MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

OPTIONAL MODEL / MEASUREMENT DEPTH

- CAUTION: The social cost of carbon values marginal climate damage but depends on discounting and
- CAUTION: Green taxonomies reduce information asymmetry while rigid labels may exclude credible
- CAUTION: Climate stress testing explores scenario exposure rather than predicting one exact
- CAUTION: Border carbon measures connect domestic climate ambition with trade competitiveness and

VINTAGE, BASKET OR LEGAL LIMIT

- CAUTION: Circular business models include product-as-service, industrial symbiosis, repair
- CAUTION: Adaptation finance has public-good characteristics and weaker direct revenue streams
- Ministry of Environment, Forest and Climate Change: coordinates climate policy and
- Ministry of New and Renewable Energy and power-sector institutions: support clean

COMPARATIVE POLICY NUANCE

- RBI and SEBI: shape climate-risk disclosure, green debt and financial-sector
- Urban local bodies and pollution-control systems: implement waste, recycling and
- CAUTION: A carbon price can reduce emissions efficiently but raise household energy costs unless
- CAUTION: A green bond finances defined environmental uses; a sustainability bond can combine
