

ASCII MASTER FLOW – PANEL 1/12: India climate-policy timeline

2008 NAPCC -> domestic mission-based framework

PARIS NDC -> internationally communicated contribution

COP26 PANCHAMRIT -> five-part political announcement

2022 UPDATED NDC -> strengthened communicated 2030 terms

2022 LT-LEDS -> long-horizon low-carbon development strategy

MUST REMEMBER: India's climate policy combines NAPCC missions, NDCs, Panchamrit...

ASCII MASTER FLOW – PANEL 2/12: Original mission map

MITIGATION-HEAVY -> solar and enhanced energy efficiency

ADAPTATION-HEAVY -> water, Himalaya and agriculture

CROSS-CUTTING -> habitat, Green India and strategic knowledge

CO-BENEFITS -> development, resilience and environmental quality

COUNT RULE -> eight original missions in the 2008 architecture

ASCII MASTER FLOW – PANEL 3/12: Centre-state implementation rail

NAPCC MISSION -> national direction

MINISTRY OR AGENCY -> programme and guidance

SAPCC -> state-context translation

BUDGET AND EXECUTION -> implementation evidence

MONITORING AND OUTCOME -> separate verification stage

ASCII MASTER FLOW – PANEL 4/12: Panchamrit five-part board

500 GW -> non-fossil capacity by 2030

50 PERCENT -> energy requirements from renewables by 2030

ONE BILLION TONNES -> projected carbon-emissions reduction by 2030

45 PERCENT -> emissions-intensity reduction from 2005 by 2030

2070 -> announced net-zero destination

ASCII MASTER FLOW – PANEL 5/12: Target-type classifier

CAPACITY -> installed power quantity

SHARE -> renewable fraction of energy requirements

PROJECTED REDUCTION -> counterfactual-dependent emissions quantity

INTENSITY -> emissions per unit of GDP

NET ZERO -> economy-wide net balance with defined boundary

ASCII MASTER FLOW – PANEL 6/12: Pledge-to-NDC firewall

COP26 SPEECH -> announced Panchamrit

OFFICIAL NDC DOCUMENT -> communicated international contribution

2022 QUANTIFIED TERMS -> intensity and non-fossil capacity

FOREST SINK -> continuing NDC objective, not Panchamrit item six

RULE -> no automatic one-to-one conversion of every phrase

ASCII MASTER FLOW – PANEL 7/12: LT-LEDS pathway map

ELECTRICITY -> lower-carbon supply and system transition
TRANSPORT AND CITIES -> integrated mobility and urban efficiency
INDUSTRY -> lower-emission growth and technology pathways
REMOVALS AND LAND -> carbon dioxide removal and vegetative cover
FINANCE AND ECONOMY -> enabling transition conditions

ASCII MASTER FLOW – PANEL 8/12: Net-zero status ladder

ANNOUNCED YEAR -> political long-term destination

LT-LEDS -> strategic pathways

SECTOR POLICY -> programmes and regulation

MEASURED TRAJECTORY -> source-dated emissions and removals

NET RESULT -> defined economy-wide balance, not one milestone

ASCII MASTER FLOW – PANEL 9/12: Climate-accounting matrix

ABSOLUTE EMISSIONS -> total flow

EMISSIONS INTENSITY -> flow per unit of GDP

GROSS REMOVALS -> sink uptake before netting

NET EMISSIONS -> emissions minus removals within boundary

BASELINE AND YEAR -> mandatory for comparison

ASCII MASTER FLOW – PANEL 10/12: Energy-denominator firewall

INSTALLED CAPACITY -> rated power-system capacity

ELECTRICITY GENERATION -> energy actually produced

NON-FOSSIL -> source classification broader than renewables

TOTAL ENERGY REQUIREMENTS -> wider denominator than electricity

NO RELABELLING -> each metric needs its own source and date

CLOSE DISTINCTION: Panchamrit political announcement is not identical to the updated NDC...

ASCII MASTER FLOW – PANEL 11/12: Reporting-instrument matrix

NDC -> forward nationally determined contribution

LT-LEDS -> long-term strategic pathway

BUR -> backward-looking inventory and progress reporting

TARGET -> intended result

ACHIEVEMENT -> verified result on the same metric

EVIDENCE LIMIT: MECHANISM / STATUS / CAUSATION: State source, announcement or submission...

ASCTII MASTER FLOW – PANEL 12/12: India climate answer spine

MAP -> NAPCC, SAPCC, Panchamrit, NDC and LT-LEDS

CLASSIFY -> mitigation, adaptation and target type

DISTINGUISH -> pledge, communication, strategy and report

MEASURE -> baseline, denominator, gross, net and as-on date

EVALUATE -> equity, co-benefits, interdependency and delivery
