# CSAT Hard Revision Folder 5: Mixed hard sweep across all four CSAT practice families

ANSWER KEY + SOLUTIONS | 40 questions | Source: original synthesis

Scoring: +2.5 for correct, –5/6 for incorrect, 0 for blank. Check the key only after completing the answer-free paper.

| Q | Key | Category |
|---|---|---|
| 1 | D | Comprehension |
| 2 | B | Comprehension |
| 3 | A | Comprehension |
| 4 | C | Comprehension |
| 5 | C | Comprehension |
| 6 | A | Comprehension |
| 7 | D | Comprehension |
| 8 | B | Comprehension |
| 9 | C | Comprehension |
| 10 | D | Comprehension |
| 11 | A | Numeracy / DI |
| 12 | C | Numeracy / DI |
| 13 | D | Numeracy / DI |
| 14 | C | Numeracy / DI |
| 15 | A | Numeracy / DI |
| 16 | A | Numeracy / DI |
| 17 | D | Numeracy / DI |
| 18 | B | Numeracy / DI |
| 19 | C | Numeracy / DI |
| 20 | A | Numeracy / DI |
| 21 | B | Logical reasoning |
| 22 | A | Logical reasoning |
| 23 | C | Logical reasoning |
| 24 | B | Logical reasoning |
| 25 | A | Logical reasoning |
| 26 | C | Logical reasoning |
| 27 | B | Logical reasoning |
| 28 | C | Logical reasoning |
| 29 | B | Logical reasoning |
| 30 | B | Logical reasoning |
| 31 | D | Decision-making / problem solving |
| 32 | D | Decision-making / problem solving |
| 33 | C | Decision-making / problem solving |
| 34 | B | Decision-making / problem solving |

| Q | Key | Category |
|---|---|---|
| 35 | A | Decision-making / problem solving |
| 36 | C | Decision-making / problem solving |
| 37 | D | Decision-making / problem solving |
| 38 | C | Decision-making / problem solving |
| 39 | A | Decision-making / problem solving |
| 40 | B | Decision-making / problem solving |

## DETAILED SOLUTIONS

**Q1 — D** Comprehension
The passage links the issue to incentives, evidence and feedback; the alternatives are absolute or narrowly framed.
Provenance: Original synthesis

**Q2 — B** Comprehension
The passage distinguishes a desirable objective from the quality of its feedback loop; it rejects universal claims.
Provenance: Original synthesis

**Q3 — A** Comprehension
The argument depends on learning through feedback; it does not require perfect information or reject all central rules.
Provenance: Original synthesis

**Q4 — C** Comprehension
The wording weighs trade-offs and improvement mechanisms rather than celebrating, rejecting or attacking them.
Provenance: Original synthesis

**Q5 — C** Comprehension
The passage links the issue to incentives, evidence and feedback; the alternatives are absolute or narrowly framed.
Provenance: Original synthesis

**Q6 — A** Comprehension
The passage distinguishes a desirable objective from the quality of its feedback loop; it rejects universal claims.
Provenance: Original synthesis

**Q7 — D** Comprehension
The argument depends on learning through feedback; it does not require perfect information or reject all central rules.
Provenance: Original synthesis

**Q8 — B** Comprehension
The wording weighs trade-offs and improvement mechanisms rather than celebrating, rejecting or attacking them.
Provenance: Original synthesis

**Q9 — C** Comprehension
The passage links the issue to incentives, evidence and feedback; the alternatives are absolute or narrowly framed.
Provenance: Original synthesis

**Q10 — D** Comprehension
The passage distinguishes a desirable objective from the quality of its feedback loop; it rejects universal claims.
Provenance: Original synthesis

**Q11 — A** Numeracy / DI
Compute powers modulo 18; cyclic reduction gives remainder 1.
Provenance: Original synthesis

**Q12 — C** Numeracy / DI
Count multiples of 7 and 17, then remove twice the common multiples: the exclusive count is 21.
Provenance: Original synthesis

**Q13 — D** Numeracy / DI
Use a weighted average: (6×20+21)/(6+1) = 20.14%.
Provenance: Original synthesis

**Q14 — C** Numeracy / DI
Combined rate = 1/12+1/19+1/40; reciprocal = 6.21 days.
Provenance: Original synthesis

**Q15 — A** Numeracy / DI
Change in average = (new−old)/19; new average = 55.21.
Provenance: Original synthesis

**Q16 — A** Numeracy / DI
Multiply successive factors: 1.0×(1+14/100)×(1−17/100)×(1+20/100); net = 13.54%.
Provenance: Original synthesis

**Q17 — D** Numeracy / DI
Removed area = $4\times2^2$; remaining area = $17\times13-4\times2^2 = 205$ m².
Provenance: Original synthesis

**Q18 — B** Numeracy / DI
Weighted total = 141; 141 divided by 17 leaves remainder 5.
Provenance: Original synthesis

**Q19 — C** Numeracy / DI
lcm(12,10) = 60; enumerate its multiples in the interval to obtain 3.
Provenance: Original synthesis

**Q20 — A** Numeracy / DI
The increments alternate 7, 2, 7, 2; the next increment is 7, giving 27.
Provenance: Original synthesis

**Q21 — B** Logical reasoning
Enumerating all valid arrangements gives possible fifth-position occupants ['A', 'B', 'D', 'E', 'F', 'G']; C never appears there.
Provenance: Original synthesis

**Q22 — A** Logical reasoning
Testing all rankings gives possible third-place candidates ['P', 'Q', 'R', 'S', 'T']; U violates the partial-order constraints in every valid ranking.
Provenance: Original synthesis

**Q23 — C** Logical reasoning
(7×6+3) mod 26 = 19.
Provenance: Original synthesis

**Q24 — B** Logical reasoning
Y contains X plus Y-only members: 6+8 = 14.
Provenance: Original synthesis

**Q25 — A** Logical reasoning
Displacement = sqrt($4^2+8^2$) = 8.94 km.
Provenance: Original synthesis

**Q26 — C** Logical reasoning
N is P's father; M is N's sister, so M is P's paternal aunt.
Provenance: Original synthesis

**Q27 — B** Logical reasoning
Assume exactly one of A, B and C is guilty and exactly one statement is true. A says B is guilty; B says A and C are innocent; C says B is innocent. Testing A, B and C in turn leaves only B guilty: A and C are then false, while B is true.
Provenance: Original synthesis

**Q28 — C** Logical reasoning
All selections minus those containing both specified proposals: C(9,4)–C(7,2) = 105.
Provenance: Original synthesis

**Q29 — B** Logical reasoning
Points = 3×6+4 = 22; losses add zero.
Provenance: Original synthesis

**Q30 — B** Logical reasoning
The first post has 9 choices and the second has 8; ordered pairs therefore total 9×8 = 72.
Provenance: Original synthesis

**Q31 — D** Decision-making / problem solving
Disaggregated evidence supports adaptation rather than premature scaling, cancellation or concealment.
Provenance: Original synthesis

**Q32 — D** Decision-making / problem solving
Complaint counts need accessibility and independent-feedback checks before they can indicate improvement.
Provenance: Original synthesis

**Q33 — C** Decision-making / problem solving
A documented risk and change-control assessment protects safety without making procedure an empty ritual.
Provenance: Original synthesis

**Q34 — B** Decision-making / problem solving
Transparent deduplication plus appeal and verification addresses both leakage and wrongful exclusion.
Provenance: Original synthesis

**Q35 — A** Decision-making / problem solving
Equal application of a published rule protects fairness while allowing genuinely defined hardship relief.
Provenance: Original synthesis

**Q36 — C** Decision-making / problem solving
The response preserves useful innovation while removing exclusion through assisted access, fallback and review.
Provenance: Original synthesis

**Q37 — D** Decision-making / problem solving
A shared evidence base and explicit assumptions address disagreement without arbitrary choice or paralysis.
Provenance: Original synthesis

**Q38 — C** Decision-making / problem solving
Outcome-by-issue plus verified follow-up distinguishes visible activity from effective service delivery.
Provenance: Original synthesis

**Q39 — A** Decision-making / problem solving
The evidence-supported intervention creates an accountable learning loop and a reviewable use of funds.
Provenance: Original synthesis

**Q40 — B** Decision-making / problem solving
Consistent use of a pre-published rule protects equal treatment, transparency and auditability.
Provenance: Original synthesis
