIGH SEAS                             | 9         |
| SESSION 3 - FOUNDATION - THREAT CATEGORIES AND SEA-TRADE EXPOSURE                                      | 10        |
| SESSION 4 - CORE - NAVY ROLE AND WIDER MARITIME DEFENCE                                                | 12        |
| SESSION 5 - CORE - COAST GUARD MANDATE AND COORDINATION                                                | 13        |
| SESSION 6 - CORE - STATE MARINE POLICE AND COASTAL SECURITY SCHEME                                     | 15        |
| SESSION 7 - CORE - LAYERED ARCHITECTURE AND COMMAND CLARITY                                            | 16        |
| SESSION 8 - CORE - NCSMCS AND JOINT OPERATIONS CENTRES                                                 | 18        |
| SESSION 9 - CORE - NC3I IMAC AND IFC-IOR INFORMATION SHARING                                           | 19        |
| SESSION 10 - CORE - MARITIME-DOMAIN AWARENESS VERSUS INTERDICTION                                      | 21        |
| SESSION 11 - CORE - COASTAL SURVEILLANCE AND VESSEL IDENTIFICATION                                     | 22        |
| SESSION 12 - CORE - FISHING COMMUNITIES SAFETY LIVELIHOOD AND REPORTING                                | 24        |
| SESSION 13 - CORE SYNTHESIS - PORTS AS PHYSICAL AND CYBER SECURITY NODES                               | 26        |
| SESSION 14 - CORE SYNTHESIS - MARITIME ZONES SUA AND PIRACY ACTS                                       | 27        |
| SESSION 15 - CORE SYNTHESIS - REACTIVE BUILD-OUT RESILIENCE AND WAY FORWARD                            | 29        |
| <b>BASIC MCQS / REMEDIATION</b>                                                                        | <b>37</b> |
| Q1. Which statement correctly identifies Maritime-coastal distinction?                                 | 37        |
| Q2. Which option preserves the legal or institutional boundary of Maritime-coastal distinction?        | 37        |
| Q3. Which statement uses Maritime-coastal distinction without changing its institution, law or status? | 38        |
| Q4. Which option avoids the standard UPSC close-option trap about Maritime-coastal distinction?        | 38        |
| Q5. Which statement correctly identifies Maritime-zone ladder?                                         | 38        |
| Q6. Which option preserves the legal or institutional boundary of Maritime-zone ladder?                | 39        |
| Q7. Which statement uses Maritime-zone ladder without changing its institution, law or status?         | 39        |
| Q8. Which option avoids the standard UPSC close-option trap about Maritime-zone ladder?                | 39        |
| Q9. Which statement correctly identifies Threat-category map?                                          | 39        |

|                                                                                                                    |    |
|--------------------------------------------------------------------------------------------------------------------|----|
| Q10. Which option preserves the legal or institutional boundary of Threat-category map? . . . . .                  | 40 |
| Q11. Which statement uses Threat-category map without changing its institution, law or status? . . . . .           | 40 |
| Q12. Which option avoids the standard UPSC close-option trap about Threat-category map? . . . . .                  | 40 |
| Q13. Which statement correctly identifies Navy role? . . . . .                                                     | 41 |
| Q14. Which option preserves the legal or institutional boundary of Navy role? . . . . .                            | 41 |
| Q15. Which statement uses Navy role without changing its institution, law or status? . . . . .                     | 41 |
| Q16. Which option avoids the standard UPSC close-option trap about Navy role? . . . . .                            | 41 |
| Q17. Which statement correctly identifies Coast Guard role? . . . . .                                              | 42 |
| Q18. Which option preserves the legal or institutional boundary of Coast Guard role? . . . . .                     | 42 |
| Q19. Which statement uses Coast Guard role without changing its institution, law or status? . . . . .              | 42 |
| Q20. Which option avoids the standard UPSC close-option trap about Coast Guard role? . . . . .                     | 42 |
| Q21. Which statement correctly identifies Marine Police role? . . . . .                                            | 43 |
| Q22. Which option preserves the legal or institutional boundary of Marine Police role? . . . . .                   | 43 |
| Q23. Which statement uses Marine Police role without changing its institution, law or status? . . . . .            | 43 |
| Q24. Which option avoids the standard UPSC close-option trap about Marine Police role? . . . . .                   | 43 |
| Q25. Which statement correctly identifies Layered-architecture boundary? . . . . .                                 | 44 |
| Q26. Which option preserves the legal or institutional boundary of Layered-architecture boundary? . . . . .        | 44 |
| Q27. Which statement uses Layered-architecture boundary without changing its institution, law or status? . . . . . | 44 |
| Q28. Which option avoids the standard UPSC close-option trap about Layered-architecture boundary? . . . . .        | 45 |
| Q29. Which statement correctly identifies NCSMCS coordination? . . . . .                                           | 45 |
| Q30. Which option preserves the legal or institutional boundary of NCSMCS coordination? . . . . .                  | 45 |
| Q31. Which statement uses NCSMCS coordination without changing its institution, law or status? . . . . .           | 45 |
| Q32. Which option avoids the standard UPSC close-option trap about NCSMCS coordination? . . . . .                  | 46 |
| Q33. Which statement correctly identifies Joint Operations Centres? . . . . .                                      | 46 |
| Q34. Which option preserves the legal or institutional boundary of Joint Operations Centres? . . . . .             | 46 |
| Q35. Which statement uses Joint Operations Centres without changing its institution, law or status? . . . . .      | 46 |
| Q36. Which option avoids the standard UPSC close-option trap about Joint Operations Centres? . . . . .             | 47 |
| Q37. Which statement correctly identifies NC3I function? . . . . .                                                 | 47 |
| Q38. Which option preserves the legal or institutional boundary of NC3I function? . . . . .                        | 47 |
| Q39. Which statement uses NC3I function without changing its institution, law or status? . . . . .                 | 47 |
| Q40. Which option avoids the standard UPSC close-option trap about NC3I function? . . . . .                        | 48 |
| Q41. Which statement correctly identifies IMAC-IFC boundary? . . . . .                                             | 48 |

|                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------|----|
| Q42. Which option preserves the legal or institutional boundary of IMAC-IFC boundary? . . . . .                         | 48 |
| Q43. Which statement uses IMAC-IFC boundary without changing its institution, law or status? . . . . .                  | 48 |
| Q44. Which option avoids the standard UPSC close-option trap about IMAC-IFC boundary? . . . . .                         | 49 |
| Q45. Which statement correctly identifies Awareness-interdiction distinction? . . . . .                                 | 49 |
| Q46. Which option preserves the legal or institutional boundary of Awareness-interdiction distinction? . . . . .        | 49 |
| Q47. Which statement uses Awareness-interdiction distinction without changing its institution, law or status? . . . . . | 50 |
| Q48. Which option avoids the standard UPSC close-option trap about Awareness-interdiction distinction? . . . . .        | 50 |
| Q49. Which statement correctly identifies Surveillance-system role? . . . . .                                           | 50 |
| Q50. Which option preserves the legal or institutional boundary of Surveillance-system role? . . . . .                  | 50 |
| Q51. Which statement uses Surveillance-system role without changing its institution, law or status? . . . . .           | 51 |
| Q52. Which option avoids the standard UPSC close-option trap about Surveillance-system role? . . . . .                  | 51 |
| Q53. Which statement correctly identifies Fishing-community interface? . . . . .                                        | 51 |
| Q54. Which option preserves the legal or institutional boundary of Fishing-community interface? . . . . .               | 52 |
| Q55. Which statement uses Fishing-community interface without changing its institution, law or status? . . . . .        | 52 |
| Q56. Which option avoids the standard UPSC close-option trap about Fishing-community interface? . . . . .               | 52 |
| Q57. Which statement correctly identifies Port-security convergence? . . . . .                                          | 52 |
| Q58. Which option preserves the legal or institutional boundary of Port-security convergence? . . . . .                 | 53 |
| Q59. Which statement uses Port-security convergence without changing its institution, law or status? . . . . .          | 53 |
| Q60. Which option avoids the standard UPSC close-option trap about Port-security convergence? . . . . .                 | 53 |
| Q61. Which statement correctly identifies Coastal Security Scheme? . . . . .                                            | 54 |
| Q62. Which option preserves the legal or institutional boundary of Coastal Security Scheme? . . . . .                   | 54 |
| Q63. Which statement uses Coastal Security Scheme without changing its institution, law or status? . . . . .            | 54 |
| Q64. Which option avoids the standard UPSC close-option trap about Coastal Security Scheme? . . . . .                   | 54 |
| Q65. Which statement correctly identifies Three-statute legal map? . . . . .                                            | 55 |
| Q66. Which option preserves the legal or institutional boundary of Three-statute legal map? . . . . .                   | 55 |
| Q67. Which statement uses Three-statute legal map without changing its institution, law or status? . . . . .            | 55 |
| Q68. Which option avoids the standard UPSC close-option trap about Three-statute legal map? . . . . .                   | 56 |
| Q69. Which statement correctly identifies Piracy-location boundary? . . . . .                                           | 56 |
| Q70. Which option preserves the legal or institutional boundary of Piracy-location boundary? . . . . .                  | 56 |
| Q71. Which statement uses Piracy-location boundary without changing its institution, law or status? . . . . .           | 56 |
| Q72. Which option avoids the standard UPSC close-option trap about Piracy-location boundary? . . . . .                  | 57 |
| Q73. Which statement correctly identifies Reactive-buildout lesson? . . . . .                                           | 57 |

|                                                                                                               |           |
|---------------------------------------------------------------------------------------------------------------|-----------|
| Q74. Which option preserves the legal or institutional boundary of Reactive-buildout lesson? . . . . .        | 57        |
| Q75. Which statement uses Reactive-buildout lesson without changing its institution, law or status? . . . . . | 58        |
| Q76. Which option avoids the standard UPSC close-option trap about Reactive-buildout lesson? . . . . .        | 58        |
| Q77. Which statement correctly identifies Resilient end-state? . . . . .                                      | 58        |
| Q78. Which option preserves the legal or institutional boundary of Resilient end-state? . . . . .             | 58        |
| Q79. Which statement uses Resilient end-state without changing its institution, law or status? . . . . .      | 59        |
| Q80. Which option avoids the standard UPSC close-option trap about Resilient end-state? . . . . .             | 59        |
| <b>PYQS AND ANSWER PRACTICE . . . . .</b>                                                                     | <b>59</b> |
| AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP . . . . .                                                                | 59        |

# Maritime and Coastal Security - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-04. No PDF was rendered and no tracker or index was mutated.

## SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-04.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. OCR-searchable official UPSC papers were supplementary only for printed routed demands. No answer key, attribution, operational method, notification effect, implementation outcome or security metric was inferred.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** The audited ledgers route the 2022 maritime-security initiatives demand and the 2025 sea-trade, maritime/coastal challenge and way-forward demand here. OCR inspection confirmed both printed Mains stems. A 2022 UNCLOS Prelims concept is included only as a clearly labelled cross-owned zone-law card.
- **Live-link boundary:** Live official attempts on 2026-09-04 confirmed no new operational readiness or outcome statistic. The module therefore uses stable owner-audited mandates and statutes, records the official coastal-police training search only as an institutional input, and requires dated Navy, Coast Guard, MHA, ports or police evidence for current performance claims.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

## LIVE OFFICIAL-SOURCE ATTEMPT LOG

The checks below were made on 2026-09-04. Substantive official text is used only for the proposition it supports; title-only, blocked or thin pages are recorded and supply no factual claim.

- <https://www.indiacode.nic.in/> - attempted 2026-09-04 for the Territorial Waters, Continental Shelf, Exclusive Economic Zone and Other Maritime Zones Act, 1976; Coast Guard Act, 1978; SUA Act, 2002; and Anti-Maritime Piracy Act, 2022. Direct retrieval returned 403, so only owner-audited statutory distinctions are used.
- <https://www.mha.gov.in/en/divisionofmha/border-management-ii-division> - attempted 2026-09-04 for the Coastal Security Scheme and marine-police capacity framework; direct retrieval returned 403. No current asset, station, vessel, training or coverage count is imported.
- <https://pib.gov.in/PressReleasePage.aspx?PRID=1996947> - searched and attempted 2026-09-04; the official PIB search result identifies a National Academy of Coastal Policing foundation course, while direct retrieval returned 403. The module uses it only as evidence that specialised coastal-police training exists, not as proof of readiness.
- <https://pib.gov.in/PressReleasePage.aspx?PRID=1952972> - searched and attempted 2026-09-04 for official coastal-security and maritime-domain-awareness material; direct retrieval returned 403. No unverified partner, liaison-officer, exercise or operational-result count is used.

## BASIC LEARNING SESSION

Refreshed teaching navigation

*Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.*

## SESSION 1 - FOUNDATION - MARITIME AND COASTAL SECURITY DISTINCTION

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.

**Technical definition:** The decisive boundary is Do not use maritime security and coastal security as synonyms.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.

### MUST-WRITE KEYWORDS

- FOUNDATION
- Maritime
- coastal security distinction
- Mechanism chain
- Qualified use
- EEZ

**How to use them:** Frame the answer through FOUNDATION; define Maritime, connect coastal security distinction with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

## VISUAL FIRST

### MARITIME AND COASTAL SECURITY DISTINCTION

01. Maritime-coastal distinction

|  
v

02. Maritime-zone ladder

STATUS / CATEGORY FIREWALL -> Do not use maritime security and coastal security as synonyms.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

## SIMPLE SYSTEM EXAMPLE

Read Maritime and coastal security distinction as a sequence: identify Maritime-coastal distinction, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not use maritime security and coastal security as synonyms. This keeps Maritime-coastal distinction and Maritime-zone ladder in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.
- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

## EXAMINER CAUTION

- Do not use maritime security and coastal security as synonyms.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Define the broader maritime domain before the coastal subset.

## MINI RECAP

- **Mechanism chain:** Maritime-coastal distinction -> Maritime-zone ladder
- **Qualified use:** Define the broader maritime domain before the coastal subset.

## CLOSING RECALL FLOW - FOUNDATION - MARITIME AND COASTAL SECURITY DISTINCTION

START / CONCEPT: FOUNDATION - Maritime and coastal security distinction

|  
v

EXACT TERMS: FOUNDATION • Maritime • coastal security distinction • Mechanism chain • Qualified use  
• EEZ

|  
v

MECHANISM / ARGUMENT: Read Maritime and coastal security distinction as a sequence: identify Maritime-coastal distinction, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|  
v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not use maritime security and coastal security as synonyms.

|  
v

UPSC TRAP / ANSWER-USE: Do not use maritime security and coastal security as synonyms.

|  
v

ANSWER-GRABBING FORMULATION: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.

## SESSION 2 - FOUNDATION - TERRITORIAL SEA CONTIGUOUS ZONE EEZ AND HIGH SEAS

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** The decisive boundary is Do not confuse territorial sea, contiguous zone, EEZ and high seas.

**Technical definition:** Read Territorial sea contiguous zone EEZ and high seas as a sequence: identify Threat-category map, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The decisive boundary is Do not confuse territorial sea, contiguous zone, EEZ and high seas.

### MUST-WRITE KEYWORDS

- **FOUNDATION**
- **Territorial sea contiguous zone EEZ**
- **high seas**
- **Mechanism chain**
- **Qualified use**
- **Relevant**

**How to use them:** Frame the answer through FOUNDATION; define Territorial sea contiguous zone EEZ, connect high seas with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

### VISUAL FIRST

TERRITORIAL SEA CONTIGUOUS ZONE EEZ AND HIGH SEAS

01. Threat-category map

STATUS / CATEGORY FIREWALL -> Do not confuse territorial sea, contiguous zone, EEZ and high seas.

*The rail fixes the institutional sequence and claim boundary before explanation.*

### CORE EXPLANATION

Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

### SIMPLE SYSTEM EXAMPLE

Read Territorial sea contiguous zone EEZ and high seas as a sequence: identify Threat-category map, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### TECHNICAL DISTINCTION

The decisive boundary is Do not confuse territorial sea, contiguous zone, EEZ and high seas. This keeps Threat-category map in the correct legal category, institutional mandate and evidentiary status.

### NAMED EVIDENCE AND MECHANISM

- Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

### EXAMINER CAUTION

- Do not confuse territorial sea, contiguous zone, EEZ and high seas.

### EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Fix the zone before assigning institution or law.

## MINI RECAP

- **Mechanism chain:** Threat-category map
- **Qualified use:** Fix the zone before assigning institution or law.

## CLOSING RECALL FLOW - FOUNDATION - TERRITORIAL SEA CONTIGUOUS ZONE EEZ AND HIGH SEAS

START / CONCEPT: FOUNDATION - Territorial sea contiguous zone EEZ and high seas

|  
v

EXACT TERMS: FOUNDATION · Territorial sea contiguous zone EEZ · high seas · Mechanism chain ·  
Qualified use · Relevant

|  
v

MECHANISM / ARGUMENT: Read Territorial sea contiguous zone EEZ and high seas as a sequence:  
identify Threat-category map, follow the named mechanism to its institutional response, and stop at  
the last verified status rather than assuming the next stage.

|  
v

CONSEQUENCE / CONTRAST: Do not confuse territorial sea, contiguous zone, EEZ and high seas.

|  
v

UPSC TRAP / ANSWER-USE: Do not miss this limiting distinction: fix the zone before assigning  
institution or law.

|  
v

ANSWER-GRABBING FORMULATION: The decisive boundary is Do not confuse territorial sea, contiguous  
zone, EEZ and high seas.

## SESSION 3 - FOUNDATION - THREAT CATEGORIES AND SEA-TRADE EXPOSURE

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read Threat categories and sea-trade exposure as a sequence: identify Navy role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

**Technical definition:** Mechanism chain: Navy role Qualified use: Link each challenge to location, actor, capability and consequence.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Threat categories and sea-trade exposure as a sequence: identify Navy role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- **FOUNDATION**
- **Threat categories**
- **sea-trade exposure**
- **Mechanism chain**
- **Qualified use**
- **The Indian Navy's**

**How to use them:** Frame the answer through FOUNDATION; define Threat categories, connect sea-trade exposure with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

## VISUAL FIRST

THREAT CATEGORIES AND SEA-TRADE EXPOSURE

01. Navy role

STATUS / CATEGORY FIREWALL -> Do not describe the Navy as the sole coastal-security authority.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

## SIMPLE SYSTEM EXAMPLE

Read Threat categories and sea-trade exposure as a sequence: identify Navy role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not describe the Navy as the sole coastal-security authority. This keeps Navy role in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

## EXAMINER CAUTION

- Do not describe the Navy as the sole coastal-security authority.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Link each challenge to location, actor, capability and consequence.

## MINI RECAP

- **Mechanism chain:** Navy role
- **Qualified use:** Link each challenge to location, actor, capability and consequence.

## CLOSING RECALL FLOW - FOUNDATION - THREAT CATEGORIES AND SEA-TRADE EXPOSURE

START / CONCEPT: FOUNDATION - Threat categories and sea-trade exposure

|

v

EXACT TERMS: FOUNDATION • Threat categories • sea-trade exposure • Mechanism chain • Qualified use  
• The Indian Navy's

|

v

MECHANISM / ARGUMENT: Mechanism chain: Navy role Qualified use: Link each challenge to location, actor, capability and consequence.

|

v

CONSEQUENCE / CONTRAST: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

|

v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not describe the Navy as the sole coastal-security authority.

|

v

ANSWER-GRABBING FORMULATION: Read Threat categories and sea-trade exposure as a sequence: identify Navy role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## SESSION 4 - CORE - NAVY ROLE AND WIDER MARITIME DEFENCE

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read Navy role and wider maritime defence as a sequence: identify Coast Guard role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

**Technical definition:** Mechanism chain: Coast Guard role Qualified use: Protect sea-control and SLOC roles from near-shore mandate conflation.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Navy role and wider maritime defence as a sequence: identify Coast Guard role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- Navy role
- wider maritime defence
- Mechanism chain
- Qualified use
- Read Navy
- Coast Guard

**How to use them:** Frame the answer through Navy role; define wider maritime defence, connect Mechanism chain with Qualified use to explain the mechanism, and use Read Navy for the decisive comparison or qualification.

### VISUAL FIRST

NAVY ROLE AND WIDER MARITIME DEFENCE

01. Coast Guard role

STATUS / CATEGORY FIREWALL -> Do not transfer a Coast Guard mandate to State Marine Police or vice versa.

*The rail fixes the institutional sequence and claim boundary before explanation.*

### CORE EXPLANATION

The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

### SIMPLE SYSTEM EXAMPLE

Read Navy role and wider maritime defence as a sequence: identify Coast Guard role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### TECHNICAL DISTINCTION

The decisive boundary is Do not transfer a Coast Guard mandate to State Marine Police or vice versa. This keeps Coast Guard role in the correct legal category, institutional mandate and evidentiary status.

### NAMED EVIDENCE AND MECHANISM

- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

### EXAMINER CAUTION

- Do not transfer a Coast Guard mandate to State Marine Police or vice versa.

### EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Protect sea-control and SLOC roles from near-shore mandate conflation.

## MINI RECAP

- **Mechanism chain:** Coast Guard role
- **Qualified use:** Protect sea-control and SLOC roles from near-shore mandate conflation.

## CLOSING RECALL FLOW - CORE - NAVY ROLE AND WIDER MARITIME DEFENCE

START / CONCEPT: CORE - Navy role and wider maritime defence

|  
v

EXACT TERMS: Navy role · wider maritime defence · Mechanism chain · Qualified use · Read Navy · Coast Guard

|  
v

MECHANISM / ARGUMENT: Mechanism chain: Coast Guard role Qualified use: Protect sea-control and SLOC roles from near-shore mandate conflation.

|  
v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not transfer a Coast Guard mandate to State Marine Police or vice versa.

|  
v

UPSC TRAP / ANSWER-USE: Do not transfer a Coast Guard mandate to State Marine Police or vice versa.

|  
v

ANSWER-GRABBING FORMULATION: Read Navy role and wider maritime defence as a sequence: identify Coast Guard role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## SESSION 5 - CORE - COAST GUARD MANDATE AND COORDINATION

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read Coast Guard mandate and coordination as a sequence: identify Marine Police role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

**Technical definition:** Mechanism chain: Marine Police role Qualified use: State Coast Guard functions without converting coordination into sole ownership.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Coast Guard mandate and coordination as a sequence: identify Marine Police role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- **Coast Guard mandate**
- **coordination**
- **Mechanism chain**
- **Qualified use**
- **Read Coast Guard**
- **Marine Police**

**How to use them:** Frame the answer through Coast Guard mandate; define coordination, connect Mechanism chain with Qualified use to explain the mechanism, and use Read Coast Guard for the decisive comparison or qualification.

## VISUAL FIRST

COAST GUARD MANDATE AND COORDINATION

01. Marine Police role

STATUS / CATEGORY FIREWALL -> Do not infer readiness from a force's statutory existence.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

## SIMPLE SYSTEM EXAMPLE

Read Coast Guard mandate and coordination as a sequence: identify Marine Police role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not infer readiness from a force's statutory existence. This keeps Marine Police role in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

## EXAMINER CAUTION

- Do not infer readiness from a force's statutory existence.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** State Coast Guard functions without converting coordination into sole ownership.

## MINI RECAP

- **Mechanism chain:** Marine Police role
- **Qualified use:** State Coast Guard functions without converting coordination into sole ownership.

## CLOSING RECALL FLOW - CORE - COAST GUARD MANDATE AND COORDINATION

START / CONCEPT: CORE - Coast Guard mandate and coordination

|

v

EXACT TERMS: Coast Guard mandate • coordination • Mechanism chain • Qualified use • Read Coast Guard • Marine Police

|

v

MECHANISM / ARGUMENT: Mechanism chain: Marine Police role Qualified use: State Coast Guard functions without converting coordination into sole ownership.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not infer readiness from a force's statutory existence.

|

v

UPSC TRAP / ANSWER-USE: Do not infer readiness from a force's statutory existence.

|

v

ANSWER-GRABBING FORMULATION: Read Coast Guard mandate and coordination as a sequence: identify Marine Police role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

# SESSION 6 - CORE - STATE MARINE POLICE AND COASTAL SECURITY SCHEME

## DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.

**Technical definition:** Read State Marine Police and Coastal Security Scheme as a sequence: identify Layered-architecture boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read State Marine Police and Coastal Security Scheme as a sequence: identify Layered-architecture boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## MUST-WRITE KEYWORDS

- Coastal Security Scheme
- Mechanism chain
- Qualified use
- Navy
- Coast Guard
- Marine Police

**How to use them:** Frame the answer through Coastal Security Scheme; define Mechanism chain, connect Qualified use with Navy to explain the mechanism, and use Coast Guard for the decisive comparison or qualification.

## VISUAL FIRST

STATE MARINE POLICE AND COASTAL SECURITY SCHEME

01. Layered-architecture boundary

|  
v

02. NCSMCS coordination

STATUS / CATEGORY FIREWALL -> Do not turn a simplified three-tier diagram into exclusive jurisdiction in every incident.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.

## SIMPLE SYSTEM EXAMPLE

Read State Marine Police and Coastal Security Scheme as a sequence: identify Layered-architecture boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not turn a simplified three-tier diagram into exclusive jurisdiction in every incident. This keeps Layered-architecture boundary and NCSMCS coordination in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

- The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.

### EXAMINER CAUTION

- Do not turn a simplified three-tier diagram into exclusive jurisdiction in every incident.

### EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Separate infrastructure, staffing, training, serviceability and outcome.

### MINI RECAP

- **Mechanism chain:** Layered-architecture boundary -> NCSMCS coordination
- **Qualified use:** Separate infrastructure, staffing, training, serviceability and outcome.

### CLOSING RECALL FLOW - CORE - STATE MARINE POLICE AND COASTAL SECURITY SCHEME

START / CONCEPT: CORE - State Marine Police and Coastal Security Scheme

|

v

EXACT TERMS: Coastal Security Scheme · Mechanism chain · Qualified use · Navy · Coast Guard · Marine Police

|

v

MECHANISM / ARGUMENT: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.

|

v

CONSEQUENCE / CONTRAST: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

|

v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not turn a simplified three-tier diagram into exclusive jurisdiction in every incident.

v

ANSWER-GRABBING FORMULATION: Read State Marine Police and Coastal Security Scheme as a sequence: identify Layered-architecture boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## SESSION 7 - CORE - LAYERED ARCHITECTURE AND COMMAND CLARITY

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** The decisive boundary is Do not equate an apex committee with operational command at sea.

**Technical definition:** Read Layered architecture and command clarity as a sequence: identify Joint Operations Centres, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Layered architecture and command clarity as a sequence: identify Joint Operations Centres, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- Layered architecture
- command clarity
- Mechanism chain
- Qualified use

- **Joint Operations Centres**
- **Mumbai**

**How to use them:** Frame the answer through Layered architecture; define command clarity, connect Mechanism chain with Qualified use to explain the mechanism, and use Joint Operations Centres for the decisive comparison or qualification.

## VISUAL FIRST

LAYERED ARCHITECTURE AND COMMAND CLARITY

01. Joint Operations Centres

STATUS / CATEGORY FIREWALL -> Do not equate an apex committee with operational command at sea.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.

## SIMPLE SYSTEM EXAMPLE

Read Layered architecture and command clarity as a sequence: identify Joint Operations Centres, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not equate an apex committee with operational command at sea. This keeps Joint Operations Centres in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.

## EXAMINER CAUTION

- Do not equate an apex committee with operational command at sea.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Use layering to explain cooperation and identify overlap risks.

## MINI RECAP

- **Mechanism chain:** Joint Operations Centres
- **Qualified use:** Use layering to explain cooperation and identify overlap risks.

## CLOSING RECALL FLOW - CORE - LAYERED ARCHITECTURE AND COMMAND CLARITY

START / CONCEPT: CORE - Layered architecture and command clarity

|

v

EXACT TERMS: Layered architecture • command clarity • Mechanism chain • Qualified use • Joint Operations Centres • Mumbai

|

v

MECHANISM / ARGUMENT: Mechanism chain: Joint Operations Centres Qualified use: Use layering to explain cooperation and identify overlap risks.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not equate an apex committee with operational command at sea.

|

v

UPSC TRAP / ANSWER-USE: Do not equate an apex committee with operational command at sea.

|

v

ANSWER-GRABBING FORMULATION: Read Layered architecture and command clarity as a sequence: identify Joint Operations Centres, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## SESSION 8 - CORE - NCSMCS AND JOINT OPERATIONS CENTRES

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read NCSMCS and Joint Operations Centres as a sequence: identify NC3I function, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

**Technical definition:** Mechanism chain: NC3I function Qualified use: Distinguish apex policy coordination from operational incident command.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read NCSMCS and Joint Operations Centres as a sequence: identify NC3I function, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- **NCSMCS**
- **Joint Operations Centres**
- **Mechanism chain**
- **Qualified use**
- **Read NCSMCS**
- **The decisive boundary**

**How to use them:** Frame the answer through NCSMCS; define Joint Operations Centres, connect Mechanism chain with Qualified use to explain the mechanism, and use Read NCSMCS for the decisive comparison or qualification.

### VISUAL FIRST

NCSMCS AND JOINT OPERATIONS CENTRES

01. NC3I function

STATUS / CATEGORY FIREWALL -> Do not expose patrol patterns, sensor gaps or exploitable port vulnerabilities.

*The rail fixes the institutional sequence and claim boundary before explanation.*

### CORE EXPLANATION

The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

### SIMPLE SYSTEM EXAMPLE

Read NCSMCS and Joint Operations Centres as a sequence: identify NC3I function, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### TECHNICAL DISTINCTION

The decisive boundary is Do not expose patrol patterns, sensor gaps or exploitable port vulnerabilities. This keeps NC3I function in the correct legal category, institutional mandate and evidentiary status.

### NAMED EVIDENCE AND MECHANISM

- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

### EXAMINER CAUTION

- Do not expose patrol patterns, sensor gaps or exploitable port vulnerabilities.

### EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Distinguish apex policy coordination from operational incident command.

## MINI RECAP

- **Mechanism chain:** NC3I function
- **Qualified use:** Distinguish apex policy coordination from operational incident command.

## CLOSING RECALL FLOW - CORE - NCSMCS AND JOINT OPERATIONS CENTRES

START / CONCEPT: CORE - NCSMCS and Joint Operations Centres  
|  
v  
EXACT TERMS: NCSMCS · Joint Operations Centres · Mechanism chain · Qualified use · Read NCSMCS ·  
The decisive boundary  
|  
v  
MECHANISM / ARGUMENT: Mechanism chain: NC3I function Qualified use: Distinguish apex policy  
coordination from operational incident command.

v  
ANSWER-GRABBING FORMULATION: Read NCSMCS and Joint Operations Centres as a sequence: identify NC3I  
function, follow the named mechanism to its institutional response, and stop at the last verified  
status rather than assuming the next stage.

## SESSION 9 - CORE - NC3I IMAC AND IFC-IOR INFORMATION SHARING

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

**Technical definition:** Read NC3I IMAC and IFC-IOR information sharing as a sequence: identify IMAC-IFC boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

### MUST-WRITE KEYWORDS

- **NC3I IMAC**
- **IFC-IOR information sharing**
- **Mechanism chain**
- **Qualified use**
- **The Information Management**
- **Centre**

**How to use them:** Frame the answer through NC3I IMAC; define IFC-IOR information sharing, connect Mechanism chain with Qualified use to explain the mechanism, and use The Information Management for the decisive comparison or qualification.

## VISUAL FIRST

NC3I IMAC AND IFC-IOR INFORMATION SHARING

01. IMAC-IFC boundary

STATUS / CATEGORY FIREWALL -> Do not equate a fused maritime picture with boarding or prosecution capacity.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

## SIMPLE SYSTEM EXAMPLE

Read NC3I IMAC and IFC-IOR information sharing as a sequence: identify IMAC-IFC boundary, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not equate a fused maritime picture with boarding or prosecution capacity. This keeps IMAC-IFC boundary in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

## EXAMINER CAUTION

- Do not equate a fused maritime picture with boarding or prosecution capacity.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Map domestic and partner information flows without claiming enforcement power.

## MINI RECAP

- **Mechanism chain:** IMAC-IFC boundary
- **Qualified use:** Map domestic and partner information flows without claiming enforcement power.

## CLOSING RECALL FLOW - CORE - NC3I IMAC AND IFC-IOR INFORMATION SHARING

START / CONCEPT: CORE - NC3I IMAC and IFC-IOR information sharing

|

v

EXACT TERMS: NC3I IMAC · IFC-IOR information sharing · Mechanism chain · Qualified use · The Information Management · Centre

v

UPSC TRAP / ANSWER-USE: Do not equate a fused maritime picture with boarding or prosecution capacity.

|

v

ANSWER-GRABBING FORMULATION: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

# SESSION 10 - CORE - MARITIME-DOMAIN AWARENESS VERSUS INTERDICTION

## DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read Maritime-domain awareness versus interdiction as a sequence: identify Awareness-interdiction distinction, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

**Technical definition:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

## ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Maritime-domain awareness versus interdiction as a sequence: identify Awareness-interdiction distinction, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## MUST-WRITE KEYWORDS

- Maritime-domain awareness versus interdiction
- Mechanism chain
- Qualified use
- Radar
- AIS
- Read Maritime-domain

**How to use them:** Frame the answer through Maritime-domain awareness versus interdiction; define Mechanism chain, connect Qualified use with Radar to explain the mechanism, and use AIS for the decisive comparison or qualification.

## VISUAL FIRST

MARITIME-DOMAIN AWARENESS VERSUS INTERDICTION

01. Awareness-interdiction distinction

STATUS / CATEGORY FIREWALL -> Do not treat fishing communities collectively as suspects.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

## SIMPLE SYSTEM EXAMPLE

Read Maritime-domain awareness versus interdiction as a sequence: identify Awareness-interdiction distinction, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not treat fishing communities collectively as suspects. This keeps Awareness-interdiction distinction in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

## EXAMINER CAUTION

- Do not treat fishing communities collectively as suspects.

### EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Separate detection, identification, decision, interception and adjudication.

### MINI RECAP

- **Mechanism chain:** Awareness-interdiction distinction
- **Qualified use:** Separate detection, identification, decision, interception and adjudication.

### CLOSING RECALL FLOW - CORE - MARITIME-DOMAIN AWARENESS VERSUS INTERDICTION

```
START / CONCEPT: CORE - Maritime-domain awareness versus interdiction
|
v
EXACT TERMS: Maritime-domain awareness versus interdiction · Mechanism chain · Qualified use ·
Radar · AIS · Read Maritime-domain
|
v
MECHANISM / ARGUMENT: Mechanism chain: Awareness-interdiction distinction Qualified use: Separate
detection, identification, decision, interception and adjudication.
|
v
CONSEQUENCE / CONTRAST: The decisive boundary is Do not treat fishing communities collectively as
suspects.
|
v
UPSC TRAP / ANSWER-USE: Do not treat fishing communities collectively as suspects.
|
v
ANSWER-GRABBING FORMULATION: Read Maritime-domain awareness versus interdiction as a sequence:
identify Awareness-interdiction distinction, follow the named mechanism to its institutional
response, and stop at the last verified status rather than assuming the next stage.
```

## SESSION 11 - CORE - COASTAL SURVEILLANCE AND VESSEL IDENTIFICATION

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.

**Technical definition:** Read Coastal surveillance and vessel identification as a sequence: identify Surveillance-system role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Coastal surveillance and vessel identification as a sequence: identify Surveillance-system role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- Coastal surveillance
- vessel identification
- Mechanism chain
- Qualified use
- Fishing communities
- Fishing

**How to use them:** Frame the answer through Coastal surveillance; define vessel identification, connect Mechanism chain with Qualified use to explain the mechanism, and use Fishing communities for the decisive comparison or qualification.

## VISUAL FIRST

### COASTAL SURVEILLANCE AND VESSEL IDENTIFICATION

01. Surveillance-system role

|  
v

02. Fishing-community interface

STATUS / CATEGORY FIREWALL -> Do not use piracy, maritime terrorism and territorial-water crime interchangeably.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.

## SIMPLE SYSTEM EXAMPLE

Read Coastal surveillance and vessel identification as a sequence: identify Surveillance-system role, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not use piracy, maritime terrorism and territorial-water crime interchangeably. This keeps Surveillance-system role and Fishing-community interface in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.
- Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.

## EXAMINER CAUTION

- Do not use piracy, maritime terrorism and territorial-water crime interchangeably.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Treat technology as maintained capability, not a procurement list.

## MINI RECAP

- **Mechanism chain:** Surveillance-system role -> Fishing-community interface
- **Qualified use:** Treat technology as maintained capability, not a procurement list.

## CLOSING RECALL FLOW - CORE - COASTAL SURVEILLANCE AND VESSEL IDENTIFICATION

START / CONCEPT: CORE - Coastal surveillance and vessel identification

|  
v

EXACT TERMS: Coastal surveillance · vessel identification · Mechanism chain · Qualified use ·  
Fishing communities · Fishing

|  
v

MECHANISM / ARGUMENT: Mechanism chain: Surveillance-system role - Fishing-community interface  
Qualified use: Treat technology as maintained capability, not a procurement list.

|  
v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not use piracy, maritime terrorism and  
territorial-water crime interchangeably.

|  
v

UPSC TRAP / ANSWER-USE: Do not use piracy, maritime terrorism and territorial-water crime  
interchangeably.

|  
v

ANSWER-GRABBING FORMULATION: Read Coastal surveillance and vessel identification as a sequence:  
identify Surveillance-system role, follow the named mechanism to its institutional response, and  
stop at the last verified status rather than assuming the next stage.

## SESSION 12 - CORE - FISHING COMMUNITIES SAFETY LIVELIHOOD AND REPORTING

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read Fishing communities safety livelihood and reporting as a sequence: identify Port-security convergence, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

**Technical definition:** Mechanism chain: Port-security convergence Qualified use: Frame fishers as partners and rights-bearing livelihood communities.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Fishing communities safety livelihood and reporting as a sequence: identify Port-security convergence, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- Fishing communities safety livelihood
- reporting
- Mechanism chain
- Qualified use
- Ports
- Read Fishing

**How to use them:** Frame the answer through Fishing communities safety livelihood; define reporting, connect Mechanism chain with Qualified use to explain the mechanism, and use Ports for the decisive comparison or qualification.

## VISUAL FIRST

FISHING COMMUNITIES SAFETY LIVELIHOOD AND REPORTING

01. Port-security convergence

STATUS / CATEGORY FIREWALL -> Do not infer outcomes from sanctioned stations, boats, radars, exercises or training seats.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

## SIMPLE SYSTEM EXAMPLE

Read Fishing communities safety livelihood and reporting as a sequence: identify Port-security convergence, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not infer outcomes from sanctioned stations, boats, radars, exercises or training seats. This keeps Port-security convergence in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

## EXAMINER CAUTION

- Do not infer outcomes from sanctioned stations, boats, radars, exercises or training seats.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Frame fishers as partners and rights-bearing livelihood communities.

## MINI RECAP

- **Mechanism chain:** Port-security convergence
- **Qualified use:** Frame fishers as partners and rights-bearing livelihood communities.

## CLOSING RECALL FLOW - CORE - FISHING COMMUNITIES SAFETY LIVELIHOOD AND REPORTING

START / CONCEPT: CORE - Fishing communities safety livelihood and reporting

|

v

EXACT TERMS: Fishing communities safety livelihood · reporting · Mechanism chain · Qualified use · Ports · Read Fishing

|

v

MECHANISM / ARGUMENT: Mechanism chain: Port-security convergence Qualified use: Frame fishers as partners and rights-bearing livelihood communities.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not infer outcomes from sanctioned stations, boats, radars, exercises or training seats.

|

v

UPSC TRAP / ANSWER-USE: Do not infer outcomes from sanctioned stations, boats, radars, exercises or training seats.

|

v

ANSWER-GRABBING FORMULATION: Read Fishing communities safety livelihood and reporting as a sequence: identify Port-security convergence, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## SESSION 13 - CORE SYNTHESIS - PORTS AS PHYSICAL AND CYBER SECURITY NODES

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

**Technical definition:** Read Ports as physical and cyber security nodes as a sequence: identify Coastal Security Scheme, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Ports as physical and cyber security nodes as a sequence: identify Coastal Security Scheme, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Ports as physical
- cyber security nodes
- Mechanism chain
- Qualified use
- The Coastal Security Scheme

**How to use them:** Frame the answer through CORE SYNTHESIS; define Ports as physical, connect cyber security nodes with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

### VISUAL FIRST

PORTS AS PHYSICAL AND CYBER SECURITY NODES

01. Coastal Security Scheme

STATUS / CATEGORY FIREWALL -> Do not use maritime security and coastal security as synonyms.

*The rail fixes the institutional sequence and claim boundary before explanation.*

### CORE EXPLANATION

The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

### SIMPLE SYSTEM EXAMPLE

Read Ports as physical and cyber security nodes as a sequence: identify Coastal Security Scheme, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### TECHNICAL DISTINCTION

The decisive boundary is Do not use maritime security and coastal security as synonyms. This keeps Coastal Security Scheme in the correct legal category, institutional mandate and evidentiary status.

### NAMED EVIDENCE AND MECHANISM

- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

### EXAMINER CAUTION

- Do not use maritime security and coastal security as synonyms.

### EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.

- **Mains:** Integrate cargo, access, operational technology, cyber continuity and recovery.

### MINI RECAP

- **Mechanism chain:** Coastal Security Scheme
- **Qualified use:** Integrate cargo, access, operational technology, cyber continuity and recovery.

### CLOSING RECALL FLOW - CORE SYNTHESIS - PORTS AS PHYSICAL AND CYBER SECURITY NODES

START / CONCEPT: CORE SYNTHESIS - Ports as physical and cyber security nodes

|

v

EXACT TERMS: CORE SYNTHESIS • Ports as physical • cyber security nodes • Mechanism chain • Qualified use • The Coastal Security Scheme

|

v

MECHANISM / ARGUMENT: Mechanism chain: Coastal Security Scheme Qualified use: Integrate cargo, access, operational technology, cyber continuity and recovery.

|

v

CONSEQUENCE / CONTRAST: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

|

v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not use maritime security and coastal security as synonyms.

|

v

ANSWER-GRABBING FORMULATION: Read Ports as physical and cyber security nodes as a sequence: identify Coastal Security Scheme, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## SESSION 14 - CORE SYNTHESIS - MARITIME ZONES SUA AND PIRACY ACTS

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

**Technical definition:** Read Maritime Zones SUA and Piracy Acts as a sequence: identify Three-statute legal map, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Maritime Zones SUA and Piracy Acts as a sequence: identify Three-statute legal map, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

### MUST-WRITE KEYWORDS

- **CORE SYNTHESIS**
- **Maritime Zones SUA**
- **Piracy Acts**
- **Mechanism chain**
- **Qualified use**
- **The Maritime Zones Act**

**How to use them:** Frame the answer through CORE SYNTHESIS; define Maritime Zones SUA, connect Piracy Acts with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

## VISUAL FIRST

MARITIME ZONES SUA AND PIRACY ACTS

01. Three-statute legal map

|  
v

02. Piracy-location boundary

STATUS / CATEGORY FIREWALL -> Do not confuse territorial sea, contiguous zone, EEZ and high seas.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

## SIMPLE SYSTEM EXAMPLE

Read Maritime Zones SUA and Piracy Acts as a sequence: identify Three-statute legal map, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not confuse territorial sea, contiguous zone, EEZ and high seas. This keeps Three-statute legal map and Piracy-location boundary in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

## EXAMINER CAUTION

- Do not confuse territorial sea, contiguous zone, EEZ and high seas.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Choose the statute only after fixing offence and maritime zone.

## MINI RECAP

- **Mechanism chain:** Three-statute legal map -> Piracy-location boundary
- **Qualified use:** Choose the statute only after fixing offence and maritime zone.

## CLOSING RECALL FLOW - CORE SYNTHESIS - MARITIME ZONES SUA AND PIRACY ACTS

START / CONCEPT: CORE SYNTHESIS - Maritime Zones SUA and Piracy Acts

|  
v

EXACT TERMS: CORE SYNTHESIS · Maritime Zones SUA · Piracy Acts · Mechanism chain · Qualified use ·  
The Maritime Zones Act

|  
v

MECHANISM / ARGUMENT: Mechanism chain: Three-statute legal map - Piracy-location boundary Qualified  
use: Choose the statute only after fixing offence and maritime zone.

|  
v

CONSEQUENCE / CONTRAST: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses  
unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022  
creates a piracy-specific framework.

|  
v

UPSC TRAP / ANSWER-USE: Piracy is a high-seas or applicable EEZ offence under the piracy framework;  
violence in territorial or internal waters is not automatically piracy and may follow other  
criminal or maritime statutes.

|  
v

ANSWER-GRABBING FORMULATION: Read Maritime Zones SUA and Piracy Acts as a sequence: identify Three-  
statute legal map, follow the named mechanism to its institutional response, and stop at the last  
verified status rather than assuming the next stage.

## SESSION 15 - CORE SYNTHESIS - REACTIVE BUILD-OUT RESILIENCE AND WAY FORWARD

### DEFINITION / WHAT THIS IS CALLED

**Plain-language definition:** Read Reactive build-out resilience and way forward as a sequence: identify  
Reactive-buildout lesson, follow the named mechanism to its institutional response, and stop at the last verified status  
rather than assuming the next stage.

**Technical definition:** Mechanism chain: Reactive-buildout lesson - Resilient end-state Qualified use: Conclude with  
anticipatory resilience, drills, recovery and audited command clarity.

### ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Reactive build-out resilience and way forward as a sequence: identify Reactive-buildout lesson, follow the  
named mechanism to its institutional response, and stop at the last verified status rather than assuming the next  
stage.

### MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Reactive build-out resilience
- way forward
- Mechanism chain
- Qualified use
- Subject

**How to use them:** Frame the answer through CORE SYNTHESIS; define Reactive build-out resilience, connect way  
forward with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or  
qualification.

## VISUAL FIRST

REACTIVE BUILD-OUT RESILIENCE AND WAY FORWARD

01. Reactive-buildout lesson

|  
v

02. Resilient end-state

STATUS / CATEGORY FIREWALL -> Do not describe the Navy as the sole coastal-security authority.

*The rail fixes the institutional sequence and claim boundary before explanation.*

## CORE EXPLANATION

India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

## SIMPLE SYSTEM EXAMPLE

Read Reactive build-out resilience and way forward as a sequence: identify Reactive-buildout lesson, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## TECHNICAL DISTINCTION

The decisive boundary is Do not describe the Navy as the sole coastal-security authority. This keeps Reactive-buildout lesson and Resilient end-state in the correct legal category, institutional mandate and evidentiary status.

## NAMED EVIDENCE AND MECHANISM

- India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

## EXAMINER CAUTION

- Do not describe the Navy as the sole coastal-security authority.

## EXAM LINK

- **Prelims:** Keep institution, law, notification, ban/listing, scheme, agreement, ceasefire and outcome in their exact category.
- **Mains:** Conclude with anticipatory resilience, drills, recovery and audited command clarity.

## MINI RECAP

- **Mechanism chain:** Reactive-buildout lesson -> Resilient end-state
- **Qualified use:** Conclude with anticipatory resilience, drills, recovery and audited command clarity.

## COMPLETE BASIC OWNER EVIDENCE BANK

**Subject:** Internal Security | **Tier:** Must-Do (foundation) | **GS Paper:** GS-III. **Core area:** Maritime vs. coastal security; threat categories; the Navy-Coast Guard-Marine Police layered architecture; the post-26/11 coastal security build-out; the Anti-Maritime Piracy Act, 2022. **Grounded in:** VisionIAS, *Security Challenges and Their Management in Border Areas*, PDF pp. 4, 31-37, 47; Ashok Kumar Singh, *Challenges to Internal Security of India*, PDF pp. 124-130; 00\_Master-Framework.md Sections 4, 6; audited GS-III syllabus; Coast Guard Act 1978, Maritime Zones Act 1976, SUA Act 2002 and Anti-Maritime Piracy Act 2022 as published in India Code; MHA order establishing the National Academy of Coastal Policing (7 July 2026). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. *Companion:* advanced/07\_Maritime-and-Coastal-Security.md.

## 1. Visual foundation

**Core proposition:** FACT: VisionIAS defines coastal security as "a subset of maritime security that involves securing the country's coasts by guarding its maritime approaches against any threat or challenge that originates from the sea" (PDF p. 31), and sets out a three-tier arrangement: "the Navy and the Coast Guard" on the high seas/EEZ limits, the "Coast Guards" protecting territorial waters, and "close coastal patrolling... by State Marine Police" (PDF p. 35).

## 2. Essential definitions

| Concept                                                                             | Exam-ready meaning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FACT: <b>Maritime terrorism</b>                                                     | "The undertaking of terrorist acts and activities within the maritime environment, using or against vessels or fixed platforms at sea or in port... against coastal facilities or settlements" (VisionIAS, PDF p. 31).                                                                                                                                                                                                                                                                                                                   |
| FACT: <b>Piracy</b>                                                                 | By definition occurs on the high seas; India's Sunderbans shallow-water violence is analogous but not technically piracy under this definition (VisionIAS, PDF p. 31).                                                                                                                                                                                                                                                                                                                                                                   |
| FACT: <b>Indian Coast Guard (ICG)</b>                                               | Established 1 February 1977; formally constituted as the fourth armed force of India under the Coast Guard Act (18 August 1978), under the Ministry of Defence, tasked with maritime-zone security and protecting maritime/national interests (VisionIAS, PDF p. 33).                                                                                                                                                                                                                                                                    |
| FACT: <b>The maritime-zone ladder</b>                                               | Under the Maritime Zones Act, 1976 and UNCLOS: <b>territorial sea</b> to 12 nautical miles (full sovereignty; State Marine Police jurisdiction ends here), <b>contiguous zone</b> to 24 nm (customs, fiscal, immigration and sanitary enforcement), <b>EEZ</b> to 200 nm (resource rights, with Navy/Coast Guard surveillance to its limits), and the <b>high seas</b> beyond. ANALYSIS: Getting this ladder right is what makes an answer's institutional claims land: which agency leads, and which law applies, changes at each line. |
| FACT: <b>Marine Police Force</b>                                                    | Created under the Coastal Security Scheme (2005); works with the ICG on a "hub-and-spoke" model, patrolling territorial waters (12 nautical miles) (VisionIAS, PDF pp. 33-34).                                                                                                                                                                                                                                                                                                                                                           |
| FACT: <b>NC3I (National Command Control Communication and Intelligence Network)</b> | An over-arching coastal-security network collating and disseminating vessel data to enhance maritime domain awareness (VisionIAS, PDF p. 35).                                                                                                                                                                                                                                                                                                                                                                                            |
| FACT: <b>Anti-Maritime Piracy Act, 2022</b>                                         | Defines piracy per international convention language ("any illegal act of violence or detention or any act of depredation committed for private ends... directed on the high seas against another ship"), applies to the high seas including the EEZ, provides for Designated Courts specified in consultation with the concerned High Court's Chief Justice, extradition of the accused to treaty partners, arrest and seizure only by authorised personnel, and court-ordered disposal of seized property (VisionIAS, PDF p. 37).      |
| FACT: <b>SUA Act, 2002</b>                                                          | The Suppression of Unlawful Acts against Safety of Maritime Navigation and Fixed Platforms on Continental Shelf Act, 2002, gives effect to India's obligations under the SUA Convention and covers ship-hijacking and violence against vessels and offshore platforms - the maritime-terrorism statute that complements, and pre-dates, the 2022 piracy Act.                                                                                                                                                                             |

## 3. How the coastal-security architecture works

0. **Why it matters, in the source's own numbers:** FACT: India's coastline

runs **7,516.6 km including island territories**, through **nine coastal States** (Gujarat, Maharashtra, Goa, Karnataka, Kerala, Tamil Nadu, Andhra Pradesh, Odisha, West Bengal) and the coastal Union Territories (VisionIAS, PDF pp. 4, 31). FACT: The same source records that "more than 90 percent of India's trade is through sea routes and more than 80% of our hydrocarbon requirement is ferried through sea route" (PDF p. 37) - ANALYSIS: a source-cited proportion, not a dated official statistic; if the 2025 Q20 answer needs a figure, cite it as the VisionIAS/standard trade-share claim and confirm against a current Ministry of Ports, Shipping and Waterways or Navy release. ANALYSIS: Note also the vulnerability profile the source gives: creeks, bays, backwaters, lagoons, estuaries, mudflats and small inhabited and uninhabited islands; the absence of any physical barrier; vital industrial and defence installations near the coast; and physical proximity to politically volatile neighbours (PDF p. 31).

1. **Threat categorisation:** FACT: VisionIAS's five broad categories:

maritime terrorism, piracy/armed robbery, smuggling/trafficking, infiltration/illegal migration/refugee influx, and fishermen straying across maritime boundaries (PDF pp. 31-32).

2. **Historical build-out:** FACT: 1974 Customs Marine Organisation (CMO, anti-smuggling) -> 1977 Indian Coast Guard -> 2005 Coastal Security Scheme (three-layered structure) -> post-26/11 multilayered surveillance expansion (NC3I, IMAC) -> 2017 proposed Maritime Theatre Command -> 2020 first national maritime security coordinator appointed (VisionIAS, PDF p. 33).

3. **Three-tier jurisdictional design:** FACT: Navy/Coast Guard patrol EEZ limits on the high seas; Coast Guard protects territorial waters with vessels and aerial surveillance; State Marine Police handles close coastal patrolling within 12 nautical miles (VisionIAS, PDF p. 35).

4. **Post-26/11 institutionalisation:** FACT: The "mind-set that coastal security is not an essential component of national security eventually changed" only after the 2008 Mumbai attacks, after which Joint Operations Centres (Mumbai, Visakhapatnam, Kochi, Port Blair) were established, jointly manned 24x7 by Navy, ICG and Marine Police (VisionIAS, PDF pp. 35-36).

5. **Legal modernisation:** FACT: The Anti-Maritime Piracy Act, 2022 filled a gap - India previously "does not have a specific law or legal provision in Indian Penal Code or Criminal Procedure Code for piracy" (VisionIAS, PDF p. 37) - bringing India's law in line with UNCLOS obligations. ANALYSIS: Read it alongside the SUA Act, 2002 (maritime terrorism and offshore platforms) and the Maritime Zones Act, 1976 (the zone ladder itself): the legal architecture is three statutes with different triggers, not one.

6. **Surveillance and community layers:** FACT: The **\*\*Coastal Surveillance Network combines static coastal-radar chain, Automatic Identification System (AIS) receivers, long-range tracking and day-night cameras, with Vessel Traffic Management System (VTMS) radars at major and minor ports; the Navy has installed Integrated Underwater Harbour Defence and Surveillance Systems (IUHDSS) at major naval harbours; Operation Sagar Kavach exercises test inter-agency coordination; and the Navy raised Sagar Prahari Bal\*\*** in 2009 to protect naval bases and adjacent vulnerable areas/points (VisionIAS, PDF pp. 35-36). FACT: Fishermen groups of trained volunteers are described as the "ears and eyes" of coastal security, alongside multi-purpose fishermen ID cards, uniform boat licensing and GPS/transponder tracking (PDF p. 36).

#### 4. Institutions, laws and reference points

- FACT: **\*\*National Committee for Strengthening Maritime and Coastal Security**

(NCSMCS):\*\* apex coordination body headed by the Cabinet Secretary, coordinating nearly 15 national and state agencies (VisionIAS, PDF p. 35).

- FACT: **Information Fusion Centre-Indian Ocean Region (IFC-IOR)**: hosted by the Indian Navy at Gurugram since 2018, sharing vessel-of-interest information with International Liaison Officers from partner nations (VisionIAS, PDF p. 36) - IR-owned diplomatic partnership dimension; this folder treats its operational maritime-domain-awareness function.

- FACT: **Coastal Security Scheme (CSS)**: implemented in phases by MHA's Department of Border Management to build coastal police stations, check-posts, jetties, boats and surveillance capability for the Marine Police (VisionIAS, PDF pp. 35, 47) - the scheme under which the Marine Police Force itself was created in 2005-06.

- FACT: **Indian Maritime Security Strategy (IMSS), 2015**: the Navy's strategy document envisaging coordination, SLOC security, and multilateral engagement (VisionIAS, PDF p. 35).

- CURRENT: **\*\*National Academy of Coastal Policing, Okha** (established 7 July 2026):\*\* MHA's dedicated training institution for coastal/marine police personnel from nine coastal States, five Union Territories and central forces (BSF, CISF) - the current institutional anchor for marine-police training capacity. ANALYSIS: It follows the earlier, partial step VisionIAS records - Marine Police training institutes approved in Tamil Nadu and Gujarat, with periodic training otherwise provided by the Navy and Coast Guard (PDF p. 36).

## 5. Indian applications and examples

- FACT: VisionIAS cites the 1993 Mumbai serial blasts (explosives smuggled via the Raigad coast) and the 26 November 2008 attacks (ten terrorists infiltrating via the sea route) as the defining historical illustrations of coastal vulnerability (PDF p. 31).

- FACT: **PYQ mapping - verbatim (2025 Q20)**: "Why is maritime security vital to protect India's sea trade? Discuss maritime and coastal security challenges and the way forward."

## 6. Must-Know Facts for Prelims

- FACT: The Indian Coast Guard was established on 1 February 1977 and formally constituted as the fourth armed force of India by the Coast Guard Act, 1978.

- FACT: India's coastline is 7,516.6 km including island territories, spanning nine coastal States and the coastal Union Territories.

- FACT: The maritime-zone ladder: territorial sea 12 nm, contiguous zone 24 nm, EEZ 200 nm (Maritime Zones Act, 1976, consistent with UNCLOS).

- FACT: The Marine Police Force was created under the Coastal Security Scheme (2005) and patrols territorial waters up to 12 nautical miles.

- FACT: Joint Operations Centres for coastal security operate at Mumbai, Visakhapatnam, Kochi and Port Blair.

- FACT: Sagar Prahari Bal was raised by the Indian Navy in 2009 to protect naval bases and adjacent vulnerable areas; Operation Sagar Kavach is the post-26/11 inter-agency coastal-security exercise.

- FACT: The Anti-Maritime Piracy Act, 2022 filled a pre-existing legal gap - India previously had no specific piracy provision in the IPC or CrPC; the SUA Act, 2002 separately covers maritime terrorism and offshore platforms.

- CURRENT: India's National Academy of Coastal Policing at Okha was established as a subordinate MHA office on 7 July 2026.

## 7. UPSC traps

- WRONG: Maritime security and coastal security are interchangeable terms. ->

Coastal security is explicitly a *subset* of the broader maritime- security concept, concerned with the coastline and territorial waters, while maritime security also covers the EEZ, high seas and SLOCs.

- WRONG: Piracy under international law includes any act of maritime violence

anywhere at sea. -> Piracy, by definition, occurs on the high seas; violence in India's territorial/inland waters (e.g., the Sunderbans) is analogous but not technically piracy.

- WRONG: The Navy is solely responsible for coastal security. -> Coastal security operates through a three-tier design: Navy (EEZ/high seas), Coast Guard (territorial waters), State Marine Police (close coastal patrol) - each has a distinct jurisdictional role.

- WRONG: India has always had a dedicated anti-piracy law. -> A specific statute (the Anti-Maritime Piracy Act) was enacted only in 2022; before that, India relied on general provisions, not a piracy-specific law.

- WRONG: Every maritime boundary of India is unsettled. -> The India-Bangladesh maritime boundary was settled by a 2014 UNCLOS arbitral award; **Sir Creek** (with Pakistan) is the principal unsettled segment. ANALYSIS: The VisionIAS text's blanket statement that India's maritime boundaries with both Pakistan and Bangladesh "are not delineated" (PDF p. 31) is stale on the Bangladesh half, as the same document acknowledges at PDF p. 21.

- WRONG: Maritime domain awareness and interdiction capability are the same

thing. -> AIS, coastal radar, NC3I and IFC-IOR generate *knowledge* of what is at sea; boats, crew, sea-days and boarding capability determine whether anything can be *done* about it. Most identified gaps in this topic are capability, not awareness, gaps.

## 8. CURRENT: Current anchor

- CURRENT: The **National Academy of Coastal Policing, Okha**, was established as a subordinate office of the MHA by official order dated **7 July 2026**, providing dedicated, specialised training to marine police personnel from nine coastal States, five Union Territories and central forces - the current institutional anchor for closing the long- standing marine-police training capacity gap identified even in the VisionIAS source's "way forward" section (PDF p. 37).

## 10. Mains angles

- ANALYSIS: Open by explicitly distinguishing maritime from coastal security (Section 1) - this distinction itself carries marks in a "discuss" question.
- ANALYSIS: Use the historical build-out sequence (Section 3) to show the architecture evolved reactively (post-26/11) rather than proactively - a useful analytical observation for a "way forward" answer.
- ANALYSIS: Cite the Anti-Maritime Piracy Act, 2022 as evidence of a still-recent, still-developing legal architecture, not a settled, long-standing one.

## 11. Probable questions

- ANALYSIS: **Prelims**: In which year was the Indian Coast Guard formally constituted as the fourth armed force of India, and under which Act?
- ANALYSIS: **Mains (10 marks)**: Distinguish maritime security from coastal security, with reference to India's three-tier security architecture.
- ANALYSIS: **Mains (15 marks, PYQ-style)**: Discuss India's maritime and coastal security challenges and the way forward.

## 12. Core answer architecture - sea trade, layered security and port resilience

**Core firewall:** This Core section independently supports the 2022 organisational/procedural route and the 2025 maritime/coastal-security route. The Advanced companion is optional.

## Demand decoder and thesis

**Thesis:** Maritime security protects the sea lanes, offshore interests and information/response capacity on which trade depends; coastal security is its near-shore subset. A high-quality answer links each threat to the right geographic zone, institution, legal route and recovery capability instead of listing Navy, Coast Guard and Marine Police together.

## Executable Core spines

**10 marks - organisational and procedural initiatives (2022).** Define maritime/coastal distinction; show the maritime-zone ladder; map Navy, Coast Guard and State Marine Police; then show coordination through JOCs, NC3I, coastal radar/AIS/VTMS, vessel identification and Sagar Kavach. Add one legal distinction: Anti-Maritime Piracy Act, 2022 for piracy on the high seas/EEZ versus SUA Act, 2002 for unlawful acts against maritime navigation/fixed platforms. Qualify that awareness is not interdiction.

**15 marks - sea trade, challenges and way forward (2025).** Start with the vulnerability of trade/energy movement through SLOCs without relying on an uncited current percentage. Cover five threats: sea-borne terror, piracy/armed robbery, smuggling/narco-trafficking, illegal fishing/ fishermen straying, and port/coastal cyber disruption. Map each to the layered architecture and include fishing communities as reporting partners, not suspects. End with prevention, preparedness, response and recovery: training, drills, port-cyber resilience, interoperable intelligence and auditable command clarity.

**20 marks - ports/fishermen/technology comparison.** Compare maritime domain awareness (radar, AIS, NC3I, IFC-IOR) with interdiction (vessels, crew, boarding authority) and cyber-resilience (port/terminal continuity and

recovery). State why each capability has a different owner and performance indicator.

#### Claim -> evidence -> analysis -> qualification bank

| Claim                                                        | Named evidence/example                                                           | What it proves                                                                                 | Qualification                                                                                       |
|--------------------------------------------------------------|----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| Coastal security is not the whole maritime-security problem. | Maritime Zones Act zone ladder; Navy/ICG/Marine Police three-tier structure.     | Jurisdiction and lead capability change by location.                                           | A simplified tier diagram does not remove operational overlap in a real incident.                   |
| The legal response depends on the offence/location.          | SUA Act, 2002; Anti-Maritime Piracy Act, 2022.                                   | Maritime terrorism and piracy are not interchangeable labels.                                  | The piracy Act's jurisdiction must not be applied automatically to territorial-water violence.      |
| Fisher communities are a capability multiplier.              | Community reporting, boat registration/identification and coastal-policing role. | Local knowledge can improve early warning and identification.                                  | Monitoring must preserve livelihood, due process and avoid treating every fishing craft as hostile. |
| A port is both a physical and digital security node.         | Port/VTMS and CII/cyber-resilience cross-link to topic 08.                       | Cargo, access control, operational technology and continuity require a whole-of-system answer. | A cyber incident is not automatically a crime, sabotage or foreign operation.                       |

#### Direct PYQ routes now owned in Core

- **2022 GS-III:** use the 10-mark organisation/procedure spine and a jurisdictional distinction.
- **2025 GS-III:** use the sea-trade/threat/way-forward spine, showing prevention-preparedness-response-recovery rather than a generic “more patrols” ending.

#### 13. Study links

- FACT: Advanced companion: advanced/07\_Maritime-and-Coastal-Security.md.
- FACT: 00\_Master-Framework.md Sections 4 and 6 - the root-cause matrix and federal/institutional architecture.
- ANALYSIS: **Lateral topics in this folder:** Topic 02 for sea-borne terrorism (26/11); topic 11 for maritime narcotics/trafficking; topic 06 for the Sir Creek land-border-adjacent dimension; topic 12 for the Coast Guard's institutional mandate in full.

## CLOSING RECALL FLOW - CORE SYNTHESIS - REACTIVE BUILD-OUT RESILIENCE AND WAY FORWARD

START / CONCEPT: CORE SYNTHESIS - Reactive build-out resilience and way forward

|  
v

EXACT TERMS: CORE SYNTHESIS · Reactive build-out resilience · way forward · Mechanism chain ·  
Qualified use · Subject

|  
v

MECHANISM / ARGUMENT: Mechanism chain: Reactive-buildout lesson - Resilient end-state Qualified use:  
Conclude with anticipatory resilience, drills, recovery and audited command clarity.

|  
v

CONSEQUENCE / CONTRAST: ANALYSIS: Open by explicitly distinguishing maritime from coastal security (Section 1) - this distinction itself carries marks in a "discuss" question. ANALYSIS: Use the historical build-out sequence (Section 3) to show the architecture evolved reactively (post-26/11) rather than proactively - a useful analytical observation for a "way forward" answer. ANALYSIS: Cite the Anti-Maritime Piracy Act, 2022 as evidence of a still-recent, still-developing legal architecture, not a settled, long-standing one.

|  
v

UPSC TRAP / ANSWER-USE: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

|  
v

ANSWER-GRABBING FORMULATION: Read Reactive build-out resilience and way forward as a sequence: identify Reactive-buildout lesson, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

## BASIC MCQS / REMEDIATION

### Q1. Which statement correctly identifies Maritime-coastal distinction?

A. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: A. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q2. Which option preserves the legal or institutional boundary of Maritime-coastal distinction?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

**Answer: B. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q3. Which statement uses Maritime-coastal distinction without changing its institution, law or status?**

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

**Answer: C. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q4. Which option avoids the standard UPSC close-option trap about Maritime-coastal distinction?**

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.

**Answer: D. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q5. Which statement correctly identifies Maritime-zone ladder?**

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

**Answer: A. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q6. Which option preserves the legal or institutional boundary of Maritime-zone ladder?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. C. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. D. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

**Answer: B. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q7. Which statement uses Maritime-zone ladder without changing its institution, law or status?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Answer: C. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q8. Which option avoids the standard UPSC close-option trap about Maritime-zone ladder?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: D. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q9. Which statement correctly identifies Threat-category map?

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

**Answer: A. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q10. Which option preserves the legal or institutional boundary of Threat-category map?**

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. D. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

**Answer: B. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q11. Which statement uses Threat-category map without changing its institution, law or status?**

A. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

**Answer: C. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q12. Which option avoids the standard UPSC close-option trap about Threat-category map?**

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

**Answer: D. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q13. Which statement correctly identifies Navy role?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Answer: A. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q14. Which option preserves the legal or institutional boundary of Navy role?

A. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

**Answer: B. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q15. Which statement uses Navy role without changing its institution, law or status?

A. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.

**Answer: C. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q16. Which option avoids the standard UPSC close-option trap about Navy role?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

**Answer: D. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument,**

**Q17. Which statement correctly identifies Coast Guard role?**

A. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. B. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Answer: A. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q18. Which option preserves the legal or institutional boundary of Coast Guard role?**

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Answer: B. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q19. Which statement uses Coast Guard role without changing its institution, law or status?**

A. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

**Answer: C. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q20. Which option avoids the standard UPSC close-option trap about Coast Guard role?**

A. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

**Answer: D. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.**

**safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q21. Which statement correctly identifies Marine Police role?**

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Answer: A. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q22. Which option preserves the legal or institutional boundary of Marine Police role?**

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

**Answer: B. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q23. Which statement uses Marine Police role without changing its institution, law or status?**

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

**Answer: C. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q24. Which option avoids the standard UPSC close-option trap about Marine Police role?**

A. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. B. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

**Answer: D. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q25. Which statement correctly identifies Layered-architecture boundary?**

A. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

**Answer: A. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q26. Which option preserves the legal or institutional boundary of Layered-architecture boundary?**

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

**Answer: B. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q27. Which statement uses Layered-architecture boundary without changing its institution, law or status?**

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: C. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q28. Which option avoids the standard UPSC close-option trap about Layered-architecture boundary?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Answer: D. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q29. Which statement correctly identifies NCSMCS coordination?**

A. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

**Answer: A. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q30. Which option preserves the legal or institutional boundary of NCSMCS coordination?**

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

**Answer: B. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q31. Which statement uses NCSMCS coordination without changing its institution, law or status?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

**Answer: C. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q32. Which option avoids the standard UPSC close-option trap about NCSMCS coordination?**

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.

**Answer: D. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q33. Which statement correctly identifies Joint Operations Centres?**

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: A. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q34. Which option preserves the legal or institutional boundary of Joint Operations Centres?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: B. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q35. Which statement uses Joint Operations Centres without changing its institution, law or status?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: C. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q36. Which option avoids the standard UPSC close-option trap about Joint Operations Centres?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. D. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.

**Answer: D. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q37. Which statement correctly identifies NC3I function?**

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: A. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q38. Which option preserves the legal or institutional boundary of NC3I function?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. C. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: B. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q39. Which statement uses NC3I function without changing its institution, law or status?**

A. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Answer: C. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q40. Which option avoids the standard UPSC close-option trap about NC3I function?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

**Answer: D. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q41. Which statement correctly identifies IMAC-IFC boundary?

A. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Answer: A. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q42. Which option preserves the legal or institutional boundary of IMAC-IFC boundary?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Answer: B. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

#### Q43. Which statement uses IMAC-IFC boundary without changing its institution, law or status?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

**Answer: C. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q44. Which option avoids the standard UPSC close-option trap about IMAC-IFC boundary?**

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

**Answer: D. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q45. Which statement correctly identifies Awareness-interdiction distinction?**

A. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Answer: A. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q46. Which option preserves the legal or institutional boundary of Awareness-interdiction distinction?**

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

**Answer: B. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q47. Which statement uses Awareness-interdiction distinction without changing its institution, law or status?**

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

**Answer: C. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q48. Which option avoids the standard UPSC close-option trap about Awareness-interdiction distinction?**

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Answer: D. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q49. Which statement correctly identifies Surveillance-system role?**

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

**Answer: A. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q50. Which option preserves the legal or institutional boundary of Surveillance-system role?**

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

**Answer: B. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response**

capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

**Q51. Which statement uses Surveillance-system role without changing its institution, law or status?**

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. C. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

**Answer: C. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q52. Which option avoids the standard UPSC close-option trap about Surveillance-system role?**

A. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. B. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Answer: D. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q53. Which statement correctly identifies Fishing-community interface?**

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

**Answer: A. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q54. Which option preserves the legal or institutional boundary of Fishing-community interface?**

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

**Answer: B. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q55. Which statement uses Fishing-community interface without changing its institution, law or status?**

A. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. B. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. C. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. D. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

**Answer: C. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q56. Which option avoids the standard UPSC close-option trap about Fishing-community interface?**

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.

**Answer: D. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q57. Which statement correctly identifies Port-security convergence?**

A. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. B. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

**Answer: A. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q58. Which option preserves the legal or institutional boundary of Port-security convergence?**

A. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: B. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q59. Which statement uses Port-security convergence without changing its institution, law or status?**

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: C. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q60. Which option avoids the standard UPSC close-option trap about Port-security convergence?**

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

**Answer: D. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q61. Which statement correctly identifies Coastal Security Scheme?

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: A. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q62. Which option preserves the legal or institutional boundary of Coastal Security Scheme?

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. C. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: B. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q63. Which statement uses Coastal Security Scheme without changing its institution, law or status?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: C. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

### Q64. Which option avoids the standard UPSC close-option trap about Coastal Security Scheme?

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

**Answer: D. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q65. Which statement correctly identifies Three-statute legal map?**

A. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. B. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

**Answer: A. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q66. Which option preserves the legal or institutional boundary of Three-statute legal map?**

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: B. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q67. Which statement uses Three-statute legal map without changing its institution, law or status?**

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: C. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q68. Which option avoids the standard UPSC close-option trap about Three-statute legal map?**

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

**Answer: D. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q69. Which statement correctly identifies Piracy-location boundary?**

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

**Answer: A. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q70. Which option preserves the legal or institutional boundary of Piracy-location boundary?**

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: B. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q71. Which statement uses Piracy-location boundary without changing its institution, law or status?**

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: C. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q72. Which option avoids the standard UPSC close-option trap about Piracy-location boundary?**

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

**Answer: D. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q73. Which statement correctly identifies Reactive-buildout lesson?**

A. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. B. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: A. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q74. Which option preserves the legal or institutional boundary of Reactive-buildout lesson?**

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: B. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q75. Which statement uses Reactive-buildout lesson without changing its institution, law or status?**

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: C. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q76. Which option avoids the standard UPSC close-option trap about Reactive-buildout lesson?**

A. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Answer: D. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q77. Which statement correctly identifies Resilient end-state?**

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

**Answer: A. Explanation: Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.**

**Q78. Which option preserves the legal or institutional boundary of Resilient end-state?**

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. C. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. D. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

**Answer: B. Explanation:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

**Q79. Which statement uses Resilient end-state without changing its institution, law or status?**

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

**Answer: C. Explanation:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

**Q80. Which option avoids the standard UPSC close-option trap about Resilient end-state?**

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

**Answer: D. Explanation:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

## PYQS AND ANSWER PRACTICE

### AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The audited ledgers route the 2022 maritime-security initiatives demand and the 2025 sea-trade, maritime/coastal challenge and way-forward demand here. OCR inspection confirmed both printed Mains stems. A 2022 UNCLOS Prelims concept is included only as a clearly labelled cross-owned zone-law card.

### PYQ DEMAND CARD 1 - 2022 Prelims GS-I

**Demand:** UNCLOS concepts concerning territorial sea, innocent passage and Exclusive Economic Zone provisions.

**Status:** Conservative cross-owned concept card; the central ledger routes the objective question to International Relations. No answer letter is recorded or inferred here.

**Model solution: Maritime-coastal distinction:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Maritime-zone ladder:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Navy role:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Coast Guard role:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and

national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Piracy-location boundary:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

## PYQ DEMAND CARD 2 - 2022 GS-III

**Demand:** Maritime security challenges in India and organisational, technical and procedural initiatives taken to improve maritime security.

**Status:** Printed stem inspected in the OCR-searchable official paper; Discuss · 10 marks · 150 words.

**Model solution:** **Maritime-coastal distinction:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Maritime-zone ladder:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Threat-category map:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Layered-architecture boundary:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **NCSMCS coordination:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Joint Operations Centres:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **NC3I function:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Awareness-interdiction distinction:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Surveillance-system role:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Coastal Security Scheme:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Three-statute legal map:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Resilient end-state:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

## PYQ DEMAND CARD 3 - 2025 GS-III

**Demand:** Why maritime security is vital for India's sea trade, maritime and coastal security challenges, and the way forward.

**Status:** Printed stem inspected in the OCR-searchable official paper; Discuss · 15 marks · 250 words.

**Model solution:** **Maritime-coastal distinction:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Maritime-zone ladder:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Threat-category map:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Navy role:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Coast Guard role:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Marine Police role:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

**Awareness-interdiction distinction:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

**Fishing-community interface:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.

**Port-security convergence:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

**Coastal Security Scheme:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

**Three-statute legal map:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

**Reactive-buildout lesson:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Resilient end-state:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

## ORIGINAL MAINS 1 - 10 MARKS

**Question:** Distinguish maritime security from coastal security and map India's layered institutional architecture. Answer in about 150 words.

**Model thesis: Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

**Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

**Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

**Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim -> named evidence -> analysis -> qualification:**

- Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.

- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.
- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

**Qualified conclusion: Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

## ORIGINAL MAINS 2 - 10 MARKS

**Question:** Explain why maritime-domain awareness cannot be treated as interdiction capability. Answer in about 150 words.

**Model thesis: Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:**

The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim -> named evidence -> analysis -> qualification:**

- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
- The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Qualified conclusion:** **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

### ORIGINAL MAINS 3 - 15 MARKS

**Question:** Discuss maritime security challenges and the organisational, technical and procedural initiatives taken by India. Answer in about 250 words.

**Model thesis:** **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim -> named evidence -> analysis -> qualification:**

- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
- Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.
- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.
- The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.
- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.
- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

**Qualified conclusion: Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

**Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

## ORIGINAL MAINS 4 - 15 MARKS

**Question:** Why is maritime security vital to protect India's sea trade? Discuss challenges and the way forward. Answer in about 250 words.

**Model thesis:** **Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:**

This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim -> named evidence -> analysis -> qualification:**

- Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.
- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
- Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.
- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.
- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.
- Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.
- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

**Qualified conclusion:** **Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast

and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

## ORIGINAL MAINS 5 - 20 MARKS

**Question:** Critically evaluate the Navy-Coast Guard-Marine Police architecture with reference to command clarity and capacity. Answer in about 300 words.

**Model thesis:** **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim -> named evidence -> analysis -> qualification:**

- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.
- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.
- The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.
- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
- India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

**Qualified conclusion: Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation

status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

## ORIGINAL MAINS 6 - 20 MARKS

**Question:** Assess how ports, fishing communities, maritime-domain awareness and legal modernisation can produce resilient coastal security. Answer in about 300 words.

**Model thesis:** **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme.

**Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Piracy-location boundary. **Named evidence/example:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

**Claim -> named evidence -> analysis -> qualification:**

- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
- The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.
- Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.
- Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.
- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

**Qualified conclusion: Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date,

institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Piracy-location boundary. **Named evidence/example:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

## OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

**Subject:** Internal Security | **Tier:** Advanced | **GS Paper:** GS-III. **Core area:** The reactive-institutionalisation pattern since 26/11; jurisdictional-boundary ambiguity between Navy, Coast Guard and Marine Police; fishermen as an intelligence asset and a diplomatic friction point; the Anti-Maritime Piracy Act's jurisdictional design. **Grounded in:** VisionIAS, *Security Challenges and Their Management in Border Areas*, PDF pp. 11, 21, 26-27, 31-39; 00\_Master-Framework.md Sections 6, 8-9; audited GS-III syllabus; Maritime Zones Act 1976, SUA Act 2002 and Anti-Maritime Piracy Act 2022 as published in India Code; MHA order establishing the National Academy of Coastal Policing (7 July 2026). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. *Companion:* basic/07\_Maritime-and-Coastal-Security.md.

### 1. Answer thesis and syllabus boundary

**Thesis:** ANALYSIS: India's coastal-security architecture has been built almost entirely in reactive bursts (1974 Customs Marine Organisation after rising smuggling; 1977 Coast Guard after continued vulnerability; 2005 Coastal Security Scheme after continued gaps; the post-26/11 NC3I/JOC build-out after the starkest failure) rather than through sustained, proactive planning, and the persisting jurisdictional overlap between Navy, Coast Guard and Marine Police remains the single most cited structural weakness even after each reactive expansion. **Boundary:** WRONG: this topic does not cover land-border management (topic 06) or general narco-trafficking typology (topic 11); it treats the maritime/coastal security architecture specifically, including its narcotics/smuggling interface only at the coastal-security level.

## 2. Conceptual distinctions

| Concept                                                                              | Precise meaning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FACT: <b>Reactive vs. proactive institutionalisation</b>                             | FACT: VisionIAS's own chronology (1974 -> 1977 -> 2005 -> post-2008 -> 2017 -> 2020) shows each major coastal-security institution or mechanism followed a specific vulnerability episode, most explicitly: "the mind-set that coastal security is not an essential component of national security eventually changed" only "post 26/11 terrorist attacks" (PDF p. 35) - a reactive, not anticipatory, institutional pattern.                                                                                                                    |
| FACT: <b>Jurisdictional layering vs. jurisdictional ambiguity</b>                    | The three-tier design (Navy/EEZ, Coast Guard/territorial waters, Marine Police/close coastal) is a deliberate layering, but VisionIAS's own "way forward" section still recommends the Coast Guard be "designated as the single authority responsible for coastal security" and calls for removing "all ambiguities... from the Coast Guard Act" (PDF p. 37) - i.e., the <i>current</i> layered design still has unresolved command-clarity gaps at the margins.                                                                                 |
| FACT: <b>Fishermen as intelligence asset vs. security liability</b>                  | FACT: VisionIAS frames fishermen as "the 'ears and eyes' of coastal security" through organised volunteer-monitoring groups (PDF p. 36), while also documenting the 2008-era risk that arrested/straying fishermen's Indian-registered boats "could be used to sneak in arms, explosives and operatives into India" (Singh, PDF p. 122) - the same population is simultaneously a security resource and a potential vulnerability, depending on engagement design.                                                                               |
| ANALYSIS: <b>Territorial waters vs. EEZ vs. high seas as a jurisdictional ladder</b> | Each zone carries different security-agency lead responsibility and different applicable law (state marine police jurisdiction ends at 12 nautical miles; the contiguous zone to 24 nm supports customs/immigration/fiscal/sanitary enforcement; Navy/Coast Guard operate to EEZ limits; the Anti-Maritime Piracy Act applies to the high seas including the EEZ) - precision on this ladder is a recurring examiner expectation.                                                                                                                |
| ANALYSIS: <b>Maritime domain awareness vs. interdiction capability</b>               | NC3I, the coastal radar chain, AIS, VTMS and IFC-IOR are <i>awareness</i> assets: they answer "what is out there?" Boats, sea-days, trained crew and boarding capacity are <i>interdiction</i> assets: they answer "can we reach it and act lawfully on it?" ANALYSIS: India's post-26/11 build-out has been awareness-heavy, which is why the residual recommendations in VisionIAS's own "way forward" (single authority, marine-police training, stronger coastal police) are all interdiction- and command-side items, not sensor-side ones. |

| Concept                                                                              | Precise meaning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ANALYSIS: <b>Blue-water navy vs. coastal-security tasking as a resource conflict</b> | FACT: VisionIAS's "way forward" states it bluntly: "The Indian navy should be eased out from coastal security responsibilities and allowed to concentrate on developing its blue water capabilities and defending the country during times of war" (PDF p. 37). ANALYSIS: This converts the command-unification question from an abstract tidiness argument into a resource argument - every Navy asset tasked to coastal patrol is one not available for sea-control or SLOC protection, which is the very interest the 2025 PYQ asks candidates to protect. |

### 3. Causal model

**Analytical claim:** ANALYSIS: The 2026 National Academy of Coastal Policing closes a *training-capacity* gap that VisionIAS's own "way forward" section explicitly flagged (PDF p. 37), but it does not by itself resolve the separate, still-open *command-unification* question (whether the Coast Guard should be the single coordinating authority) - Mains answers should not conflate the two as though one institutional announcement resolves both problems.

### 4. Institutional and reform architecture

- FACT: **\*\*National Committee for Strengthening Maritime and Coastal Security (NCSMCS):\*\*** apex, Cabinet-Secretary-led coordination body for nearly 15 agencies (VisionIAS, PDF p. 35) - the coordination layer sitting above the three operational tiers.
- FACT: **Joint Operations Centres (JOCs):** Mumbai, Visakhapatnam, Kochi, Port Blair - jointly and continuously (24x7) manned by Navy, ICG and Marine Police, the clearest operational expression of the layered design working *in practice* (VisionIAS, PDF p. 36).
- ANALYSIS: **IFC-IOR (2018) as an external-facing extension:** while its diplomatic-partnership dimension belongs to IR, its operational function - expanding maritime-domain-awareness data beyond India's own agencies to 12 partner-nation liaison officers - is a genuine internal-security capability multiplier

this folder claims.

- CURRENT: **National Academy of Coastal Policing (established 7 July 2026):**

the current, dated institutional response to the marine-police training- capacity gap; verify any claim about its command relationship to the Coast Guard or Navy from a subsequent official source, since the underlying "single authority" question remains, per the source material, unresolved.

- ANALYSIS: **Fishermen-engagement architecture:** AIS transponders on larger vessels, RFID proposals for smaller ones, colour-coded registration, Distress Alert Transmitters, and coastal-security helplines (1554 ICG, 1093 Marine Police) collectively convert a historically vulnerable population into a monitored, semi-formal intelligence layer (VisionIAS, PDF p. 27).

## 5. Indian applications and boundary cases

- ANALYSIS: **\*\*Sri Lanka fishermen-straying dispute as a boundary case between Internal Security and IR:\*\*** the Palk Bay dispute is fundamentally about Indian fishermen's refusal to recognise a settled maritime boundary (not an unsettled-boundary problem, per VisionIAS's own framing, PDF p.

26. - Internal Security owns the coastal-security/livelihood-transition response (sustainable fishing incentives, deep-sea fishing shift); IR owns the bilateral diplomatic-protest dimension whenever an Indian fisherman is arrested.

- ANALYSIS: **Katchatheevu as a legacy-dispute boundary case:** the 1974 cession of the uninhabited island continues to generate periodic domestic political salience without altering the settled international maritime boundary - a useful illustration that "settled boundary, unsettled domestic politics" is itself a distinct category from "unsettled boundary."

- ANALYSIS: **\*\*Sir Creek versus the Bangladesh maritime boundary as paired boundary cases: India's maritime boundary with Bangladesh was delimited by a 2014 UNCLOS arbitral award\*\*** (VisionIAS, PDF p. 21), whereas Sir Creek with Pakistan remains unsettled on the Thalweg-versus- green-line question, with roughly 250 square miles of EEZ turning on it (PDF p. 11). ANALYSIS: Note the source's own inconsistency - at PDF p. 31 it still describes *both* boundaries as undelimited; cite the settled position, not the stale sentence. The analytical point is that maritime boundary settlement is achievable through third-party adjudication when both parties submit, and the security consequence of non-settlement is a permanently ambiguous patrolling line, not merely a diplomatic irritant.

- ANALYSIS: **Piracy jurisdiction as a boundary case:** the Anti-Maritime Piracy Act, 2022 applies to the high seas including the EEZ; violence within territorial waters or internal waters (e.g., Sunderbans-type incidents) falls instead under ordinary criminal law, not the piracy Act - a precise jurisdictional distinction examiners reward.

## 6. Limitations and trade-offs

- ANALYSIS: **\*\*Layered command without a single accountable authority risks coordination lag in a fast-moving incident\*\*** - VisionIAS's own recommendation to designate the Coast Guard as the single coastal- security authority reflects this unresolved concern even after JOCs and NCSMCS were established.
- ANALYSIS: **\*\*Technology-heavy solutions (AIS, VTMS, coastal radar) depend on near-universal vessel compliance;\*\*** small, informally operated fishing craft remain the hardest population to fully integrate into electronic surveillance, which is why human/community-based measures (fishermen as "ears and eyes") remain necessary alongside technology.

- ANALYSIS: **A new training academy addresses capacity, not command structure;** treating the 2026 Academy as a complete answer to "way forward" would understate the still-open Coast Guard/Navy/Marine-Police jurisdictional question.

- WRONG: **\*\*The Indian Ocean Naval Symposium (IONS) and IFC-IOR are not internal-security institutions in the strict sense\*\*** - they are Navy-led regional cooperation platforms whose diplomatic architecture is IR's domain; this folder claims only their operational maritime-domain- awareness contribution.

## 7. Must-Know Facts for Advanced Prelims

- FACT: VisionIAS's own "way forward" recommends designating the Coast Guard

as the single authority responsible for coastal security, removing ambiguities from the Coast Guard Act, integrating State police in detection and capture at sea, and easing the Navy out of coastal-security tasking so it can concentrate on blue-water capability - indicating this question remained open even after the post-26/11 institutional build-out.

- FACT: Joint Operations Centres operate at four locations: Mumbai, Visakhapatnam, Kochi and Port Blair.

- FACT: The Palk Bay/Sri Lanka fishermen dispute concerns a *settled* maritime boundary that Indian fishermen dispute in practice, not an unsettled boundary; the India-Bangladesh maritime boundary was likewise settled, by the 2014 arbitral award. Sir Creek is the principal unsettled maritime segment.

- CURRENT: The National Academy of Coastal Policing, Okha, established 7 July 2026, is India's first dedicated marine-police training institution, serving nine coastal States, five Union Territories and central forces.

## 8. Advanced Prelims traps

- WRONG: India's coastal-security architecture was built proactively, well ahead of any specific threat episode. -> VisionIAS's own chronology shows each major institution (CMO, Coast Guard, Coastal Security Scheme, NC3I/JOCs) followed a specific vulnerability episode - a reactive, not anticipatory, pattern.
- WRONG: The Sri Lanka fishermen dispute reflects an unsettled maritime boundary. -> VisionIAS explicitly frames it as Indian fishermen's refusal to recognise an already-delineated boundary, not a boundary- settlement problem.
- WRONG: The 2026 National Academy of Coastal Policing resolves the Coast Guard/Navy/Marine Police command-unification question. -> It addresses the marine-police training-capacity gap specifically; the broader "single authority" recommendation remains a separate, still-open policy question per the source material.
- WRONG: Expanding surveillance coverage automatically expands the ability to act. -> Awareness assets (radar, AIS, NC3I, IFC-IOR) and interdiction assets (boats, sea-days, boarding teams) are separately funded and separately constrained; a detection without a reachable response is a logged track, not a security outcome.

## 9. CURRENT: Current-anchor note

- CURRENT: The **National Academy of Coastal Policing, Okha**, established by MHA order dated **7 July 2026**, is the current institutional anchor for marine-police training; any claim about its relationship to Coast Guard command authority, or about subsequent institutional reforms, must be verified from a dated official source rather than assumed.

## 11. Mains-ready framework

**Central thesis:** India's coastal-security architecture has expanded almost entirely in response to specific vulnerability episodes rather than through sustained anticipatory planning, and while the layered Navy-Coast Guard-Marine Police design and 2026's dedicated training academy address real gaps, the still-open recommendation to designate a single coordinating authority shows that command-structure unification, not capacity alone, remains the architecture's central unresolved reform.

1. **State India's sea-trade/energy-import dependence** on maritime security (cite only currently-verified figures).
2. **Distinguish maritime from coastal security** and lay out the three-tier jurisdictional design.
3. **Trace the reactive-institutionalisation chronology**, naming the

vulnerability episode behind each major institution.

4. **Identify the still-open command-unification question** (Coast Guard as single authority) as the clearest structural gap.

5. **Cite the 2026 National Academy of Coastal Policing** as a training-capacity solution, explicitly distinct from the command question.

6. **Address the fishermen dual-role nuance** (asset and vulnerability) as part of "way forward."

7. **\*\*Close by relating the answer to the master framework's calibrated way-forward principle\*\*** - sustained, anticipatory, command-clarified reform rather than continued reactive expansion.

## 12. Probable questions

- ANALYSIS: **Prelims**: Under India's coastal-security architecture, up to how many nautical miles does State Marine Police jurisdiction extend?

- ANALYSIS: **Mains (15 marks, PYQ-linked)**: "India's coastal-security architecture has grown reactively rather than proactively." Examine, citing at least three institutional milestones.

- ANALYSIS: **Mains (15 marks)**: Critically examine the recommendation to designate the Indian Coast Guard as the single authority for coastal security.

## 13. Study links

- FACT: Foundation companion: `basic/07_Maritime-and-Coastal-Security.md`.

- FACT: `00_Master-Framework.md` Sections 6, 8 and 9 - the federal architecture, recurring analytical gaps and boundary routing.

- ANALYSIS: **Lateral topics in this folder**: Topic 06 (advanced) for the Sir Creek land-border-adjacent dimension; topic 11 for maritime narcotics trafficking; topic 12 for the Coast Guard's full institutional mandate.

# CONSOLIDATED REGISTER NOTES

## Maritime and Coastal Security: MARITIME ZONES, THREATS AND INSTITUTIONAL LAYERS

1. **Maritime-coastal distinction**: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.
2. **Maritime-zone ladder**: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
3. **Threat-category map**: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.
4. **Navy role**: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
5. **Coast Guard role**: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.
6. **Marine Police role**: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
7. **Layered-architecture boundary**: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

8. **NCSMCS coordination:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.
9. **Joint Operations Centres:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
10. **NC3I function:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
11. **IMAC-IFC boundary:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.
12. **Awareness-interdiction distinction:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
13. **Surveillance-system role:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.
14. **Fishing-community interface:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.
15. **Port-security convergence:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.
16. **Coastal Security Scheme:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
17. **Three-statute legal map:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
18. **Piracy-location boundary:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.
19. **Reactive-buildout lesson:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.
20. **Resilient end-state:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

## Maritime and Coastal Security: AWARENESS, INTERDICTION, PORT AND FISHING-COMMUNITY FIREWALLS

- Do not use maritime security and coastal security as synonyms.
- Do not confuse territorial sea, contiguous zone, EEZ and high seas.
- Do not describe the Navy as the sole coastal-security authority.
- Do not transfer a Coast Guard mandate to State Marine Police or vice versa.
- Do not infer readiness from a force's statutory existence.
- Do not turn a simplified three-tier diagram into exclusive jurisdiction in every incident.
- Do not equate an apex committee with operational command at sea.
- Do not expose patrol patterns, sensor gaps or exploitable port vulnerabilities.
- Do not equate a fused maritime picture with boarding or prosecution capacity.
- Do not treat fishing communities collectively as suspects.
- Do not use piracy, maritime terrorism and territorial-water crime interchangeably.
- Do not infer outcomes from sanctioned stations, boats, radars, exercises or training seats.

## Maritime and Coastal Security: MARITIME LAW AND THREE CONSERVATIVE PYQ SPINES

DEFINE COASTAL SECURITY AS A SUBSET OF MARITIME SECURITY  
-> FIX TERRITORIAL SEA CONTIGUOUS ZONE EEZ OR HIGH SEAS  
-> MAP NAVY COAST GUARD MARINE POLICE AND COORDINATION BODIES  
-> SEPARATE NC3I IMAC IFC-IOR AWARENESS FROM INTERDICTION  
-> TREAT FISHING COMMUNITIES AS PARTNERS AND LIVELIHOOD STAKEHOLDERS  
-> INTEGRATE PORT PHYSICAL CYBER CONTINUITY AND RECOVERY  
-> DISTINGUISH MARITIME ZONES SUA AND PIRACY ACT TRIGGERS  
-> CONCLUDE WITH TRAINING COMMAND CLARITY EXERCISES AND AUDITED CAPABILITY

## Maritime and Coastal Security: CAPACITY, COORDINATION, RECOVERY AND RESILIENT END-STATE

Live official attempts on 2026-09-04 confirmed no new operational readiness or outcome statistic. The module therefore uses stable owner-audited mandates and statutes, records the official coastal-police training search only as an institutional input, and requires dated Navy, Coast Guard, MHA, ports or police evidence for current performance claims.

## COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

**High-yield use:** Follow the panels as one topic-specific conceptual atlas: root question, classifications, processes or arguments, comparisons, objections and a final answer-writing spine. This text-native master is separate from both graphical flowchart artifacts.

### ASCII MASTER FLOW - PANEL 1/12: Maritime-coastal nesting

```
MARITIME SECURITY
|-- HIGH SEAS / SLOCs / OFFSHORE INTERESTS
|-- EEZ AWARENESS / ENFORCEMENT
`-- COASTAL SECURITY -> near-shore subset
RULE -> subset is not synonym
```

### ASCII MASTER FLOW - PANEL 2/12: Maritime-zone ladder

```
0-12 nm -> TERRITORIAL SEA
12-24 nm -> CONTIGUOUS ZONE
TO 200 nm -> EXCLUSIVE ECONOMIC ZONE
BEYOND -> HIGH SEAS
FIX ZONE -> THEN INSTITUTION + LAW
```

### ASCII MASTER FLOW - PANEL 3/12: Threat-to-response matrix

```
SEA-BORNE TERROR | INTELLIGENCE + INTERDICTION + SUA
PIRACY / ROBBERY | ZONE + PIRACY / OTHER LAW
SMUGGLING / TRAFFICKING | COAST GUARD / CUSTOMS / POLICE
PORT CYBER / SABOTAGE | PHYSICAL + DIGITAL RESILIENCE
```

### ASCII MASTER FLOW - PANEL 4/12: Institutional layers

NAVY -> wider defence / sea control / SLOCs  
COAST GUARD -> maritime-zone security / law enforcement / coordination  
MARINE POLICE -> close coastal patrol / State investigation  
RULE -> connected mandates, not one undifferentiated force

### ASCII MASTER FLOW - PANEL 5/12: Coordination architecture

NCSMCS -> APEX POLICY COORDINATION  
JOCs -> MUMBAI / VISAKHAPATNAM / KOCHI / PORT BLAIR  
NC3I / IMAC -> DOMESTIC INFORMATION FUSION  
IFC-IOR -> PARTNER INFORMATION-SHARING LAYER

### ASCII MASTER FLOW - PANEL 6/12: Awareness-to-action chain

DETECT -> IDENTIFY -> FUSE -> DECIDE  
-> INTERCEPT / BOARD UNDER LAWFUL AUTHORITY  
-> INVESTIGATE -> PROSECUTE / RECOVER  
TRAP -> awareness is not interdiction

### ASCII MASTER FLOW - PANEL 7/12: Coastal-police capacity audit

SCHEME SANCTION  
-> STATION / JETTY / BOAT / TRAINING INPUT  
-> STAFFING + MAINTENANCE + SEA-TIME  
-> EXERCISE PERFORMANCE + VERIFIED RESPONSE  
RULE -> never skip from input to outcome

### ASCII MASTER FLOW - PANEL 8/12: Fishing-community interface

SECURITY VALUE -> LOCAL KNOWLEDGE / EARLY WARNING  
LIVELIHOOD NEED -> SAFE ACCESS / COMMUNICATION / DUE PROCESS  
TOOLS -> REGISTRATION / IDENTIFICATION / DISTRESS / REPORTING  
VERDICT -> partnership, not collective suspicion

### ASCII MASTER FLOW - PANEL 9/12: Port-resilience map

WATERSIDE ACCESS + LANDSIDE ACCESS  
CARGO / CUSTOMS + INDUSTRIAL ASSETS  
OPERATIONAL TECHNOLOGY + DATA SYSTEMS  
CONTINUITY -> PREVENT / RESPOND / RECOVER / LEARN

### ASCII MASTER FLOW - PANEL 10/12: Maritime-law decision tree

WHERE? -> TERRITORIAL / EEZ / HIGH SEAS  
WHAT ACT? -> PIRACY / TERROR / OTHER CRIME  
MARITIME ZONES ACT -> zone framework  
SUA ACT -> navigation / fixed-platform unlawful acts  
PIRACY ACT -> piracy-specific trigger

### **ASCII MASTER FLOW - PANEL 11/12: Reactive-to-resilient timeline**

1977/1978 -> INDIAN COAST GUARD  
2005 -> COASTAL SECURITY SCHEME  
POST-26/11 -> JOCs / NETWORKED AWARENESS EXPANSION  
2022 -> ANTI-MARITIME PIRACY ACT  
NEXT -> anticipatory capacity + recovery

### **ASCII MASTER FLOW - PANEL 12/12: PYQ and end-state rail**

2022 PRELIMS -> UNCLOS ZONE CONCEPT, CROSS-OWNED  
2022 MAINS -> ORGANISATIONAL / TECHNICAL / PROCEDURAL  
2025 MAINS -> SEA TRADE + CHALLENGES + WAY FORWARD  
END -> mandate + awareness + action + community + resilience
