E SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

EXTRA | OPTIONAL ADVANCED ENRICHMENT | FARMER IDENTITY AND CULTIVATION | CROP CONDITION AND LIKELY OUTPUT | PREVAILING PRICES AND BUYER RELIABILITY. | MORE BUYERS AND SELLERS MAY IMPROVE MATCHING AND PRICE | MORE TRANSACTIONS CREATE DATA THAT CAN IMPROVE SERVICES. | BUT DATA, SWITCHING COSTS AND NETWORK EFFECTS MAY ENTRENCH | A DOMINANT PLATFORM MAY BECOME A NEW INTERMEDIARY CAPABLE

OPTIONAL SOURCE DEPTH
- farmer identity and cultivation;
- crop condition and likely output;
- prevailing prices and buyer reliability.
- More buyers and sellers may improve matching and price discovery.

ADVANCED DEBATE
- More transactions create data that can improve services.
- But data, switching costs and network effects may entrench a platform.
- A dominant platform may become a new intermediary capable of setting terms, ranking
- expand farmer capability through better information, access and coordination; or

LEGACY / NUANCE
- reduce autonomy through opaque recommendations, locked ecosystems and dependence on one
- purchase or service fee
- learning and switching cost
- larger or commercially oriented farms;

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
