OPTIONAL SOURCE DEPTH
- CAUTION: India's informal waste economy (waste-pickers, kabadiwalas/scrap dealers, informal
- CAUTION: Policy tension: formal EPR systems risk bypassing or displacing this informal
- CAUTION: This is a recurring, genuinely two-sided policy dilemma: purely informal processing
- India's single-use-plastic restrictions target specifically identified items (based on

ADVANCED DEBATE
- CAUTION: Enforcement reality: effective enforcement of item-specific bans requires
- CAUTION: National aggregate figures for plastic-waste generation, collection rate and recycling
- CAUTION: E-waste generation growth estimates are typically modelled from electronics-sales data
- CPCB's EPR portals allow producers to meet obligations by acquiring EPR certificates

LEGACY / NUANCE
- India's informal waste sector has historically handled a substantial share of actual
- India's single-use-plastic restrictions target specifically identified items rather
- National plastic/e-waste generation and recycling-rate figures are largely modelled/
- NOT: EPR compliance requires a producer's own waste to be physically recycled by a specific
