

SOLVED PRACTICE WORKBOOK

Maritime and Coastal Security - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Maritime and Coastal Security - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which statement correctly identifies Maritime-coastal distinction?	5
Q2. Which option preserves the legal or institutional boundary of Maritime-coastal distinction?	5
Q3. Which statement uses Maritime-coastal distinction without changing its institution, law or status?	5
Q4. Which option avoids the standard UPSC close-option trap about Maritime-coastal distinction?	6
Q5. Which statement correctly identifies Maritime-zone ladder?	6
Q6. Which option preserves the legal or institutional boundary of Maritime-zone ladder?	6
Q7. Which statement uses Maritime-zone ladder without changing its institution, law or status?	6
Q8. Which option avoids the standard UPSC close-option trap about Maritime-zone ladder?	7
Q9. Which statement correctly identifies Threat-category map?	7
Q10. Which option preserves the legal or institutional boundary of Threat-category map?	7
Q11. Which statement uses Threat-category map without changing its institution, law or status?	8
Q12. Which option avoids the standard UPSC close-option trap about Threat-category map?	8
Q13. Which statement correctly identifies Navy role?	8
Q14. Which option preserves the legal or institutional boundary of Navy role?	8
Q15. Which statement uses Navy role without changing its institution, law or status?	9
Q16. Which option avoids the standard UPSC close-option trap about Navy role?	9
Q17. Which statement correctly identifies Coast Guard role?	9
Q18. Which option preserves the legal or institutional boundary of Coast Guard role?	9
Q19. Which statement uses Coast Guard role without changing its institution, law or status?	10
Q20. Which option avoids the standard UPSC close-option trap about Coast Guard role?	10
Q21. Which statement correctly identifies Marine Police role?	10
Q22. Which option preserves the legal or institutional boundary of Marine Police role?	10
Q23. Which statement uses Marine Police role without changing its institution, law or status?	11
Q24. Which option avoids the standard UPSC close-option trap about Marine Police role?	11
Q25. Which statement correctly identifies Layered-architecture boundary?	11
Q26. Which option preserves the legal or institutional boundary of Layered-architecture boundary?	11
Q27. Which statement uses Layered-architecture boundary without changing its institution, law or status?	12

Q28. Which option avoids the standard UPSC close-option trap about Layered-architecture boundary?	12
Q29. Which statement correctly identifies NCSMCS coordination?	12
Q30. Which option preserves the legal or institutional boundary of NCSMCS coordination?	13
Q31. Which statement uses NCSMCS coordination without changing its institution, law or status?	13
Q32. Which option avoids the standard UPSC close-option trap about NCSMCS coordination?	13
Q33. Which statement correctly identifies Joint Operations Centres?	13
Q34. Which option preserves the legal or institutional boundary of Joint Operations Centres?	14
Q35. Which statement uses Joint Operations Centres without changing its institution, law or status?	14
Q36. Which option avoids the standard UPSC close-option trap about Joint Operations Centres?	14
Q37. Which statement correctly identifies NC3I function?	14
Q38. Which option preserves the legal or institutional boundary of NC3I function?	15
Q39. Which statement uses NC3I function without changing its institution, law or status?	15
Q40. Which option avoids the standard UPSC close-option trap about NC3I function?	15
Q41. Which statement correctly identifies IMAC-IFC boundary?	15
Q42. Which option preserves the legal or institutional boundary of IMAC-IFC boundary?	16
Q43. Which statement uses IMAC-IFC boundary without changing its institution, law or status?	16
Q44. Which option avoids the standard UPSC close-option trap about IMAC-IFC boundary?	16
Q45. Which statement correctly identifies Awareness-interdiction distinction?	17
Q46. Which option preserves the legal or institutional boundary of Awareness-interdiction distinction?	17
Q47. Which statement uses Awareness-interdiction distinction without changing its institution, law or status?	17
Q48. Which option avoids the standard UPSC close-option trap about Awareness-interdiction distinction?	17
Q49. Which statement correctly identifies Surveillance-system role?	18
Q50. Which option preserves the legal or institutional boundary of Surveillance-system role?	18
Q51. Which statement uses Surveillance-system role without changing its institution, law or status?	18
Q52. Which option avoids the standard UPSC close-option trap about Surveillance-system role?	19
Q53. Which statement correctly identifies Fishing-community interface?	19
Q54. Which option preserves the legal or institutional boundary of Fishing-community interface?	19
Q55. Which statement uses Fishing-community interface without changing its institution, law or status?	19
Q56. Which option avoids the standard UPSC close-option trap about Fishing-community interface?	20
Q57. Which statement correctly identifies Port-security convergence?	20
Q58. Which option preserves the legal or institutional boundary of Port-security convergence?	20
Q59. Which statement uses Port-security convergence without changing its institution, law or status?	21

Q60. Which option avoids the standard UPSC close-option trap about Port-security convergence?	21
Q61. Which statement correctly identifies Coastal Security Scheme?	21
Q62. Which option preserves the legal or institutional boundary of Coastal Security Scheme?	22
Q63. Which statement uses Coastal Security Scheme without changing its institution, law or status?	22
Q64. Which option avoids the standard UPSC close-option trap about Coastal Security Scheme?	22
Q65. Which statement correctly identifies Three-statute legal map?	22
Q66. Which option preserves the legal or institutional boundary of Three-statute legal map?	23
Q67. Which statement uses Three-statute legal map without changing its institution, law or status?	23
Q68. Which option avoids the standard UPSC close-option trap about Three-statute legal map?	23
Q69. Which statement correctly identifies Piracy-location boundary?	24
Q70. Which option preserves the legal or institutional boundary of Piracy-location boundary?	24
Q71. Which statement uses Piracy-location boundary without changing its institution, law or status?	24
Q72. Which option avoids the standard UPSC close-option trap about Piracy-location boundary?	24
Q73. Which statement correctly identifies Reactive-buildout lesson?	25
Q74. Which option preserves the legal or institutional boundary of Reactive-buildout lesson?	25
Q75. Which statement uses Reactive-buildout lesson without changing its institution, law or status?	25
Q76. Which option avoids the standard UPSC close-option trap about Reactive-buildout lesson?	26
Q77. Which statement correctly identifies Resilient end-state?	26
Q78. Which option preserves the legal or institutional boundary of Resilient end-state?	26
Q79. Which statement uses Resilient end-state without changing its institution, law or status?	26
Q80. Which option avoids the standard UPSC close-option trap about Resilient end-state?	27

Maritime and Coastal Security - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Maritime-coastal distinction?

A. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: A. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q2. Which option preserves the legal or institutional boundary of Maritime-coastal distinction?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

Answer: B. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q3. Which statement uses Maritime-coastal distinction without changing its institution, law or status?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

Answer: C. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about Maritime-coastal distinction?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.

Answer: D. Explanation: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q5. Which statement correctly identifies Maritime-zone ladder?

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

Answer: A. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q6. Which option preserves the legal or institutional boundary of Maritime-zone ladder?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. C. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. D. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

Answer: B. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q7. Which statement uses Maritime-zone ladder without changing its institution, law or status?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Answer: C. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about Maritime-zone ladder?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: D. Explanation: India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q9. Which statement correctly identifies Threat-category map?

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

Answer: A. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q10. Which option preserves the legal or institutional boundary of Threat-category map?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. D. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

Answer: B. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q11. Which statement uses Threat-category map without changing its institution, law or status?

A. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

Answer: C. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about Threat-category map?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

Answer: D. Explanation: Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q13. Which statement correctly identifies Navy role?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Answer: A. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q14. Which option preserves the legal or institutional boundary of Navy role?

A. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

Answer: B. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument,

evidentiary rung or implementation status.

Q15. Which statement uses Navy role without changing its institution, law or status?

A. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.

Answer: C. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about Navy role?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

Answer: D. Explanation: The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q17. Which statement correctly identifies Coast Guard role?

A. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. B. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Answer: A. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q18. Which option preserves the legal or institutional boundary of Coast Guard role?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Answer: B. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category,

institutional owner, legal instrument, evidentiary rung or implementation status.

Q19. Which statement uses Coast Guard role without changing its institution, law or status?

A. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

Answer: C. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about Coast Guard role?

A. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.

Answer: D. Explanation: The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q21. Which statement correctly identifies Marine Police role?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Answer: A. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q22. Which option preserves the legal or institutional boundary of Marine Police role?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

Answer: B. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q23. Which statement uses Marine Police role without changing its institution, law or status?

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

Answer: C. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about Marine Police role?

A. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. B. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.

Answer: D. Explanation: State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q25. Which statement correctly identifies Layered-architecture boundary?

A. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

Answer: A. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q26. Which option preserves the legal or institutional boundary of Layered-architecture boundary?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

Answer: B. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q27. Which statement uses Layered-architecture boundary without changing its institution, law or status?

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: C. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about Layered-architecture boundary?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Answer: D. Explanation: Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q29. Which statement correctly identifies NCSMCS coordination?

A. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

Answer: A. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q30. Which option preserves the legal or institutional boundary of NCSMCS coordination?

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

Answer: B. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q31. Which statement uses NCSMCS coordination without changing its institution, law or status?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. C. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

Answer: C. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about NCSMCS coordination?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.

Answer: D. Explanation: The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q33. Which statement correctly identifies Joint Operations Centres?

A. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. B. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: A. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q34. Which option preserves the legal or institutional boundary of Joint Operations Centres?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: B. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q35. Which statement uses Joint Operations Centres without changing its institution, law or status?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: C. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about Joint Operations Centres?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. D. Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.

Answer: D. Explanation: Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q37. Which statement correctly identifies NC3I function?

A. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: A. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q38. Which option preserves the legal or institutional boundary of NC3I function?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. C. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: B. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q39. Which statement uses NC3I function without changing its institution, law or status?

A. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Answer: C. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about NC3I function?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.

Answer: D. Explanation: The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q41. Which statement correctly identifies IMAC-IFC boundary?

A. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Answer: A. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal

Q42. Which option preserves the legal or institutional boundary of IMAC-IFC boundary?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Answer: B. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q43. Which statement uses IMAC-IFC boundary without changing its institution, law or status?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. C. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

Answer: C. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about IMAC-IFC boundary?

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.

Answer: D. Explanation: The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q45. Which statement correctly identifies Awareness-interdiction distinction?

A. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Answer: A. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q46. Which option preserves the legal or institutional boundary of Awareness-interdiction distinction?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

Answer: B. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q47. Which statement uses Awareness-interdiction distinction without changing its institution, law or status?

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

Answer: C. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about Awareness-interdiction distinction?

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.

Answer: D. Explanation: Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q49. Which statement correctly identifies Surveillance-system role?

A. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

Answer: A. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q50. Which option preserves the legal or institutional boundary of Surveillance-system role?

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

Answer: B. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q51. Which statement uses Surveillance-system role without changing its institution, law or status?

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. C. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

Answer: C. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about Surveillance-system role?

A. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. B. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Answer: D. Explanation: Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q53. Which statement correctly identifies Fishing-community interface?

A. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

Answer: A. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q54. Which option preserves the legal or institutional boundary of Fishing-community interface?

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

Answer: B. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q55. Which statement uses Fishing-community interface without changing its institution, law or status?

A. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. B. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. C. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. D. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

Answer: C. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about Fishing-community interface?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.

Answer: D. Explanation: Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q57. Which statement correctly identifies Port-security convergence?

A. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. B. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

Answer: A. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q58. Which option preserves the legal or institutional boundary of Port-security convergence?

A. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. B. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: B. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q59. Which statement uses Port-security convergence without changing its institution, law or status?

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. C. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: C. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about Port-security convergence?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.

Answer: D. Explanation: Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q61. Which statement correctly identifies Coastal Security Scheme?

A. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: A. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q62. Which option preserves the legal or institutional boundary of Coastal Security Scheme?

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. C. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: B. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q63. Which statement uses Coastal Security Scheme without changing its institution, law or status?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: C. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Coastal Security Scheme?

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. D. The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

Answer: D. Explanation: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q65. Which statement correctly identifies Three-statute legal map?

A. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. B. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

Answer: A. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q66. Which option preserves the legal or institutional boundary of Three-statute legal map?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: B. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q67. Which statement uses Three-statute legal map without changing its institution, law or status?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: C. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about Three-statute legal map?

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.

Answer: D. Explanation: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q69. Which statement correctly identifies Piracy-location boundary?

A. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

Answer: A. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q70. Which option preserves the legal or institutional boundary of Piracy-location boundary?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: B. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q71. Which statement uses Piracy-location boundary without changing its institution, law or status?

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. C. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: C. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Piracy-location boundary?

A. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. D. Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.

Answer: D. Explanation: Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q73. Which statement correctly identifies Reactive-buildout lesson?

A. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. B. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: A. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q74. Which option preserves the legal or institutional boundary of Reactive-buildout lesson?

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: B. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q75. Which statement uses Reactive-buildout lesson without changing its institution, law or status?

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: C. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about Reactive-buildout lesson?

A. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. D. India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Answer: D. Explanation: India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q77. Which statement correctly identifies Resilient end-state?

A. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. B. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. C. Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. D. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.

Answer: A. Explanation: Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q78. Which option preserves the legal or institutional boundary of Resilient end-state?

A. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. B. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. C. India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. D. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.

Answer: B. Explanation: Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q79. Which statement uses Resilient end-state without changing its institution, law or status?

A. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. B. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. C. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. D. Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.

Answer: C. Explanation: Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Resilient end-state?

A. State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. B. The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. C. The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. D. Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

Answer: D. Explanation: Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The audited ledgers route the 2022 maritime-security initiatives demand and the 2025 sea-trade, maritime/coastal challenge and way-forward demand here. OCR inspection confirmed both printed Mains stems. A 2022 UNCLOS Prelims concept is included only as a clearly labelled cross-owned zone-law card.

PYQ DEMAND CARD 1 - 2022 Prelims GS-I

Demand: UNCLOS concepts concerning territorial sea, innocent passage and Exclusive Economic Zone provisions.

Status: Conservative cross-owned concept card; the central ledger routes the objective question to International Relations. No answer letter is recorded or inferred here.

Model solution: Maritime-coastal distinction: Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Maritime-zone ladder:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Navy role:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Coast Guard role:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Piracy-location boundary:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

PYQ DEMAND CARD 2 - 2022 GS-III

Demand: Maritime security challenges in India and organisational, technical and procedural initiatives taken to improve maritime security.

Status: Printed stem inspected in the OCR-searchable official paper; Discuss · 10 marks · 150 words.

Model solution: **Maritime-coastal distinction:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Maritime-zone ladder:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Threat-category map:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Layered-architecture boundary:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **NCSMCS coordination:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Joint Operations Centres:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **NC3I function:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Awareness-interdiction distinction:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Surveillance-system role:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Coastal Security Scheme:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Three-statute legal map:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Resilient end-state:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

PYQ DEMAND CARD 3 - 2025 GS-III

Demand: Why maritime security is vital for India's sea trade, maritime and coastal security challenges, and the way forward.

Status: Printed stem inspected in the OCR-searchable official paper; Discuss · 15 marks · 250 words.

Model solution: **Maritime-coastal distinction:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Maritime-zone ladder:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Threat-category map:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Navy role:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Coast Guard role:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Marine Police role:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Awareness-interdiction distinction:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Fishing-community interface:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Port-security convergence:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and

recovery. **Coastal Security Scheme:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.

Three-statute legal map: The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Reactive-buildout lesson:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Resilient end-state:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish maritime security from coastal security and map India's layered institutional architecture. Answer in about 150 words.

Model thesis: Claim: Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.
- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions

within its mandate.

- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.

Qualified conclusion: **Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain why maritime-domain awareness cannot be treated as interdiction capability. Answer in about 150 words.

Model thesis: **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
- The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Qualified conclusion: **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 3 - 15 MARKS

Question: Discuss maritime security challenges and the organisational, technical and procedural initiatives taken by India. Answer in about 250 words.

Model thesis: **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
- Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.
- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.
- The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.
- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.
- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.

Qualified conclusion: Claim: Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 4 - 15 MARKS

Question: Why is maritime security vital to protect India's sea trade? Discuss challenges and the way forward. Answer in about 250 words.

Model thesis: **Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:**

This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast and maritime approaches from sea-originating threats.
- India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond.
- Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports.
- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.
- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.
- Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.
- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

Qualified conclusion: **Claim:** Maritime-coastal distinction. **Named evidence/example:** Maritime security covers sea lanes, offshore interests, the EEZ and high seas, while coastal security is its near-shore subset protecting the coast

and maritime approaches from sea-originating threats. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Maritime-zone ladder. **Named evidence/example:** India's zone framework distinguishes the territorial sea to 12 nautical miles, contiguous zone to 24 nautical miles, Exclusive Economic Zone to 200 nautical miles, and the high seas beyond. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Threat-category map. **Named evidence/example:** Relevant challenges include sea-borne terrorism, piracy or armed robbery, smuggling and trafficking, infiltration or illegal migration, illegal fishing and fishermen straying, and physical or cyber disruption of ports. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 5 - 20 MARKS

Question: Critically evaluate the Navy-Coast Guard-Marine Police architecture with reference to command clarity and capacity. Answer in about 300 words.

Model thesis: **Claim:** Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role.
- The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate.
- State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy.
- Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident.
- The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary.
- Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
- India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

Qualified conclusion: Claim: Navy role. **Named evidence/example:** The Indian Navy's principal security contribution lies in sea control, surveillance, offshore and sea-lane protection and the wider maritime domain; near-shore tasking must not erase its broader defence role. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Coast Guard role. **Named evidence/example:** The Indian Coast Guard, under the Ministry of Defence and Coast Guard Act, protects maritime and national interests in India's maritime zones and performs security, law-enforcement, safety and coordination functions within its mandate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Marine Police role. **Named evidence/example:** State Marine Police conduct close coastal patrolling and investigation within State jurisdiction, supported through the Coastal Security Scheme and coordinated with the Coast Guard and Navy. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Layered-architecture boundary. **Named evidence/example:** Navy, Coast Guard and Marine Police form a layered arrangement with connected but distinct mandates; the architecture does not make any one institution the sole owner of every maritime incident. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: NCSMCS coordination. **Named evidence/example:** The National Committee for Strengthening Maritime and Coastal Security is the apex inter-agency coordination mechanism headed by the Cabinet Secretary. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Joint Operations Centres. **Named evidence/example:** Joint Operations Centres at Mumbai, Visakhapatnam, Kochi and Port Blair are jointly manned coordination nodes linking the Navy, Coast Guard and Marine Police. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation

status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Reactive-buildout lesson. **Named evidence/example:** India's coastal-security architecture expanded through successive vulnerability-driven reforms, especially after the 2008 Mumbai attacks; later institution-building must be assessed for capacity and coordination, not announced existence alone. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess how ports, fishing communities, maritime-domain awareness and legal modernisation can produce resilient coastal security. Answer in about 300 words.

Model thesis: **Claim:** NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme.

Named evidence/example: The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Piracy-location boundary. **Named evidence/example:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness.
- The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction.
- Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act.
- Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity.
- Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality.
- Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery.
- The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes.
- The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework.
- Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes.
- Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises.

Qualified conclusion: Claim: NC3I function. **Named evidence/example:** The National Command Control Communication and Intelligence Network collates and disseminates vessel and sensor information to strengthen coastal maritime-domain awareness. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IMAC-IFC boundary. **Named evidence/example:** The Information Management and Analysis Centre supports India's maritime picture, while the Navy-hosted IFC-IOR adds partner information-sharing for the Indian Ocean Region; awareness cooperation is not itself interdiction. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date,

institution, legal character and notification-to-implementation status boundary. **Claim:** Awareness-interdiction distinction. **Named evidence/example:** Radar, AIS, vessel reporting and fused information answer what is at sea; vessels, trained crews, lawful boarding, investigation and prosecution determine whether the State can act. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Surveillance-system role. **Named evidence/example:** Coastal radar, Automatic Identification System receivers, vessel traffic systems and related reporting improve identification and tracking but depend on maintenance, compliance and response capacity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Fishing-community interface. **Named evidence/example:** Fishing communities are livelihood stakeholders and early-warning partners; registration, identification, safety communication and protected reporting should build trust rather than presume criminality. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Port-security convergence. **Named evidence/example:** Ports combine physical access, cargo, customs, industrial assets, operational technology and data systems, so continuity planning must integrate physical security, cyber resilience and recovery. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Coastal Security Scheme. **Named evidence/example:** The Coastal Security Scheme supports marine-police stations, jetties, boats, training and surveillance capacity; sanctioned infrastructure is not proof of staffing, serviceability or outcomes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Three-statute legal map. **Named evidence/example:** The Maritime Zones Act establishes zone rights, the SUA Act, 2002 addresses unlawful acts against navigation and fixed platforms, and the Anti-Maritime Piracy Act, 2022 creates a piracy-specific framework. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Piracy-location boundary. **Named evidence/example:** Piracy is a high-seas or applicable EEZ offence under the piracy framework; violence in territorial or internal waters is not automatically piracy and may follow other criminal or maritime statutes. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Resilient end-state. **Named evidence/example:** Maritime security requires zone-specific mandate clarity, interoperable awareness and response, trained coastal police, port resilience, community partnership, lawful enforcement and repeated preparedness and recovery exercises. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.
