Indian Legal and Institutional Architecture - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-04. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-04.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. OCR-searchable official UPSC papers were supplementary only for printed routed demands. No answer key, warning performance, notification effect, implementation outcome, casualty reduction or disaster metric was inferred.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** The 2020 GS-III card is directly routed. The 2020 GS-II card is explicitly cross-cutting. The 2024 urban-flood card is an institutional application and does not displace Topic 08 ownership.
- **Live-link boundary:** India Code and MHA parliamentary material are the current legal-status anchors; NIDM and NDRF official pages verify their institutional roles. Blocked PDFs are recorded honestly, and no enabling provision is treated as completed rollout.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

LIVE OFFICIAL-SOURCE ATTEMPT LOG

The checks below were made on 2026-09-04. Substantive official text is used only for the proposition it supports; title-only, blocked or thin pages are recorded and supply no factual claim.

- <https://www.indiacode.nic.in/indiacode/bitstream/123456789/2045/1/A200553.pdf> - attempted 2026-09-04; the India Code PDF returned HTTP 403 to the fetcher. The module therefore relies on the consolidated provisions already audited into the Basic and Advanced owners and does not infer a notification or implementation outcome.
- <https://www.mha.gov.in/MHA1/Par2017/pdfs/par2025-pdfs/LS22072025/284.pdf> - attempted 2026-09-04; the official parliamentary PDF returned HTTP 403, while official search metadata confirmed the amendment's commencement and the reported 16 operational NDRF battalions. No deployment success claim was imported.
- <https://nidm.gov.in/about.asp> - fetched 2026-09-04; NIDM's official page confirms its statutory capacity-development, training, research, documentation and policy-advocacy responsibilities.
- <https://ndrf.gov.in/en/about-us> - fetched 2026-09-04; the official force page confirms the DM Act basis and expansion to 16 battalions. Operational narratives were not converted into comparative outcomes.

BASIC LEARNING SESSION

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - DM ACT AND AMENDMENT CHRONOLOGY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

Technical definition: Read DM Act and amendment chronology as a sequence: identify DM Act foundation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read DM Act and amendment chronology as a sequence: identify DM Act foundation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- DM Act
- amendment chronology
- Mechanism chain
- Qualified use
- The Disaster Management Act

How to use them: Frame the answer through FOUNDATION; define DM Act, connect amendment chronology with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

DM ACT AND AMENDMENT CHRONOLOGY

01. DM Act foundation

|
v

02. Current amendment status

STATUS / CATEGORY FIREWALL -> Do not present the original 2005 Act as the complete current law.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

SIMPLE SYSTEM EXAMPLE

Read DM Act and amendment chronology as a sequence: identify DM Act foundation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not present the original 2005 Act as the complete current law. This keeps DM Act foundation and Current amendment status in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.
- The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

EXAMINER CAUTION

- Do not present the original 2005 Act as the complete current law.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Open with the current amended statute and date.

MINI RECAP

- **Mechanism chain:** DM Act foundation -> Current amendment status
- **Qualified use:** Open with the current amended statute and date.

CLOSING RECALL FLOW - FOUNDATION - DM ACT AND AMENDMENT CHRONOLOGY

START / CONCEPT: FOUNDATION - DM Act and amendment chronology

|
v

EXACT TERMS: FOUNDATION · DM Act · amendment chronology · Mechanism chain · Qualified use · The Disaster Management Act

|
v

MECHANISM / ARGUMENT: Mechanism chain: DM Act foundation - Current amendment status Qualified use: Open with the current amended statute and date.

|
v

CONSEQUENCE / CONTRAST: The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

|
v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not present the original 2005 Act as the complete current law.

|
v

ANSWER-GRABBING FORMULATION: Read DM Act and amendment chronology as a sequence: identify DM Act foundation, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 2 - FOUNDATION - NDMA POLICY AND PLAN AUTHORITY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

Technical definition: Read NDMA policy and plan authority as a sequence: identify NDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

MUST-WRITE KEYWORDS

- FOUNDATION
- NDMA policy
- plan authority
- Mechanism chain
- Qualified use
- NDMA

How to use them: Frame the answer through FOUNDATION; define NDMA policy, connect plan authority with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

NDMA POLICY AND PLAN AUTHORITY

01. NDMA

STATUS / CATEGORY FIREWALL -> Do not confuse NDMA policy functions with NEC coordination functions.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

SIMPLE SYSTEM EXAMPLE

Read NDMA policy and plan authority as a sequence: identify NDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not confuse NDMA policy functions with NEC coordination functions. This keeps NDMA in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

EXAMINER CAUTION

- Do not confuse NDMA policy functions with NEC coordination functions.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Attribute policy and plan functions to the correct apex authority.

MINI RECAP

- **Mechanism chain:** NDMA
- **Qualified use:** Attribute policy and plan functions to the correct apex authority.

CLOSING RECALL FLOW - FOUNDATION - NDMA POLICY AND PLAN AUTHORITY

START / CONCEPT: FOUNDATION - NDMA policy and plan authority

|

v

EXACT TERMS: FOUNDATION · NDMA policy · plan authority · Mechanism chain · Qualified use · NDMA

|

v

MECHANISM / ARGUMENT: Read NDMA policy and plan authority as a sequence: identify NDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not confuse NDMA policy functions with NEC coordination functions.

|

v

UPSC TRAP / ANSWER-USE: Do not confuse NDMA policy functions with NEC coordination functions.

|

v

ANSWER-GRABBING FORMULATION: NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

SESSION 3 - FOUNDATION - NEC COORDINATION AND IMPLEMENTATION

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read NEC coordination and implementation as a sequence: identify NEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Mechanism chain: NEC Qualified use: Separate coordination and monitoring from policy approval.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read NEC coordination and implementation as a sequence: identify NEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- FOUNDATION
- NEC coordination
- implementation
- Mechanism chain
- Qualified use
- The National Executive Committee

How to use them: Frame the answer through FOUNDATION; define NEC coordination, connect implementation with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

NEC COORDINATION AND IMPLEMENTATION

01. NEC

STATUS / CATEGORY FIREWALL -> Do not merge NDRF-the-force with NDRF-the-fund.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.

SIMPLE SYSTEM EXAMPLE

Read NEC coordination and implementation as a sequence: identify NEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not merge NDRF-the-force with NDRF-the-fund. This keeps NEC in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.

EXAMINER CAUTION

- Do not merge NDRF-the-force with NDRF-the-fund.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Separate coordination and monitoring from policy approval.

MINI RECAP

- **Mechanism chain:** NEC
- **Qualified use:** Separate coordination and monitoring from policy approval.

CLOSING RECALL FLOW - FOUNDATION - NEC COORDINATION AND IMPLEMENTATION

START / CONCEPT: FOUNDATION - NEC coordination and implementation

|

v

EXACT TERMS: FOUNDATION • NEC coordination • implementation • Mechanism chain • Qualified use • The National Executive Committee

|

v

MECHANISM / ARGUMENT: Mechanism chain: NEC Qualified use: Separate coordination and monitoring from policy approval.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not merge NDRF-the-force with NDRF-the-fund.

|

v

UPSC TRAP / ANSWER-USE: Do not merge NDRF-the-force with NDRF-the-fund.

|

v

ANSWER-GRABBING FORMULATION: Read NEC coordination and implementation as a sequence: identify NEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 4 - CORE - SDMA AND STATE POLICY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

Technical definition: Read SDMA and State policy as a sequence: identify SDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Mechanism chain: SDMA Qualified use: Show how the State tier adapts national direction.

MUST-WRITE KEYWORDS

- SDMA
- Mechanism chain
- Qualified use
- The State Disaster Management Authority
- Chief Minister
- Read SDMA

How to use them: Frame the answer through SDMA; define Mechanism chain, connect Qualified use with The State Disaster Management Authority to explain the mechanism, and use Chief Minister for the decisive comparison or qualification.

VISUAL FIRST

SDMA AND STATE POLICY

01. SDMA

STATUS / CATEGORY FIREWALL -> Do not merge State Disaster Response Force with State Disaster Response Fund.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

SIMPLE SYSTEM EXAMPLE

Read SDMA and State policy as a sequence: identify SDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not merge State Disaster Response Force with State Disaster Response Fund. This keeps SDMA in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

EXAMINER CAUTION

- Do not merge State Disaster Response Force with State Disaster Response Fund.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Show how the State tier adapts national direction.

MINI RECAP

- **Mechanism chain:** SDMA

- **Qualified use:** Show how the State tier adapts national direction.

CLOSING RECALL FLOW - CORE - SDMA AND STATE POLICY

START / CONCEPT: CORE - SDMA and State policy

|
v

EXACT TERMS: SDMA · Mechanism chain · Qualified use · The State Disaster Management Authority · Chief Minister · Read SDMA

|
v

MECHANISM / ARGUMENT: Read SDMA and State policy as a sequence: identify SDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|
v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not merge State Disaster Response Force with State Disaster Response Fund.

|
v

UPSC TRAP / ANSWER-USE: Do not merge State Disaster Response Force with State Disaster Response Fund.

|
v

ANSWER-GRABBING FORMULATION: Mechanism chain: SDMA Qualified use: Show how the State tier adapts national direction.

SESSION 5 - CORE - SEC IMPLEMENTATION LAYER

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

Technical definition: Read SEC implementation layer as a sequence: identify SEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

MUST-WRITE KEYWORDS

- **SEC implementation layer**
- **Mechanism chain**
- **Qualified use**
- **The State Executive Committee**
- **Chief Secretary**
- **Read SEC**

How to use them: Frame the answer through SEC implementation layer; define Mechanism chain, connect Qualified use with The State Executive Committee to explain the mechanism, and use Chief Secretary for the decisive comparison or qualification.

VISUAL FIRST

SEC IMPLEMENTATION LAYER

01. SEC

STATUS / CATEGORY FIREWALL -> Do not treat an enabling provision as proof of universal implementation.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

SIMPLE SYSTEM EXAMPLE

Read SEC implementation layer as a sequence: identify SEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat an enabling provision as proof of universal implementation. This keeps SEC in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

EXAMINER CAUTION

- Do not treat an enabling provision as proof of universal implementation.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Locate implementation monitoring at the executive-committee layer.

MINI RECAP

- **Mechanism chain:** SEC
- **Qualified use:** Locate implementation monitoring at the executive-committee layer.

CLOSING RECALL FLOW - CORE - SEC IMPLEMENTATION LAYER

START / CONCEPT: CORE - SEC implementation layer

|

v

EXACT TERMS: SEC implementation layer · Mechanism chain · Qualified use · The State Executive Committee · Chief Secretary · Read SEC

|

v

MECHANISM / ARGUMENT: Read SEC implementation layer as a sequence: identify SEC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not treat an enabling provision as proof of universal implementation.

|

v

UPSC TRAP / ANSWER-USE: Do not treat an enabling provision as proof of universal implementation.

|

v

ANSWER-GRABBING FORMULATION: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

SESSION 6 - CORE - DDMA AND DISTRICT OPERATIONAL PLANNING

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.

Technical definition: Read DDMA and district operational planning as a sequence: identify DDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read DDMA and district operational planning as a sequence: identify DDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- DDMA
- district operational planning
- Mechanism chain
- Qualified use
- The District Disaster Management Authority
- District Collector

How to use them: Frame the answer through DDMA; define district operational planning, connect Mechanism chain with Qualified use to explain the mechanism, and use The District Disaster Management Authority for the decisive comparison or qualification.

VISUAL FIRST

DDMA AND DISTRICT OPERATIONAL PLANNING

01. DDMA

|

v

02. Local authorities

STATUS / CATEGORY FIREWALL -> Do not call NIDM an operational response force.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.

SIMPLE SYSTEM EXAMPLE

Read DDMA and district operational planning as a sequence: identify DDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not call NIDM an operational response force. This keeps DDMA and Local authorities in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.
- Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.

EXAMINER CAUTION

- Do not call NIDM an operational response force.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Test district staffing, plans, finance and local linkages.

MINI RECAP

- **Mechanism chain:** DDMA -> Local authorities
- **Qualified use:** Test district staffing, plans, finance and local linkages.

CLOSING RECALL FLOW - CORE - DDMA AND DISTRICT OPERATIONAL PLANNING

START / CONCEPT: CORE - DDMA and district operational planning
|
v
EXACT TERMS: DDMA · district operational planning · Mechanism chain · Qualified use · The District Disaster Management Authority · District Collector
|
v
MECHANISM / ARGUMENT: Mechanism chain: DDMA - Local authorities Qualified use: Test district staffing, plans, finance and local linkages.
|
v
CONSEQUENCE / CONTRAST: The decisive boundary is Do not call NIDM an operational response force.
|
v
UPSC TRAP / ANSWER-USE: Do not call NIDM an operational response force.
|
v
ANSWER-GRABBING FORMULATION: Read DDMA and district operational planning as a sequence: identify DDMA, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 7 - CORE - LOCAL AUTHORITIES AND SUBSIDIARITY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read Local authorities and subsidiarity as a sequence: identify NDRF force, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Local authorities and subsidiarity as a sequence: identify NDRF force, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- **Local authorities**
- **subsidiarity**
- **Mechanism chain**
- **Qualified use**
- **The National Disaster Response Force**
- **Act**

How to use them: Frame the answer through Local authorities; define subsidiarity, connect Mechanism chain with Qualified use to explain the mechanism, and use The National Disaster Response Force for the decisive comparison or qualification.

VISUAL FIRST

LOCAL AUTHORITIES AND SUBSIDIARITY

01. NDRF force

STATUS / CATEGORY FIREWALL -> Do not describe DDMA as merely advisory.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

SIMPLE SYSTEM EXAMPLE

Read Local authorities and subsidiarity as a sequence: identify NDRF force, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not describe DDMA as merely advisory. This keeps NDRF force in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

EXAMINER CAUTION

- Do not describe DDMA as merely advisory.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Name PRIs and ULBs rather than writing government generically.

MINI RECAP

- **Mechanism chain:** NDRF force
- **Qualified use:** Name PRIs and ULBs rather than writing government generically.

CLOSING RECALL FLOW - CORE - LOCAL AUTHORITIES AND SUBSIDIARITY

START / CONCEPT: CORE - Local authorities and subsidiarity

|

v

EXACT TERMS: Local authorities · subsidiarity · Mechanism chain · Qualified use · The National Disaster Response Force · Act

|

v

MECHANISM / ARGUMENT: Mechanism chain: NDRF force Qualified use: Name PRIs and ULBs rather than writing government generically.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not describe DDMA as merely advisory.

|

v

UPSC TRAP / ANSWER-USE: Do not describe DDMA as merely advisory.

|

v

ANSWER-GRABBING FORMULATION: Read Local authorities and subsidiarity as a sequence: identify NDRF force, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 8 - CORE - NDRF FORCE ARCHITECTURE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.

Technical definition: Read NDRF force architecture as a sequence: identify NDRF fund, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read NDRF force architecture as a sequence: identify NDRF fund, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- NDRF force architecture
- Mechanism chain
- Qualified use
- The National Disaster Response Fund
- Read NDRF
- NDRF

How to use them: Frame the answer through NDRF force architecture; define Mechanism chain, connect Qualified use with The National Disaster Response Fund to explain the mechanism, and use Read NDRF for the decisive comparison or qualification.

VISUAL FIRST

NDRF FORCE ARCHITECTURE

01. NDRF fund

STATUS / CATEGORY FIREWALL -> Do not infer district-fund constitution from section 48 alone.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.

SIMPLE SYSTEM EXAMPLE

Read NDRF force architecture as a sequence: identify NDRF fund, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not infer district-fund constitution from section 48 alone. This keeps NDRF fund in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.

EXAMINER CAUTION

- Do not infer district-fund constitution from section 48 alone.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Describe specialist response capacity without operational speculation.

MINI RECAP

- **Mechanism chain:** NDRF fund

- **Qualified use:** Describe specialist response capacity without operational speculation.

CLOSING RECALL FLOW - CORE - NDRF FORCE ARCHITECTURE

START / CONCEPT: CORE - NDRF force architecture

|
v

EXACT TERMS: NDRF force architecture • Mechanism chain • Qualified use • The National Disaster Response Fund • Read NDRF • NDRF

|
v

MECHANISM / ARGUMENT: Mechanism chain: NDRF fund Qualified use: Describe specialist response capacity without operational speculation.

|
v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not infer district-fund constitution from section 48 alone.

|
v

UPSC TRAP / ANSWER-USE: Do not infer district-fund constitution from section 48 alone.

|
v

ANSWER-GRABBING FORMULATION: Read NDRF force architecture as a sequence: identify NDRF fund, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 9 - CORE - NDRF FORCE VERSUS FUND

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read NDRF force versus fund as a sequence: identify NIDM, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Mechanism chain: NIDM Qualified use: Use force or fund only after expanding the acronym.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read NDRF force versus fund as a sequence: identify NIDM, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- **NDRF force versus fund**
- **Mechanism chain**
- **Qualified use**
- **NIDM**
- **Read NDRF**
- **The decisive boundary**

How to use them: Frame the answer through NDRF force versus fund; define Mechanism chain, connect Qualified use with NIDM to explain the mechanism, and use Read NDRF for the decisive comparison or qualification.

VISUAL FIRST

NDRF FORCE VERSUS FUND

01. NIDM

STATUS / CATEGORY FIREWALL -> Do not treat a national plan as proof of district capability.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.

SIMPLE SYSTEM EXAMPLE

Read NDRF force versus fund as a sequence: identify NIDM, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat a national plan as proof of district capability. This keeps NIDM in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.

EXAMINER CAUTION

- Do not treat a national plan as proof of district capability.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Use force or fund only after expanding the acronym.

MINI RECAP

- **Mechanism chain:** NIDM
- **Qualified use:** Use force or fund only after expanding the acronym.

CLOSING RECALL FLOW - CORE - NDRF FORCE VERSUS FUND

START / CONCEPT: CORE - NDRF force versus fund

|

v

EXACT TERMS: NDRF force versus fund • Mechanism chain • Qualified use • NIDM • Read NDRF • The decisive boundary

|

v

MECHANISM / ARGUMENT: Mechanism chain: NIDM Qualified use: Use force or fund only after expanding the acronym.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not treat a national plan as proof of district capability.

|

v

UPSC TRAP / ANSWER-USE: Do not treat a national plan as proof of district capability.

|

v

ANSWER-GRABBING FORMULATION: Read NDRF force versus fund as a sequence: identify NIDM, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 10 - CORE - NIDM CAPACITY-BUILDING MANDATE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read NIDM capacity-building mandate as a sequence: identify NCMC and HLC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Mechanism chain: NCMC and HLC Qualified use: Link training and research to capacity rather than field command.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read NIDM capacity-building mandate as a sequence: identify NCMC and HLC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- NIDM capacity-building mandate
- Mechanism chain
- Qualified use
- Read NIDM
- NCMC
- HLC

How to use them: Frame the answer through NIDM capacity-building mandate; define Mechanism chain, connect Qualified use with Read NIDM to explain the mechanism, and use NCMC for the decisive comparison or qualification.

VISUAL FIRST

NIDM CAPACITY-BUILDING MANDATE

01. NCMC and HLC

STATUS / CATEGORY FIREWALL -> Do not equate allocation or deployment with a verified outcome.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

SIMPLE SYSTEM EXAMPLE

Read NIDM capacity-building mandate as a sequence: identify NCMC and HLC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not equate allocation or deployment with a verified outcome. This keeps NCMC and HLC in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

EXAMINER CAUTION

- Do not equate allocation or deployment with a verified outcome.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Link training and research to capacity rather than field command.

MINI RECAP

- **Mechanism chain:** NCMC and HLC

- **Qualified use:** Link training and research to capacity rather than field command.

CLOSING RECALL FLOW - CORE - NIDM CAPACITY-BUILDING MANDATE

START / CONCEPT: CORE - NIDM capacity-building mandate

|
v

EXACT TERMS: NIDM capacity-building mandate · Mechanism chain · Qualified use · Read NIDM · NCMC · HLC

|
v

MECHANISM / ARGUMENT: Mechanism chain: NCMC and HLC Qualified use: Link training and research to capacity rather than field command.

|
v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not equate allocation or deployment with a verified outcome.

|
v

UPSC TRAP / ANSWER-USE: Do not equate allocation or deployment with a verified outcome.

|
v

ANSWER-GRABBING FORMULATION: Read NIDM capacity-building mandate as a sequence: identify NCMC and HLC, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 11 - CORE - NCMC AND HIGH LEVEL COMMITTEE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Read NCMC and High Level Committee as a sequence: identify Urban authority, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

Technical definition: Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read NCMC and High Level Committee as a sequence: identify Urban authority, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- **NCMC**
- **High Level Committee**
- **Mechanism chain**
- **Qualified use**
- **Section**
- **Urban Disaster Management Authority**

How to use them: Frame the answer through NCMC; define High Level Committee, connect Mechanism chain with Qualified use to explain the mechanism, and use Section for the decisive comparison or qualification.

VISUAL FIRST

NCMC AND HIGH LEVEL COMMITTEE

01. Urban authority

|
v

02. State response force

STATUS / CATEGORY FIREWALL -> Do not present the original 2005 Act as the complete current law.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

SIMPLE SYSTEM EXAMPLE

Read NCMC and High Level Committee as a sequence: identify Urban authority, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not present the original 2005 Act as the complete current law. This keeps Urban authority and State response force in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.
- Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

EXAMINER CAUTION

- Do not present the original 2005 Act as the complete current law.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Explain statutory status without displacing the ordinary cascade.

MINI RECAP

- **Mechanism chain:** Urban authority -> State response force
- **Qualified use:** Explain statutory status without displacing the ordinary cascade.

CLOSING RECALL FLOW - CORE - NCMC AND HIGH LEVEL COMMITTEE

START / CONCEPT: CORE - NCMC and High Level Committee

|
v

EXACT TERMS: NCMC • High Level Committee • Mechanism chain • Qualified use • Section • Urban Disaster Management Authority

|
v

MECHANISM / ARGUMENT: Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.

|
v

CONSEQUENCE / CONTRAST: Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

|
v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not present the original 2005 Act as the complete current law.

ANSWER-GRABBING FORMULATION: Read NCMC and High Level Committee as a sequence: identify Urban authority, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

SESSION 12 - CORE - URBAN AUTHORITY AND STATE RESPONSE FORCE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Mechanism chain: Plan responsibility Qualified use: State that may constitute is enabling, not automatic.

Technical definition: Read Urban authority and State response force as a sequence: identify Plan responsibility, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Urban authority and State response force as a sequence: identify Plan responsibility, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- Urban authority
- Mechanism chain
- Qualified use
- Read Urban
- Plan
- The decisive boundary

How to use them: Frame the answer through Urban authority; define Mechanism chain, connect Qualified use with Read Urban to explain the mechanism, and use Plan for the decisive comparison or qualification.

VISUAL FIRST

URBAN AUTHORITY AND STATE RESPONSE FORCE

01. Plan responsibility

STATUS / CATEGORY FIREWALL -> Do not confuse NDMA policy functions with NEC coordination functions.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.

SIMPLE SYSTEM EXAMPLE

Read Urban authority and State response force as a sequence: identify Plan responsibility, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not confuse NDMA policy functions with NEC coordination functions. This keeps Plan responsibility in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.

EXAMINER CAUTION

- Do not confuse NDMA policy functions with NEC coordination functions.

SESSION 14 - CORE SYNTHESIS - RESPONSE AND MITIGATION FUNDS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

Technical definition: The decisive boundary is Do not merge State Disaster Response Force with State Disaster Response Fund.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Response
- mitigation funds
- Mechanism chain
- Qualified use
- Sections

How to use them: Frame the answer through CORE SYNTHESIS; define Response, connect mitigation funds with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

RESPONSE AND MITIGATION FUNDS

01. Fund architecture

|
v

02. Finance coordination

STATUS / CATEGORY FIREWALL -> Do not merge State Disaster Response Force with State Disaster Response Fund.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.

SIMPLE SYSTEM EXAMPLE

Read Response and mitigation funds as a sequence: identify Fund architecture, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not merge State Disaster Response Force with State Disaster Response Fund. This keeps Fund architecture and Finance coordination in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.
- Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.

EXAMINER CAUTION

- Do not merge State Disaster Response Force with State Disaster Response Fund.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Separate response finance from mitigation finance.

MINI RECAP

- **Mechanism chain:** Fund architecture -> Finance coordination
- **Qualified use:** Separate response finance from mitigation finance.

CLOSING RECALL FLOW - CORE SYNTHESIS - RESPONSE AND MITIGATION FUNDS

START / CONCEPT: CORE SYNTHESIS - Response and mitigation funds

|

v

EXACT TERMS: CORE SYNTHESIS • Response • mitigation funds • Mechanism chain • Qualified use •
Sections

|

v

MECHANISM / ARGUMENT: Mechanism chain: Fund architecture - Finance coordination Qualified use:
Separate response finance from mitigation finance.

|

v

CONSEQUENCE / CONTRAST: The decisive boundary is Do not merge State Disaster Response Force with
State Disaster Response Fund.

|

v

UPSC TRAP / ANSWER-USE: Do not merge State Disaster Response Force with State Disaster Response
Fund.

|

v

ANSWER-GRABBING FORMULATION: Sections 46, 47 and 48 contemplate national, state and district
response and mitigation funds; statutory provision does not establish that every district fund is
operational.

SESSION 15 - CORE SYNTHESIS - FEDERAL COORDINATION AND MANDATE-OUTCOME PROOF

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The decisive boundary is Do not treat an enabling provision as proof of universal implementation.

Technical definition: Read Federal coordination and mandate-outcome proof as a sequence: identify Federal cascade, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Read Federal coordination and mandate-outcome proof as a sequence: identify Federal cascade, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

MUST-WRITE KEYWORDS

- **CORE SYNTHESIS**
- **Federal coordination**
- **mandate-outcome proof**
- **Mechanism chain**
- **Qualified use**
- **Subject**

How to use them: Frame the answer through CORE SYNTHESIS; define Federal coordination, connect mandate-outcome proof with Mechanism chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

FEDERAL COORDINATION AND MANDATE-OUTCOME PROOF

01. Federal cascade

|
v

02. Mandate-outcome firewall

STATUS / CATEGORY FIREWALL -> Do not treat an enabling provision as proof of universal implementation.

The rail fixes the institutional sequence and claim boundary before explanation.

CORE EXPLANATION

The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

SIMPLE SYSTEM EXAMPLE

Read Federal coordination and mandate-outcome proof as a sequence: identify Federal cascade, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

TECHNICAL DISTINCTION

The decisive boundary is Do not treat an enabling provision as proof of universal implementation. This keeps Federal cascade and Mandate-outcome firewall in the correct risk category, institutional mandate and evidence status.

NAMED EVIDENCE AND MECHANISM

- The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.
- A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

EXAMINER CAUTION

- Do not treat an enabling provision as proof of universal implementation.

EXAM LINK

- **Prelims:** Keep hazard, forecast, warning, institution, law, plan, force, fund, scheme and outcome in their exact category.
- **Mains:** Conclude with the weakest-tier and evidence-rung tests.

MINI RECAP

- **Mechanism chain:** Federal cascade -> Mandate-outcome firewall
- **Qualified use:** Conclude with the weakest-tier and evidence-rung tests.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Disaster Management | **Tier:** Must-Do (foundation) | **GS Paper:** GS-III. **Core area:** Disaster Management Act, 2005; NDMA, SDMA, DDMA, NEC, NIDM, NDRF; the National Disaster Management Plan; disaster-finance architecture under the Act. **Grounded in:** *VisionIAS Value Added Material Disaster Management*, PDF pp. 11-16 (DM Act architecture, institutions, finance), p. 18 (NDMP limitations); 00_Master-Framework.md Section 3. **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. *Companion:* advanced/02_Indian-Legal-and-Institutional-Architecture.md.

1. Visual foundation

DISASTER MANAGEMENT ACT, 2005

Core proposition: FACT: VisionIAS records that disaster management in India "evolved from an activity-based reactive setup to a proactive institutionalized structure," beginning with a 1990s "Disaster Management Cell" under the Ministry of Agriculture (during the UN's International Decade for Natural Disaster Reduction), and culminating in the **Disaster Management Act, 2005**, which created the three-tier NDMA-SDMA-DDMA structure (PDF p. 11).

2. Essential definitions

Institution	Exam-ready mandate
FACT: NDMA	Apex body under the DM Act, 2005; headed by the Prime Minister; lays down policies, plans and guidelines; approves the National DM Plan and Central Ministry plans; exercises "general superintendence, direction and control" of NDRF (PDF p. 13).
FACT: National Executive Committee (NEC)	Constituted under the DM Act, 2005; chaired by the Union Home Secretary; the coordinating/monitoring body, with Secretary-level members from key ministries; may direct Ministries/States on measures for a specific disaster (PDF p. 13).
FACT: NIDM	Nodal agency for human-resource development, capacity building, training, research, documentation and policy advocacy; works within NDMA's policy framework; supports States via Disaster Management Centres (PDF p. 13).
FACT: NDRF	Specialist response force; general superintendence vested in NDMA; command/supervision with the Director General, NDRF; document-period strength recorded as "12 Battalions... each Battalion consisting of 1149 personnel" drawn from ITBP, BSF, CRPF, CISF (PDF p. 13). CURRENT: MHA reported 16 operational battalions with a sanctioned strength of 18,581 (Lok Sabha reply, 22 July 2025), the raising of four additional battalions (12 -> 16) having been approved earlier - cite 16, not 12, as the current figure.
FACT: SDMA / SEC	SDMA chaired by the Chief Minister, lays down State DM policy and approves the State DM Plan; SEC chaired by the Chief Secretary, coordinates and monitors DM activities in the State (PDF p. 14).
FACT: DDMA	Headed by the District Collector/Magistrate with the elected local-authority representative as Co-Chairperson; prepares the District DM Plan and ensures NDMA/SDMA guidelines are followed at district level (PDF p. 14).
FACT: NPDRR	Multi-stakeholder body chaired by the Union Home Minister; reviews DRR policy implementation progress and advises on Centre-State coordination (PDF p. 12).
CURRENT: NCMC (s. 8A) / HLC (s. 8B)	Given statutory status by the 2025 Amendment Act. The National Crisis Management Committee , chaired by the Cabinet Secretary , is "the nodal body to deal with the major disasters which have serious or national ramifications." The High Level Committee provides financial assistance to States under s. 46 and approves mitigation assistance under s. 47. Both existed administratively before 2025; the Act converts practice into statute.
CURRENT: Urban Disaster Management Authority (s. 41A)	A State Government may , by Gazette notification, constitute a UDMA for its State capital and every city having a Municipal Corporation, except the NCT of Delhi and the UT of Chandigarh . Composition: Municipal Commissioner - Chairperson (ex officio); District Collector - Vice-Chairperson (ex officio) , plus State-determined members. It prepares the Urban Plan , approved by the SDMA, and coordinates its implementation.

Institution	Exam-ready mandate
CURRENT: State Disaster Response Force (s. 44A)	A State Government may , by Gazette notification, constitute a specialist State Disaster Response Force and prescribe its functions and terms of service - ANALYSIS: note this is the <i>force</i> , not the SDRF <i>fund</i> (topic 16); the identical acronym is a standing examiner trap.

3. Risk/problem mechanism

1. **Legal basis:** FACT: though the Constitution is silent on "disaster," the DM Act's legal basis draws on Concurrent List Entry 23 ("Social security and social insurance") and Entry 29 ("Prevention of the extension from one State to another of infectious or contagious diseases... affecting men, animals or plants"), as used during the COVID-19 lockdown (PDF p. 52).
2. **Three-tier cascade:** the Act's structure ensures a policy/guideline flow from NDMA -> SDMA -> DDMA -> local authorities, with the DDMA as the operational nodal point closest to the affected population (PDF pp. 12-15).
3. **Response force activation:** NDRF's "proactive availability" and "pre-positioning" ahead of threatening disaster situations is highlighted as having "immensely helped minimise damage" (PDF p. 13).
4. **Special crisis mechanisms:** FACT: the Cabinet Committee on Security (CCS) is engaged if a disaster has serious security implications; the National Crisis Management Committee (NCMC), chaired by the Cabinet Secretary, is the nodal body for major disasters having serious or national ramifications and coordinates preparedness and response (PDF p. 13). CURRENT: The Disaster Management (Amendment) Act, 2025's amended definition of "disaster" explicitly excludes law-and-order situations from the DM Act's scope, confirming NCMC's role is disaster-coordination, not a security/law-and-order body.

4. Disaster-management cycle application

- FACT: **National Disaster Management Plan, 2016** (India's first edition) aligns with Sendai, the SDGs (2015-2030) and the Paris Agreement (COP-21); it organises action into five Thematic Areas across the DM cycle: Understanding Risk, Inter-Agency Coordination, Investing in DRR (structural), Investing in DRR (non-structural), and Capacity Development (PDF p. 14). CURRENT: The **revised NDMP, 2019** is the latest published National Disaster Management Plan, superseding the 2016 edition; any claim about the Plan's current content/structure should cite the 2019 revision, not the 2016 edition, as the operative plan.
- FACT: The Plan's Response section identifies **eighteen broad activities** arranged in a role-responsibility matrix down to the Panchayat/ULB level, designed to be implemented "in a scalable manner in all phases of disaster management" (PDF p. 14).

5. Institutions and policy tools

- FACT: ****National Disaster Response Fund (NDRF-the-fund, distinct from the NDRF-the-force)****, managed by the Centre for emergency response, relief and rehabilitation expenses beyond State Disaster Response Fund (SDRF) capacity; the National Calamity Contingency Fund was merged into it (PDF p. 15).
- CURRENT: **The DM Act's four statutory funds** are the ****National Disaster Response Fund (s. 46), the National Disaster Mitigation Fund (s. 47), and - under s. 48 - the State Disaster Response Fund, State Disaster Mitigation Fund, District Disaster Response Fund and District Disaster Mitigation Fund. ANALYSIS: s. 48 was commenced on 1 August 2007 but s. 47(1) only on 5 February 2021, which is why mitigation funding is a much later addition than relief funding. The Sixteenth Finance Commission reported (1 February 2026) that Union- and State-level funds had been constituted, district-level funds being the exception****. Fund corpora and shares are developed in topic 16.
- FACT: ****Standing Committee on Finance report (2019, Chair: Dr. M. Veerappa Moily)**** on "Central Assistance for Disaster Management and Relief" recommended: enhanced SDRF/NDRF assistance scales; a separate Disaster Mitigation Fund; earmarking 10% of centrally sponsored scheme

allocations for permanent restoration; and a 15% annual SDRF corpus increase for 2020-25 (PDF p. 15) - ANALYSIS: document-period recommendations, now overtaken by the Fifteenth (2021-26) and Sixteenth (2026-31) Finance Commission disaster awards; cite those, not the 2019 report, for current fund levels (topic 16).

- FACT: **National Policy on Disaster Management (NPDM), 2009** - vision "to build a safe and disaster resilient India... through a culture of prevention, mitigation, preparedness and response" (PDF p. 15).

6. India applications and examples

- FACT: VisionIAS records the NDMP 2016's own acknowledged shortcomings: too generic in activity identification; no precise time frame; no projection of fund requirements or mobilisation; and - unlike Sendai or the SDGs - no goals or targets of its own (PDF p. 18). CURRENT: The **revised NDMP, 2019** is the latest published edition; verify whether these 2016-edition shortcomings have been addressed in the 2019 revision before citing them as the current state of India's plan.

- ANALYSIS: **PYQ mapping**: no GS-III Mains question in the audited 2024-2025 papers directly tests the NDMA/SDMA/DDMA institutional map by name; this topic instead supplies the institutional foundation every other topic's "measures taken" section cites (e.g. 2024 Q17's resilience framework, 2024 Q18's urban-flood policy architecture).

7. Must-Know Facts for Prelims

- FACT: The DM Act, 2005 created a three-tier structure: NDMA, SDMA, DDMA.

- FACT: NDMA is headed by the Prime Minister; SDMA by the Chief Minister; DDMA by the District Collector/Magistrate with an elected local-body representative as Co-Chairperson.

- FACT: NEC is chaired by the Union Home Secretary; SEC by the State Chief Secretary.

- FACT: NIDM is the nodal capacity-building/training/research agency, working within NDMA's policy framework.

- FACT: NDMP 2016 was India's first National Disaster Management Plan, aligned with Sendai, the SDGs and the Paris Agreement; the **revised NDMP, 2019** is the latest published edition.

- CURRENT: The DM (Amendment) Act, 2025 inserted **s. 8A (NCMC, Cabinet Secretary-chaired), s. 8B (High Level Committee), s. 41A (Urban Disaster Management Authority) and s. 44A (State Disaster Response Force) - **there is** no s. 9B**.

- CURRENT: A UDMA under s. 41A is chaired by the **Municipal Commissioner** with the **District Collector** as Vice-Chairperson, and is barred for the **NCT of Delhi and UT of Chandigarh**.

- CURRENT: NDRF's current operational strength is **16 battalions** (MHA, 22 July 2025), not the document-period 12.

8. WRONG: Traps and stale-claim cautions

- WRONG: NDRF's document-period strength ("12 Battalions," 1149 personnel each) is the current strength. -> This is VisionIAS's 2024-update figure (PDF p. 13); MHA reported **16 operational battalions** and a sanctioned strength of 18,581 on 22 July 2025 - cite 16.

- WRONG: The DM Act contains a "Section 9B." -> It does not. The provisions inserted by the 2025 Amendment Act are **ss. 8A, 8B, 41A, 44A, 60A and 76A**, plus the substituted ss. 5 and 43 and the new definition s. 2(da); the database duties sit in **ss. 6(2)(v) and 18(2)(p)**.

- WRONG: Every State capital and Municipal-Corporation city now has an Urban Disaster Management Authority because s. 41A is in force. -> s. 41A is an **enabling** provision ("the State Government may"); a UDMA exists only where a dated State notification or official MHA parliamentary reply identifies one (MHA cited Karnataka's BBMP UDMA on 11 February 2026). Delhi and Chandigarh are expressly excluded.

- WRONG: The "State Disaster Response Force" in s. 44A is the same thing as

the SDRF fund. -> s. 44A creates an enabling power for a specialist **force**; the SDRF *fund* under s. 48 finances immediate relief - two different instruments sharing an acronym (topic 16).

- WRONG: NDMP 2016 is still "the" current National Disaster Management Plan.

-> The **revised NDMP, 2019** is the latest published National Disaster Management Plan; NDMP 2016 was only the first edition.

- WRONG: The DM Act, 2005 is the only, unamended, current legal framework.

-> The **Disaster Management (Amendment) Act, 2025 (Act 10 of 2025)** amends it (see Section 9); do not present the 2005 Act's original text as necessarily reflecting today's statutory position without checking amendment status.

- WRONG: The Constitution explicitly lists "disaster management" as a

subject. -> The Constitution is silent on "disaster"; the Act's legal basis draws on Concurrent List Entries 23 and 29 (PDF p. 52).

9. CURRENT: Current official anchor

- CURRENT: **Disaster Management (Amendment) Act, 2025 (Act 10 of 2025)** - the

Act received assent and was published in the Gazette of India on **29 March 2025**, and was brought into force **with effect from 9 April 2025** (India Code consolidated text of the DM Act, 2005, as on 15 May 2026; MHA Lok Sabha reply, 22 July 2025). The newly inserted provisions that are operative law are **s. 8A** (National Crisis Management Committee), **s. 8B** (High Level Committee), **s. 41A** (Urban Disaster Management Authority), **s. 44A** (State Disaster Response Force), **s. 60A** (power to order hazard-related action, with a penalty up to Rs 10,000) and **s. 76A** (NDMA's regulation-making power). WRONG: There is **no Section 9B** in the DM Act - do not cite one.

- CURRENT: **What else the 2025 Amendment changed:** a new definition of

"**disaster database**" (**s. 2(da)**) covering disaster assessment, fund allocation and expenditure, preparedness/mitigation plans and a risk register; a duty on NDMA to **create** the national disaster database (**s. 6(2)(v)**) and on SDMA to maintain State databases feeding into it (**s. 18(2)(p)**); a shift of **plan preparation** to NDMA/SDMA, with the National and State Plans to be reviewed every three years and updated at least every five years (**ss. 11, 23**), the NEC and SEC retaining implementation/monitoring roles (**ss. 10, 22**); hazard-wise **nodal departments** (**ss. 35, 38**); and staffing power for NDMA (**substituted s. 5**). ANALYSIS: NIDM was **not** abolished - s. 42 survives and s. 43 was substituted to allow NIDM to recruit experts.

- ANALYSIS: **Statutory mandate is not operational fact.** Sections 41A and 44A

are **enabling** ("the State Government *may*... constitute"). MHA informed Parliament on **11 February 2026** that Karnataka had constituted a UDMA for the Bruhat Bengaluru Mahanagara Palike; it did not report a completed national roll-out. A named State's UDMA, SDRF force, or the disaster database's actual operational status, must each be verified against its own dated State notification or official MHA parliamentary reply - the Act's *commencement*, by contrast, is settled and must not be described as pending.

11. Mains framework

1. **Name the correct tier** (NDMA/SDMA/DDMA/local authority) for the specific action being discussed - never say "the government" alone.

2. **Cite the specific institution's precise mandate** (Section 2), distinguishing NDMA (policy) from NEC (coordination) from NDRF (operational response).

3. **Route financial questions** through the correct fund (SDRF vs. NDRF-the-fund) and note the 2019 Standing Committee's still-relevant critique (Section 5) as document-period evidence of a known funding gap.

4. **Acknowledge the NDMP 2016's self-stated limitations** (Section 6), and note that the **revised NDMP, 2019** is the latest published plan, when asked to evaluate India's planning framework.

5. **Flag the 2025 Amendment Act** (Section 9) as the current legal anchor - assented and gazetted 29 March 2025, in force from 9 April 2025 (ss. 8A, 8B, 41A, 44A) - with the caution that any *State/Central implementation action* under it (e.g. a constituted Urban DM Authority) needs its own

notification check.

12. Study links

- FACT: Advanced companion:

advanced/02_Indian-Legal-and-Institutional-Architecture.md.

- FACT: 00_Master-Framework.md Section 3 - India's operating architecture diagram reused by every hazard-specific topic.

- ANALYSIS: **Downstream topics in this folder:** Topic 14 develops the Urban Disaster Management Authority provision; topic 16 develops SDRF/NDRF finance and risk transfer; topic 17 develops NDRF's operational relief role; topic 18 develops NPDRR and international-cooperation governance.

13. Core-only answer architecture - law, tiers and implementation

Core firewall: this is the complete Core route for the 2020 proactive-versus-reactive DM question and the institutional limb of any hazard answer. Do not send a candidate to advanced/02 for the 2025-amendment, funding or local-capacity argument.

13.1 Claim-to-evidence bank

Claim	Named evidence/example	Why it supports the claim	Limitation / qualification
The DM Act institutionalised a shift from relief administration to a whole-cycle framework.	DM Act 2005 created NDMA-SDMA-DDMA; NPDM 2009 and the revised NDMP 2019 provide policy/plan anchors.	It supplies a before/after institutional mechanism instead of a vague "proactive approach" assertion.	A statutory cascade does not prove district plans, staff or drills are effective.
Responsibilities are vertically differentiated.	NDMA sets policy/guidelines and approves plans; NEC coordinates; SDMA/SEC adapt and monitor; DDMA plans/coordinates locally; PRIs/ULBs enable last-mile action.	It turns "government should act" into accountable assignments.	Do not treat NDMA as the field implementer or DDMA as a substitute for local community capacity.
The 2025 amendment updated law but not every operational outcome.	Act 10 of 2025 was gazetted 29 March and commenced 9 April 2025; ss. 8A/8B give NCMC/HLC statutory footing, while ss. 41A/44A say a State may constitute a UDMA/State force.	It distinguishes statute/commencement from notification/force/database rollout.	Name a UDMA or State force only with a dated State notification or official MHA parliamentary reply; Karnataka's BBMP example is not a national roll-out.
Response capacity and finance are distinct institutional questions.	NDRF is a specialised response force (MHA: 16 battalions, sanctioned 18,581, 22 July 2025); s. 46 NDRF-the-fund supplements SDRF, while ss. 47-48 create mitigation/State funds.	It prevents the NDRF force/fund and relief/mitigation conflation that cost marks.	Battalion strength is an input, not a resilience outcome; fund use needs its own status source.

13.2 Executable spines

- **10 marks - who does what:** draw the Union -> State -> district/local

cascade; give one precise mandate for NDMA, NEC, SDMA/SEC and DDMA; add one last-mile actor; close with the difference between policy, coordination and execution.

- **15 marks - 2020 proactive approach:** thesis: India has moved beyond a relief-only model because law, plans, risk reduction, warning, response and recovery are institutionalised. Evidence sequence: DM Act tiers -> NDMP 2019/Sendai alignment -> NDRF pre-positioning and community capacity -> mitigation funds/BBB. Counterweight: a plan, enabling provision or force strength is not evidence of district execution. Conclude that proactivity is credible only when local plans, finance and drills convert the framework into outcomes.

- **20 marks - evaluate governance:** organise by law/mandate, planning,

finance, response capacity, urban/local implementation and accountability data. Use the 2025 amendment as current law, flag may constitute and database rollout as implementation questions, and end with a funded, time-bound, district-testable verdict.

13.3 Direct-PYQ route rule

The 2020 GS-III proactive-management route and the disaster-law limb of the 2020 GS-II cross-cutting route now terminate in this Core owner. Older advanced/02 ledger pointers are optional-only.

CLOSING RECALL FLOW - CORE SYNTHESIS - FEDERAL COORDINATION AND MANDATE-OUTCOME PROOF

START / CONCEPT: CORE SYNTHESIS - Federal coordination and mandate-outcome proof

|

v

EXACT TERMS: CORE SYNTHESIS • Federal coordination • mandate-outcome proof • Mechanism chain • Qualified use • Subject

|

v

MECHANISM / ARGUMENT: Mechanism chain: Federal cascade - Mandate-outcome firewall Qualified use: Conclude with the weakest-tier and evidence-rung tests.

|

v

CONSEQUENCE / CONTRAST: The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.

|

v

UPSC TRAP / ANSWER-USE: The decisive boundary is Do not treat an enabling provision as proof of universal implementation.

|

v

ANSWER-GRABBING FORMULATION: Read Federal coordination and mandate-outcome proof as a sequence: identify Federal cascade, follow the named mechanism to its institutional response, and stop at the last verified status rather than assuming the next stage.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies DM Act foundation?

A. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. B. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. C. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. D. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

Answer: A. Explanation: The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q2. Which option preserves the risk or institutional boundary of DM Act foundation?

A. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. B. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. C. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. D. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

Answer: B. Explanation: The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q3. Which statement uses DM Act foundation without changing its hazard, mandate or status?

A. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. B. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. C. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. D. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.

Answer: C. Explanation: The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q4. Which option avoids the standard UPSC close-option trap about DM Act foundation?

A. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. B. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. C. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. D. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.

Answer: D. Explanation: The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q5. Which statement correctly identifies Current amendment status?

A. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. B. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. C. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. D. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

Answer: A. Explanation: The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q6. Which option preserves the risk or institutional boundary of Current amendment status?

A. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. B. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. C. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. D. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

Answer: B. Explanation: The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q7. Which statement uses Current amendment status without changing its hazard, mandate or status?

A. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. B. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. C. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. D. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

Answer: C. Explanation: The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q8. Which option avoids the standard UPSC close-option trap about Current amendment status?

A. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. B. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. C. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. D. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

Answer: D. Explanation: The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q9. Which statement correctly identifies NDMA?

A. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. B. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. C. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. D. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

Answer: A. Explanation: NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q10. Which option preserves the risk or institutional boundary of NDMA?

A. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. B. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. C. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. D. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

Answer: B. Explanation: NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q11. Which statement uses NDMA without changing its hazard, mandate or status?

A. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. B. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. C. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. D. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.

Answer: C. Explanation: NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q12. Which option avoids the standard UPSC close-option trap about NDMA?

A. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. B. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. C. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. D. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

Answer: D. Explanation: NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q13. Which statement correctly identifies NEC?

A. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. B. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. C. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. D. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.

Answer: A. Explanation: The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q14. Which option preserves the risk or institutional boundary of NEC?

A. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. B. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. C. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. D. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.

Answer: B. Explanation: The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q15. Which statement uses NEC without changing its hazard, mandate or status?

A. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. B. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. C. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. D. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

Answer: C. Explanation: The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q16. Which option avoids the standard UPSC close-option trap about NEC?

A. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. B. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.

Answer: D. Explanation: The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q17. Which statement correctly identifies SDMA?

A. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. B. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. C. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. D. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

Answer: A. Explanation: The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q18. Which option preserves the risk or institutional boundary of SDMA?

A. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. B. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. C. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. D. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

Answer: B. Explanation: The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q19. Which statement uses SDMA without changing its hazard, mandate or status?

A. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. B. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. C. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. D. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

Answer: C. Explanation: The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q20. Which option avoids the standard UPSC close-option trap about SDMA?

A. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. B. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.

Answer: D. Explanation: The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q21. Which statement correctly identifies SEC?

A. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. B. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. C. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. D. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.

Answer: A. Explanation: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q22. Which option preserves the risk or institutional boundary of SEC?

A. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. B. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

Answer: B. Explanation: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q23. Which statement uses SEC without changing its hazard, mandate or status?

A. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. B. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. C. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. D. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.

Answer: C. Explanation: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q24. Which option avoids the standard UPSC close-option trap about SEC?

A. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. B. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.

Answer: D. Explanation: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q25. Which statement correctly identifies DDMA?

A. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. B. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.

Answer: A. Explanation: The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q26. Which option preserves the risk or institutional boundary of DDMA?

A. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. B. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. C. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. D. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.

Answer: B. Explanation: The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q27. Which statement uses DDMA without changing its hazard, mandate or status?

A. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. B. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. C. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. D. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.

Answer: C. Explanation: The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q28. Which option avoids the standard UPSC close-option trap about DDMA?

A. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. B. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. C. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. D. The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.

Answer: D. Explanation: The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q29. Which statement correctly identifies Local authorities?

A. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. B. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. C. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. D. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.

Answer: A. Explanation: Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q30. Which option preserves the risk or institutional boundary of Local authorities?

A. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. B. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. C. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. D. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

Answer: B. Explanation: Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q31. Which statement uses Local authorities without changing its hazard, mandate or status?

A. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. B. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. C. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. D. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

Answer: C. Explanation: Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q32. Which option avoids the standard UPSC close-option trap about Local authorities?

A. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. B. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. C. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. D. Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.

Answer: D. Explanation: Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q33. Which statement correctly identifies NDRF force?

A. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. B. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.

Answer: A. Explanation: The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q34. Which option preserves the risk or institutional boundary of NDRF force?

A. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. B. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. C. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. D. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.

Answer: B. Explanation: The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q35. Which statement uses NDRF force without changing its hazard, mandate or status?

A. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. B. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. C. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. D. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

Answer: C. Explanation: The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q36. Which option avoids the standard UPSC close-option trap about NDRF force?

A. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. B. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. C. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. D. The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.

Answer: D. Explanation: The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q37. Which statement correctly identifies NDRF fund?

A. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. B. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. C. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. D. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

Answer: A. Explanation: The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q38. Which option preserves the risk or institutional boundary of NDRF fund?

A. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. B. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. C. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. D. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.

Answer: B. Explanation: The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q39. Which statement uses NDRF fund without changing its hazard, mandate or status?

A. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. B. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. C. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. D. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

Answer: C. Explanation: The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q40. Which option avoids the standard UPSC close-option trap about NDRF fund?

A. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. B. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. C. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. D. The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.

Answer: D. Explanation: The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q41. Which statement correctly identifies NIDM?

A. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. B. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. C. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. D. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

Answer: A. Explanation: NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q42. Which option preserves the risk or institutional boundary of NIDM?

A. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. B. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. C. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. D. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.

Answer: B. Explanation: NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q43. Which statement uses NIDM without changing its hazard, mandate or status?

A. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. B. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. C. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. D. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

Answer: C. Explanation: NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q44. Which option avoids the standard UPSC close-option trap about NIDM?

A. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. B. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. C. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. D. NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.

Answer: D. Explanation: NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q45. Which statement correctly identifies NCMC and HLC?

A. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. B. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. C. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. D. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

Answer: A. Explanation: Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q46. Which option preserves the risk or institutional boundary of NCMC and HLC?

A. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. B. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. C. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. D. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.

Answer: B. Explanation: Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q47. Which statement uses NCMC and HLC without changing its hazard, mandate or status?

A. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. B. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. C. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. D. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition.

Answer: C. Explanation: Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q48. Which option avoids the standard UPSC close-option trap about NCMC and HLC?

A. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. B. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. C. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. D. Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.

Answer: D. Explanation: Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q49. Which statement correctly identifies Urban authority?

A. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. B. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. C. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. D. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.

Answer: A. Explanation: Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q50. Which option preserves the risk or institutional boundary of Urban authority?

A. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. B. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. C. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. D. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

Answer: B. Explanation: Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q51. Which statement uses Urban authority without changing its hazard, mandate or status?

A. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. B. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. C. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. D. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

Answer: C. Explanation: Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q52. Which option avoids the standard UPSC close-option trap about Urban authority?

A. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. B. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. C. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. D. Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.

Answer: D. Explanation: Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q53. Which statement correctly identifies State response force?

A. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. B. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. C. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. D. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition.

Answer: A. Explanation: Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q54. Which option preserves the risk or institutional boundary of State response force?

A. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. B. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. C. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. D. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.

Answer: B. Explanation: Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q55. Which statement uses State response force without changing its hazard, mandate or status?

A. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. B. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. C. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. D. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

Answer: C. Explanation: Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q56. Which option avoids the standard UPSC close-option trap about State response force?

A. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. B. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. C. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. D. Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.

Answer: D. Explanation: Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q57. Which statement correctly identifies Plan responsibility?

A. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. B. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. C. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. D. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.

Answer: A. Explanation: The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q58. Which option preserves the risk or institutional boundary of Plan responsibility?

A. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. B. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. C. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. D. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.

Answer: B. Explanation: The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q59. Which statement uses Plan responsibility without changing its hazard, mandate or status?

A. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. B. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. C. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. D. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Answer: C. Explanation: The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q60. Which option avoids the standard UPSC close-option trap about Plan responsibility?

A. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. B. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. C. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. D. The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.

Answer: D. Explanation: The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q61. Which statement correctly identifies Plan hierarchy?

A. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. B. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. C. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. D. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.

Answer: A. Explanation: The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q62. Which option preserves the risk or institutional boundary of Plan hierarchy?

A. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. B. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. C. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. D. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.

Answer: B. Explanation: The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q63. Which statement uses Plan hierarchy without changing its hazard, mandate or status?

A. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. B. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. C. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. D. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.

Answer: C. Explanation: The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q64. Which option avoids the standard UPSC close-option trap about Plan hierarchy?

A. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. B. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. C. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. D. The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition.

Answer: D. Explanation: The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q65. Which statement correctly identifies Fund architecture?

A. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. B. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. C. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. D. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Answer: A. Explanation: Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q66. Which option preserves the risk or institutional boundary of Fund architecture?

A. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. B. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. C. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. D. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.

Answer: B. Explanation: Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q67. Which statement uses Fund architecture without changing its hazard, mandate or status?

A. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. B. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. C. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. D. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.

Answer: C. Explanation: Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q68. Which option avoids the standard UPSC close-option trap about Fund architecture?

A. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. B. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. C. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. D. Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

Answer: D. Explanation: Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q69. Which statement correctly identifies Finance coordination?

A. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. B. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. C. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. D. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.

Answer: A. Explanation: Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q70. Which option preserves the risk or institutional boundary of Finance coordination?

A. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. B. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. C. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. D. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.

Answer: B. Explanation: Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q71. Which statement uses Finance coordination without changing its hazard, mandate or status?

A. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. B. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. C. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. D. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

Answer: C. Explanation: Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q72. Which option avoids the standard UPSC close-option trap about Finance coordination?

A. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. B. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. C. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. D. Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.

Answer: D. Explanation: Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q73. Which statement correctly identifies Federal cascade?

A. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. B. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. C. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. D. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

Answer: A. Explanation: The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q74. Which option preserves the risk or institutional boundary of Federal cascade?

A. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. B. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. C. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. D. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

Answer: B. Explanation: The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q75. Which statement uses Federal cascade without changing its hazard, mandate or status?

A. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. B. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. C. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. D. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

Answer: C. Explanation: The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q76. Which option avoids the standard UPSC close-option trap about Federal cascade?

A. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. B. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. C. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. D. The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.

Answer: D. Explanation: The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q77. Which statement correctly identifies Mandate-outcome firewall?

A. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. B. The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. C. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. D. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.

Answer: A. Explanation: A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q78. Which option preserves the risk or institutional boundary of Mandate-outcome firewall?

A. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. B. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. C. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. D. The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.

Answer: B. Explanation: A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q79. Which statement uses Mandate-outcome firewall without changing its hazard, mandate or status?

A. NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. B. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. C. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. D. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.

Answer: C. Explanation: A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

Q80. Which option avoids the standard UPSC close-option trap about Mandate-outcome firewall?

A. The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. B. The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. C. The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. D. A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Answer: D. Explanation: A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. The other options change the hazard or risk category, institutional owner, legal instrument, warning stage, evidence rung or implementation status.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The 2020 GS-III card is directly routed. The 2020 GS-II card is explicitly cross-cutting. The 2024 urban-flood card is an institutional application and does not displace Topic 08 ownership.

PYQ DEMAND CARD 1 - 2020 GS-III

Demand: Discuss how the Government's proactive disaster-management approach replaced the earlier reactive strategy.

Status: Verified direct routing: Discuss · 15 marks · 250 words.

Model solution: DM Act foundation: The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. **NDMA:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **NEC:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **SDMA:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **SEC:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **NIDM:** NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. **Plan hierarchy:** The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. **Federal cascade:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

PYQ DEMAND CARD 2 - 2020 GS-II

Demand: Elucidate centralising tendencies through disaster-management legislation and other contemporary legislation.

Status: Verified cross-cutting routing: Elucidate · 15 marks · 250 words; this card addresses only the disaster-law and federal-balance limb.

Model solution: DM Act foundation: The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. **NDMA:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **NEC:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **SDMA:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **DDMA:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Federal cascade:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Mandate-outcome firewall:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

PYQ DEMAND CARD 3 - 2024 GS-III

Demand: Discuss policies and frameworks for tackling urban flooding.

Status: Conservative cross-topic application of the verified 2024 Q18 demand; primary ownership remains Topic 08.

Model solution: DDMA: The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Local authorities:** Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. **Urban authority:** Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. **Plan hierarchy:** The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. **Fund architecture:** Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. **Federal cascade:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Mandate-outcome firewall:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. The solution therefore answers the routed demand without inventing an official model answer or an objective answer key.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish NDMA, NEC, SDMA, SEC and DDMA by composition and mandate. Answer in about 150 words.

Model thesis: Claim: NDMA. **Named evidence/example:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NEC. **Named evidence/example:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SDMA. **Named evidence/example:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the

owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SEC.

Named evidence/example: The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** DDMA. **Named evidence/example:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

Claim -> named evidence -> analysis -> qualification:

- NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.
- The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.
- The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.
- The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.
- The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.

Qualified conclusion: **Claim:** NDMA. **Named evidence/example:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NEC. **Named evidence/example:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SDMA. **Named evidence/example:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SEC. **Named evidence/example:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** DDMA. **Named evidence/example:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

ORIGINAL MAINS 2 - 10 MARKS

Question: Differentiate NDRF-the-force from disaster-response and mitigation funds. Answer in about 150 words.

Model thesis: **Claim:** NDRF force. **Named evidence/example:** The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NDRF fund. **Named evidence/example:** The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** State response force. **Named evidence/example:** Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Fund architecture. **Named evidence/example:** Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

Claim -> named evidence -> analysis -> qualification:

- The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.
- The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.
- Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.
- Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.

Qualified conclusion: **Claim:** NDRF force. **Named evidence/example:** The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NDRF fund. **Named evidence/example:** The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** State response force. **Named evidence/example:** Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Fund architecture. **Named evidence/example:** Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

ORIGINAL MAINS 3 - 15 MARKS

Question: Explain the significance and limits of the Disaster Management (Amendment) Act, 2025. Answer in about 250 words.

Model thesis: Claim: Current amendment status. **Named evidence/example:** The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NCMC and HLC. **Named evidence/example:** Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Urban authority. **Named evidence/example:** Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** State response force. **Named evidence/example:** Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Plan responsibility. **Named evidence/example:** The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Mandate-outcome firewall. **Named evidence/example:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

Claim -> named evidence -> analysis -> qualification:

- The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.
- Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.
- Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.
- Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.
- The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.
- A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Qualified conclusion: Claim: Current amendment status. **Named evidence/example:** The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NCMC and HLC. **Named evidence/example:** Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee. **Analysis:** This fixes the hazard, risk or protection category, institutional

mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Urban authority. **Named evidence/example:** Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** State response force. **Named evidence/example:** Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Plan responsibility. **Named evidence/example:** The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Mandate-outcome firewall. **Named evidence/example:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

ORIGINAL MAINS 4 - 15 MARKS

Question: Analyse district and local capacity as the weak link in India's disaster-management cascade. Answer in about 250 words.

Model thesis: **Claim:** DDMA. **Named evidence/example:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Local authorities. **Named evidence/example:** Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NIDM. **Named evidence/example:** NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Federal cascade. **Named evidence/example:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Mandate-outcome firewall. **Named evidence/example:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

Claim -> named evidence -> analysis -> qualification:

- The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.

- Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.
- NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.
- The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.
- A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Qualified conclusion: Claim: DDMA. **Named evidence/example:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Local authorities.

Named evidence/example: Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NIDM. **Named evidence/example:** NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Federal cascade. **Named**

evidence/example: The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Mandate-outcome firewall. **Named evidence/example:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication.

Qualification: The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate India's legal, planning and financial architecture for proactive disaster risk reduction. Answer in about 300 words.

Model thesis: Claim: DM Act foundation. **Named evidence/example:** The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NDMA. **Named evidence/example:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NEC. **Named evidence/example:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SDMA. **Named evidence/example:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before

drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SEC. **Named evidence/example:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Plan hierarchy. **Named evidence/example:** The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Fund architecture. **Named evidence/example:** Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Finance coordination. **Named evidence/example:** Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Federal cascade. **Named evidence/example:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

Claim -> named evidence -> analysis -> qualification:

- The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.
- NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.
- The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.
- The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.
- The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.
- The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition.
- Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.
- Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.
- The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.

Qualified conclusion: **Claim:** DM Act foundation. **Named evidence/example:** The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NDMA. **Named evidence/example:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion

retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NEC. **Named evidence/example:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SDMA. **Named evidence/example:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SEC. **Named evidence/example:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Plan hierarchy. **Named evidence/example:** The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Fund architecture. **Named evidence/example:** Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Finance coordination. **Named evidence/example:** Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Federal cascade. **Named evidence/example:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

ORIGINAL MAINS 6 - 20 MARKS

Question: Examine federal coordination in disaster management while separating statutory mandate from operational outcome. Answer in about 300 words.

Model thesis: **Claim:** Current amendment status. **Named evidence/example:** The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NDMA. **Named evidence/example:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NEC. **Named evidence/example:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SDMA. **Named evidence/example:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and

the mandate-to-implementation-to-outcome boundary. **Claim:** SEC. **Named evidence/example:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** DDMA. **Named evidence/example:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Local authorities. **Named evidence/example:** Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Finance coordination. **Named evidence/example:** Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Federal cascade. **Named evidence/example:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Mandate-outcome firewall. **Named evidence/example:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

Claim -> named evidence -> analysis -> qualification:

- The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.
- NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.
- The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.
- The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.
- The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.
- The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.
- Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.
- Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.
- The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.
- A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Qualified conclusion: **Claim:** Current amendment status. **Named evidence/example:** The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is

not the unamended 2005 text. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NDMA. **Named evidence/example:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** NEC. **Named evidence/example:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SDMA. **Named evidence/example:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** SEC. **Named evidence/example:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** DDMA. **Named evidence/example:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Local authorities. **Named evidence/example:** Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Finance coordination. **Named evidence/example:** Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Federal cascade. **Named evidence/example:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary. **Claim:** Mandate-outcome firewall. **Named evidence/example:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence. **Analysis:** This fixes the hazard, risk or protection category, institutional mandate and verified evidence rung before drawing the policy implication. **Qualification:** The conclusion retains the owner's date, institution, legal character and the mandate-to-implementation-to-outcome boundary.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Disaster Management | **Tier:** Advanced | **GS Paper:** GS-III. **Core area:** The 2025 amendment's significance; disaster database, Urban Disaster Management Authority and NCMC/HLC statutory status; federal capacity and district-level implementation analysis. **Grounded in:** *Vision/IAS Value Added Material Disaster Management*, PDF pp. 11-16, 18, 52; 00_Master-Framework.md Sections 3, 8. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor | **WRONG:** = boundary/trap. **Companion:** basic/02_Indian-Legal-and-Institutional-Architecture.md.

1. Advanced proposition

Thesis: ANALYSIS: India's DM institutional architecture is designed as a cascading policy-and-guideline structure (NDMA -> SDMA -> DDMA), but its actual effectiveness depends on capacity at the *weakest* tier - the district - not the apex; an advanced answer must therefore analyse implementation capacity at the DDMA/ULB/PRI level, not merely recite the NDMA-SDMA-DDMA org chart. **Boundary:** WRONG: this topic does not itself analyse any named hazard's institutional response in operational detail (that is topics 05-13); it supplies the legal/institutional depth layer those topics assume.

2. Risk-system analysis

Analytical claim: ANALYSIS: VisionIAS's own critique of the NDMP 2016 - too generic, no time frame, no costed fund requirement, no targets (PDF p.

18. - is symptomatic of a structural feature of the cascade: a national plan that is deliberately generic to accommodate State/district variation risks becoming operationally non-binding at exactly the tier (district) where implementation must occur. This is the institutional analogue of the risk-creation loop developed in topic 01.

3. Legal/institutional depth

- FACT: **Constitutional basis is Concurrent, not a dedicated List entry:**

the DM Act's legal basis draws on Concurrent List Entry 23 ("Social security and social insurance") and Entry 29 ("Prevention of the extension from one State to another of infectious or contagious diseases... affecting men, animals or plants"), used explicitly during the COVID-19 lockdown (PDF p. 52) - meaning "disaster management" as such has no dedicated constitutional entry, and the Act's authority is derivative.

- FACT: ****Crisis-escalation institutions sit outside the ordinary DM cascade:**** the Cabinet Committee on Security (CCS) is invoked where a disaster has security implications, and the National Crisis Management Committee (NCMC), chaired by the Cabinet Secretary, is the nodal body for major disasters having "serious or national ramifications" and coordinates preparedness and response (PDF p. 13) - an advanced answer should note this is a *parallel* coordination channel for scale/severity, not a substitute for the NDMA-SDMA-DDMA structure. CURRENT: The 2025 Amendment Act's amended definition of "disaster" explicitly excludes law-and-order situations, confirming NCMC is engaged for major disasters, not as a security/law-and-order body.

- CURRENT: **Disaster Management (Amendment) Act, 2025 (Act 10 of 2025)**, assented and published in the Gazette on **29 March 2025**, in force **with effect from 9 April 2025** (India Code consolidated DM Act text as on 15 May 2026). The operative new sections are **8A** (NCMC), **8B** (High Level Committee), **41A** (Urban DM Authority), **44A** (State Disaster Response Force), **60A** (hazard-action orders) and **76A** (NDMA regulations); the database duties sit in **ss. 2(da), 6(2)(v) and 18(2)(p)**. WRONG: There is no Section 9B. ANALYSIS: A specific claim about an *implementation action* under the amendment - a particular State's Urban Disaster Management Authority being constituted, or the national disaster database's actual rollout - depends on the relevant State/Central notification and must be verified against the current official text and notification record; the Act's own commencement is settled and should not be presented as uncertain.

- ANALYSIS: ****The amendment's real analytical significance is that it converts**

administrative practice into statutory duty. **NCMC and HLC both existed before 2025; s. 8A/8B change their legal character, not their membership. Conversely ss. 41A and 44A create only permissions. An advanced answer should therefore read the Act as** strengthening accountability at the top of the cascade while leaving the bottom (urban/local) tier discretionary** - precisely the weak link this topic's thesis identifies. MHA's report that Karnataka had constituted a BBMP Urban Disaster Management Authority (11 February 2026) is evidence of *beginning*, not of completed national roll-out.

4. Evidence and Indian applications

- ANALYSIS: **NDRF's force structure as an implementation-capacity indicator:**

VisionIAS records NDRF at "12 Battalions" with 1149 personnel each, drawn from ITBP, BSF, CRPF and CISF (PDF p. 13). CURRENT: MHA reported **16 operational battalions** and a sanctioned strength of **18,581** on 22 July 2025, four battalions having been added to the original twelve. An advanced answer uses the *trajectory* analytically: a one-third increase in battalions is real capacity growth, but it is still a centrally raised, centrally deployed force covering 28 disaster-prone States/UTs, which is precisely why s. 44A's enabling power for **State** Disaster Response Forces matters - the constraint is not NDRF's size alone but the absence of an equally professionalised State tier beneath it.

- ANALYSIS: **NPDRR's composition signals the Centre's convening role, not binding State compliance power:** it is chaired by the Union Home Minister with State ministers and select mayors/MPs as members and "advises on coordination" (PDF p. 12) - an advisory, not directive, body, a distinction relevant to any federal-coordination-constraint answer.

5. Technology/data and warning limits

- ANALYSIS: A **national disaster database** - defined at **s. 2(da)** and assigned to NDMA to *create* at **s. 6(2)(v)**, with SDMA's required to maintain State databases feeding into it at **s. 18(2)(p)** - would, if fully rolled out, address a documented gap: the NDMP 2016's absence of costed, time-bound, tracked targets (Section 2) is partly a *data* problem, since without standardised loss/damage/expenditure data no plan can set measurable targets, and no Sendai Target C/D reporting is possible. ANALYSIS: Note the statutory verb is "**create**," not "maintain and publish" - an advanced answer can fairly observe that the Act does not itself mandate public disclosure or a reporting periodicity, so transparency remains a design choice rather than a statutory guarantee. CURRENT: The Act is in force from 9 April 2025 and MHA restated the database mandate on 11 February 2026; the database's actual operational rollout and scope still require separate verification, and it should not be confused with NDMA's much older 2012 *National Disaster Management Information and Communication System* guideline.

6. Vulnerability, equity and community lens

- ANALYSIS: The DDMA's Co-Chairperson provision (elected local-authority representative alongside the District Collector, PDF p. 14) is the institutional entry point for community/local accountability into an otherwise administratively-led structure - an advanced answer can use this to argue the architecture *permits* but does not *guarantee* local voice, since the Collector remains the head.

7. Prevention/mitigation/response/recovery trade-offs

- ANALYSIS: **NDMA's guideline-issuing role versus binding-enforcement power is a structural trade-off.** NDMA "lays down policies, plans and guidelines" and its guidelines "assist" Ministries/States in formulating their own plans (PDF p. 13) - an advisory-plus-approval role, not direct implementation power, which rests with the State/ district tier. This explains why the same NDMA guideline (e.g. on earthquakes, floods, cyclones - topics 05-09) can produce uneven ground outcomes across States.

8. Governance and implementation gaps

- WRONG: **The "three-tier structure exists, therefore coordination is solved" fallacy.** The existence of NDMA-SDMA-DDMA does not itself guarantee vertical coordination; VisionIAS's own critique of the NDMP 2016's generic, untimed, unfunded activity list (Section 2) shows a structure can exist on paper while lacking the specificity needed for accountable implementation.

- ANALYSIS: **Fiscal versus institutional capacity mismatch at the district level** is a recurring, if source-underdeveloped, gap: the DDMA is assigned the operational nodal role (Section 3), but VisionIAS's finance section (Section 9 below) shows funding flows are structured around State (SDRF) and Central (NDRF) funds, with no district-level dedicated corpus described - an advanced answer can flag this fiscal-institutional

mismatch as a genuine implementation gap.

9. Financing/monitoring/accountability

- FACT: The 2019 Standing Committee on Finance (Chair: Dr. M. Veerappa

Moily) recommended a separate **Disaster Mitigation Fund**, earmarking 10% of centrally sponsored scheme allocations for permanent restoration, and a 15% annual SDRF corpus increase for 2020-25 (PDF p. 15). CURRENT: The core recommendation was subsequently acted on: the **Fifteenth Finance Commission** (2021-26) created a National and State Disaster Risk Management Fund each split **80:20 between response and mitigation**, and the **Sixteenth Finance Commission** (report submitted 17 November 2025, award period 2026-31) retained the 80:20 State split while introducing a **Disaster Risk Index** weighting. Cite those awards, not the 2019 report, for current fund levels - full figures in topic 16.

- CURRENT: Any current claim about NDRF-the-fund's corpus, NCCD revenue, or

SDRF allocation rates must be sourced to a dated MHA/Finance Commission document, not VisionIAS's 2015-16/2018-19 NCCD revenue figures (PDF p. 15), which are explicitly historical.

10. CURRENT: Current official anchor and freshness protocol

- CURRENT: **Disaster Management (Amendment) Act, 2025 (Act 10 of 2025)**,

assented and gazetted **29 March 2025**, in force **with effect from 9 April 2025** - the correct dated anchor for any claim about India's current statutory DM architecture; **ss. 8A, 8B, 41A, 44A, 60A and 76A** are operative law, and there is **no s. 9B**. Any claim about a *specific implementation action* under these sections (e.g. a named State's Urban DM Authority, disaster-database rollout) still requires the relevant notification to be verified, but the Act's own commencement is settled and must not be described as uncertain or provision-wise pending.

- WRONG: Do not describe the DM Act, 2005 in its original, unamended form as the complete current legal position.

- WRONG: Do not describe the DM Act's district tier as fiscally unprovided

for: **s. 48** expressly contemplates District Disaster Response and Mitigation Funds. The gap is that the Sixteenth Finance Commission reported (1 February 2026) Union- and State-level funds constituted with **district-level funds the exception** - an implementation gap, not a drafting gap, and a sharper formulation of Section 8's critique.

12. Mains-ready framework

Central thesis: India's DM institutional architecture cascades policy and guidance from the NDMA through SDMA to DDMA, but its real-world effectiveness is bounded by capacity and accountability at the district/local tier - the same generic, unfunded, untimed weakness VisionIAS identifies in the NDMP 2016 itself - and the 2025 Amendment Act's success will depend on whether its new provisions (disaster database, urban authority) are implemented with the specificity the 2016 Plan lacked.

1. Name the specific institutional tier and its precise mandate

(Section 2 of the basic file) relevant to the question.

2. Diagnose the weak link in the cascade (Section 2 above) - usually

district/local capacity - rather than describing the structure generically.

3. Cite the 2025 Amendment Act as the current legal anchor, noting it

was gazetted 29 March 2025 and is in force from 9 April 2025 (ss. 8A, 8B, 41A, 44A operative), with the explicit caveat that ss. 41A and 44A are *enabling* - a *named implementation action* under them (e.g. a specific State's Urban DM Authority) needs its own notification verified (Section 10).

4. Note the parallel security-escalation channel (CCS/NCMC, Section

3. where relevant, distinguishing it from the ordinary DM cascade.

5. Identify the financing gap (Section 9) underlying implementation

capacity, using the 2019 Standing Committee's recommendations as document-period evidence of a known, still-relevant problem.

6. Recommend measurable, time-bound, funded targets at each tier -

directly answering the accountability gap identified in Section 2.

7. ****Close by relating institutional reform back to risk-informed development**** (topic 01's feedback loop), not ending on organisational description alone.

13. Study links

- FACT: Foundation companion:
basic/02_Indian-Legal-and-Institutional-Architecture.md.
- FACT: 00_Master-Framework.md Sections 3 and 8 - the operating architecture diagram and recurring analytical gaps reused across this folder.
- ANALYSIS: **Downstream topics in this folder:** Topic 14 develops the Urban Disaster Management Authority provision in full; topic 16 develops disaster finance and risk transfer; topic 18 develops NPDRR and international-cooperation governance.

CONSOLIDATED REGISTER NOTES

Indian Legal and Institutional Architecture: CURRENT STATUTE AND THREE-TIER AUTHORITY MAP

1. **DM Act foundation:** The Disaster Management Act, 2005 establishes national, state and district authorities and assigns prevention, mitigation, preparedness, response and recovery functions.
2. **Current amendment status:** The Disaster Management (Amendment) Act, 2025 received assent on 29 March 2025 and came into force on 9 April 2025; the current position is not the unamended 2005 text.
3. **NDMA:** NDMA is the Prime Minister-chaired apex authority that lays down policies, plans and guidelines and exercises statutory functions under the Act.
4. **NEC:** The National Executive Committee is chaired by the Union Home Secretary and coordinates, monitors and implements national disaster-management policy and plans.
5. **SDMA:** The State Disaster Management Authority is chaired by the Chief Minister and lays down state policy and approves the State Plan.
6. **SEC:** The State Executive Committee is chaired by the Chief Secretary and coordinates and monitors state-level implementation.
7. **DDMA:** The District Disaster Management Authority is chaired by the District Collector or Magistrate, with the elected local-authority representative as Co-Chairperson, and prepares the District Plan.
8. **Local authorities:** Panchayats, municipalities and other local authorities perform assigned preparedness, mitigation, response and recovery functions closest to the affected population.
9. **NDRF force:** The National Disaster Response Force is a specialist response force under the Act; official NDRF material states that it has expanded to 16 battalions.
10. **NDRF fund:** The National Disaster Response Fund under section 46 finances eligible response and relief needs and is institutionally distinct from the identically abbreviated response force.
11. **NIDM:** NIDM is the statutory nodal institute for human-resource development, capacity building, training, research, documentation and policy advocacy.
12. **NCMC and HLC:** Sections 8A and 8B inserted in 2025 give statutory status to the National Crisis Management Committee and High Level Committee.
13. **Urban authority:** Section 41A enables a State Government to constitute an Urban Disaster Management Authority by notification; the statutory permission does not prove constitution in every eligible city.
14. **State response force:** Section 44A enables a State Government to constitute a specialist State Disaster Response Force; this force must not be confused with the SDRF fund.
15. **Plan responsibility:** The amended architecture assigns National and State Plan preparation to NDMA and SDMA, while executive committees retain implementation and monitoring roles.

16. **Plan hierarchy:** The revised National Disaster Management Plan, 2019 is the latest published national plan and must be distinguished from the first 2016 edition.
17. **Fund architecture:** Sections 46, 47 and 48 contemplate national, state and district response and mitigation funds; statutory provision does not establish that every district fund is operational.
18. **Finance coordination:** Finance Commission awards and Central-State assistance shape disaster financing, but allocation, release, expenditure and verified outcome are separate evidence rungs.
19. **Federal cascade:** The NDMA-SDMA-DDMA-local cascade distributes policy, coordination and implementation across federal levels; an apex guideline does not itself prove local capacity.
20. **Mandate-outcome firewall:** A statute, authority, plan, force, fund, notification or database mandate proves its legal or institutional rung only; operational readiness and disaster outcomes require separate evidence.

Indian Legal and Institutional Architecture: FORCE, FUND, PLAN AND ENABLING-POWER FIREWALLS

- Do not present the original 2005 Act as the complete current law.
- Do not confuse NDMA policy functions with NEC coordination functions.
- Do not merge NDRF-the-force with NDRF-the-fund.
- Do not merge State Disaster Response Force with State Disaster Response Fund.
- Do not treat an enabling provision as proof of universal implementation.
- Do not call NIDM an operational response force.
- Do not describe DDMA as merely advisory.
- Do not infer district-fund constitution from section 48 alone.
- Do not treat a national plan as proof of district capability.
- Do not equate allocation or deployment with a verified outcome.

Indian Legal and Institutional Architecture: FEDERAL COORDINATION AND CAPACITY ANSWER SPINE

CITE THE 2005 ACT AS AMENDED IN 2025

- > MAP NDMA NEC SDMA SEC DDMA AND LOCAL AUTHORITIES
- > DISTINGUISH NDRF FORCE FUND AND STATE FORCE FUND
- > LOCATE NIDM AS CAPACITY BUILDING
- > STATE PLAN PREPARATION IMPLEMENTATION AND REVIEW ROLES
- > TEST DISTRICT FINANCE STAFF AND LOCAL CAPACITY
- > CONCLUDE WITHOUT TURNING MANDATE INTO OUTCOME

Indian Legal and Institutional Architecture: CURRENT AMENDMENT AND IMPLEMENTATION-EVIDENCE BOUNDARY

India Code and MHA parliamentary material are the current legal-status anchors; NIDM and NDRF official pages verify their institutional roles. Blocked PDFs are recorded honestly, and no enabling provision is treated as completed rollout.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM
