E

EXTRA

SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT | IF SUPPLY IS INELASTIC, PART OF SUPPORT MAY RAISE | IF DEMAND EXPANDS STRONGLY, FISCAL AND ENVIRONMENTAL COST RISES | IF LAND IS RENTED, EXPECTED SUBSIDY BENEFITS MAY BE | IF OUTPUT SUPPLY RISES, CONSUMERS MAY RECEIVE PART OF | RATIONING, QUEUES OR POOR QUALITY CAN OFFSET THE NOMINAL | COUPLING IS NOT AUTOMATICALLY BAD | TEMPORARY ADOPTION SUPPORT MAY INTENTIONALLY CHANGE

OPTIONAL MODEL / MEASUREMENT DEPTH
- if supply is inelastic, part of support may raise supplier rent;
- if demand expands strongly, fiscal and environmental cost rises;
- if land is rented, expected subsidy benefits may be capitalised into rent;
- if output supply rises, consumers may receive part of the benefit through lower prices;

VINTAGE, BASKET OR LEGAL LIMIT
- rationing, queues or poor quality can offset the nominal price benefit.
- Coupling is not automatically bad: temporary adoption support may intentionally change
- Decoupling is not automatically equitable: land-based historical entitlements can
- The correct question is whether the induced behaviour serves a legitimate objective and

COMPARATIVE POLICY NUANCE
- farmers receiving the benefit;
- utilities, banks, insurers and procurement agencies;
- regions/crops organised around the support;
- political actors promising continuity.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
