

SOLVED PRACTICE WORKBOOK

Security Forces, Intelligence Coordination and Rights - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Security Forces, Intelligence Coordination and Rights - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which statement correctly identifies Constitutional allocation?	5
Q2. Which option preserves the legal or institutional boundary of Constitutional allocation?	5
Q3. Which statement uses Constitutional allocation without changing its institution, law or status?	5
Q4. Which option avoids the standard UPSC close-option trap about Constitutional allocation?	6
Q5. Which statement correctly identifies Force-category boundary?	6
Q6. Which option preserves the legal or institutional boundary of Force-category boundary?	6
Q7. Which statement uses Force-category boundary without changing its institution, law or status?	7
Q8. Which option avoids the standard UPSC close-option trap about Force-category boundary?	7
Q9. Which statement correctly identifies Current CAPF map?	7
Q10. Which option preserves the legal or institutional boundary of Current CAPF map?	8
Q11. Which statement uses Current CAPF map without changing its institution, law or status?	8
Q12. Which option avoids the standard UPSC close-option trap about Current CAPF map?	8
Q13. Which statement correctly identifies Force-mandate fingerprints?	8
Q14. Which option preserves the legal or institutional boundary of Force-mandate fingerprints?	9
Q15. Which statement uses Force-mandate fingerprints without changing its institution, law or status?	9
Q16. Which option avoids the standard UPSC close-option trap about Force-mandate fingerprints?	9
Q17. Which statement correctly identifies Dual-and-specialised forces?	10
Q18. Which option preserves the legal or institutional boundary of Dual-and-specialised forces?	10
Q19. Which statement uses Dual-and-specialised forces without changing its institution, law or status?	10
Q20. Which option avoids the standard UPSC close-option trap about Dual-and-specialised forces?	11
Q21. Which statement correctly identifies Home Guards status?	11
Q22. Which option preserves the legal or institutional boundary of Home Guards status?	11
Q23. Which statement uses Home Guards status without changing its institution, law or status?	11
Q24. Which option avoids the standard UPSC close-option trap about Home Guards status?	12
Q25. Which statement correctly identifies Army Corps PYQ facts?	12
Q26. Which option preserves the legal or institutional boundary of Army Corps PYQ facts?	12
Q27. Which statement uses Army Corps PYQ facts without changing its institution, law or status?	13

Q28. Which option avoids the standard UPSC close-option trap about Army Corps PYQ facts?	13
Q29. Which statement correctly identifies State-police primacy?	13
Q30. Which option preserves the legal or institutional boundary of State-police primacy?	13
Q31. Which statement uses State-police primacy without changing its institution, law or status?	14
Q32. Which option avoids the standard UPSC close-option trap about State-police primacy?	14
Q33. Which statement correctly identifies Intelligence cycle?	14
Q34. Which option preserves the legal or institutional boundary of Intelligence cycle?	15
Q35. Which statement uses Intelligence cycle without changing its institution, law or status?	15
Q36. Which option avoids the standard UPSC close-option trap about Intelligence cycle?	15
Q37. Which statement correctly identifies IB-R&AW boundary?	15
Q38. Which option preserves the legal or institutional boundary of IB-R&AW boundary?	16
Q39. Which statement uses IB-R&AW boundary without changing its institution, law or status?	16
Q40. Which option avoids the standard UPSC close-option trap about IB-R&AW boundary?	16
Q41. Which statement correctly identifies MAC-SMAC coordination?	16
Q42. Which option preserves the legal or institutional boundary of MAC-SMAC coordination?	17
Q43. Which statement uses MAC-SMAC coordination without changing its institution, law or status?	17
Q44. Which option avoids the standard UPSC close-option trap about MAC-SMAC coordination?	17
Q45. Which statement correctly identifies NATGRID boundary?	18
Q46. Which option preserves the legal or institutional boundary of NATGRID boundary?	18
Q47. Which statement uses NATGRID boundary without changing its institution, law or status?	18
Q48. Which option avoids the standard UPSC close-option trap about NATGRID boundary?	19
Q49. Which statement correctly identifies NIA mandate?	19
Q50. Which option preserves the legal or institutional boundary of NIA mandate?	19
Q51. Which statement uses NIA mandate without changing its institution, law or status?	20
Q52. Which option avoids the standard UPSC close-option trap about NIA mandate?	20
Q53. Which statement correctly identifies NSG mandate?	20
Q54. Which option preserves the legal or institutional boundary of NSG mandate?	21
Q55. Which statement uses NSG mandate without changing its institution, law or status?	21
Q56. Which option avoids the standard UPSC close-option trap about NSG mandate?	21
Q57. Which statement correctly identifies Intelligence-evidence chain?	22
Q58. Which option preserves the legal or institutional boundary of Intelligence-evidence chain?	22
Q59. Which statement uses Intelligence-evidence chain without changing its institution, law or status?	22

Q60. Which option avoids the standard UPSC close-option trap about Intelligence-evidence chain?	23
Q61. Which statement correctly identifies Federal coordination?	23
Q62. Which option preserves the legal or institutional boundary of Federal coordination?	23
Q63. Which statement uses Federal coordination without changing its institution, law or status?	24
Q64. Which option avoids the standard UPSC close-option trap about Federal coordination?	24
Q65. Which statement correctly identifies Police-reform architecture?	24
Q66. Which option preserves the legal or institutional boundary of Police-reform architecture?	25
Q67. Which statement uses Police-reform architecture without changing its institution, law or status?	25
Q68. Which option avoids the standard UPSC close-option trap about Police-reform architecture?	25
Q69. Which statement correctly identifies Use-of-force legality?	26
Q70. Which option preserves the legal or institutional boundary of Use-of-force legality?	26
Q71. Which statement uses Use-of-force legality without changing its institution, law or status?	26
Q72. Which option avoids the standard UPSC close-option trap about Use-of-force legality?	27
Q73. Which statement correctly identifies Rights-accountability map?	27
Q74. Which option preserves the legal or institutional boundary of Rights-accountability map?	27
Q75. Which statement uses Rights-accountability map without changing its institution, law or status?	28
Q76. Which option avoids the standard UPSC close-option trap about Rights-accountability map?	28
Q77. Which statement correctly identifies Technology-evidence end-state?	28
Q78. Which option preserves the legal or institutional boundary of Technology-evidence end-state?	29
Q79. Which statement uses Technology-evidence end-state without changing its institution, law or status?	29
Q80. Which option avoids the standard UPSC close-option trap about Technology-evidence end-state?	29

Security Forces, Intelligence Coordination and Rights - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Constitutional allocation?

A. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. B. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. C. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. D. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.

Answer: A. Explanation: Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q2. Which option preserves the legal or institutional boundary of Constitutional allocation?

A. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. B. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.

Answer: B. Explanation: Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q3. Which statement uses Constitutional allocation without changing its institution, law or status?

A. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. B. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. C. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. D. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts.

Answer: C. Explanation: Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about Constitutional allocation?

A. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. B. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. C. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. D. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.

Answer: D. Explanation: Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q5. Which statement correctly identifies Force-category boundary?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.

Answer: A. Explanation: The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q6. Which option preserves the legal or institutional boundary of Force-category boundary?

A. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. B. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. C. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. D. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force.

Answer: B. Explanation: The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q7. Which statement uses Force-category boundary without changing its institution, law or status?

A. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. B. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. C. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. D. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts.

Answer: C. Explanation: The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about Force-category boundary?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. C. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. D. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.

Answer: D. Explanation: The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q9. Which statement correctly identifies Current CAPF map?

A. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. B. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. C. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. D. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.

Answer: A. Explanation: MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q10. Which option preserves the legal or institutional boundary of Current CAPF map?

A. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. B. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. C. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. D. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force.

Answer: B. Explanation: MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q11. Which statement uses Current CAPF map without changing its institution, law or status?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations.

Answer: C. Explanation: MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about Current CAPF map?

A. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. B. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. C. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. D. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list.

Answer: D. Explanation: MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q13. Which statement correctly identifies Force-mandate fingerprints?

A. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. B. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. C. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. D. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force.

Answer: A. Explanation: BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q14. Which option preserves the legal or institutional boundary of Force-mandate fingerprints?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. C. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. D. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts.

Answer: B. Explanation: BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q15. Which statement uses Force-mandate fingerprints without changing its institution, law or status?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. C. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. D. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations.

Answer: C. Explanation: BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about Force-mandate fingerprints?

A. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. B. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. C. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. D. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.

Answer: D. Explanation: BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q17. Which statement correctly identifies Dual-and-specialised forces?

A. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. B. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. C. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. D. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts.

Answer: A. Explanation: Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q18. Which option preserves the legal or institutional boundary of Dual-and-specialised forces?

A. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. B. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. C. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. D. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations.

Answer: B. Explanation: Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q19. Which statement uses Dual-and-specialised forces without changing its institution, law or status?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. C. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: C. Explanation: Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about Dual-and-specialised forces?

A. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. B. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. C. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. D. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force.

Answer: D. Explanation: Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q21. Which statement correctly identifies Home Guards status?

A. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. B. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. C. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. D. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations.

Answer: A. Explanation: Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q22. Which option preserves the legal or institutional boundary of Home Guards status?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. C. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: B. Explanation: Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q23. Which statement uses Home Guards status without changing its institution, law or status?

A. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. B. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. C. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. D. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action.

Answer: C. Explanation: Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about Home Guards status?

A. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. B. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. C. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. D. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts.

Answer: D. Explanation: Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q25. Which statement correctly identifies Army Corps PYQ facts?

A. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. B. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. C. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: A. Explanation: For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q26. Which option preserves the legal or institutional boundary of Army Corps PYQ facts?

A. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. B. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. C. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. D. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.

Answer: B. Explanation: For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q27. Which statement uses Army Corps PYQ facts without changing its institution, law or status?

A. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. B. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. C. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: C. Explanation: For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about Army Corps PYQ facts?

A. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. B. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. C. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. D. For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations.

Answer: D. Explanation: For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q29. Which statement correctly identifies State-police primacy?

A. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. B. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. C. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. D. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action.

Answer: A. Explanation: State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q30. Which option preserves the legal or institutional boundary of State-police primacy?

A. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. B. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. C. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: B. Explanation: State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q31. Which statement uses State-police primacy without changing its institution, law or status?

A. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. B. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. C. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. D. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.

Answer: C. Explanation: State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about State-police primacy?

A. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. B. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. C. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. D. State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain.

Answer: D. Explanation: State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q33. Which statement correctly identifies Intelligence cycle?

A. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. B. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. C. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: A. Explanation: The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q34. Which option preserves the legal or institutional boundary of Intelligence cycle?

A. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. B. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. C. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. D. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate.

Answer: B. Explanation: The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q35. Which statement uses Intelligence cycle without changing its institution, law or status?

A. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. B. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. C. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. D. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.

Answer: C. Explanation: The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about Intelligence cycle?

A. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. B. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. C. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. D. The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action.

Answer: D. Explanation: The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q37. Which statement correctly identifies IB-R&AW boundary?

A. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. B. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. C. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. D. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.

Answer: A. Explanation: IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q38. Which option preserves the legal or institutional boundary of IB-R&AW boundary?

A. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. B. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. C. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. D. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.

Answer: B. Explanation: IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q39. Which statement uses IB-R&AW boundary without changing its institution, law or status?

A. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. B. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. C. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. D. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.

Answer: C. Explanation: IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about IB-R&AW boundary?

A. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. B. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. C. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. D. IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Answer: D. Explanation: IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q41. Which statement correctly identifies MAC-SMAC coordination?

A. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. B. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. C. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. D. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.

Answer: A. Explanation: The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q42. Which option preserves the legal or institutional boundary of MAC-SMAC coordination?

A. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. B. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. C. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. D. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.

Answer: B. Explanation: The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q43. Which statement uses MAC-SMAC coordination without changing its institution, law or status?

A. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. B. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. C. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. D. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.

Answer: C. Explanation: The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about MAC-SMAC coordination?

A. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. B. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. C. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. D. The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.

Answer: D. Explanation: The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q45. Which statement correctly identifies NATGRID boundary?

A. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. B. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. C. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. D. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.

Answer: A. Explanation: NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q46. Which option preserves the legal or institutional boundary of NATGRID boundary?

A. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. B. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. C. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. D. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence.

Answer: B. Explanation: NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q47. Which statement uses NATGRID boundary without changing its institution, law or status?

A. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. B. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. C. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. D. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission.

Answer: C. Explanation: NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about NATGRID boundary?

A. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. B. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. C. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. D. NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate.

Answer: D. Explanation: NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q49. Which statement correctly identifies NIA mandate?

A. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. B. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. C. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. D. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Answer: A. Explanation: NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q50. Which option preserves the legal or institutional boundary of NIA mandate?

A. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. B. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. C. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. D. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission.

Answer: B. Explanation: NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q51. Which statement uses NIA mandate without changing its institution, law or status?

A. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. B. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. C. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. D. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Answer: C. Explanation: NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about NIA mandate?

A. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. B. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. C. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. D. NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.

Answer: D. Explanation: NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q53. Which statement correctly identifies NSG mandate?

A. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. B. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. C. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. D. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Answer: A. Explanation: NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q54. Which option preserves the legal or institutional boundary of NSG mandate?

A. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. B. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. C. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. D. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful.

Answer: B. Explanation: NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q55. Which statement uses NSG mandate without changing its institution, law or status?

A. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. B. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. C. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. D. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.

Answer: C. Explanation: NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about NSG mandate?

A. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. B. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. C. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. D. NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.

Answer: D. Explanation: NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q57. Which statement correctly identifies Intelligence-evidence chain?

A. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. B. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. C. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. D. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Answer: A. Explanation: A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q58. Which option preserves the legal or institutional boundary of Intelligence-evidence chain?

A. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. B. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. C. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. D. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.

Answer: B. Explanation: A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q59. Which statement uses Intelligence-evidence chain without changing its institution, law or status?

A. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. B. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. C. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. D. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful.

Answer: C. Explanation: A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about Intelligence-evidence chain?

A. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. B. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. C. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. D. A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence.

Answer: D. Explanation: A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q61. Which statement correctly identifies Federal coordination?

A. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. B. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. C. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. D. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful.

Answer: A. Explanation: Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q62. Which option preserves the legal or institutional boundary of Federal coordination?

A. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. B. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. C. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. D. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.

Answer: B. Explanation: Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q63. Which statement uses Federal coordination without changing its institution, law or status?

A. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. B. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. C. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. D. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.

Answer: C. Explanation: Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Federal coordination?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. C. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. D. Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Answer: D. Explanation: Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q65. Which statement correctly identifies Police-reform architecture?

A. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. B. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. C. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. D. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses.

Answer: A. Explanation: Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q66. Which option preserves the legal or institutional boundary of Police-reform architecture?

A. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. B. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. C. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. D. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.

Answer: B. Explanation: Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q67. Which statement uses Police-reform architecture without changing its institution, law or status?

A. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. B. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. C. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. D. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.

Answer: C. Explanation: Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about Police-reform architecture?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission.

Answer: D. Explanation: Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q69. Which statement correctly identifies Use-of-force legality?

A. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. B. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. C. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. D. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.

Answer: A. Explanation: Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q70. Which option preserves the legal or institutional boundary of Use-of-force legality?

A. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. B. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. C. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. D. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.

Answer: B. Explanation: Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q71. Which statement uses Use-of-force legality without changing its institution, law or status?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. C. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. D. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.

Answer: C. Explanation: Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Use-of-force legality?

A. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. B. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. C. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. D. Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful.

Answer: D. Explanation: Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q73. Which statement correctly identifies Rights-accountability map?

A. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. B. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. C. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. D. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.

Answer: A. Explanation: Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q74. Which option preserves the legal or institutional boundary of Rights-accountability map?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. C. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. D. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list.

Answer: B. Explanation: Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q75. Which statement uses Rights-accountability map without changing its institution, law or status?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. C. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. D. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.

Answer: C. Explanation: Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about Rights-accountability map?

A. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. B. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.

Answer: D. Explanation: Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q77. Which statement correctly identifies Technology-evidence end-state?

A. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. B. Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.

Answer: A. Explanation: Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q78. Which option preserves the legal or institutional boundary of Technology-evidence end-state?

A. The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. B. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. C. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. D. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.

Answer: B. Explanation: Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q79. Which statement uses Technology-evidence end-state without changing its institution, law or status?

A. MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. B. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. C. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. D. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force.

Answer: C. Explanation: Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Technology-evidence end-state?

A. Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. B. BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. C. Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. D. Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses.

Answer: D. Explanation: Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. The other options change the threat category, institutional owner, legal instrument, evidentiary rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The three conservative routed cards are the 2023 GS-III intelligence-agency demand, the 2023 Prelims Home Guards question and the 2026 provisional-key Army Corps question. Objective answer letters are not inferred, and the Corps card records only owner-audited public headquarters facts.

PYQ DEMAND CARD 1 - 2023 GS-III

Demand: Internal security challenges faced by India and the role of Central Intelligence and Investigative Agencies tasked to counter them.

Status: Routed to this owner; Discuss · 15 marks · 250 words.

Model solution: Constitutional allocation: Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Force-category boundary:** The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **State-police primacy:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Intelligence cycle:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **IB-R&AW boundary:** IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. **MAC-SMAC coordination:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **NATGRID boundary:** NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **NIA mandate:** NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. **NSG mandate:** NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. **Intelligence-evidence chain:** A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. **Federal coordination:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Technology-evidence end-state:** Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

PYQ DEMAND CARD 2 - 2023 Prelims GS-I

Demand: Home Guards legal basis, auxiliary roles and Border Wing Home Guard battalions.

Status: Routed objective concept card; the official key is unavailable locally, so no answer letter is inferred.

Model solution: Force-category boundary: The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **Home Guards status:** Home Guards are auxiliary police and public-support organisations governed by respective State or Union Territory Acts and Rules, not one all-India Central Home Guards Act; Border Wing Home Guards exist in specified border contexts. **State-police primacy:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Federal coordination:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. The

solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

PYQ DEMAND CARD 3 - 2026 Prelims GS-I

Demand: Indian Army Corps formations matched with their operational headquarters locations.

Status: Routed objective concept card; the local Set-A key is provisional, so facts are recorded without inferring an answer option.

Model solution: Force-category boundary: The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **Army Corps PYQ facts:** For the provisionally keyed 2026 route, the owner records III Corps at Dimapur, IV Corps at Tezpur, XIV Corps at Leh and XXXIII Corps at Sukna; these factual matches do not disclose deployment, readiness or operations. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish the Armed Forces, CAPFs, State police and specialised agencies by administrative home, primary function and legal boundary. Answer in about 150 words.

Model thesis: Claim: Constitutional allocation. **Named evidence/example:** Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-category boundary. **Named evidence/example:** The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Current CAPF map. **Named evidence/example:** MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Force-mandate fingerprints. **Named evidence/example:** BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dual-and-specialised forces. **Named evidence/example:** Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.
- The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.
- MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list.

- BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.
- Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force.

Qualified conclusion: Claim: Constitutional allocation. **Named evidence/example:** Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-category boundary. **Named evidence/example:** The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Current CAPF map. **Named evidence/example:** MHA's owner-audited list comprises Assam Rifles, BSF, CISF, CRPF, ITBP, NSG and SSB; SPG, RPF and the Indian Coast Guard have separate administrative arrangements and must not be added to that list. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-mandate fingerprints. **Named evidence/example:** BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Dual-and-specialised forces. **Named evidence/example:** Assam Rifles is administratively under MHA and operates under Army command, while the Indian Coast Guard is an armed force under the Ministry of Defence; command arrangement and task do not make either an ordinary State police force. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain why MAC, NATGRID and NIA perform different functions in India's security architecture. Answer in about 150 words.

Model thesis: Claim: Intelligence cycle. **Named evidence/example:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IB-R&AW boundary. **Named evidence/example:** IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NATGRID boundary. **Named evidence/example:** NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the

owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NIA mandate.

Named evidence/example: NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence-evidence chain.

Named evidence/example: A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action.
- IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.
- The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.
- NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate.
- NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.
- A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence.

Qualified conclusion: Claim: Intelligence cycle. **Named evidence/example:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: IB-R&AW boundary. **Named evidence/example:** IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.

Analysis: This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NATGRID boundary. **Named evidence/example:** NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NIA mandate.

Named evidence/example: NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence-evidence chain.

Named evidence/example: A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may

guide action but is not automatically trial evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 3 - 15 MARKS

Question: Discuss the role of Central Intelligence and Investigative Agencies in countering internal-security threats while preserving State-police primacy. Answer in about 250 words.

Model thesis: **Claim:** Constitutional allocation. **Named evidence/example:** Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State-police primacy. **Named evidence/example:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: Intelligence cycle. **Named evidence/example:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IB-R&AW boundary. **Named evidence/example:** IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: NATGRID boundary. **Named evidence/example:** NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NIA mandate. **Named evidence/example:** NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence-evidence chain. **Named evidence/example:** A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.
- State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain.
- The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action.
- IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest.
- The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.
- NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate.
- NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.
- A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence.
- Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Qualified conclusion: Claim: Constitutional allocation. **Named evidence/example:** Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State-police primacy. **Named evidence/example:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence cycle. **Named evidence/example:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** IB-R&AW boundary. **Named evidence/example:** IB supplies domestic intelligence and R&AW external intelligence within their public institutional roles; neither is a police investigating body or has a general power of arrest. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NATGRID boundary. **Named evidence/example:** NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NIA mandate. **Named evidence/example:** NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence

collector and does not replace every State-police case. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence-evidence chain. **Named evidence/example:** A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess India's federal coordination architecture across State police, CAPFs, NIA, NSG and intelligence-sharing mechanisms. Answer in about 250 words.

Model thesis: **Claim:** Constitutional allocation. **Named evidence/example:** Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-category boundary. **Named evidence/example:** The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-mandate fingerprints. **Named evidence/example:** BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State-police primacy. **Named evidence/example:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NIA mandate. **Named evidence/example:** NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NSG mandate. **Named evidence/example:** NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named**

evidence/example: Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility.
- The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions.
- BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries.
- State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain.
- The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.
- NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case.
- NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions.
- Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.

Qualified conclusion: Claim: Constitutional allocation. **Named evidence/example:** Public order and police are State List Entries 1 and 2, while Union List Entry 2A permits deployment of Union armed forces in aid of civil power and Article 355 places a protective duty on the Union; support does not erase State responsibility. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-category boundary. **Named evidence/example:** The Armed Forces are military services, CAPFs are Union police and security forces, State police exercise ordinary public-order and investigation powers, and specialised agencies have narrower statutory or executive functions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Force-mandate fingerprints. **Named evidence/example:** BSF, ITBP and SSB have designated border-guarding roles, CRPF supports internal security and public order, and CISF protects specified installations and sectors; each mandate has legal and operational boundaries. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** State-police primacy. **Named evidence/example:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation

status boundary. **Claim:** NIA mandate. **Named evidence/example:** NIA is a statutory Central investigative and prosecuting agency for scheduled offences in a concurrent-jurisdiction framework; it is not the domestic intelligence collector and does not replace every State-police case. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NSG mandate. **Named evidence/example:** NSG is a specialised counter-terrorism and hostage-rescue response force within its mandate, whereas NIA investigates scheduled offences after or alongside response; tactical response and legal case-building are different functions. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

ORIGINAL MAINS 5 - 20 MARKS

Question: Critically evaluate police reform, use-of-force legality and human-rights accountability as operational security capabilities. Answer in about 300 words.

Model thesis: **Claim:** State-police primacy. **Named evidence/example:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Police-reform architecture. **Named evidence/example:** Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Use-of-force legality. **Named evidence/example:** Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rights-accountability map. **Named evidence/example:** Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Technology-evidence end-state. **Named evidence/example:** Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain.
- Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.
- Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission.
- Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful.
- Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.
- Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses.

Qualified conclusion: **Claim:** State-police primacy. **Named evidence/example:** State police are first responders for public order, complaint registration, local intelligence, evidence preservation, witnesses and investigation; Central forces and agencies supplement rather than eliminate this local chain. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Police-reform architecture. **Named evidence/example:** Prakash Singh v. Union of India set seven reform benchmarks including State Security Commissions, tenure protections, separation of investigation, Police Establishment Boards, Police Complaints Authorities and a National Security Commission. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Use-of-force legality. **Named evidence/example:** Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rights-accountability map. **Named evidence/example:** Article 33 permits Parliament to restrict specified service rights, D.K. ORIGINAL MAINS 6 - 20 MARKS

Question: Examine how security technology and intelligence coordination can be strengthened without collapsing attribution, intelligence leads and admissible evidence. Answer in about 300 words.

Model thesis: **Claim:** Intelligence cycle. **Named evidence/example:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NATGRID boundary. **Named evidence/example:** NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence-evidence chain. **Named evidence/example:** A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Use-of-force legality. **Named evidence/example:** Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rights-accountability map. **Named evidence/example:** Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Technology-evidence end-state. **Named evidence/example:** Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim -> named evidence -> analysis -> qualification:

- The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action.
- The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command.
- NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate.

- A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence.
- Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity.
- Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful.
- Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately.
- Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and conviction remain distinct statuses.

Qualified conclusion: Claim: Intelligence cycle. **Named evidence/example:** The intelligence cycle moves through direction, collection, processing, analysis, dissemination and feedback; volume of collection does not establish relevance, accuracy, lawful use or operational action. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.

Claim: MAC-SMAC coordination. **Named evidence/example:** The Multi Agency Centre and Subsidiary MACs are intelligence-sharing coordination mechanisms under the IB framework; a shared lead is not an FIR, admissible evidence or operational command. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** NATGRID boundary.

Named evidence/example: NATGRID is a data-integration and authorised-access tool connecting existing government data sources for security use; it does not independently collect all intelligence, investigate, arrest or adjudicate. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Intelligence-evidence chain. **Named evidence/example:** A disciplined chain separates intelligence lead, preventive action, incident response, lawful search or seizure, forensic preservation, investigation, charge, prosecution and judicial finding; intelligence may guide action but is not automatically trial evidence. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Federal coordination. **Named evidence/example:** Internal security requires Centre-State and inter-agency coordination through lawful requisition, information sharing, agreed command, deconfliction and post-operation handoff; centralisation is not a substitute for functional clarity. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Use-of-force legality. **Named evidence/example:** Use of force must rest on legal authority and satisfy necessity, proportionality, precaution, command responsibility, record and review; a mandate or disturbed-area status never proves that every act within it is lawful. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Rights-accountability map. **Named evidence/example:** Article 33 permits Parliament to restrict specified service rights, D.K. Basu safeguards arrest and custody, and Section 19 of the Protection of Human Rights Act limits the NHRC's armed-forces procedure; each safeguard's implementation must be assessed separately. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary. **Claim:** Technology-evidence end-state. **Named evidence/example:** Security technology needs defined purpose, authorised access, data minimisation, accuracy checks, audit logs, human review, retention limits, cybersecurity and remedy; attribution, intelligence assessment, arrest, charge and

conviction remain distinct statuses. **Analysis:** This fixes the threat category, legal instrument, institutional mandate and verified evidentiary rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and notification-to-implementation status boundary.
